Budget Message

BY

GOVERNOR EDMUND G. BROWN

To the Senate and Assembly of the Legislature of California:

Five years ago I submitted my first budget message, describing the budget as a ledger of our character, our choices and our courage.

Each year since I have been impressed at what a dramatic test of all three the budget process has become in California.

This will be my sixth budget. Like its five predecessors it is soundly in balance. Like the last four, it requires no new taxes.

Once again it extends state services to more than 600,000 new Californians. Once again it adds modest new programs to meet the State's pressing needs, $35 million in new subventions to local school districts, $12 million, or less than one-half of 1 percent of the budget, for increased state programs.

Once again the budget gives full recognition to needs, but employs frugal means.

The expenditure program of $3.26 billion from current sources represents an increase of $129 million or 4 percent over the revised operating budget of the current year. In addition, $398 million of bond financing is proposed for capital construction, of which $225 million is planned for facilities of the self-amortizing state water plan and $173 million for state institutions, principally of higher education. These bond expenditures are not included in budget totals, since they are accounted for in the operating budget each year as the bonds are retired. To indicate the economic impact of this budget, however, the operating budget and bond program should be, and traditionally have been combined. The total is $3.66 billion.

As I also said five years ago, the budget is a stern test of our principles. To do less than meet honest needs when it is within our capacity to do so is to turn our back on those principles.

I am proud of the way in which we have met and mastered the test in past budgets, and I am confident that you will do the same with this budget.

As in the past, we will act in the true California tradition—boldly and decisively, with courage and with compassion.

Five years ago we faced up to the hard fact that California was pursuing a bankrupt fiscal policy. Our expenditures were exceeding income, and our surpluses were gone. A deficit was due within six months. We substituted fiscal forthrightness for fiscal evasion, with a true economy drive and a bold revenue program. We not only balanced the budget, but we launched a new era of responsible liberalism in California government.

This budget again matches dollars against needs, sparely, but sufficiently. Within its pages, each column of figures testifies that together—the Executive and the Legislature, the Democrats and the Republicans—we are successfully meeting challenges greater than any state has ever faced.

We are providing the classrooms, the highways, the beaches and parks and other vital services for more than 600,000 new citizens a year. We are ending the unchecked waste of our precious water resources. We have launched pioneering programs extending help to the victims of discrimination and disadvantage. We are working on the frontiers of science and technology, exploring the potential of nuclear power.

We have demonstrated that we can meet the test of the greatest mass migration in the history of man—a challenge for which there was no precedent for decision, no historic guidelines, no tested blueprint for leadership.

California continues to surmount the challenges that always face a pioneer and leader.

But there is business ahead.

We have learned to measure our population in precise terms. We know we will have more than 18 million citizens by the beginning of the next fiscal year and that we expect this number to grow to nearly 28 million by 1980.

But we have learned only imperfectly to measure the effects of our tremendous growth—the impact on our cities, on housing patterns, on our transportation facilities, on our farmlands and factories, and, most of all, on our educational institutions.

Our rapid growth is creating new and complex problems. It also is exposing older, festering problems that have been attacked only piecemeal or shunted aside entirely by the rush of population.

We have a long way to go in coping with the unsolved problems before us. Broadly speaking, our paramount task is to extend the benefits of a prosperous California to the hundreds of thousands still denied full participation in our abundance.

I will present to you later this month an economic report in which I will expand on this theme, but this budget already marks

a start within the proper and practical limits of state responsibility toward meeting some of today's most urgent social and economic challenges.

The foundation must be laid down now. To postpone action is to invite disaster and to break faith with the future.

Perhaps the most critical question to be asked about the budget is why it represents an increase of 6 per cent over the 1963-64 total budget when the population increase is only 3.3 per cent.

The problem is simply that the population group under age 25 is growing far faster than the rest of the population. It is a kind of human tidal wave sweeping through all our institutions, but especially our most expensive institutions—correctional and educational.

The statistics pose a sobering paradox. Our under 25 age group population now represents 45 per cent of the state's entire population. Our young people contribute only a tiny fraction to state revenues, yet they rightly seek more and more education of a more and more expensive variety.

Yet their need is our need. It must not be denied, and it will not be denied.

I think you will find the following statistics noteworthy:

Of this year's total budget, $1.54 billion is proposed in *direct* expenditures for young people—in education, in the Youth Authority, in the Youth Conservation Program, aid to families with dependent children, the Crippled Children's Program and other categories.

The increases over the current year for these services are almost entirely due to population growth.

The educational package is up 10.6 per cent; Youth Authority up 9 per cent; aid to families with dependent children is up 19.7 per cent; the crippled children program up 7.4 per cent; and so on.

An additional $160 million, including $123 million for the University of California and the State college system, is proposed in capital outlay projects, for which the growth of the under 25 age group will be primarily responsible.

If we add these two components—direct services to youth and capital outlay—we have $1.7 billion, almost one-half of the entire proposed expenditure program.

Despite these mounting pressures, I am anticipating a narrow surplus of $8.7 million at the end of the 1964-65 fiscal year.

To preserve it, I have deleted from this budget more than $22 million in departmental proposals to establish new programs. I also have eliminated more than $60 million in additional requests for capital outlay projects and personnel to reduce program workloads.

Desirable as these proposals are, they must be deferred at this time. They simply do not rank high enough on a priority basis.

I invite further economies by the Legislature, but only those economies that will not impair our present level of services.

Our tax program of 1959 put California back on a sound fiscal footing. Since then, we have concentrated not on new taxes, but on tax reform—on closing loopholes, in removing inequities and in dealing with isolated islands of wealth that properly should bear a more equitable share of the cost of government services.

This budget embodies additional reforms, two of which affect the State's revenue code. Both are important, although their effect is relatively minor.

More fundamental and far reaching are a vitally needed reform of local school support taxation and a reform involving tideland oil revenues. Both have heavy implications for education in the years to come.

First, local school support:

This budget provides for an additional $51 million in local school assistance due to population increases and through the traditional attendance formula.

It provides an additional $25 million in support as the result of action taken by the Legislature in 1963.

I propose to add $35 million more in local assistance.

But I firmly believe that this additional assistance should be appropriated only if accompanied by enactment of meaningful reform in school support at the local level.

We estimate that a countywide equalization would produce an additional $27.5 million and benefit more than 80 percent of California's school children.

If you adopt my proposals, you will have lifted in just two years the level of school support by a total of $87.5 million annually. This is exclusive of growth increases of approximately $50 million each year.

Enactment of this full program would mean a newly revitalized program in most districts, and an end to desperation in many.

While this program can be financed fully from existing funds, it will require one other special action from you—approval again this year of budget language which reserves tidelands money which is surplus to the needs of the state water plan. This means that all tidelands funds in excess of the $11 million assigned to the California Water Fund will be available for educational purposes. Without such action, no new state aid to education could be offered.

I assure you that the $11 million assigned to the water fund fully meets the long-term financing requirements of the state

water plan. We have already invested $236 million of tidelands oil revenue in water development, money which will not be returned to the General Fund until the next century. It is only equitable that some of this magnificent resource be used now to benefit this generation as well. There is no greater immediate need than in the field of education.

In order to enable us to continue to finance the school support program at the proposed level in future years, I am also placing another issue before you for special consideration.

I propose that we revise the 1957 legislation which established the present legal relationship and division of revenues between Long Beach as the trustee of the oil-rich tidelands in and near its harbor and the state as the owner of the oil.

It is now clear that at least $1.5 billion in profit should be realized in the next 35 years from a combination of the field already producing and that still untapped. Only a fraction of that amount could be spent wisely and well by Long Beach acting within the limits of its trusteeship to the State to make local expenditures only for purposes of statewide benefit.

I offer no specific figures for a settlement, but I will offer legislation based on four principles:

1. Before any profits are distributed, all costs of subsidence damage or of subsidence control measures should be deducted.

2. Before the Legislature determines the Long Beach share of the profits, whether on a dollar or percentage basis, the city should be asked to justify whatever amount it seeks in terms of specific and planned projects of statewide value and interest.

3. Since the Long Beach share would thus become a relatively small one, the legislation should vest primary control over the tidelands oil operations involved in the State Lands Commission rather than in city officials.

4. Insofar as possible such changes as these policies would require should be achieved through legislation dealing with the untapped wealth of the new and much larger East Wilmington area. Where necessary in order to achieve a satisfactory solution, however, changes could be made affecting the current operations in the harbor area.

Enactment of such legislation would not only insure ability to meet the proposed $35 million in new annual school support in future years (only $20 million of which is otherwise expected from present tidelands operations), but it would also provide substantial funds to relieve bonding for capital outlay needs in higher education.

Our high level support for education over the years has proven to be our finest investment. Its dividends have been incalculable. Let us continue in that California tradition by making this decision now.

Meanwhile, we must continue our traditional bond issue financing, both for elementary and secondary schools and for our institutions of higher education, including the junior colleges.

For our 14-year old bond program to provide local school construction aid, I propose we place a $260 million issue on the June ballot.

For our nine-year old bond program for capital construction, largely at the University of California, the state college system and our hard-pressed local junior colleges, I propose we place a $350 million bond issue on the November ballot. This issue will also finance much-needed mental health and correctional facilities.

A number of other major items in the budget involve legislation which also must come before you in the special session I am calling concurrent with the budget session.

PERSONAL INCOME TAX

To remove an inequity that works against lower bracket income earners, I am proposing a reform in our state personal income tax procedures.

Our present laws unfairly penalize the family man who earns less than $10,000 a year and who claims the standard deduction instead of itemizing on his return. The more dependents he has, the greater the inequity.

I propose to eliminate the present percentage method of computing the standard deduction and substitute instead a flat allowance—$500 for a single taxpayer, $1,000 for a married person or head of household.

The reform will eliminate the income tax liability entirely for an estimated 120,000 of the lowest income earners. It will provide modest tax relief for an additional 990,000. In operation, it would reduce General Fund revenues by $2.75 million annually.

INSURANCE TAX

I also propose that we take action to close a legal loophole that results in the annual loss of $2.5 million in insurance company taxes.

Present law allows an insurance company to deduct all real estate taxes on its home or principal office in California from the gross premiums tax it pays the State.

In many cases a company pays real estate taxes on a large commercial building, only part of which is used for the firm's insurance business. The remainder is rented. The property tax deduction, however, is taken for the entire building.

I recommend that we grant no further deductions and that we limit the principal office deductions already in effect to real estate taxes paid only on property occupied for the transaction of the company's insurance business.

Under present law, the State, in effect, is subsidizing some commercial leasing operations while taxing others. Reform will mean an increase in General Fund revenues of approximately $2.5 million a year.

HOUSING

I propose an appropriation of $81,000 to establish a State Office of Housing.

This is a minimum investment to help meet one of the great unmet needs of our time—adequate housing for tens of thousands of our citizens, particularly for low income families, the aged and the farm worker.

OFFICE OF CALIFORNIA DEVELOPMENT

I am proposing $593,000 for creation of a new Office of California Development, only $275,000 of which is not now expended for comparable purposes in other agencies.

This office will give California a more effective, better coordinated program in all phases of economic development—industrial expansion, trade promotion and tourism.

It is urgent that we take concerted action now in the face of anticipated reductions in the level of Federal defense spending. We must produce new jobs for our expanding population or bear the burden of mounting and expensive unemployment.

EXECUTIVE AND JUDICIAL SALARIES

I am recommending salary increases totaling $213,000 for our top State executives and $1.9 million for judges throughout the State court system.

Many department heads now earn only a few dollars a month more than their civil service subordinates.

Further, if we are to attract men of outstanding ability to positions of leadership in California government, our salaries

must be competitive with those paid elsewhere. We should not make financial sacrifice a requirement of service, whether on the bench or in the executive branch.

I ask you also to consider these noteworthy expenditure programs:

HIGHER EDUCATION

This budget proposes State expenditures of $172 million for the University of California and $113.7 million for the State college system to meet the greatest enrollment increase in nearly two decades.

I also propose capital outlay expenditures of $63.7 million for the university system and $59.3 million for State colleges.

We must not jeopardize our historic national pre-eminence in education. Our support must keep pace with heavier enrollment loads.

HEALTH AND WELFARE

I am proposing funds:

—For a substantial expansion of our promising Short-Doyle program to develop effective community-based mental health services for our citizens.

—For an increase of nearly 20 percent in the appropriation for increased counseling services to the mentally and physically handicapped, the blind and the deaf.

—To establish two respiratory rehabilitation centers—one in northern California, the other in the southern part of the state.

—For the inclusion of epilepsy as a treatable disease under the Crippled Children Services program.

Short-Doyle—Twenty cities and counties now operate mental health services under the Short-Doyle program, and a number of them are proposing significant expansions next year. Some 12 to 15 additional counties are expected to initiate local mental health programs in 1964-65. As a result of amendments to the act adopted by the 1963 Legislature, the state's financial share for new or expanded services under the program increases from 50 to 75 percent.

I am therefore recommending an additional $6.4 million in state support.

Rehabilitation—Experience has demonstrated dramatically that the handicapped and the retarded can, with help and counseling guidance, be rehabilitated for gainful employment and more useful lives.

I am proposing an augmentation of $520,000—to be matched by Federal funds—for expanded counseling services in the Department of Rehabilitation. In addition, I am proposing an increase of $527,000 in case service funds for the purchase of rehabilitation aids and services.

Respiratory centers—While disabling respiratory diseases are becoming an increasingly serious health problem, facilities for specialized care of respiratory patients are being reduced.

To expand our attack on this serious problem, I am proposing an appropriation of $200,000.

Epilepsy—Pilot studies in Contra Costa and San Bernardino Counties have demonstrated that a high percentage of children afflicted with epilepsy can be helped by proper diagnosis and treatment.

I am proposing $418,000 to extend the program to other counties in the State.

CORRECTIONS

I am proposing expenditures of $1.3 million to begin a pioneering and systematic attack on the problem of the violent offender in California. Of this total, $900,000 is for Department of Corrections programs and the remainder for the Youth Authority.

We are beginning to make real progress in solving the costly and explosive riddle of the violent offender in our midst. The funds I propose will make possible a concerted effort to identify and treat the potentially violent inmate in correctional institutions, increase his supervision on parole and conduct further research into the problem.

I am also proposing more than $31 million for Department of Corrections and Youth Authority capital outlay programs designed to relieve dangerous overcrowding in our correctional institutions.

These expenditures are a partial reflection of the staggering cost of crime in our society.

They do not begin to measure a host of other costs and consequences—in human tragedy, in lost production, in broken homes and increased welfare costs.

The violent offenders program I have outlined is aimed directly at better community protection, and at reducing criminal recidivism and its burdensome price tag. Crime must be reduced in California.

HIGHWAY SAFETY

I am proposing additional Highway Patrol expenditures of $1.3 million in an effort to reduce California's frightening traffic death toll.

The amount provides for 85 additional uniformed patrolmen and their equipment and an expanded motor carrier safety program.

I have attempted to spotlight some of the new programs proposed in this budget. I remind you that together they constitute a small fraction of 1 percent of its total. They also serve as an indication of the dramatically mounting pressures on government.

The Executive branch and the Legislature both have recognized that we are responding to these pressures with a tax structure, at all levels of government, that is badly in need of repair, a tax structure that is, in some respects, 30 years behind its time.

I am hopeful that as a result of your interim tax studies, we will be in a position at the next session of the Legislature to assess our problems realistically, to weigh our unmet needs in California against an anachronistic tax structure.

It is difficult to know whether or not new revenues will be required, and I would not attempt to prejudge your studies by premature recommendations. But should they be needed, we must be prepared to take forthright action.

Together, we have managed remarkably well to date.

California ranks 27th among the 50 states in state tax burden per $100 of personal income and 31st in net debt. Our tax burden in relation to personal income in the last 12 years has risen just 6.6 percent. The average for all states in the same period was 26.7 percent. For nine other leading industrial states it was 36.1 percent. And for New York, the closest comparable state to California, it was 50.9 percent. And again this year, as many other states seek new or increased taxes, California need not do so.

This is a truly remarkable record. It is particularly noteworthy in the light of these comparisons with the nine other leading industrial states:

California's public school enrollment exceeds the next highest state, New York, by 28.0 percent.

Our enrollments in publicly supported institutions of higher learning exceed the next highest state, Michigan, by three to one.

The number of autos using our streets and highways exceeds the next highest state, New York, by 51.8 percent. The number of trucks and buses tops the next highest state, Pennsylvania, by 120.8 percent.

And we have three times more Old Age Security recipients than the next highest state.

The fact is that government in California is producing a higher level of service at a lower relative cost than states with far fewer pressures.

The new programs I propose are modest, but they are necessary. I ask you to weigh their cost carefully, and at the same time weigh the cost of failure to act.

I ask you to remember:

That it costs $3,000 a year to kept a patient in a mental hospital, but only a fraction of that amount under Short-Doyle community based care.

That it costs $2,000 a year to keep an inmate in a correctional institution, but only $700 for the most intensely supervised parole.

That it costs the State $2,500 a year to support a student at the University of California, or $1,100 a year for a student at a state college, but that college graduates return to the state in their lifetime many times the amount of this investment.

That it will cost $81,000 to begin a state attack on our pressing housing problems, but that the price of inadequate housing is misery, ill health, broken homes and a host of ills we include under the label of social dynamite.

That we must weigh our investment in traffic safety against the frightening 1963 state traffic toll: 4,304 dead; 198,636 injured.

I ask, in short, that you view these expenditure proposals as investments, investments ultimately in people and in California's future.

In a very real sense, the kind of California we will live in next year and for years in the future will be determined by what we do now. The future is what we in the present make it—no more and no less.

I believe there is a broad, historic California consensus on most of the items in this budget.

The consensus grew out of the vision of Hiram Johnson and gained strength in the courage of Earl Warren. You and I repeatedly have confirmed that consensus since.

Despite our broad agreement, I invite debate on my proposals. I invite review and the clash and competition of opinion. That is your right and your role.

But let us approach our task as reasonable men. Let us recognize that we are dealing with a fundamental document of public policy and that reasonable men must ultimately arrive at agreement.

The policies we set now will outlive this budget and this administration. Our judgments, for good or ill, will help shape the

future for all of us alike, Democrats or Republicans, rich or poor, young or old.

The budget is now yours. Let its ultimate fate depend not on the fortunes of partisan maneuvering, but on its own merits, on how well it meets the challenges of modern California, first among equals in the United States of America.

Respectfully submitted,

Edmund G. Brown

Letter of Transmittal

HONORABLE EDMUND G. BROWN
Governor of California
State Capitol
Sacramento, California

DEAR GOVERNOR BROWN:

Submitted herewith are the summary statements and detailed schedules for the Budget of the State of California for the fiscal year beginning July 1, 1964, and ending June 30, 1965.

Approval of the federal tax reduction program is the principal consideration underlying the revenue estimates for 1964-65. The personal and corporate tax adjustments will provide the impetus for a greater volume of personal income, a higher level of consumer expenditures, greater profits and an increase in business investment. Allowance has been made for a change in aerospace expenditures which will dampen somewhat the rate of industrial expansion compared to other recent years.

In accordance with your established policy, expenditure increases have been limited almost exclusively to those functions or areas directly related to the care, treatment and education of human beings. In all other operations of state government, automation, increased efficiencies and other cost saving techniques have been exploited to the fullest to keep operating costs as low as possible.

I must mention two reforms in the budget structure which have been discussed with the Legislature this last year. We have developed three pilot budgets for state departments on a program presentation format rather than a line item basis. These budgets for the Department of Motor Vehicles, Fish and Game, and Youth Authority will be presented to each fiscal committee as these items are considered in the Budget Bill. The second format change to separate the capital budget from the operating budget has not been possible due to the length of time of the 1963 legislative session. The 1965-66 Budget will be prepared with these two issues clearly separated.

I wish to again express my appreciation for the cooperation demonstrated by the department heads and their assistants. I must also commend the budget staff for their diligent and able assistance in the preparation of this Budget.

Hale Champion
Director of Finance

February 1, 1964

[1] The General Budget Summary includes the revenues and expenditures of all state funds and activities that reflect the cost of State Government. The transactions involving bond funds, federal funds and other funds (see Schedule 6) are excluded.

[2] Income for the General Fund includes revenues which were originally deposited in a special fund and subsequently transferred to the General Fund, and transfers of surplus from special funds. Such amounts are reduced from special fund revenues.

[3] Outgo from the General Fund includes amounts transferred to special funds and expenditures from special funds are reduced by a like amount.

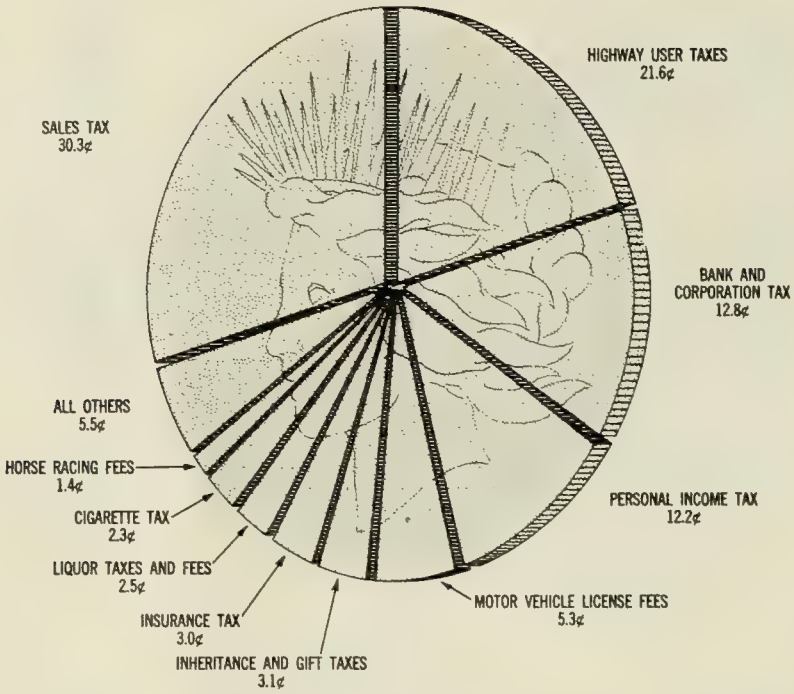
Surplus available for appropriation		45,454,995
TOTAL LIABILITIES, RESERVES AND SURPLUS		$393,172,569

[1] This statement was prepared by the office of the State Controller. The revenues and expenditures for the 1962-63 fiscal year as reported in this budget are in accordance with the accounts that produce this statement of financial condition of the General Fund.

[2] "Feeder Funds" have been established by law as the depositories for collection of certain major taxes prior to clearance as revenue to the General Fund. The equities stated herein represent the amount of collections which had not been cleared to the General Fund on June 30, 1963.



[3] Unreimbursed Debt Service of $168,660,742 represents the accumulated cost of debt service on state school building bonds in excess of reimbursements received from the school districts. The ultimate amount of reimbursements will be limited by each district's ability to pay in relation to its assessed valuation and bonded debt burden. Reimbursements to date have amounted to approximately 40.8 percent of the total debt service cost from the beginning of the State's public school building loan program.

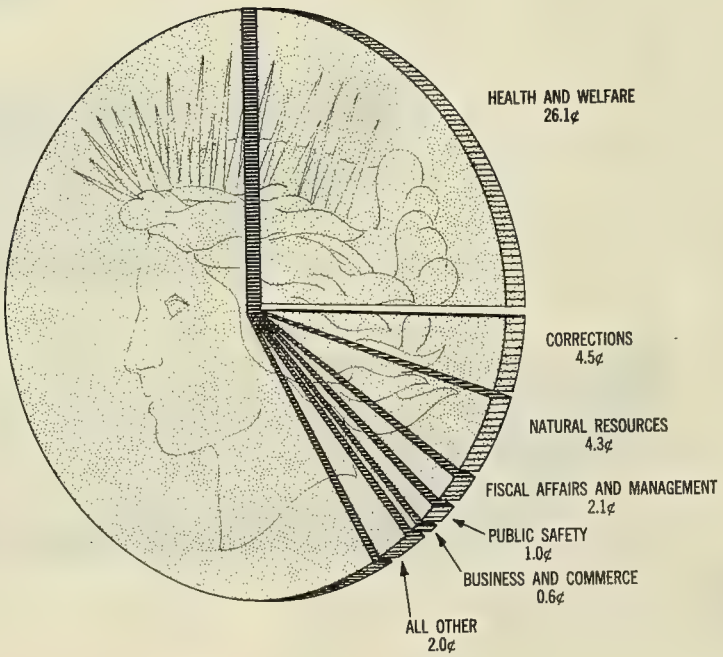

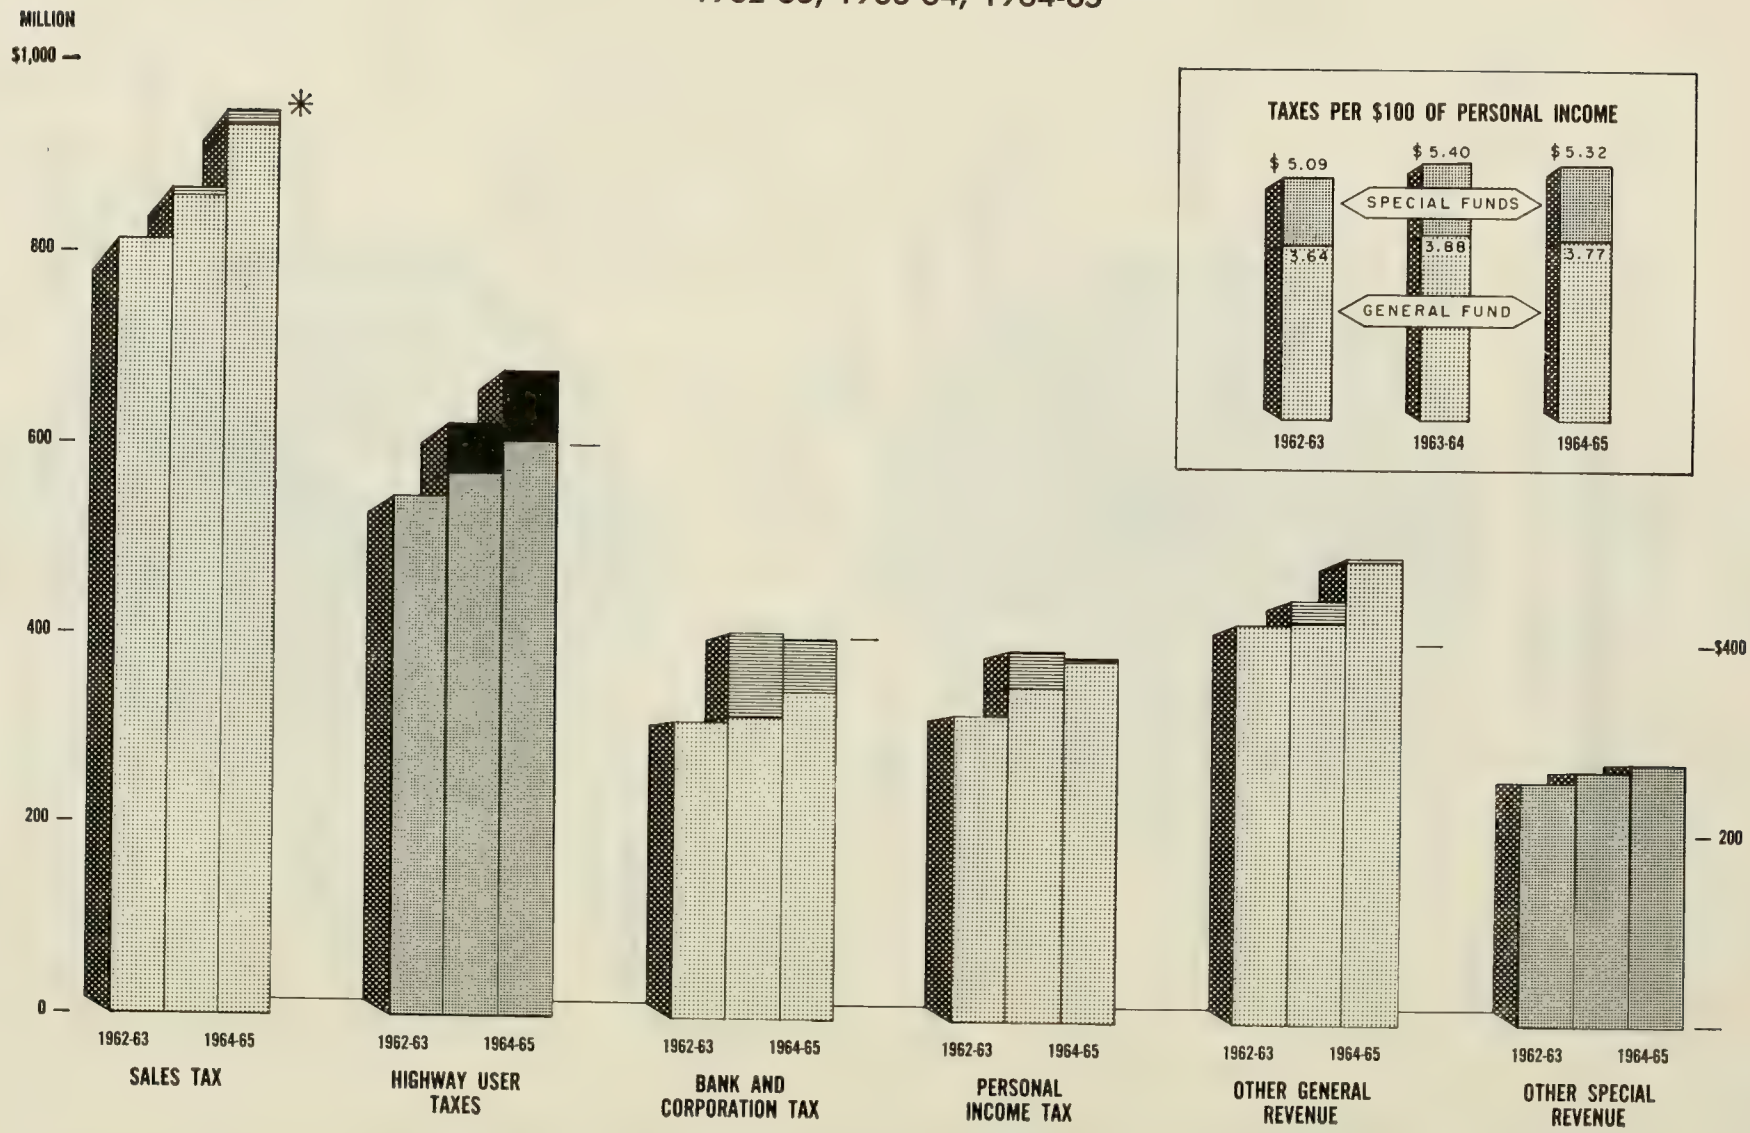

CHART 4

COMPARATIVE REVENUE

1962-63, 1963-64, 1964-65

✳ Effect of 1963 legislation.

Revenue Estimates

State revenue during the 1964-65 fiscal year is expected to total $3,129,916,586 according to the forecasts presented in this budget. This represents an increase of $134,033,849 in total revenue over the receipts for the current period and is $461,999,199 more than actual collections for 1962-63. A major part of the revenue gain results from the tax adjustment program and other changes enacted during the last general and extraordinary legislative sessions.

Receipts for the budget year and the revised estimates for the current year reflect an assumed high level of economic activity and no major international crisis. Enactment of the long awaited federal tax reduction program has also been built into these projections, with changes in withholding schedules assumed to be effective March 1964.

Under these assumptions, the economy should produce a gross national output of $617.5 billion during the year, aggregate personal income of $487.5 billion and corporate profits before taxes of $53.5 billion. For California the essential factors are: personal income of $55.6 billion compared with $52.4 billion in 1963, and corporate profits of $5.4 billion—4 percent over the $5.2 billion level last year.

In accordance with the Governor's recommendations, these revenue estimates include two proposed changes in the California tax structure. The first, affecting the personal income tax will allow taxpayers a standard deduction of $500 if single, or $1,000 if married or the head of a household, regardless of the amount of income. This will eliminate a current inequity in the optional tax table and provide nominal tax relief for those in the low income brackets. For most taxpayers, this proposal is more liberal than the minimum standard deduction now being considered by the Congress. It is estimated that this provision will reduce revenue for 1964-65 by $2,750,000. The second change relates to the insurance premiums tax and will limit the amount of real property taxes claimed as a principal office deduction to that space occupied by the insurer. This will close an important loophole in the insurance tax. It will increase General Fund revenue by $2,500,000 in 1964-65.

General Fund receipts of $2,177,524,000 † will be $68,002,000 higher than revenue indicated for the current fiscal year. The 1963-64 total, however, includes $156.2 million attributable to 1963 legislation, while total receipts indicated for 1964-65 include $75.5 million of tax adjustment receipts and minus $250,000 as the net effect of proposed legislation. Without these adjustments, General Fund receipts are expected to show a $149 million gain between the two fiscal years attributable to growth, the stimulative effect of federal tax reduction and improved economic climate in this State.

The sales tax will provide $947 million followed in order of size by bank and corporation tax receipts of $399,100,000 and $382,500,000 in personal income tax revenue. Following these three major revenue sources are such levies as the inheritance and gift tax, $95.8 million; insurance gross premiums tax of $93.0 million; cigarette tax, $73.2 million; the alcoholic beverage taxes and fees, $67.3 million; and the receipts from parimutuel wagering on horse racing—$36.1 million.

Receipts for the special funds are estimated at $952,392,000 for 1964-65, an increase of $66,032,000 over anticipated collections in the current year. Again legislative changes distort the comparison between the fiscal years. The budget year and the current year include $75.3 million and $49.6 million, respectively, in new revenue.

Special fund receipts are dedicated for special purposes. For the most part they represent taxes and fees collected from the ownership or operation of motor vehicles. Of all the special fund receipts, fuel taxes total $491.2 million, registration, weight and vehicle license fees account for $335.8 million, other vehicle associated levies add $16.0 million, and nonvehicle taxes and licenses and miscellaneous collections provide the remainder—$109.5 million.

Comparative data for General Fund and special fund levies for the past fiscal year, current period and budget year are shown on the table below.

Table 1

Total, Special Funds	$801.9	$886.4	$952.4	30.4
Grand Totals, Revenue	$2,667.9	$2,995.9	$3,129.9	100.0

* Excluding special fund share of liquor license fees.
† Excluding special fund share of horse racing tax.
‡ Excludes General Fund share of vehicle license fee which is included in other General Fund sources.

As indicated earlier, data for many of the taxes in the current and 1964-65 fiscal years are not comparable because of the legislative changes in 1963. Some of the tax adjustments produce major amounts of revenue for a single year, others, a gain spread over several years while still others produce a continuous

† This and all subsequent dollar amounts are rounded to the nearest thousand. Percentage changes have been computed from unrounded data.

flow of new revenue. The following table indicates the major revenue changes attributable to 1963 legislation and the effect in 1963-64 and 1964-65.

Table 2
MAJOR REVENUE CHANGES ATTRIBUTABLE TO 1963 LEGISLATION
(In millions)

	1963-64	*1964-65*
General Fund		
Bank and corporation tax	$88.4	$56.8
Personal income tax	38.2	2.2
Insurance tax	22.0	2.5
Sales tax	7.1	13.8
Other	0.5	0.2
Total	$156.2	$75.5
Special Funds		
Motor vehicle fuel taxes	42.2	66.4
Motor vehicle weight fees	7.4	8.9
Total	$49.6	$75.3
Grand Total	$205.8	$150.8

Beginning with returns filed on 1963 incomes, installment payments will no longer be permitted for either corporation or personal income taxpayers. The installment privilege for banks, however, will be eliminated in two steps, affecting revenues in 1963-64 and 1964-65. In addition, partial prepayment of bank and corporation taxes will be required on an estimated basis beginning in June 1965.

The transition to quarterly payments of the insurance tax will start in 1964 with the tax on first quarter premiums due in June. The change over to full quarterly payments will be spread over a four-year period and during this time tax rates will be reduced to compensate for possible retaliatory action of other states. Receipts from the surplus line brokers tax, formerly revenue for the Insurance Fund, became General Fund revenue last September.

Several bills were passed affecting sales and use tax revenues. The principal changes were the extension of the levy to (1) meals sold for off-premise consumption, (2) meals served by employer and employee organizations and (3) occasional sales of motor vehicles. There were two relatively minor sales tax exemptions—insulin, and fuel oil sold to tramp steamers for use outside the limits of this State.

A major change was also made in highway user revenues. Gasoline and liquid petroleum gas taxes were increased and weight fees on commercial vehicles were raised to provide additional funds for city streets and county roads. Although the increases were designed to afford additional revenue for local jurisdictions, the receipts will flow through the State financial structure and the amounts are included in the fuel tax and registration fee estimates shown below. Another feature of the measure allows an increase in motor vehicle license fees for rapid transit systems. Imposition of the higher fees depends upon local action and receipts will be treated as local revenue collected by the State under contract with local jurisdictions.

Revised Estimates

Revenue data for the current year as shown in this budget differ in total and in detail for most of the taxes from the estimates submitted in the Governor's Budget last year. The latter included $139 million for tax proposals to bring collections current with State obligations. Only minor changes affecting revenue for 1963-64 were made in the legislative process and, as enacted, these proposals totaled $140.7 million. There were, however, other measures passed which had substantial effect on General Fund and special fund revenues.

As originally submitted, revenues for 1963-64 totaled $2,883,738,000, $2,079,711,000 for the General Fund and $804,027,000 for the special funds. If these amounts are adjusted for legislation, total revenues become $2,942,668,000, General Fund receipts rise to $2,083,007,000 and special fund income increases to $859,661,000. On this basis, the revised General Fund total presented in this budget exceeds comparable original estimates by $26.5 million, or 1.3 percent. The revised special fund aggregate is $26.7 million (3.1 percent) above the original estimate as adjusted.

The original budget estimates assumed a reduction in federal income tax levies about mid-1963, retroactive to January 1 of last year. Although passage of the tax cut has been delayed, gross national product and income exceeded most expectations. There is some indication that the high level of activity included an anticipatory effect of the tax reduction.

Stimulus to the economy last year came largely from three sources: record sales of motor vehicles; a sharp rise in business investment and residential building; and exceptionally good corporate profits. The General Fund taxes associated with these factors reflect these higher levels and account for $37.0 million of increased revenue for 1963-64. The major gain is shown in bank and corporation taxes, up $19.3 million from the adjusted estimate. Sales tax receipts show a gain of $12.4 million and personal income tax receipts an increase of $5.3 million. In contrast to these increases inheritance and gift tax receipts were overestimated by $8.5 million, largely the result of extending the high collections of the early part of 1962-63.

The motor vehicle levies—fuel, license and registration—in the aggregate were $12.2 million higher, again reflecting the effect of the record motor vehicle sales. The other major increase in special fund receipts occurs in oil and mineral royalties for the California Water Fund which are $15 million higher than anticipated.

General Fund revenue for 1963-64 in this budget is $243.5 million greater than actual receipts for 1962-63. As pointed out earlier $156.2 million is attributable to 1963 legislation and $87.3 million to basic yields for the current year. A number of factors account for the apparently low gain over the preceding year. These include the fact that a major part of the 1962-63 tax was generated by (1) the cyclical recovery from the 1960-61 recession; (2) a substantial increase in motor vehicle sales and building activity; (3) abnormally large inheritance tax receipts and (4) one large corporation tax settlement covering several years. The current year, on the other hand, has witnessed large tax refunds, substantial adjustments in the corporation tax base, a decline in the taxable earnings of financial corporations subject to the bank tax, and an apparent slight drop in inheritance tax collections.

A summary of the original forecasts for 1963-64 as adjusted for legislation and the estimates shown in this budget is given in the table below.

Table 3
COMPARISON OF ORIGINAL AND REVISED ESTIMATES OF STATE REVENUE, 1963-64
(In millions)

Taxes, fees, etc.	Original*	Revised	Changes Amount	Changes Percent

* Original estimate corrected for changes between proposed tax adjustment program and tax adjustments as enacted.

Economic Conditions

The foregoing estimates of revenue are predicated upon continued growth in economic activity for the Nation in 1964 and 1965. Part of this anticipated improvement rests upon enactment of the federal tax reduction program early in 1964, retroactive to January 1. It has been assumed that withholding schedules will be cut to 14 percent as of March 1. This should have a stimulative effect on the Nation's economy increasing output in the first year by about 1½ times the value of the tax reduction. In 1965 the effect will be greater and will include the second step of the tax reduction program.

The projected growth in economic activity presupposes neither major international crises nor a marked easing of world tensions leading to widespread disarmament, although some relaxation may accompany the nuclear test ban. The rapid rise in defense and aerospace expenditures characteristic of recent years is expected to diminish in 1964 and defense expenditures may actually level off by 1965.

The forces influencing the national picture will also affect California although the declining growth rate in defense and space industries should have greater repercussions on this State's economic outlook. The relatively greater population growth here should continue to hold California's income gains above the Nation's, but the margin of difference is not expected to be as great as in recent years.

Gross national production this year is estimated at $617.5 billion, $33.3 billion higher than in 1963. Personal income in the Nation is expected to reach $487.5 billion, compared with $463 billion in 1963. Income of California residents will rise to $55.6 billion from an estimated $52.4 billion last year.

Components of gross national product together with estimates of personal income, corporate profits and other major economic factors for the Nation and for California are summarized in Table 4.

Table 4
ECONOMIC DATA
(Dollar amounts in billions)

National data:	1962 actual	1963 preliminary	1964 estimated	Percent changed 1963-64
Gross national product	$554.9	$585.0	$617.5	5.6

[a] Includes effect of federal tax cut assumed effective March 1964.
[b] Disposable income of California residents represents personal income less federal and state personal income taxes. Other personal tax and nontax payments have not been deducted.
[c] Spendable resources of California residents represent disposable income adjusted for estimated changes in short-term consumer credit and in liquid asset holdings of individuals—e.g., money, bank accounts, savings bonds. Amounts are estimated by the California Department of Finance for use in connection with the analysis and projection of sales tax revenue.
[d] Index for California as computed by the California Department of Industrial Relations, Division of Labor Statistics and Research.

SOURCE: National data for 1962 from reports of the Office of Business Economics, U.S. Department of Commerce; preliminary figures for 1963 based on Department of Commerce reports for the first three quarters with fourth quarter estimated by the California Department of Finance; estimates of national data for 1964, estimates of California's population, personal income, personal taxes, disposable income, etc., are based upon studies by the Financial and Population Research Section, Budget Division, California Department of Finance.

Gross National Product

The consumer is expected to play the dominant role in the economic growth of the current year. Two-thirds of the increase in gross national product will occur in consumer expenditures, principally for nondurable goods and services. These higher rates of consumption are a direct corollary of the increase in disposable income following the tax cut and the higher levels of income generated by the growth in economic activity.

The automobile industry posted its best sales record last year and the second-best production record with 7,644,000 units. With two good years just completed, it is unlikely that a new record will be established this year. However, replacement needs, coupled with high levels of income, should produce a good market, and car sales in 1964 have been estimated at 7.0 million units on this basis, about the volume reported in 1962.

Notwithstanding the decline in automobile output, consumers' purchases of durable goods should show further growth in the current year. The dollar volume of automobile sales, allowing for more accessories, will not decline as much as the number of units. Other durable goods—appliances and house furnishings—should increase with higher disposable incomes and the record levels of residential building in 1963 and 1964. In total, consumers are expected to spend $394.5 billion, $21.0 billion more than last year.

Business investment in plant and equipment promises to provide another significant portion of the economic growth forecast for the year. Increased profits, record cash flow, ample loan funds and a greater use of capacity all point toward an increase in business investment. With greater consumer demand, the need for more or improved facilities will become manifest, particularly as many industries are now at or near profitable capacity operations.

Nationally, private housing starts in 1964 will be about 1,475,000 units, slightly below the level in 1963. More of the construction is expected in single family units, which will increase costs per unit and produce a slightly higher dollar volume of outlays. The remaining segment of gross private domestic investment —inventory accumulation—should hold at about the 1963 level. Recent years have shown a declining inventory-sales ratio as a result of better inventory control, delivery speed-up, better distribution of supplies and faster communication. The trend should continue, but with a six percent projected growth in sales, total inventories should rise during the year.

Gross private domestic investment is expected to total $86.5 billion in 1964. This represents an increase of $4.5 billion for the year, made up of a $0.6 billion gain in residential housing and $3.9 billion in greater outlays for plant and equipment.

Since 1960, federal expenditures for goods and services have been one of the major elements of strength in the economy. Only a moderate increase is expected for the current year—$2.4 billion, about half the gain of 1963. As indicated above, the rate of increase in space and defense expenditures is leveling off and the latter may actually decline by 1965. State and local outlays are expected to continue the strong upward trend that has characterized the postwar period. Expenditures for all governmental purchases of goods and services are estimated to aggregate $132 billion, 5.4 percent above last year.

Personal Income

The increased demand for goods and services should create employment opportunities. These projections, therefore, contemplate civilian employment of more than 70 million for the current year and aggregate payrolls of $332 billion, including military. At this level, wage and salary receipts will be $19.6 billion, or 6.3 percent, above last year.

Improvement is also expected in business and professional income, property income (dividends, interest and rents) and in transfer payments. Aggregate personal income has been forecast at $487.5 billion. Disposable income is estimated at $427 billion, including the effect of the federal tax cut, or 6.1 percent above the 1963 level. With an estimated $394.5 billion deducted for personal consumption expenditures, savings for the year will amount to $32.5 billion, 7.6 percent of disposable income—a new record in the dollar total, but below the rates established in the early 1950's and in 1956.

Corporate profits have also been forecast to set a new record at $53.5 billion, 4.9 percent greater than the exceptionally high level of $51 billion apparent for last year.

California Situation

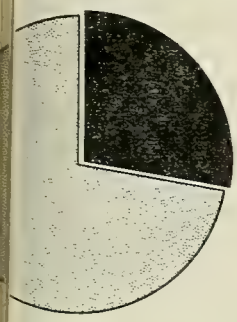
California population is expected to total 18,272,000 on July 1, 1964, up 3.4 percent from 1963. This growth, slightly lower than gains in previous years, anticipates 600,000 new Californians, divided 60-40 between net migration and natural increase. The lower growth rate for this year is attributable to both an apparent decline in natural increase and to a drop in migration as leveling of defense business in this State somewhat reduces employment opportunities.

It is anticipated that employment in 1964 will total 6,635,000, up 194,000 from last year's total. This will not fully absorb the expansion in the labor force and consequently unemployment will rise to an estimated 425,000 persons, 6.0 percent of the labor force. With the exception of agriculture and mining, a gain in employment is projected for all major industrial groups this year. The largest numerical gains are expected in service, government and trade. Manufacturing employment is expected to show only a moderate improvement.

California's share of prime contracts awarded by the Defense Department has slipped from 26 percent in 1961 to 23 percent last year. The closing out of the Skybolt system contract was the major loss in California.

The volume of new nonfarm dwelling units in this State is expected to decline from the record established last year. Most of the decrease will be in Southern California multi-unit structures. Because of the greater emphasis on single family units, however, the total dollar value of residential construction is not likely to drop significantly. The considerations which affect non-residential construction in the Nation are applicable to California and this type of activity should show a 4 percent gain over last year.

Personal income of California residents is forecast at a record breaking $55.6 billion, an increase of $3.2 billion over the total for 1963. At this level, California will show a continuation of the rise which has carried this State's share of the Nation's personal income to new heights each year. On the basis of factors indicated earlier, however, the gain will not be as great this year as in the past. California will account for 11.4 percent of the Nation's income, compared with 11.31 percent in 1963 and 11.13 in 1962.



Corporate profits during 1964 are estimated at $5.4 billion, up 3.9 percent over last year. The gain in corporate earnings in 1963 was not as large as that experienced nationally nor is the gain for the current year likely to be as great. Some of the industries showing high profits are not as important in California's corporate structure, and the slowing of defense and aerospace industries has tended to depress profits in this sector.

Additional details on these and other basic national and State economic factors used in preparing the budget revenue forecasts are given in Table 4.

GENERAL FUND REVENUE

More than seven-tenths of aggregate State revenue will accrue to the General Fund. This includes collections from such levies as those on sales of tangible personal property, personal income, corporate profits, and insurance premiums. For the most part these taxes are geared directly to business conditions. Hence, the estimate of revenue from each source flows directly from the economic assumptions explained above. The influence of these economic factors upon the various taxes and the methods used in preparing the budget revenue estimates are outlined below.

Sales Tax—$947,000,000

3% OF TOTAL BUDGET

Since economic activity during 1963 was at a higher level than had been anticipated in this report a year ago, the taxable sales for 1963, likewise, exceeded the earlier expectations. Sales in all major categories of goods were above the anticipated levels, with the largest differences occurring in motor vehicles, consumer durables, and building materials.

Taxable sales are expected to show further gains during 1964 and 1965, reflecting higher personal incomes, growing population, favorable business conditions and the twofold effect of the proposed federal tax reduction: the immediate increase in disposable income and spending resulting from lower withholding rates, and the subsequent impact on the economy. Total taxable sales in 1964 are estimated to be $29.75 billion and at that level will exceed the apparent 1963 volume by 6.5 percent. The estimate for 1965 is $31.75 billion, up 6.7 percent from the anticipated 1964 level.*

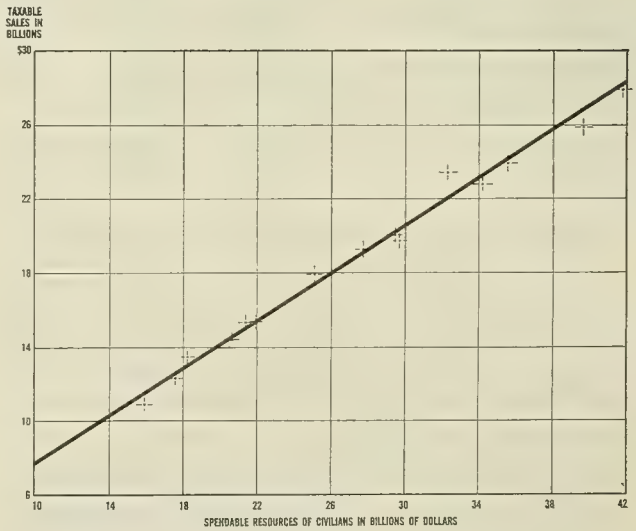
As in the preceding years, the estimates of taxable sales have been prepared by two independent methods. One is based on detailed analyses of sales in more than 40 types of businesses. Using analyses of per capita consumption, aggregate sales of $15.94 billion are expected during 1964 and $16.95 billion during 1965 for consumer nondurables, consumer durables, and automobile supplies, compared to apparent sales of $15.08 billion during 1963 for the same categories. Because sales of motor vehicles, building materials and producers' equipment are exceptionally volatile and do not show as pronounced per capita trends as most of the consumer goods, sales for these groups have been estimated separately.

Motor vehicle sales during 1964 are expected to decline numerically from the record level reached in the past year. However, it is expected that higher priced models, coupled with more accessories, will hold the dollar volume at about 7 percent below the 1963 level, resulting in sales of approximately $4.1 billion in 1964, compared with $4.4 billion last year.

Sales of building materials should reflect the high level of housing units started during the latter part of 1963, continued high volume of housing construction in 1964, and increased nonresidential construction. This group is estimated at $3.3 billion for 1964, about 4 percent above the record level reached in 1963, and should show additional gains during the following year, perhaps reaching $3.5 billion.

Sales of producers' equipment, too, are expected to show sizeable increases during the year. The total for this year has been estimated at $5.67 billion, up almost 8 percent. Further increases during 1965 are expected to bring the level in that year to $6 billion.

The second method of estimating sales tax involves the correlation of taxable sales with projected spendable resources. The spendable resources of Californians are derived from disposable personal income, adjusted for estimated changes in consumer credit and liquid assets—primarily cash balances at various banking institutions. The relationship between taxable sales and spendable resources has been quite stable over a period of years, as the accompanying chart indicates. Although there is no reason to believe that this relationship has changed, the difficulties in estimating changes in savings have increased during the last few years because of the high and unpredictable volume of out-of-state funds deposited in California's savings institutions. Since savings data are not segregated by residence of depositors, changes in out-of-state deposits affect the estimate of spendable resources.



The estimates of taxable sales as obtained by reconciling the figures from the two approaches are shown in Table 5, together with the corresponding data for 1963.

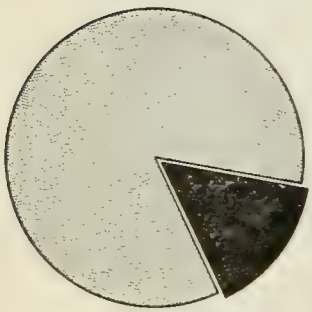
Taxable transactions were allocated by quarters on the basis of seasonal patterns, with allowances for

Chart 5

CORRELATION BETWEEN TAXABLE SALES AND SPENDABLE RESOURCES OF CIVILIANS

1949-63

* With respect to 1965, only the first quarter taxable sales and those of vendors reporting monthly during the second quarter will influence State revenues of the 1964-65 fiscal year.



changes in the dates of Easter and other factors affecting fiscal year collections.

After audit adjustments, the sales tax is estimated to yield $947,000,000 for 1964-65 and $866,500,000 for 1963-64, compared to actual receipts of $813,465,000 for 1962-63.

Table 5
TAXABLE TRANSACTIONS IN CALIFORNIA
(In millions)

	1963	1964	Percent change over 63	1965	Percent change over 64
Consumer nondurables	$11,590	$12,284	+6.0	$13,065	+6.4
Consumer durables, excluding autos	2,326	2,420	+4.0	2,565	+6.0
Motor vehicle sales	4,405	4,100	—6.9	4,360	+6.3
Motor vehicle supplies	1,167	1,231	+5.5	1,310	+6.4
Building materials	3,177	3,300	+3.9	3,500	+6.1
Producers' equipment and supplies	5,260	5,665	+7.7	6,030	+6.4
Unallocated	–	750	–	920	–
Totals	$27,925	$29,750	+6.5	$31,750	+6.7

Bank and Corporation Tax—$399,100,000

12.8% OF TOTAL BUDGET

Corporate profits attributable to California operations in 1963 and 1964 will determine largely the receipts from this source during the periods covered by this budget. The estimate of 1963 earnings was based upon the results of a carefully selected sample of over 900 corporations in 62 industry classes. According to the data obtained from this survey, California corporate income approached $5.2 billion, exceeding the previous high set in 1962. Earnings by major industry for 1962 and 1963 are shown in the following table.

Table 6
CORPORATE PROFITS BY MAJOR INDUSTRY, CALIFORNIA, 1962 and 1963
(In thousands)

	1962	1963	Percent change
Agriculture	$45,790	$53,600	+17.1
Mining and oil production	195,200	277,000	+41.9
Construction	133,700	122,400	—8.5
Manufacturing	1,819,110	1,950,100	+7.2
Trade	660,450	710,000	+7.5
Financials subject to bank tax	555,038	585,500	+5.5
Real estate and other financials	329,692	374,600	+13.6
Utilities	821,500	845,500	+2.9
Services	261,120	275,300	+5.4
Miscellaneous	1,935	2,000	+3.4
Totals	$4,823,535	$5,196,000	+7.7

The 7.7 percent increase compares with a 9 percent gain for the nation. Corporate profits in California generally do not fluctuate in either direction as much as they do in the nation because of differences in industrial makeup. Usually it is the manufacturing group that accounts for much of the year-to-year variation in profit levels, and manufacturing comprises a somewhat smaller part of the corporate structure in California than in the nation as a whole. In addition, earnings of the aerospace industry—aircraft, missiles, and electronics—declined in 1963 and contributed to holding down the gain in manufacturing profits in this State. The following table compares the composition of corporate profits for both the United States and California.

Table 7
INDUSTRIAL DISTRIBUTION OF CORPORATE PROFITS
UNITED STATES AND CALIFORNIA
(In percent)

	United States	California
Agriculture	0.1	1.0
Mining and oil production	1.8	4.1
Construction	1.0	2.8
Manufacturing	55.1	37.7
Trade	11.2	13.7
Finance, real estate, etc.	12.4	18.3
Utilities	17.1	17.0
Services	1.3	5.4
	100.0	100.0

California corporate profits for 1964 are forecast at $5.4 billion, almost 4 percent above the 1963 level. This follows the earnings trend for corporate profits in the national economic outlook for 1964.

The bank and corporation tax was amended in 1963 in the following important respects:

1. Installment payment privileges were eliminated for general corporations effective January 1, 1964.
2. Installment privileges for payment of the bank tax by banks and other financial institutions, were eliminated in two stages, half in 1964 and half in 1965.
3. Provisions were made for the payment of estimated tax on current business profits beginning June 15, 1965.

Receipts during the current year will be increased by $88.4 million due to the elimination of the installment privilege for general companies and the provision requiring one-half of the additional tax on banks and other financial institutions to be paid nine months earlier. Payment of the entire bank tax coupled with first receipts of the estimated current tax next year will result in an additional $57 million during 1964-65. The estimate for 1963-64 was reduced by $5,500,000 as a result of a California Supreme Court decision requiring payment of refunds to certain oil companies.

On this basis, revenue from the bank and corporation tax for 1964-65 is estimated to total $399,100,000 down from the $405,750,000 anticipated in the current year. Actual collections during 1962-63 totaled $311,351,000.

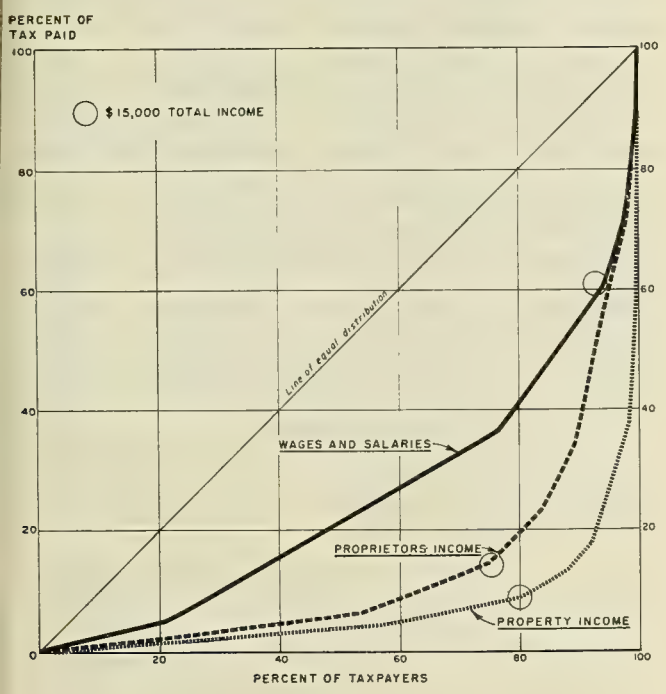
Personal Income Tax—$382,500,000

Personal income of California residents, the basis of the revenue collected under the personal income tax, reached a record $52.4 billion in 1963 and is expected to climb to $55.6 billion this year. Details of these totals together with comparable amounts for 1962 are shown in the following table.

12.2% OF TOTAL BUDG

Table 8
CALIFORNIA PERSONAL INCOME
(In millions)

Source	1962	1963	1964
Wages and salaries	$33,186	$35,427	$37,550
Proprietors' income	5,335	5,544	5,750
Property income	6,784	7,338	7,900
Other income	5,177	5,595	6,020
Less: Social insurance contributions	1,296	1,523	1,620
Totals	$49,187	$52,381	$55,600



SOURCE: U.S. Department of Commerce, 1962; California Department of Finance, 1963 and 1964.

Taxes paid on wage and salary income, proprietors' income and property income (interest, dividends and rent) accounted for approximately 89 percent of the self-assessed tax in 1962. Capital gains and miscellaneous income, such as annuity and alimony payments, which are not included in the Department of Commerce definition of personal income, made up the remainder.

The concentration of income into the various tax brackets varies according to income source. Generally, wage and salary income accumulates in the lower brackets, proprietors' income in the middle ranges and property income in the higher brackets.

The following chart illustrates these differences in income distribution. The farther the curve is from the line of equal distribution the more concentrated is the income in the higher tax brackets. Thus, 6 percent of the taxpayers with wage and salary income exceeding $15,000 paid 39 percent of the tax attributable to wages and salaries, and 20 percent of the taxpayers with property incomes over $15,000 paid over 91 percent of the tax attributable to property income. In fact, one-half of 1 percent of these taxpayers accounted for 42 percent of the tax attributable to property income.

Chart 6
PERCENT OF TAX PAID BY TYPE OF TAXPAYER

The following table illustrates the relative importance of personal income and self-assessed tax for 1962 by components of personal income.

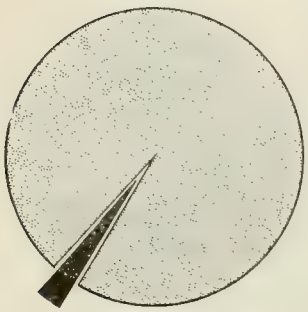
	Personal income (percent)	Tax assessment (percent)
Wages and salaries	67.5	58.0
Proprietors' income	10.8	16.9
Property income		
Interest	7.2	3.5
Dividends	3.5	8.1
Rents	3.1	2.2
Other income	7.9	2.0
Capital gains	--	9.3
Totals	100.0	100.0

Two bills amending the personal income tax with significant fiscal implications were enacted during 1963. The more important, in terms of revenue, eliminated the privilege of paying the income tax in three installments beginning with the tax due this year. It is estimated that this will result in an additional $38 million during 1963-64. The second bill conformed the California law to some of the amendments of the Internal Revenue Code enacted by the Congress in 1962. The net effect of this legislation is expected to result in additional revenue of $200,000 annually.

The revenue estimate for 1964-65 also includes the effect of the Governor's recommendation to allow all persons a standard deduction of $500 if single, or $1,000 if filing a joint return or as head of household —regardless of the 10 percent income limitation. This has been estimated to reduce revenue collections $2,750,000 a year.

After adding audit collections of the Franchise Tax Board and converting calendar year collections into fiscal years, revenue from this levy is expected to total $382,500,000 during 1964-65, compared with $389,500,000 in 1963-64 and actual receipts of $322,012,000 in 1962-63.

Inheritance and Gift Taxes—$95,800,000



3.1% OF TOTAL BUDGET

Receipts from the inheritance and gift taxes depend primarily upon such variable factors as the number and size of bequests or gifts and the relationship between the decedent or donor and the beneficiary. Exemptions are scaled down with the remoteness of relationship while tax rates rise substantially as the value of the transfer increases and as the relationship recedes.

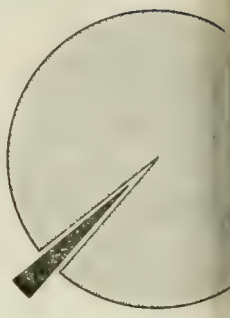
Collections generally follow business conditions and growth in property values. Occasionally, however, the settlement of a large estate or a greater number of medium sized estates than are normally received produces a significant increase in receipts during a fiscal year. This was apparently true in 1962-63. Inheritance tax collections for that year were $86.8 million —$16.2 million greater than in the preceding year. So far in 1963-64, collections are below a year ago and the estimate for current year reflects this drop. A normal growth pattern is expected to resume for the budget period and collections of $90,000,000 have been forecast.

The abnormally high gift tax collections in the current year are attributable to a concerted effort by the State Controller to reduce the backlog of returns awaiting audit. A return to a normal growth pattern is assumed for 1964-65. Revenue for the budget period has been forecast at $5,800,000, compared with $6,200,000 in 1963-64 and actual receipts of $5,649,000 in 1962-63.

Insurance Tax—$93,000,000

3.0% OF TOTAL BUDGET

This tax is imposed on premiums written by insurance companies and is in lieu of all levies except real estate taxes and motor vehicle fees. The base for 1963-64 was estimated from the replies of 72 insurance companies indicating their estimates of the percentage changes in the volume of premiums written on major lines of insurance. The replies indicated a tax base of $3,940,000,000 for 1963.



In arriving at the net tax base, dividends paid or credited to policyholders were deducted, other business done by title insurers was added, and allowances were made for the special rates on annuities and ocean marine insurance.

Insurers are now allowed to deduct from their tax liability the entire amount of real property taxes paid on their principal office in California. The Governor is recommending, however, that this deduction be limited to only that space occupied by the insurance company. This will increase revenue for 1964-65 by $2,500,000.

As a part of the revenue program passed by the 1963 Legislature, revenues from the insurance tax will be placed on a current basis beginning this year. Under the old system, taxes on premiums written in one calendar year were due the following June. The transition to a system of quarterly payments due two and one half months after the close of each calendar quarter will take four years to complete. During this period the tax rate is reduced from 2.35 percent to 2.33 percent to compensate insurers for possible retaliatory action by other states. Under the first phase of this program, insurers will remit to the State in June 1964 a payment for premiums written in the first quarter of that year. Total collections for 1963-64 are estimated at $104,500,000, of which $22,000,000 is attributable to this change in the law.

Revenue projections for 1964-65 were based upon the replies of the insurance companies to the questionnaire and upon an analysis of insurance trends in relation to motor vehicle registration, population and income. In addition, revenue from the surplus line brokers tax will be deposited in the General Fund rather than the Insurance Fund. This tax amounts to about $500,000 a year. Since the due date of this tax has been changed to June 15 starting in 1965, two years' receipts will be received in 1964-65. Total revenue for the insurance tax is estimated at $93,000,000 for 1964-65.

Alcoholic Beverage Taxes—$78,300,000

2.5% OF TOTAL BU

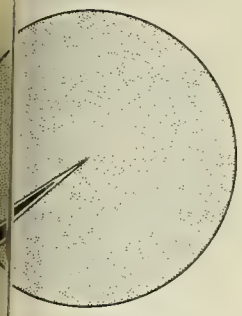
Revenue related to sale and consumption of alcoholic beverages is of two types: (1) excise taxes collected on the sale of distilled spirits, beer, and wine and (2) liquor license fees collected from manufacturers, distributors and retailers engaged in this industry.

The estimated consumption of alcoholic beverages is based on an analysis of per capita trends in relation to time and income. After an especially large increase in 1962, per capita consumption of distilled spirits remained stable at 3.1 gallons per adult civilian last year. In projecting taxable consumption this year and next, a resumption of the gradual upward trend of the past decade has been assumed. Beer consumption is expected to increase by about 0.3 of a gallon per person to reach a total of 25 gallons per adult civilian. Purchase of wine is also expected to increase, both in absolute amount and in terms of adult population. Total distribution by type of beverage is shown below.

	(Millions of gallons)			
	1962	*1963*	*1964*	*1965*
Distilled spirits	31.3	32.2	34.1	36.0
Beer	245.3	258.0	270.0	282.0
Wine	35.2	37.2	39.0	40.9

Application of the relevant rates and adjustment to a fiscal year basis results in the following estimates:

	(In thousands)		
	1962-63	*1963-64*	*1964-65*
Distilled spirits	$48,152	$49,300	$52,000
Beer	--	10,545	11,083
Sweet wine	10,659 *	331	339
Dry wine		199	214
Sparkling wine		355	364
Total Excise Taxes	$58,811	$60,730	$64,000

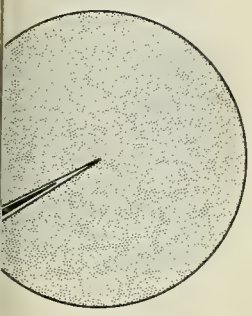


* Cannot be separated due to credits and other adjustments.

Revenue from liquor license fees accrues to both the General Fund and the Alcoholic Beverage Control Fund. General Fund money is composed of application fees for new licenses, service charges, special fees on certain licenses collected for the enforcement of fair trade regulations and 10 percent of all other fees, primarily the annual renewal fees.

The authority for issuance of intercounty transfers at $3,000 each expired June 1, 1963. Money from this source amounted to nearly $400,000 in 1962-63. However, the 1963 Legislature authorized special fees of $24 and $52 on certain licenses. Revenue from this source is expected to be about $300,000 in the current and following fiscal years and nearly offsets the decline resulting from elimination of intercounty transfers. License fee receipts for both the General Fund and the Alcoholic Beverage Control Fund are shown in the following table.

	(In thousands)		
	1962-63	*1963-64*	*1964-65*
General Fund	$3,353	$3,321	$3,300
Alcoholic Beverage Control Fund	10,585	10,800	11,000
Total Liquor License Fees	$13,939	$14,121	$14,300



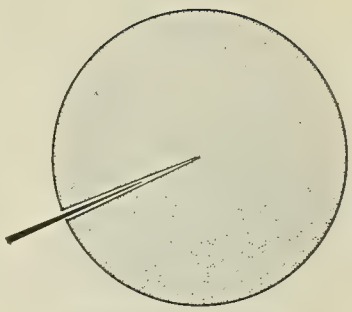
Cigarette Tax—$73,200,000

3% OF TOTAL BUDGET

Cigarette consumption for the current and following years has been estimated on the basis of an analysis of trends since the inception of the tax. A downward adjustment has been made to allow for the effects of the United States Department of Public Health report on smoking and subsequent intensified campaigns to curb cigarette smoking. Per capita purchases are estimated at 138 packages for 1964, a decrease of about 4 packages from last year. Application of the 3-cent-per-package tax rate and the 2 percent distributor's discount to the appropriate fiscal year yields revenue estimates of $73,200,000 for the budget year, and $72,150,000 for the current year compared to $70,194,000 in 1962-63.

Horse Racing Fees—$45,306,000

.4% OF TOTAL BUDGET



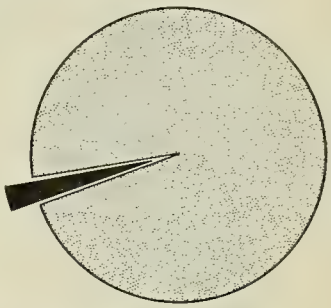
In general, the trend in parimutuel wagering at California race tracks has paralleled personal income. This basic factor underlies the detailed estimates of parimutuel betting at each of the racing meets to be held in the remainder of the current year and the budget period.

The revenue estimates also reflect variations in total betting due to changes in the number of racing days for Hollywood Park where the meet overlaps two fiscal years. This track, which had 54 racing days in 1962-63, will have 52 days in 1963-64 and 56 days in 1964-65. The estimates for 1963-64 and 1964-65 also provide for the newly authorized Spring Meet at the California State Fair. No allowance was made for the effect of the strike at Santa Anita, since the loss in wagering may be fully offset by the five added racing days authorized by the Horse Racing Board.

The aggregate handle for all tracks for 1963-64 has been estimated at $567,946,000 and for 1964-65 at $595,318,000. The total handle for 1962-63 was $551,966,000. The table below shows the amount of revenue from horse racing and the disposition of receipts among the various funds. Since excess revenue in the Fair and Exposition Fund is subsequently transferred to the General Fund, final disposition of receipts is shown instead of initial deposits.

	(In thousands)		
	1962-63	*1963-64*	*1964-65*
Tax on parimutuel pools	$35,998	$37,069	$39,099
Breakage	5,322	5,547	5,843
Unclaimed wagering tickets	285	295	307
Licenses, fines and penalties	58	56	57
Totals	$41,663	$42,967	$45,306
General Fund	$33,606	$34,015	$36,056
Fair and Exposition Fund	7,307	8,202	8,500
Wildlife Restoration Fund	750	750	750

Private Car Tax—$1,900,000



0.1% OF TOTAL BUDGET

Under this levy, railroad cars owned by companies other than railroads are taxed by the State rather than by the various local governments. Assessed valuations are determined by the State Board of Equalization and the average statewide property tax rate during the preceding fiscal year is applied against the assessment roll.

Based upon assessments of $26,679,000 and on a statewide rate of $6.92 per $100, current year collections will total $1,846,000. Assuming a moderate increase in tax rates but no change in assessed valuation, receipts from this source have been projected to $1,900,000 for 1964-65. Actual collections during 1962-63 totaled $1,808,000.

Nontax Receipts—$80,625,000

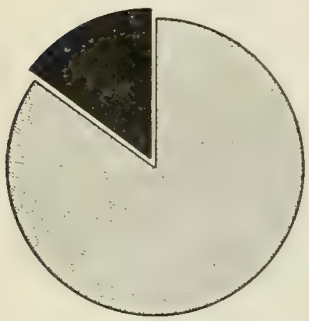
2.6% OF TOTAL BUDGET

A substantial volume of revenue accrues to the General Fund from sources other than tax levies. These include bonus payments and royalties on the production of oil and gas from State-owned lands; interest on investments and bank accounts; charges for treatment and services at State hospitals, if the patient has private means or is a county responsibility; charges to counties for support of Youth Authority wards; and such other items as sale of property and penalty payments for traffic violations.

In total, miscellaneous general receipts will amount to $80,625,000 in the budget year, an increase of $2,220,000 over the corresponding figure for the current period. The total is made up of four roughly equal categories; pay patients and county board charges at hospitals and correctional schools—$21.4 million; interest income—$22.0 million; oil and gas royalties—$16.9 million; and all other, chiefly traffic penalties, sale of property and charges for certain services in connection with business, incorporations and issuance of stock—$20.3 million. Principal amounts comprising the total are shown in Schedule 2.

Legislation affecting revenues in this category during the 1963 session transferred the small craft license fees from the General Fund to the Small Craft Harbor Revolving Fund. Because of this transfer, the revenue from those fees—$260,000—does not appear in the budget totals for 1964-65, but is shown in the fund statement on page 1130.

SPECIAL FUND REVENUE



Provisions of the State Constitution, codes and statutes restrict the use of certain revenue for specified purposes, and under California's financial procedure these receipts are separately accounted in

various special funds. In general, they comprise three categories of income: (1) receipts from broad tax levies which are allocated to specific functions; (2) charges for special services to specific groups; and (3) certain rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees illustrate the first of these classes. License fees for the regulation of businesses and professions are typical of the second, while oil and gas royalties assigned in part to water resource development and school support are an example of the third. Interest earned by the investment of special fund money accrues to the fund for which the investments are held.

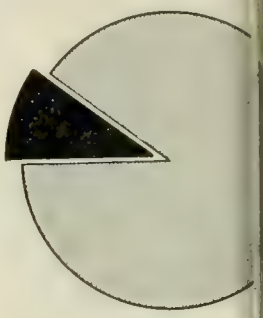
Motor vehicle taxes and fees account for almost 90 percent of all special fund revenue. Principal sources of this income are the levies upon motor vehicle fuel, registration and weight fees, transportation tax, and the vehicle license fee which is levied in lieu of local taxes on this type of personal property. During the 1964-65 fiscal year $844,000,000 will be derived from motor vehicle taxes. Approximately $384 million of this revenue will be returned to local governments, and $1.0 million will accrue to the General Fund to meet highway bond interest and redemption charges. The remainder will be available for various activities related to state highways and vehicle regulation.

Regulatory fees and charges for special services to industry, business and the professions constitute the second largest source of special fund income. Coupled with hunting and fishing licenses and liquor licenses, receipts from these sources will amount to $52.6 million in the coming fiscal year. Rents, royalties and other miscellaneous receipts during 1963-64 are estimated to total $42.7 million.

Motor Vehicle Fuel Taxes—$491,150,000

15.7% OF TOTAL BUDGET

The forecast of revenue from the gasoline tax is based upon estimates of the number of vehicles in operation and the average fuel consumption per vehicle. Including exempt vehicles, total registrations are expected to reach 10,510,000 by year-end 1964, up 5.7 percent from the previous December 31. The greater use of lightweight vehicles and continuing growth in multi-car families have tended to reduce the average gasoline consumption per vehicle. This decline is expected to continue at a decreasing rate, dropping to 630 gallons per vehicle in 1964-65 from the 634 gallons consumed during 1962-63.



With vehicle registration of 10,510,000 and average consumption at 630 gallons, total consumption is estimated at 6.62 billion gallons. This volume, at 7 cents per gallon, will result in collections of $463,500,000 during 1964-65, compared with $419,100,000 in 1963-64 and actual receipts of $362,140,000 in 1962-63.

The estimate of revenue for 1963-64 includes $42.1 million as a result of the Collier-Unruh Local Transportation Development Act. This act, in part, increased the gas tax from 6 cents to 7 cents per gallon effective October 1, 1963. The estimate for 1964-65 includes $66.2 million in new revenue from this legislation.

Diesel fuel consumption is expected to increase in line with economic activity. However, continued use of piggyback hauling of trailers by railroads will offset part of this gain. As a result, consumption of diesel fuel is expected to total 375,000,000 gallons in 1964-65, compared with 351,000,000 gallons in 1963-64 and 339,512,000 gallons in 1962-63.

Including $125,000 in 1963-64 and $200,000 in 1964-65 as a result of the one cent increase in the liquid petroleum gas tax as provided in the Collier-Unruh Act, receipts from the diesel tax and the tax on liquid petroleum gas are expected to reach $27,650,000 in 1964-65, compared with $25,800,000 in 1963-64 and actual receipts of $24,075,000 in 1962-63.

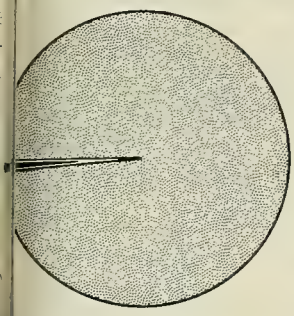
Motor Vehicle Fees—$336,800,000

10.8% OF TOTAL BUD

The bulk of revenue from this source is obtained from registration, weight and vehicle license fees with the remaining revenue from drivers' licenses and others fees incidental to vehicle operation. Sales of new vehicles—autos, trucks, trailers and motorcycles—during 1964 are expected to total 965,000 and an additional 352,000 will be registered by people moving into California. Allowing for scrappage and vehicles leaving the State, total fee-paid vehicle registrations at year-end 1964 are estimated at 10,393,000.

Weight fees were increased approximately 19 percent by the Collier-Unruh Act and as a result revenue is expected to increase $7.4 million during 1963-64 and $8.9 million in 1964-65. This will be offset, in part, by a decline in the average weight of commercial vehicles due to continued utilization of lightweight materials in truck and trailer construction. Drivers' licenses fees will total approximately $9.3 million during the current year and $10.3 million in the budget year.

Total registration and weight fees, drivers' licenses and other charges, which amounted to $151,364,000 in 1962-63, are estimated at $161,100,000 in 1963-64 and $170,300,000 in the budget year.



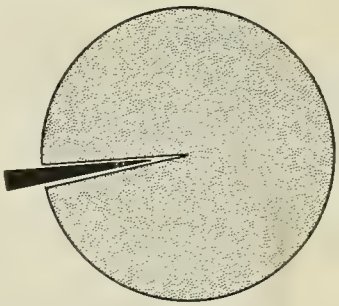
In addition to the number of vehicles, original market value and age distribution are factors important to the determination of vehicle license fee revenue. The average value of new cars appears to be increasing slightly and further small increases have been

projected for 1964 and 1965. Average renewal fees on automobiles will continue to rise as a result of successive years of high volume new car sales.

Total revenues for motor vehicle fees are shown in the following table:

	(In millions)		
	Actual 1962-63	*Estimated 1963-64*	*Estimated 1964-65*
Vehicle license fees	$147.0	$157.3	$166.5
Registration and weight fees	137.7	147.7	155.6
Drivers' license fees	9.2	9.3	10.3
Other	4.4	4.1	4.4
Total	$298.3	$318.4	$336.8

Transportation Tax—$16,000,000



5% OF TOTAL BUDGET

The revenue from this source is obtained from a 1.5 percent tax on the gross receipts from the operation of motor vehicles used in the transportation of persons or property for hire and operating outside of city limits. As gross receipts of common carriers are sensitive to business conditions and population requirements, both of these factors were considered in the preparation of the estimate.

Revenue during the budget year is estimated to total $16,000,000 versus $15,200,000 for the current year and actual receipts of $14,106,000 in 1962-63.

Other Special Fund Revenue—$89,235,000

2.8% OF TOTAL BUDGET

For most part, nontax revenue accruing to special funds represents regulatory fees self-imposed by businesses and professions, or charges for special services to designated groups. In many instances the distinction between a license fee and a service charge is somewhat vague.

Fees and charges during 1964-65 will amount to approximately $41,596,000, with with fishing and hunting licenses the major item.

Oil and gas royalties earmarked for the California Water Fund and for support of public schools will amount to $33,405,000. Interest receipts from investments held for the various special funds are estimated at $7,042,000, while miscellaneous items—chiefly State Fair revenue and penalty charges related to unemployment contributions—will reach $7,192,000 during the budget year.

Table 9

SUMMARY OF STATE POPULATION, INCOME OF CALIFORNIA RESIDENTS, AND STATE TAX COLLECTIONS

Excluding Departmental, Interest and Miscellaneous Revenue

* Amounts shown during period of World War II represent civilian population, estimated income of civilians, and per capita civilian income.

† Estimated.

Population data, 1940 through 1949, are based on United States Census Bureau estimates; population, 1950 to date, estimated by the State Department of Finance.

Personal income, 1940 through 1962, from estimates by the Office of Business Economics, United States Department of Commerce. Reported totals for 1941 through 1945 have been adjusted to exclude income of armed forces personnel. Data for 1963 and 1964 are estimates by the State Department of Finance.

Income per capita computed from population and income data shown. Amounts differ somewhat from U. S. Department of Commerce estimates.

Taxes per capita computed on the basis of population January 1st, the midpoint of the fiscal year.

Table 10

COMPARATIVE YIELD OF STATE TAXES, 1945-46 THROUGH 1964-65

1 Includes the corporation income tax and includes amounts credited to the postwar employment reserve in 1945-46.
2 Including special fund share of horse racing revenue.
3 Includes the motor vehicle (gasoline) fuel tax, use (diesel and liquid petroleum gas) fuel tax, and brokers and producers fees.
4 Includes registration and weight fees, motor vehicle license fee (in lieu tax) and other fees. Part of the revenue from the motor vehicle license fee is credited to the General Fund.
5 Motor vehicle transportation tax and permit fees. All revenue from this source accrued to the General Fund in 1945-46 and 1946-47 and the early months of 1947-48.
6 Includes General Fund share of revenue from liquor license fees.
NOTE: Changes in rates and other features of these taxes have affected revenue yields during the period covered by this table, hence the data shown are not strictly comparable.

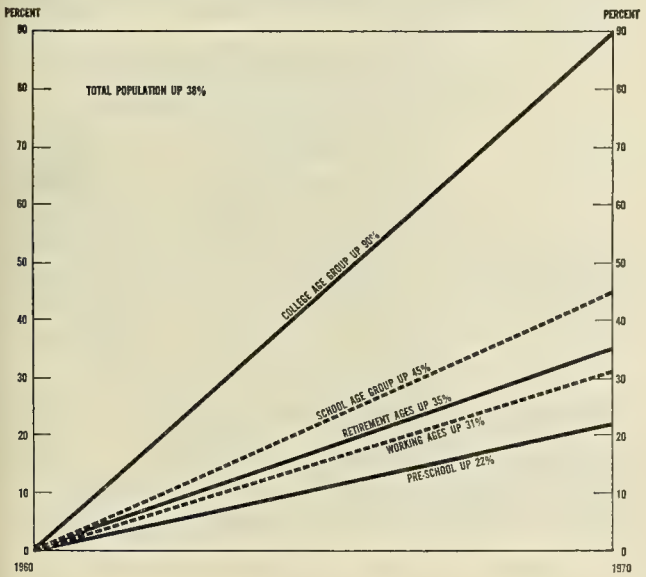
(1) Revenue and Taxation Code.
(2) This tax is levied at the rate of $1.24 per 31-gallon barrel.
(3) State Board of Equalization.
(4) Distilled spirits in excess of proof strength are taxed at double this rate.
(5) Minimum tax $100 per year, not applicable to banks.
(6) Franchise Tax Board.
(7) This tax is levied at the rate of 1.5 mills per cigarette.
(8) Business and Professions Code.
(9) Ocean marine insurance is taxed at the rate of 5 percent of underwriting profit attributable to California business. A special rate also applies to annuities.
(10) For return to cities and counties.
(11) For payment of administrative costs, highway bond interest and redemption and apportionment to counties, cities and school districts.
(12) For administrative expense and apportionment to State, counties and cities for highways, airport and small craft harbors.
(13) For support of State Department of Motor Vehicles, California Highway Patrol, county roads and state highways.
(14) For administrative expenses and state highways.
(15) Average property tax rate in the State during preceding year, which for 1962-63 was $6.92 per $100 of assessed valuation.

CHART 7

COMPARATIVE EXPENDITURES

1962-63, 1963-64, 1964-65



Expenditure Program, 1964-65

The decade of the 1960's has brought a growth pattern to California which has produced both population leadership among the states and economic leadership as measured by personal income. The advantages of this growth are mixed, however, with the problems of capital expansion and operating costs required to serve this expanded populace. The 1964-65 Budget reflects more than any other before it the cost of government directly related to such growth.

Although California has long lived with the explosive problems connected with population expansion, this decade is producing the additional internal problems within that expansion which are caused when one element of the population grows at a different rate than the remainder. This is particularly true in the younger age groups which consume so many of the services rendered by the state government.

Although this expenditure on youth encompasses such problems as correctional overcrowding and public health services for children, the major impact in the cost of state government is found in the field of education. Here we find the public school age group still exceeding our average population growth, while our college age group, supported almost entirely by state funds, is increasing at an astronomical rate which is more than double that of the total population. On the other hand, the prime working ages which are most productive of state revenue will actually increase less than any group other than preschool children during the 1960's (See Chart 8 below). Obviously, government expenditures are extremely difficult to hold down when the largest expenditure areas such as education will practically double. It is equally obvious that the resources to pay for this expansion of governmental service are difficult to provide when the most productive age groups are expanding the least.

Chart 8
GROWTH RATES, CALIFORNIA
1960-1970

This paradox of more rapid growth in the nonproductive age groups as compared with productive workers is clearly expressed in the 1964-65 budget. Although approximately $200 million more to meet the needs of regular operations will be taken from annual revenue collections, it will still be necessary to finance most investments required for state institutional building and water facilities through long-term bonded debt.

An expenditure program from current income sources of $3,263,598,639 is provided to meet the operating costs of state government for 1964-65, representing an increase of $129 million or 4% over the revised operating budget for the current year. In addition, $398 million of bond financing is proposed for capital construction, of which $163 million is included for state institutional buildings including junior colleges, and $225 million is planned for water facilities. These bond expenditures are not included in budget totals, since they are accounted as they are repaid in future years. When combined with the operating budget, however, they produce a total of $3.66 billion which best indicates the economic impact of the budget program in California during 1964-65.

Although overall expenditure increases (including bonds) of $208.9 million or 6% are recommended for 1964-65, the capital construction budget indicates a decrease of $96 million. This apparent decline is caused by the usual practice of carrying unspent highway funds forward from previous budgets and simply adding them on top of the 1963-64 program. This practice accounts for the most significant portion of this apparent decline. Apart from the decrease in capital outlay the state operations budget will increase just under $100 million, while the local assistance budget will increase slightly more than $200 million. These increases will be explained in greater detail in the explanatory text which follows.

Significant studies are now underway by both houses of the Legislature on the tax structure for state and local government. Until these studies are completed in 1965, the expenditure program for state government has been held as closely as possible to basic workload needs of existing programs. The major exception to this approach is a proposal for substantial increase in state support of the public school system. This proposal is included even though the tax studies have not been completed because the local property tax burden is becoming so strained that adequate local financial support for public schools is becoming increasingly difficult to obtain. It is also felt that this basic problem was not met by the actions of the 1963 Legislature, and a second-step program should be built on the foundation of the current school bill.

Spotlighted by this increase in public school support, aid to local government continues to expand more than twice as fast as the operations of state government itself. Assistance to local government is now consuming the major portion of the state tax base, exceeding by more than one quarter the combined operating costs of state departments and funds for capital construction of highways, institutions and other state facilities.

Local Assistance

As an indication of the growing cost of local government, the share of California's growth for the assistance to cities, counties, and special districts comprises 58 percent of the entire budget. These grants and matching programs are primarily for public school support and welfare assistance. They also include certain payments where the State merely acts as a tax collector and returns such funds directly to local government (although legally these collections must be accounted as state expenditures and included in the budget totals). These latter shared revenues account for $50 million of the budget increase, and have now reached almost $400 million in amount. Additional increases contained in the aggregate local assistance budget of $1.895 billion are found in areas of education and social welfare. The public schools alone will require $51 million for normal increases of over 235,000 children, and the augmentation program of $35 million will raise contributions in this area to over $900 million. The welfare budget is also up over $50 million because of caseload increases and the effect of 1963 legislation. In total, the local assistance budget represents an increase of $207.3 million, well over two-thirds of all increases contained in the budget.

State Operations

Costs of operating the various state institutions, departments, boards, commissions, and independent offices comprise one-third of the budget, at $1.052 billion. Included within the $98 million increase for the budget year are $86 million for normal workload needs and $12 million for program improvements in departments concerned with the areas which affect the lives of people.

The most significant increases in state operations are $32 million for the full year cost of salary increases granted January, 1963 to most state employees, and increases in excess of 10% for the University and state colleges totaling $30 million which are required to meet one of the largest enrollment increases within the history of these educational institutions. Since the most significant cost of state operations is contained in the staffing required to operate the various departmental programs it is important to note that 145,000 employees are included in 1964-65 requests at a cost of $1.05 billion from state, federal, and trust funds. Within this total are 8,418 proposed new positions of which 3,100 are included for the University and colleges, 1,000 for the highway transportation agency, 990 for the resources agency, and 800 for the correctional institutions. For summary purposes, table 24 on page A-42 contains a breakdown of existing and proposed new positions and costs for the three fiscal years reported in this budget, subdivided by function and classification.

Capital Outlay

Less than one-tenth of the total budget expenditures from current revenues are applied to capital construction—primarily from special funds dedicated for highway purposes. Total current expenditures for capital outlay will drop to $316 million, a decline of $174 million from the revised current year projections. As discussed previously this decrease is particularly deceptive because the current highway construction budget has been augmented by over $80 million from funds carried over from prior years. In addition, water facility construction from current revenue decreases $63 million as a result of the exhausting of the California Water Fund and the use of water bonds. The remaining decline represents the return to a normal development rate for parks, after a 1963 one-time appropriation of $20 million for emergency acquisition of park lands which otherwise would have been lost to the State.

Although not contained in current expense amounts, a total of $388 million in state construction is proposed from bond financing. Of this sum, $225 million will be from water bonds to pay for the full-scale construction program now underway from the Feather River to Southern California. Construction of colleges, university and other state buildings is proposed at $163 million from bond issues for institutional building. The need for additional building capacity will remain high for the next few years, thereby requiring the continued use of such bond financing for at least the middle years of this decade.

The level of construction required to meet the State's institutional housing needs will deplete the 1962 bond issue for this purpose. For this reason it is planned to request the Legislature for a new bond issue of $350 million, to be placed on the ballot for the November, 1964 general election. Approximately 70% of the proceeds of this bond issue will be earmarked for educational purposes, including strengthened support for junior college facilities to meet growth problems caused by diversion of students from the University and state colleges.

* Reflects distribution of Salary Increase and Debt Service.

In accordance with the established policy of the administration, expenditure increases have been limited almost exclusively to those functions or areas directly related to the care, treatment and education of human beings. In all other operations of state gov-

Chart 9

MAJOR DIVISION OF THE EXPENDITURE DOLLAR

1964-65

ernment, automation, increased efficiencies and other cost saving techniques have been exploited to the fullest to keep operating costs as low as possible.

Functional Distribution

This analysis of the expenditure program combines within each of the major functions of state government all of the costs chargeable thereto. Lump sum costs of salary increases, debt service, and other unallocated amounts have been distributed to these functions. For this reason alone, the amounts shown in the following narrative will not correspond with detailed budget totals in the remainder of the document. These major functional areas of government also provide a basic distribution of the budget dollar, so that the cost of government can readily be related to the proportionate share of the budget. These amounts and percentages are shown below in Table 13, and are analyzed individually in the remainder of this writeup.

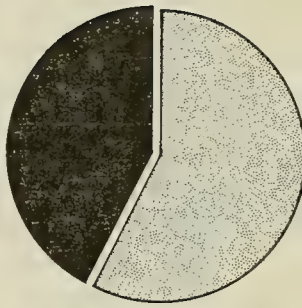

Table 13

EXPENDITURES CLASSIFIED BY PRINCIPAL FUNCTIONS

(In millions)

Function	Proposed 1964-65	Percent of Total	Change from 1963-64 Amount	Change from 1963-64 Percent
Education	$1,384.6	42.4	140.4	11.3

Other	219.9	6.8	12.2	5.9
Totals	$3,263.6	100.0	129.0	4.1

Education—$1,384,683,000

42.4% OF TOTAL BUDGET

In terms of dollars expended as well as benefits to the citizens of California, education has long been considered the single most important function supported by the State. As a result of this emphasis and because of ever-increasing enrollments this portion of the budget again constitutes the largest category of state expenditures. For the support of California's burgeoning educational system these costs cover many and diverse program elements.

California, again next year, will provide for the education of more public school children and college-age students than any other state, at a cost of $1.3 billion. Of the total budget dollar 42.4 cents will be expended on education and of each General Fund dollar 59.4 cents will be devoted to the support of California's education system.

Department of Education

The administration and general supervision of public school education through the junior college level is the responsibility of the Department of Education. Among the programs in this broad field are the apportionment of funds for the support of the public

schools; selection, printing and distribution of free textbooks for the elementary grades; and the operation of special schools for the handicapped.

The Department also acts as the cooperating agency in such Federal-State cooperative programs as vocational education, national defense education, and the distribution of surplus property.

Legislation enacted in 1963 transferred the administration of the vocational rehabilitation function from the Department of Education to a new Department of Rehabilitation. This action not only results in a greater emphasis on the rehabilitative programs but also allows more attention to be devoted to the education of California's youth.

The 1964-65 budget of the Department of Education provides for the continuation of the ongoing education programs conducted or administered by the Department. 1963 legislation added responsibilities to the Department for new or pilot programs in such diverse areas as: (1) increased assistance to the educationally handicapped, (2) emphasis on work with the culturally disadvantaged, (3) assistance to school districts in areas of de facto school segregation, and (4) a study of public school libraries. These programs are designed to assist local school districts to cope with areas such as those above which often preclude the attainment of adequate and equal educational opportunities for all children.

Local Assistance

During the budget year 4.2 million students, or almost one out of four persons in the State, will be enrolled in the public schools—kindergarten through grade 14. This cost continues at a rate far exceeding that of the general population, and will require a State contribution of $888 million next year to meet the present level of public school support. An increase of $51 million over the current year will provide funds for an additional 234,500 students during the 1964-65 school year.

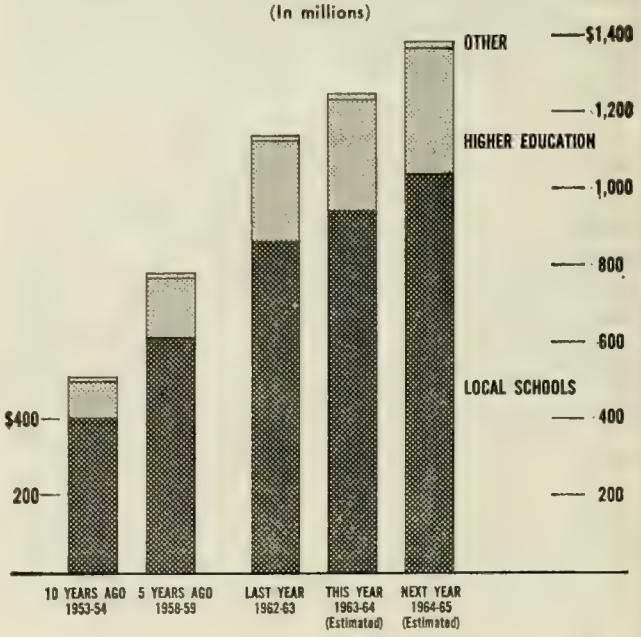
Because this long-continued growth of the public school system has put increasing, if uneven, pressure on the property tax used as the local revenue source for the school system, an additional $35 millions of State contributions are recommended in 1964-65. Representing by far the major augmentation contained in this budget, this proposal, when added to the $25 million of new money provided in the current year, will raise the level of State contribution by $60 million. Due to the present disparity of the local property tax levy between school districts, however, this State augmentation should be contingent on the adoption of fiscal reform legislation which will permit a more reasonable sharing of local effort. This budget proposes the principle of countywide equalization as a means of equalizing the present disparity in the local tax bases available for educational purposes, and obtaining additional assistance from the relatively untapped resources of islands of wealth in many counties. It would provide thereby an additional $27 million of local contributions which could be added to the $60 million of State aid to produce a total fiscal improvement of $87 million for the budget year.

Rising enrollments and new adoptions in the free textbook program for the elementary grades will again increase substantially—to an adoption level of $15 million—in 1964-65. Because the new concepts contained in the arithmetic adoption are so significant, however, the State Board of Education will attempt to advance normal delivery dates of basic texts for as many grades as possible so as to make the books available in the classrooms by this September.

Funds for child care centers of $6.2 million will provide for an estimated 3.2 percent increase in enrollment hours of attendance over 1963-64. These centers are operated by 46 school districts—primarily in the urbanized areas of the State—to provide low cost care and supervision of children whose parents must work to provide an adequate livelihood for the family.

The 1964-65 Budget includes $800,000 for assistance to public libraries as authorized by the Public Library Services Act. This new program, added by action of the 1963 Legislature, is anticipated to make a significant contribution to the improvement of public library service in California.

A Federal co-operative program to provide for retraining the unemployed with submarginal or obsolescent job skills is also included at an estimated cost of nearly $3.6 million. The Vocational Education Section of the department will supervise the training phases of the Manpower Development and Training Act Program. This training will be conducted primarily by the public schools with full reimbursement of excess costs by the Federal Government.



In addition, funds are included in the budget for grants to teachers of the physically handicapped and the mentally retarded. Many teachers of these children do not have the requisite training that has been found necessary for optimum results. This program will offer financial grants to teachers undertaking further academic training leading to full qualification.

The State will also contribute $52 million for the major share of retirement benefits for 30,000 teachers who will have retired by the end of the budget year. One-third of the $5 million increase for this purpose

Chart 10

COMPARATIVE EXPENDITURES FOR EDUCATION

(In millions)

will provide a 15 percent increase in benefits for teachers in the lowest retirement brackets, raising the minimum allowance from $70 to $80 per year of service.

Assistance to junior colleges for capital outlay purposes is a continuing and serious need. To meet this problem, the Junior College Facility Construction Law was enacted in 1963, providing $20 million in matching funds to be expended during the 1963-64 and 1964-65 fiscal years. Legislation will be proposed at the 1965 General Session to enact a sound, permanent program of state assistance for junior college construction to meet the tremendous enrollment growth that the junior colleges are now experiencing, and which they face in the near future. Expenditures for this purpose are necessary to accomplish the recommended apportionment of responsibilities for higher education among the University of California, the state colleges, and the locally administered junior colleges. Sufficient funds will be included in the proposed State bond issue for capital outlay at the junior college level to meet the responsibility of the Master Plan for Higher Education for students diverted from the University and State Colleges to the Junior College system.

Higher Education

California's system of publicly supported higher education is tripartite in nature, consisting of: (1) public junior colleges which are locally controlled, tuition free, and jointly supported by the local school districts and the State; (2) multipurpose four- to five-year liberal arts state colleges; and (3) a state university offering advanced graduate and professional education programs. So that the three complementary systems responsible for higher education may better serve the growing needs of California, the Coordinating Council for Higher Education was created in 1961. This advisory agency, representing public and private higher education and the general public is charged with co-ordinating the orderly growth and defining the proper distribution of the various functions in this field, and in advising the Governor and the Legislature regarding levels of state support for the university, the state colleges, and the junior colleges.

University of California

The proposed budget for 1964-65 provides for the largest increase in enrollment experienced by the University of California in the last 11 years. During the budget year over 7,300 additional students will raise student enrollments to 68,600, an increase of 12 percent over the current academic year.

Not only is this increase the greatest in the past decade, but the composition of student enrollments involves a continuing increase at the graduate level. Since 1954, enrollments at the graduate level have increased 50 percent more than undergraduate enrollments.

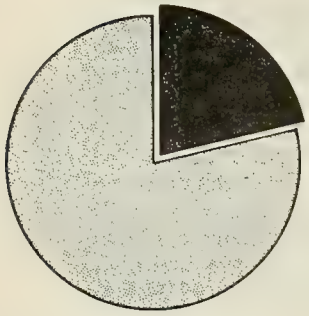
To provide for present and future operating needs of the university, $194 million from state sources will be required, an increase of $24.7 million. Future growth is being provided through the planning of new campuses at Irvine and Santa Cruz (scheduled to open in fall 1965), and an expanded liberal arts program at San Diego.

Provision has also been made to start a new law school at the Davis campus, with a first class to be admitted in 1966. The 1963 Legislature also provided that the California College of Medicine become a medical department of the university effective in January 1965 for which $64,000 has been recommended for preliminary planning and programming.

Continuing capital construction requirements for classrooms as well as research facilities and necessary land acquisition programs are budgeted at $63.7 million to provide for an estimated enrollment of 76,600 in the fall of 1966. Working drawings are included for projects to meet estimated enrollments of 81,800 students in the fall of 1967.

State Colleges

The 17 State Colleges (including San Bernardino and Palos Verdes which are in the planning stage) are administered by the Trustees of the California State Colleges. These colleges will provide academic programs for nearly 105,000 students in 1964-65, an increase of 8,300 students over current enrollments. The State Colleges have become one of the fastest growing and largest single complexes for higher education in the nation. The individual colleges, each with a geographic, curricular, and academic character of its own, offer solid basic programs in liberal arts. Beyond this, each college offers individuality in academic emphasis to provide a diversified system of academic education opportunities.



The budget for the State Colleges totals $130.2 million for current operations to provide for continuation of existing service levels, plus modest program improvements. A total of $1 million is provided for library books and processing costs as a special allowance to improve library collections over current inadequate levels. A new master of social work program is being instituted at Fresno, Sacramento, and San Diego State Colleges to meet the critical shortage of adequately trained social workers. Plans are also being made to initiate a joint doctoral program with the University of California.

Because of pressure for greater utilization of physical plant a move toward year-round operation is being considered. Funds are provided in this budget for a study of the existing curricula so that they may be converted to a four-quarter system. To establish a faculty research program, $500,000 is included for incidental expenses, such as clerical and technical assistance, operating expense and equipment to support classroom-related research projects.

In addition funds are provided for sabbatical leave benefits, out-of-state travel related to faculty recruitment, general increases in the level of support for the masters degree program, improvement of levels of staffing in top management areas, and for further utilization of electronic data processing programs in instructional and administrative areas.

The capital outlay budget totals $59.3 million. The additional classroom buildings and related facilities funded within this sum will provide for construction of the required capacity to accommodate the expected addition of more than 7,800 students by 1966, with an additional 6,200 students to be accommodated by space to be provided by the working drawing funds provided in this budget.

Highway Transportation—$692,209,000

21.1% OF TOTAL BUDGET

The second largest segment of expenditures in the budget is for activities related to highway tranportation—highway construction and maintenance, enforcement of traffic laws, registration of motor vehicles, and licensing of drivers.

During the 1964-65 fiscal year this function will account for expenditures totaling $692 million, including $314.6 million in Federal funds. Slightly over 90 percent of the total will go for highway construction and maintenance, purchase of rights-of-way, and subventions to cities and counties for streets and roads. The remainder will support the operations of the Departments of the California Highway Patrol and Motor Vehicles.

Highways

The State Highway Budget is prepared under the direction of the State Highway Commission and, in accordance with law, is submitted to the Legislature without modification by the Governor. This budget is included to provide a comprehensive report of state expenditures. The proposed expenditures for 1964-65, including federal funds, total $796.1 million.

The State Operations portion of the budget totals $76.5 million for maintenance of the State Highway system and overhead costs of the headquarters and district offices. Included here is $51 million for highway maintenance, landscaping and functional planting; $14.5 million for administration; $1.1 million for payments to and benefits for prisoners engaged in highway projects.

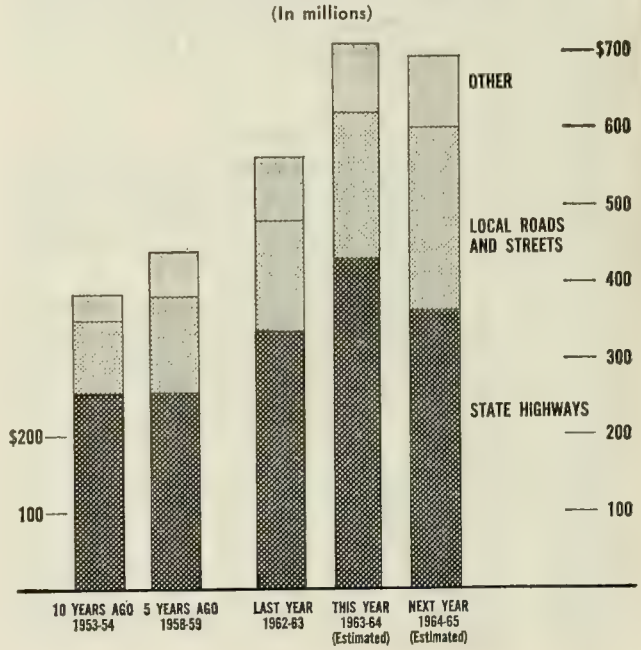
Totals, City Streets	$44,823	$49,493	$54,221	$4,728	9.6
County Roads and City Streets:					
Apportionment of motor vehicle fuel tax		$32,020	$68,264	$36,244	113.2
Totals, Local Assistance	$145,076	$189,219	$236,470	$47,251	25.0
Grand Totals	$561,258	$711,221	$692,210	—$19,012	—2.7

The recommended construction program is $586 million. The budget provides construction funds for 282 miles of multi-lane freeways, 25.2 miles of multi-lane expressways and 37.6 miles of two-lane expressways planned for future expansion to four-lane divided facilities when traffic conditions warrant, in addition to numerous widening and other improvement projects.

Priority will continue to be given to construction of the State's 2,177-mile portion of the national system of Interstate and Defense Highways in which the 1964-65 Budget contains $305.7 million in federal funds, of which $256.1 million is designated for Interstate system routes which federal law requires completion by 1972.



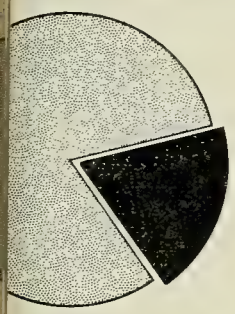
Another large segment of the Highways' budget provides for road purposes other than State highways. The largest of these non-state highway items are for construction and rights-of-way for streets and roads on the Select System of cities and counties and for improvements and maintenance work on city streets. As a consequence of 1963 legislation, the "shared revenue" for these purposes (all of which goes to counties and cities) will be increased by $36.4 million in the 1963-64 fiscal year and by $75.9 million in 1964-65.

Highway Patrol

The California Highway Patrol operations budget of $47.6 million, for the 1964-65 fiscal year, is designed to keep abreast of the increasing number of vehicles

Chart 11

COMPARATIVE EXPENDITURES FOR HIGHWAY TRANSPORTATION



and the growth in highway mileage under the jurisdiction of the Highway Patrol. To meet this need an additional 85 traffic officers are included in this budget. Implementation of 1963 legislation has resulted in the addition of a recommended 72 new positions for inspection activities related to motor vehicle pollution control and 57 new positions for the motor carrier safety program transferred this year from the Public Utilities Commission.

Department of Motor Vehicles

The principal activities of the Department of Motor Vehicles are the registration of vehicles, the licensing of drivers, and the determination of financial responsibility of individuals involved in vehicle accidents. It is estimated that during the 1964-65 fiscal year the department will register 10,858,000 vehicles and issue 3,276,000 driver licenses at an estimated cost of $44.3 million. This represents increases of 3.7 percent in registrations, 10.8 percent in driver licenses and 4.3 percent in cost of operations.

Major increases for the department are for increased workload at a cost of $1.4 million, and for the collection of use tax at a cost of $488,000 which will be reimbursed by the Board of Equalization.

Health and Welfare—$607,125,000

OF TOTAL BUDGET

The promotion and protection of Californians' well-being continues to be a major concern of the State. This involves all aspects, the physical and mental health, the economic well-being, and the restoration of both health and economic capabilities where it is lost or in danger of being lost.

Programs in this area involve a surveillance of healthful environment through the Department of Public Health, the improvement of mental health through the Department of Mental Hygiene, the restoration of the ability to earn a livelihood by the Department of Rehabilitation, and through the Department of Social Welfare the preservation of home situations and personal maintenance when economic disaster threatens.

The health and well-being of our citizens is of such great importance that all segments of government cooperate in its preservation. The Federal Government, State Government, county government, and other local governments participate both fiscally and operationally in all of these endeavors.

In 1964-65 the State is estimated to spend a total of $69.2 million in this field.

Mental Hygiene

The proposed expansion of the mental health program will require an increase of $9.7 million over current year expenditures, carrying the cost of this function to $171.8 million in 1964-65.

During 1964-65 it is planned to develop further and improve the services that make up California's comprehensive approach to the problems of mental illness and mental retardation. In regard to the mentally ill, it is expected that the planned program will make possible a further reduction in the population of the hospitals for the mentally ill. By June 30, 1965, it is estimated that the population of these hospitals will be 31,300 compared with 36,771 on June 30, 1959. The reduction during this period has been accomplished despite a rising state population and an increasing number of admissions.

Bond act program	(1,903)	(9,341)	(7,050)	(—2,291)	—24.5

For the hospitals for the mentally retarded, a continuation of the trend of both increasing admissions and rising population is expected. During 1964-65, it is estimated that 1,620 patients will be admitted and that the resident population will reach the rated capacity of 13,100 by June 30, 1965.

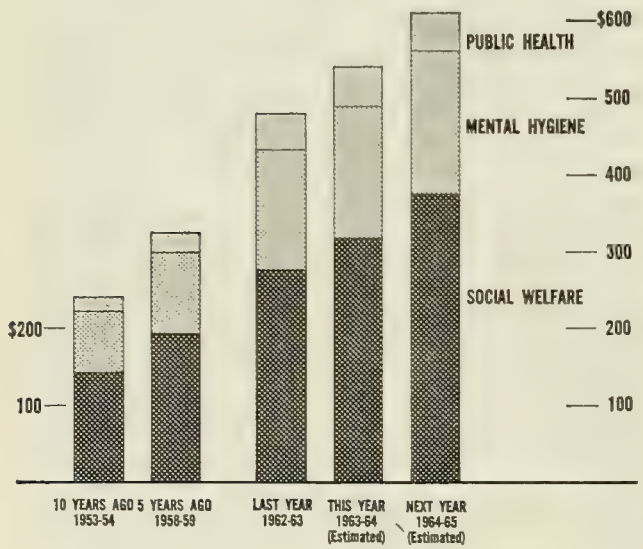
Enrichment of hospital treatment and supportive programs, expansion of various community-based programs such as home leave, family care, outpatient and day treatment services, development of the Short-Doyle community health program, and other cooperative efforts between state and local agencies have been significant factors in the success of the California program in recent years. This budget includes funds to develop further many of these services in an effort to exploit the advances made to date. Besides funds for additional staffing for increased mentally ill and mentally retarded admissions and other workload increases, an augmented program of nearly $2 million

is proposed. This amount includes $798,000 for improvement of hospital services in a variety of activities such as special drug therapy, consultative services in medical specialties, rehabilitation therapy, dental, education, and chaplaincy services, along with increases in supportive activities such as clerical, maintenance, and safety.

To improve the recruitment opportunities for qualified professional personnel and to increase the effectiveness of services offered, a total of $412,201 is included for scholarships and internships in specialized areas, student training programs, and for additional training courses and training consultation.

Also included in the augmented program is $214,000 to maintain the research program at a level comparable to that existing in the base year of 1961-62, by offsetting the increases in personnel costs that have been absorbed in the research allocation since that time.

A total of $498,691 is included for community service programs of which $410,610 is to increase the allowance for the family care home board rate to remain in a competitive position for these important services. Also included are consultation positions for administration of the expanding Short-Doyle program.



In the area of central program administration and services, $70,664 is included for new positions in support of medical services administration, mental retardation and children's services, food administration, facilities management, and hospital social service consultation.

In addition, an allocation of $11.7 million is provided to continue the dynamic expansion of community mental health services (Short-Doyle Program), and thus obviate the necessity for large numbers of citizens to leave their home communities because of mental problems. While this program was rather slow getting started, the momentum has been increasing. Amendments enacted by the 1963 Legislature, liberalizing services as well as revision of the reimbursement rate, have done much to encourage greater local participation.

Chart 12

COMPARATIVE EXPENDITURES FOR HEALTH AND WELFARE

(In millions)

The 1964-65 fiscal year will provide State reimbursing to local jurisdictions for local mental health services at a dollar level which is double that of the highest previous year. This is indicative of the dramatic change that is taking place in the local mental health field.

Capital outlay projects in the budget year, totaling $7.0 million are proposed to provide additional auxiliary facilities, to remodel outdated ward buildings, including a limited amount of air conditioning; and to improve physical plants through the correction of other deficiencies. It is also proposed to provide for the final phase of site acquisition for the replacement of the Langley Porter Institute.

Rehabilitation

A new department in the Health and Welfare Agency, the Department of Rehabilitation, was established by the 1963 Legislature and officially came into being on October 1, 1963. The new department includes 7 functions formerly administered by the Department of Education: Vocational Rehabilitation Service, Disability Certification Program, Business Enterprise Program for the Blind, Field Rehabilitation Services for the Blind, Opportunity Work Centers for the Blind, Industries for the Blind, and the Orientation Center for the Blind. The over-all objective of the Department of Rehabilitation is to intensify services to the physically and mentally handicapped in the State; to promote a higher degree of coordination of services among the several functions which were brought together in the new department; and to reduce dependency through the provision of a wide variety of restorative and retraining services to handicapped citizens in the State who otherwise are or would become public charges. Because of 1963 legislation the State became eligible for Federal financial assistance for programs formerly funded entirely from state sources. As a consequence the reduction in state expenditures exceeds the costs attributable to the establishment of a new administrative organization.

The proposed 1964-65 expenditure program for the new department totals $12.8 million which includes $5.4 million state funds and $7.4 million federal funds. Nearly $11.8 million of this total is for continuation of existing service levels and special projects, and for increases in workload in several program areas. The remaining amount of slightly over $1 million is for an augmented program of vocational rehabilitation services. This includes 45 new positions and approximately $500,000 in additional case service funds to increase services to accommodate additional high priority referrals and to give special attention to the needs of the blind, the deaf, the mentally ill, and to the mentally retarded.

These recommended increases in services are accompanied by a proposal to amend the counselor to population ratio (from 1 to 80,830 persons in the age group 16 to 64 years to 1 counselor for each 75,000 persons) and a recognition of price increases in the case service funds. The allowance of case service funds for each experienced counselor will be raised from $21,644 to $25,000 by this proposal.

Because of the federal participation in the rehabilitation program, the increase of $1 million will cost the State of California but $520,560 in additional General Fund expenditures.

Social Welfare

Expenditures in support of the activities of the Department of Social Welfare will increase $602,000 to a total of $5,149,000 in 1964-65. This includes the full year cost of a new continuous quality control program as well as provision for 50.8 new positions for workload and general program strengthening.

Payments of state funds to local government for economic assistance to the aged, handicapped and needy citizens as well as expenditures for social services and other local welfare activities will total $366 million in 1964-65. This is an increase of $52.8 million over the revised 1963-64 estimate of expenditures.

This increase results from program growth primarily related to population increases, increased grants for cost of living increases, and legislative liberalizations enacted at the 1963 General Session.

The most significant legislative change was contained in Chapter 510, Statutes of 1963, which permitted eligibility of unemployed parents in the Aid to Families with Dependent Children category. Other major changes included in this legislation were: (1) expanding the definition of disability to include unemployability; (2) providing for federal sharing in the cost of the first 30 days in county hospitals of Medical Assistance to the Aged; (3) establishing an earlier beginning date for aid for recipients of all programs; (4) liberalizing residence requirements for the blind and disabled recipients; (5) providing for the cost of living increases to disabled recipients; and (6) liberalizing property and income provisions.

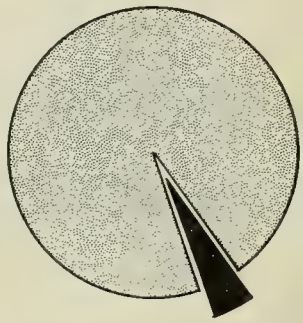
Public Health

Further emphasis on programs dealing with California's air pollution and respiratory disease problems account for most of the $1,024,000 increase in the $11.9 million support budget proposed for the Department of Public Health.

Two respiratory-rehabilitation centers at an estimated annual operating cost of $200,000 would evaluate need, and provide limited care, specialized services, and equipment for persons with severe respiratory disabilities. These centers are planned to provide services on an inpatient, outpatient, and home care basis for southern and northern California.

A reduced rate in the incidence of tuberculosis has been evident for some time although there is evidence that the decrease is slackening. However, there is a need to follow-up reactivated tuberculosis cases, make additional sanitarium inspections, and accelerate control and casefinding generally. For this purpose a medical officer is requested at an estimated cost of $23,000.

Restoration to the Public Health budget of $200,000 for air pollution research is essential if the Department of Public Health is to administer properly the pollution control program for which it is responsible.



Two capital outlay projects are proposed at a cost of $1.2 million for a laboratory building in Los Angeles and $165,000 as the State's share of $1.6 million cancer research facility in Berkeley. The Los Angeles project will replace an overcrowded leased building which must be vacated in 1966.

The $33.5 million for assistance to local agencies in 1964-65 is $1.8 million less than the estimate for the current year. This results primarily from a $3 million acceleration in the hospital construction program during 1963-64 for which a deficiency appropriation is being requested. The rate of increase in this program is expected to diminish to more normal levels next year.

The significant increase in program proposed by the assistance budget is $418,000 for diagnosis and treatment of children suffering from epilepsy, as a handicapping condition under the Crippled Children Services Program. Successful results of pilot clinics for severe epilepsy proved the value of more adequate diagnosis and treatment, thereby indicating the advantage of inclusion in the Crippled Children program.

Resources—$142,635,000

Aggregate expenditures of $142 million for the development, protection, and optimum utilization of the State's wealth of natural resources place this function in fourth position in order of magnitude. Recognition of the deleterious effects of our population growth on these resources is creating a sense of urgency for their protection which should keep this function high in importance in future budget priorities.

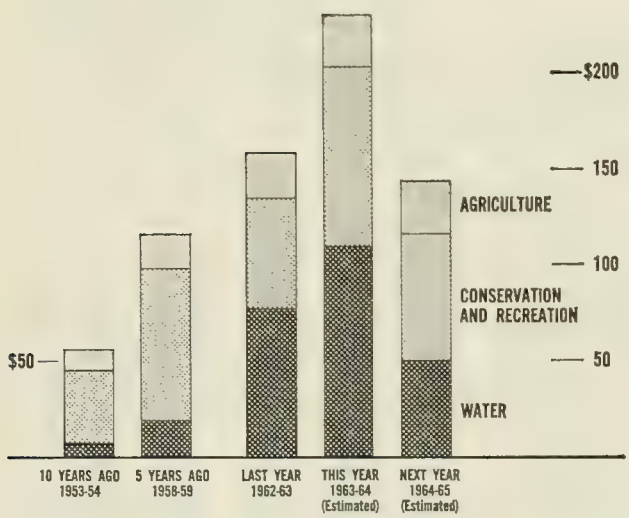
Water Resources

Water conservation and development will again be a major expenditure factor as the Feather River Project enters its third year of construction. The concrete core block for Oroville Dam is complete and work is well underway on depositing the embankment material. Other features of the California Water Development Program are on schedule, with intensive aqueduct construction activity scheduled for the North and South San Joaquin Divisions. Construction is proceeding on San Luis Dam and Reservoir, a joint federal-state project, with expenditures by the State of $50.4 million proposed for that project alone. This represents 55 percent of the cost of the work programmed as this State's share for the San Luis Project.



Intensive study is underway on pumping facilities and power sources necessary to move water over the Tehachapi Mountains and into Southern California. State expenditures for 1964-65 for the entire system of aqueducts, dams and reservoirs stretching from the upper Feather River in the north to Perris Reservoir in Riverside County are anticipated to aggregate $236.9 million, an increase of $40 million over the current year level.

The validation of revenue bonds by the State Supreme Court will permit the sale of authorized general obligation bonds. $150 million in bonds are scheduled for sale during the latter part of 1963-64 and $200 million are planned for sale during 1964-65. $50 million of bond anticipation notes were sold in November of 1963 at an interest rate of less than 2 percent. These short-term notes will be redeemed from the proceeds of the first general obligation bond sale.

Chart 13

COMPARATIVE EXPENDITURES FOR RESOURCES

(In millions)

To continue the policy of maximizing recreational benefits of the project, $1,651,000 is included for recreational development at Grizzly Valley and Del Valle Dams and Reservoirs and tree planting at San Luis and Castaic Dams and Reservoirs.

General planning activities will continue to emphasize investigations of water needs. In addition, project planning on the Eel River Diversion Project, will accelerate and the next water development projects to be undertaken in time to meet the State's ever increasing need for water.

The Reclamation Board's flood control program provides for the expenditure of $10.4 million. Included in this amount is $6.6 million to complete the state-constructed segment of the Lower San Joaquin River Project. The Department of Water Resources' portion of the State's local assistance flood control program reflects an expenditure of $12.4 million in 1964-65.

Fish and Game

For the protection, propagation and management of the State's fish and wildlife resources, the proposed budget for the Department of Fish and Game and Wildlife Conservation Board totals $12.1 million. Anticipated expenditures in the budget year are completely funded from available resources. No new programs are proposed for the budget year, and augmented programs are restricted almost exclusively to those in completely reimbursed areas.

Conservation

To protect and enhance the statewide values represented by 39,000,000 acres of timber, range, watershed and recreational lands will require expenditures by the Division of Forestry in excess of $24.6 million during the coming fiscal year. To assist in the accomplishment of these objectives the division operates through a network of strategically located fire suppression stations and conservation camps. During the current year, 2,280 Department of Corrections inmates and 360 Youth Authority wards will man 31 permanent conservation camps, 3 mobile camps and 3 temporary camps.

New conservation facilities with capacity for 340 men are scheduled to be opened in the budget year at Black Mountain in Sonoma County, Piney Creek in Monterey County, Cuyamaca in San Diego County, and Baseline in Tuolumne County.

The newly created California Youth Conservation and Training Program is scheduled for its first full year of operation in 1964-65. This program began with the conversion of the Oak Glen Camp from a regular conservation camp. In November 1963, the first of 100 young men moved into this camp to begin this pilot program.

The use of aircraft under contract in controlling and suppressing wildland fires has proved very effective. In 1964-65, additional funds are proposed for contracting for air tanker service. These funds will not provide for any increase in the number of tankers under contract, but will guarantee operators

a reasonable return on their investment without depending upon the occurrence of fires to be assured of this return. This augmented program is expected to reduce the demand for emergency fire suppression funds for air operations.

Legislation in 1963 placed added responsibilities on the division in the field of fire prevention. To meet these responsibilities, additional fire prevention officers will make it possible to investigate and prosecute more cases related to man-caused forest fires and to recover from the responsible parties expenditures by the State in suppressing wilfully set or negligently caused fires.

For the first time the department will be staffed to develop and maintain a safety program. A safety officer and clerk are provided in the Division of Administration for this purpose. The Division of Forestry alone has an accident frequency rate of 62 per million man-hours as compared with a statewide average of 22. Other state agencies engaged in similar safety programs have succeeded in materially reducing their accident frequency rates and it is expected the same results will occur in the Department of Conservation.

Additional staffing has also been provided for the Division of Soil Conservation to handle a backlog of requests from soil conservation districts for reconnaissance studies. These studies will establish which of several assistance programs a local district may qualify for.

Parks and Recreation

The state park system consists of 195 beach, park and historical monument units covering in excess of 700,000 acres. Thirty of these units are operated by local governments. There are 5,355 campsites and 5,274 picnic units available for use at the present time. During 1964-65 an additional 636 campsites and 125 picnic units will provide added recreational developments to meet the backlog of user demand. Another special demand area will be met with the opening of a second tour at Hearst Castle. Heavy use of all these facilities will require a stepped-up maintenance program, and a new fee schedule adopted this year will assist in offsetting these increased costs.

In the area of recreation associated with state water projects, Beaches and Parks working with Water Resources, have provided initial development at Frenchman and Antelope Reservoirs which were constructed in accordance with the California Water Development Plan. Beaches and Parks is currently engaged in planning for developments at three additional reservoir sites. Initial facilities for recreation will be available at the time these reservoir projects are complete.

A major land acquisition program is underway in the Division of Beaches and Parks financed from a special appropriation of $19.1 million at the 1963 session. Under this accelerated program, 21 projects will be acquired which would otherwise have been lost to the State. In addition, a bond issue for $150 million for recreational acquisition and development projects will be presented to the people in November 1964.

The Division of Small Craft Harbors recently assumed responsibility for registration of all vessels from the Department of Motor Vehicles. The division regulates over 300,000 small craft owners. This number is increasing by approximately 12,000 annually. The activities of this division are expanding to handle increased registration and implement new legislation that provides for boating safety and regulation.

Legislation in 1963 increased the amount to be transferred annually from the Motor Vehicle Fuel Fund into the Small Craft Harbor Revolving Fund from $750,000 to $2,000,000. In addition, starting on July 1, 1964, all proceeds from licensing and registering vessels will go to the Small Craft Harbor Revolving Fund rather than to the General Fund. Also, all funds in the Small Craft Harbor Revolving Fund will now be subject to specific appropriation by the Legislature.

These legislative measures dedicated funds coming from boating interests to programs furthering boating developments and regulation, and new boating facilities are therefore proposed to be financed from the Small Craft Harbor Revolving Fund.

Agriculture

The Department of Agriculture will receive modest increases to meet additional demands for inspection and other services related to the growth of the State. New responsibilities have been assumed relating to the district agricultural associations during the current year as a result of the transfer of the Division of Fairs and Expositions to the Department of Agriculture from the Department of Finance. In conjunction with the federal government, a program aimed at eradication of hog cholera will be undertaken during 1964-65 as part of the national effort to bring this disease under control.

State Fair

The State Fair and Exposition, in addition to its customary fall event, will present a 25-day Spring Fair from March 11 to April 4. This program will include a statewide high school industrial arts competition; a showing of the permanent State Fair art exhibit; a textile show; Angus show and sales; and will be highlighted by a 21-day quarter horse racing meet. Costs of this program will be offset by revenues except for state support of the high school industrial arts program.

The State Fair Horse Show, having been staged for over 100 years, is the oldest in the Western United States. It was moved from the Fall Fair to the Spring Fair in 1961 because of a conflict in stabling for both race horses and show horses in facilities that are barely adequate for only one group. However, by moving the Spring Fair dates to March and April, and with the addition of a racing program, the stabling problem again arises. As the earlier dates are unsuitable for a horse show, it is, therefore, proposed to hold the horse show in mid-June when stables are available, and at a time during which weather should be favorable. The horse show program is budgeted on a self-supporting basis at $81,500.

Corrections—$105,697,000

3.3% OF TOTAL BUDGET

Among the most firmly established and traditional of governmental operations is the protection of society through the confinement of violators of the penal laws. Because under California's laws all but a limited number of persons committed to the state's correctional institutions will be released eventually, the programs conducted by the Department of Corrections and the California Youth Authority emphasize rehabilitation rather than retribution. The state's program in this area consists of 2 principal elements—imprisonment, therapy, and training; and the guidance and supervision of those released on parole.

During the 1964-65 fiscal year, the Departments of Corrections and Youth Authority will operate 23 institutions and 41 conservation camps. In addition to these facilities, the State will contribute $3.7 million for assistance to local communities for the establishment and maintenance of juvenile homes and camps.

Department of Corrections

The Department of Corrections will be charged with responsibility for 40,503 persons during the budget year. Of this total, 27,530 will be incarcerated in one of the department's 14 institutions or in its camps and 12,973 will be under parole supervision.

An expansion of the employment of suitable inmates in the conservation of our natural resources will continue to develop. During 1964-65 approximately 4,200 inmates will be involved in the conservation program. Rather than 1 conservation center and 2 branches, legislation of 1963 created 3 separate conservation centers. The third center, Sierra Conservation Center, now under construction, will be completed during 1965.

Chart 14

COMPARATIVE EXPENDITURES FOR CORRECTIONS
(In millions)

The nonfelon narcotic treatment and control program initiated in 1962-63 will involve approximately 3,100 persons. In addition to institutional confinement and treatment conducted at the California Rehabilitation Center, the program involves intensified parole supervision and treatment.

In light of the continued growth in prison population which is directly related to total state population growth, and in the face of increasing costs of building and maintenance, it is particularly important that the parole and associated programs be given proper emphasis. To this end, a revision in parole supervision and services is proposed. In recognition of the fact that all parolees do not require the same level of supervision, the parole population will be divided into 3 distinct classes, each receiving a different level of service. The classifications will differentiate between those who may be prone to violence or require special services, those who require a normal level of supervision, and those who are expected to succeed with minimum guidance. This program will be initiated by including only a portion of those deemed to require special services at the increased level of supervision and a portion of those classified as the regular group. All parolees in the minimum group will be given supervision at a reduced level. To further strengthen the parole function, a training program for new parole agents will be initiated.

As an adjunct to the parole program, the community center and halfway house programs are proposed for expansion. The expansion will include two centers for nonfelon narcotic addicts established on an interim basis in 1963-64 and the State's assumption of full responsibility for the East Los Angeles halfway house which has been financed up to this time from federal funds.

During the 1963-64 fiscal year, an administrative reorganization transferred the administration of the women's parole function to the Division of Parole and Community Services. This was done by agreement

with the Board of Trustees, Institution for Women.

The major proposal of the capital outlay program consists of new construction at the Correctional Institution at Tehachapi, which will add a 640-bed living unit plus 30 hospital and 20 isolation beds adjacent to the existing facility, and 160 additional beds at the existing facility. Other proposals designed to provide capacity include planning and working drawing funds for a 1,200-man special security unit at Vacaville and site acquisition and planning funds for a medical correctional institution in Southern California.

This latter unit of 1,200 capacity is planned as a part of a proposed 3,600-bed complex which will be necessary to meet the projected number of male felons in institutions by 1972.

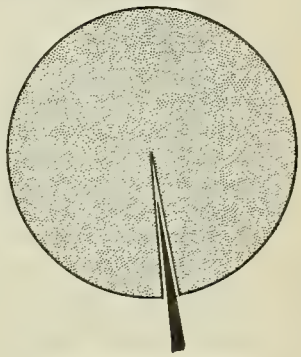
Department of the Youth Authority

The Department of the Youth Authority is smaller than the Department of Corrections both in number of wards and size of facilities. Youth Authority, however, provides a more intensive treatment in its institutions and wards are incarcerated shorter periods of time than inmates in a Department of Corrections institution. The more intensive treatment program is justifiable in that society has a greater stake in the rehabilitation of youth. Being younger, the released ward presents a greater potential career as a productive member of society than does the Department of Corrections parolee.

A total of $31.2 million is recommended for operating and maintaining nine institutions and four forestry camps, housing 4,964 wards. In addition, an average of 13,289 wards will be under parole supervision. Parole has proved to be a more economical way of rehabilitating wards and helping them to readjust to a free society as productive and useful citizens.

The budget provides $431,000 for increased surveillance, supervision and treatment of wards who have a history of, or potential for, violent acts against persons and property. This new approach to parole management will allow parole agents more time for treatment of that segment of the parole population which appears to be violence-prone. To prepare newly hired parole agents to handle their caseloads in a more intelligent and sophisticated manner, a two-week training program for the new agents is planned.

A proposal to provide funds for clothing and incidental expenses for wards placed in foster homes is included in the budget. This proposal also includes placement of those cases needing special care. Correction of staffing deficiencies in the most critical areas of need is also proposed, totaling $212,000.



An increase in the rate of commitments plus general statewide population increases has caused institutional populations to grow at a rate greater than originally anticipated when planning the 1963-64 and 1964-65 Budgets. As a result of this, $1,500,000 has been included in the budget to develop programs to handle excess population. Of the total amount, $500,000 is allocated for 1963-64 requirements and $1,000,000 for needs in 1964-65.

Communities that combat juvenile delinquency and provide rehabilitation at the local level will continue to share in state local assistance programs. A total of $535,000 is proposed to aid cities and counties in the construction of 205 detention beds and $3.2 million is provided in 1964-65 to help maintain a population of 2,798 boys and girls in 45 juvenile homes and camps. Assistance to the City of San Diego for checking juveniles crossing into Mexico at the San Ysidro Border Station is continued.

Despite efforts devoted to the struggle against juvenile delinquency in terms of more effective correctional and rehabilitation programs, additional facilities will be needed.

The capital outlay program totals $17,342,000 for 1964-65. The major portion of this program includes construction of the second and third units at the Northern California Youth Center near Stockton to provide an additional 800 beds at a cost of $12.6 million. Construction of an administration building plus equipment for the first institution together with planning funds for a laundry and a girls unit will total another $1,965,000 at this center. Other items include construction of a 100-bed reception center at the Ventura School for Girls and a living unit at Fred C. Nelles School for Boys. Funds are also included for initial planning for a Southern California Youth Center, to adjoin the present Youth Training School at Ontario.

Fiscal Affairs and General Administration—$52,871,000

1.6% OF TOTAL BUDGET

Judged by any criterion, California State Government is a major business. It differs somewhat, however, from activities in the private sector of the economy in that the administration of governmental funds represents a public trust. For this reason every effort is made to assure the highest levels of integrity and economy in conduct of the State's business affairs.

Included within this group are the tax collection agencies, executive, business management, general services, and similar activities.

Tax Collection

Although the major tax collection responsibility continues to be divided among the State Board of Equalization, the Franchise Tax Board, and the State Controller, the Department of Motor Vehicles will enforce use tax provisions regarding motor vehicles for the Board of Equalization starting in the current year.

The 1963 Legislative Session extended the coverage of the use tax to certain in-state purchases of automobiles. This tax as well as the use tax on automobiles purchased out-of-state for use in California will be collected for the Board of Equalization by the Department of Motor Vehicles at the time of registration of the vehicle. The cost of this collection service is to be reimbursed to the Department of Motor Vehicles by the Board of Equalization.

Bond act program	(121)	(560)	(438)	(122)	—21.8

Tax laws and requirements are among the most complex in contemporary society. Every citizen is affected. Self assessed tax programs depend upon each taxpayer's understanding and cooperation. With the influx of new citizens to our State and the frequent updating of tax laws, misunderstandings as to taxpayer's responsibility frequently occur. It is proposed to reduce these misunderstandings and to assure that state tax law requirements are presented in easily understood language by including tax information programs for the Franchise Tax Board and the State Board of Equalization.

The Franchise Tax Board's Data Processing System, authorized by the 1963 Legislature for installation in Mid 1963-64 will operate on a full year basis for 1964-65. This system will permit the electronic processing of information by automation from the Internal Revenue Service data, the accounting of personal income tax receivables, the statistical analysis of returns, and the computation of the annual bank and corporation tax rates.

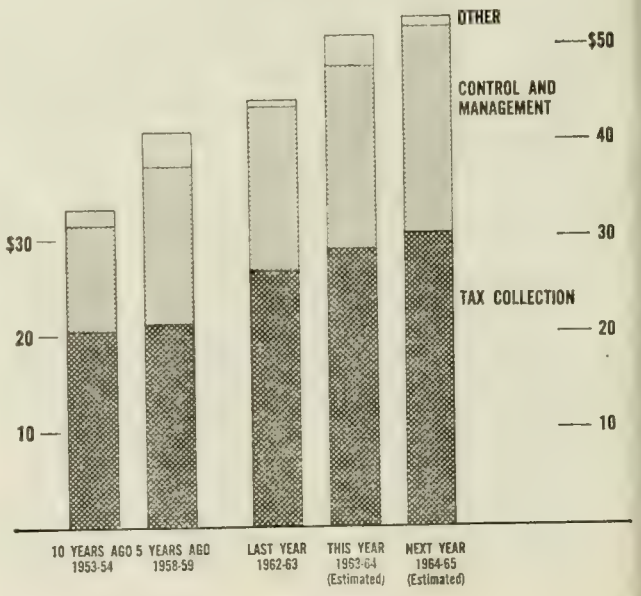
General Services

The new Department of General Services authorized by the 1963 Legislature combines the business management activities to provide centralized services in State Government. Specialized skills and techniques in the field of architecture, property acquisition, construction, building maintenance and protection, purchasing, printing, transportation, communications and administrative hearings are among the more significant activities included herein to produce greater efficiency in State Government. The new State Fair will be planned and developed through a non-profit corporation which will be directed by the State Exposition and Fair Executive Committee.

Finance

The transfer of business services to the newly created Department of General Services enables the concentration within the Department of Finance of the general supervision over State Government's fiscal policies. A new Office of Housing is proposed within this budget to develop a housing program to meet the growing needs of California citizens. The administration will also request enabling legislation creating the Office of California Development at the 1964 Session of the Legislature. This Office of California Development is planned to stimulate the State's economy through vigorous promotion of our State's industrial and agricultural products, tourist attractions, world trade significance, and plant site and labor force potential.

Secretary of State



During election years the Secretary of State publishes and distributes pamphlets containing the text of proposed amendments to the constitution, propositions and other ballot measures together with arguments thereon. It is anticipated that a School Building Aid Bond issue permitting authorization of the Public School Building Program will appear on the June primary ballot. The estimated cost of $60,000 is reflected in 1963-64. Expenditures for measures appearing on the November general election ballot are estimated at $190,000 and are included in the 1964-65 budget.

To prevent the steady deterioration of many historically valuable records held by the Secretary of State, it is planned to add a small records preservation laboratory which will preserve permanently a sampling of the more important documents. This laboratory will be staffed with only one position, and after the initial equipment investment, the annual cost will be modest in relation to the value of the records so preserved.

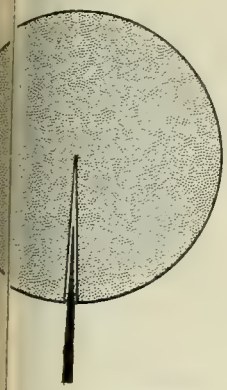


Chart 15

COMPARATIVE EXPENDITURES FOR FISCAL AFFAIRS AND MANAGEMENT

(In millions)

Business and Commerce—$34,673,000

OF TOTAL BUDGET

Included within this category are the expenditures of the several agencies of the State Government concerned with regulating and licensing business, commercial, professional and occupational enterprises in California. The agencies comprising this functional category are the Publice Utilities Commission, the Department of Professional and Vocational Standards, the Department of Alcoholic Beverage Control and the Appeals Board, the Department of Investment, and similar organizations. Concurrently with and as a direct result of the continued growth of the State's economy, the number of businesses and individuals subject to regulation has increased continuously in the past four years.

Public Utilities Commission

Over the last few years, the Public Utilities Commission has been actively participating in Federal Power Commission proceedings involving the pricing of out-of-state natural gas. In 1963 the Federal Power Commission ruled in favor of California and ordered the El Paso Natural Gas Company, the major supplier of the state's natural gas, to refund a total of $30.5 million to California consumers. This refund was passed on directly to the customers of the California utilities by credits to their monthly statements. In late 1963, as a direct result of negotiations between the El Paso Natural Gas Co. and the Public Utilities Commission, the Federal Power Commission confirmed a second refund of an additional $95.9 million to California consumers making a total of $126.5 million in direct refunds to California consumers. Further orders of the Federal Power Commission and commitments on the part of the producer, when converted to dollars, will amount to approximately $74.4 million in reduced rates over the three-year period beginning in 1963. The combined refunds and savings exceed $200 million.

The California Commission is continuing to press for improved pricing methods for production of natural gas at the wellheads. These improved pricing methods are being brought about by increasing the B.T.U. content as well as lowering the price per cubic foot. If these efforts are successful California consumers will once again be recipients of an estimated $62.9 million in refunds plus an estimated $21 million in reduced rates over a three-year period. Until such time as the California Commission is satisfied with the pricing of imported natural gas no reduction in staff is expected.

In view of recent railroad crossing disasters, the Commission has concentrated several members of its staff on the problems of private railroad crossings, the impact of urbanization on existing crossings, and the relocation of industries along railroad right-of-way. The Commission has included three new positions in the 1964-65 Budget to accelerate its study of this problem.

Real Estate

The enactment of new out-of-state and in-state subdivision laws by the 1963 Legislature highlight the activities of the Division of Real Estate in 1963-64 as well as in future years. This new legislation vests in the Division authority to deny the right to sell or offer to sell to California residents any out-of-state or in-state subdivided land offering until standards and conditions established by law and rules adopted by the Commissioner have been fulfilled. As a result of the enactment of these statutes great strides have been made in the prevention of the fraudulent and unscrupulous land sale practices.

Savings and Loan

In 1963 the Division of Savings and Loan reported that their investigations had disclosed questionable lending practices by a number of state-licensed associations. To preserve the financial integrity of these associations, as a matter of public interest and con-

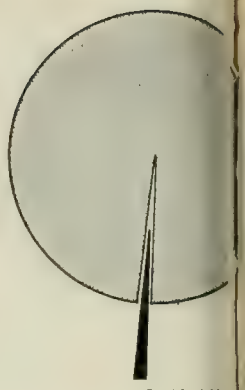
cern, the Division has initiated an accelerated audit and investigation program to curb and discourage questionable lending and financial practices. Initially, this program will be on a limited scale, but expansion is planned in 1964-65 and further emphasis in this area is planned until such time as the Division is certain that the industry is responding favorably to the increased regulatory efforts.

Alcoholic Beverage Control

The 1963 Legislature increased the regulatory authority of this Department by adding statutes that covered the enforcement of the Fair Trade Laws as applied to the sale of Alcoholic Beverages in California. To enforce these new laws, a total of 35 new positions were added in 1963-64 and are continued on a permanent basis in 1964-65.

Department of Professional and Vocational Standards



The Department of Professional and Vocational Standards coordinates and supervises the administrative and fiscal affairs of 30 member boards, bureaus, and commissions in addition to four of its own divisions. These boards, bureaus, and commissions regulate in excess of 600,000 persons practicing more than 50 occupations or professions. In addition to the estimated 1,964 positions, consisting of 259 board and committee members, 605 permanent employees and 1,100 part-time positions, a total of 61.5 new positions are included in 1964-65. With the exception of a relatively few positions related to legislation enacted in the 1963 Session, most of the new positions are necessary to handle increased workload.

To curb the growing unethical practices of electronic repair dealers, the 1963 Legislature created the Bureau of Electronic Repair Dealer Registration which will require permanent authorization in 1965. This Bureau will function in a manner similar to other boards and commissions in the Department by adopting uniform standards of competence and performance and the licensing of persons who are engaged in this field.

In addition, the 1963 Legislature enacted laws to regulate marriage counselors and provided for the Director of the Department of Professional and Vocational Standards to administer these laws. This regulatory body was created to insure that only those persons meeting the standards of competence and conduct established by the Director are permitted to practice this profession.

In response to industry-wide concern over the level of competence of unlicensed building designers, the 1963 Legislature also enacted laws requiring building designers to register with the Board of Architectural Examiners. These new registrants will have until the year 1972 to become qualified as licensed architects. Subsequent to that date, only those persons meeting the Board's requirements will be licensed.

Public Safety—$23,769,000

The eighth in the categories used in this analysis is composed of those agencies responsible for the protection of the public and the preservation of law and order: the Disaster Office, the Fire Marshal, the Department of Justice, the Military Department, and the Department of Veterans Affairs.

Disaster Office

The ever-present possibility of natural disaster, coupled with the continuing state of tension in international politics, requires that the Disaster Office maintain its readiness and capability to perform its role: co-ordination of emergency relief operations.

Principal items of increase in the Disaster Office budget are in programs for the replacement of deteriorated stockpiles of drugs and other medical supplies and for the replacement of worn-out fire trucks. These essential items, plus certain improvements in communications equipment, necessitate increasing the budget for this agency to $1.4 million.

State Fire Marshal

The budget for the Fire Marshal reflects an increase in direct regulation and enforcement and a continuance of the traditional consultative role. The positions added in this budget are to meet expanding workload in regulatory programs for fire prevention and protection. Particularly significant this year is the addition of a fire studies specialist to compile and analyze

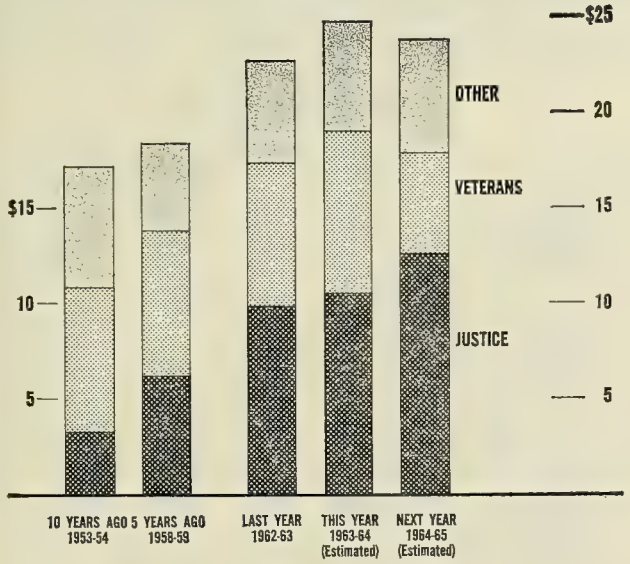
data on fires and explosions in schools, institutions, and public assembly structures. This will fill a previously unmet need and provide a basis for program planning and evaluation in the office of the State Fire Marshal.

Justice

In 1963 the Department of Justice initiated action to obtain a decision from the United States Supreme Court for a definition of the 3-mile off-shore limits, whether or not the State rather than the Federal Government has the authority to issue drilling permits to the disputed off-shore areas and a determination of entitlement to oil royalties from wells situated in these areas. In the event that the current out-of-court negotiations fail to produce a mutually satisfactory agreement, the department is continuing to gather evidence and prepare briefs essential for formal court proceedings.



The 1964-65 Budget continues to provide funds for support of the Colorado River litigation, but at a reduced level compared to 1963-64 including the deletion of fees paid to special counsel in this case. The court's decree, which was adverse to California, ordered the parties to prepare evidence of "present perfected rights" which will be submitted to the court, probably in mid-1966. No specific date has been set by the court when the allocation of water, based on the evidence of "present perfected rights," will be made to the participating states. Accordingly, funds will be recommended for inclusion in the State's budget at this reduced level through fiscal year 1965-66.

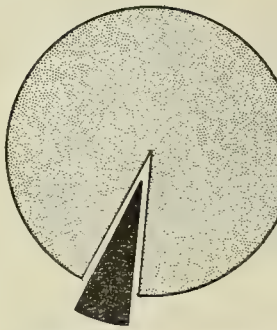
Since September 1962, a total of 609 claims and 133 tort actions have been filed against the State which amount to an estimated $56.9 million. As a result of legislation enacted at the 1963 session, the department is now able to begin handling this unusual caseload, much of which will involve prolonged litigation.

Chart 17

COMPARATIVE EXPENDITURES FOR PUBLIC SAFETY

(In millions)

Military Department



The Military Department includes the California National Guard, the California National Guard Reserve, and the California Cadet Corps. The purpose of the National Guard is to provide an organization prepared for federal mobilization in time of national emergency. The National Guard Reserve is the cadre for internal security if the California National Guard is called into active federal service. The California Cadet Corps provides a program of military education for high schools and junior colleges. Staff strengthening of certain reorganized functions is provided in the budget year.

Veterans Affairs

The major activities of the Department of Veterans Affairs are operating the Veterans' Home of California, assisting California veterans in the purchase of homes and farms, providing financial assistance for education of veterans and their dependents, and operating a claims and rights service.

Since the state program of educational assistance to veterans is no longer a priority item for General Fund support, it is proposed that the program be financed from surpluses in the Farm and Home Building Fund. Because of the availability of this special fund surplus, financing for the education of dependents of veterans is also transferred from the General Fund to this fund. At the Veterans' Home, additional capacity will be provided in the hospital, and a training program will be inaugurated.

Other Expenditures—$219,935,000

6.8% OF TOTAL BUDGET

Because of the diversity of State programs, there are a number which cannot be readily and appropriately included in any of the foregoing eight major functional groupings. To provide the comprehensive overview of the State's budget intended by this analysis, these activities are covered in this final category. Within this grouping are included the costs of the legislative and judicial branches of California's government and the Departments of Employment and Industrial Relations.

Of the $220.4 million in expenditures programmed for this functional area it is most important to recognize that more than $176.2 million is for assistance to local governments—payments to cities, counties, and districts of tax collected by the State but returned to these local jurisdictions for their use.

Judicial

As a result of a State Supreme Court decision requiring appointment of counsel when requested by an indigent, appellant costs for criminal appeal fees in the Supreme Court and several District Courts of Appeal are estimated to increase $81,350 in 1963-64 and $65,350 in 1964-65. Provision is made in the Judicial Council budget to develop a much-needed program of improved informational services within the court system as well as a public information program to improve public understanding of judicial actions.

In Local Assistance for the State's share of salaries of Superior Court Judges there is an increase of $142,000 in 1964-65 as a result of 12 new judgeships authorized at the 1963 General Session of the Legislature. Since 11 of these judgeships became effective during 1963-64 nearly $102,000 more will be required in the current year. These additional Superior Court judgeships coupled with 18 new Municipal Courts increase the state's contributions to the Judges' Retirement Fund by nearly $20,000 in 1963-64 and $24,000 in 1964-65.

To provide sufficient funds to pay retirement benefits it will be necessary to increase both the state and members' contribution rate. This rate increase will add $518,400 to the State's contribution for judges' retirement in 1964-65. Adjustment of the retirement contribution, together with a proposed increase in judicial salaries, will be the subject of legislation to be submitted at the 1964 session.

Employment

Although the State Department of Employment is supported largely from federal subventions and Trust Funds and such expenditures are not included in the budget totals, the size and significance of this agency justify review here. Program costs will increase from $774 million in 1963-64 to $867 million in 1964-65, including increases of $76 million in unemployment benefit payments, $11 million in disability insurance benefit payments, and $6 million in administrative costs. Of continued significance in the programs of this agency are the job training activities being conducted under provisions of the Federal Manpower Development and Training Act in cooperation with the Departments of Education and Industrial Relations. It is estimated that 13,000 trainees will be enrolled in courses under these programs at a cost to the Department of Employment of $5,784,000 in 1964-65. In an effort to meet a farm labor supply problem occasioned by the anticipated termination of Public Law 78, which authorized the Mexican Farm Labor Program, all phases of the farm labor service are being strengthened by the addition of 96 positions in 1964-65.

Provision has also been made for the activities of the new Commission on Manpower, Automation and Technology whose purpose it is to conduct a continuous appraisal of the impact of changing technology on California's work force. This Commission was authorized during the 1963 General Session of the Legislature and it is expected that much useful information will be developed through its efforts.

Industrial Relations

To meet the objective of improving the welfare of the wage earners of the State, a significant increase of 14.5 over 1963-64 levels for the budget of the Department of Industrial Relations is necessary. Included in the 1964-65 Budget total of $17.8 million, is an increase of 35 additional safety engineers to strengthen efforts to reduce California's work injury rate, particularly in the high-hazard construction industry. Complaints of discriminatory employment practices continue to grow, requiring moderately increased staffing in the Division of Fair Employment Practices. Still more marked increases are being experienced in complaints regarding employment conditions of women and minors, and in the 10% caseload

increases estimated for both 1963-64 and 1964-65 in wage payment and other labor law enforcement functions. In order to handle this workload 43.6 positions at a cost of $379,000 have been added in the Divisions of Industrial Welfare and Labor Law Enforcement.

The addition of 20 referee teams in the Division of Industrial Accidents at a cost of $784,000 is necessary because of filings which have been increasing by 15% each year. The activities of the new Workmen's Compensation Study Commission, established by 1963 legislation and reported in this budget, are expected to be helpful in determining causes and characteristics of the workload in this area.

Of considerable importance in the Division of Apprenticeship Standards, and in addition to the increased workload activities on apprenticeship, are the on-the-job training activities being carried on under provisions of the federal Manpower Development and Training Act; and the provision for establishment of Apprenticeship Training and Information Centers in cooperation with the Departments of Employment and Education.

Less: Amounts in Sinking Funds available for payment of principal						3,612,718	
NET BONDED DEBT						$2,752,671,282	

1 The Sacramento State Building Interest and Sinking Fund has a balance of $1,443,811.88 in excess of $3,000,000 required to redeem all of the outstanding bonds.

2 The Motor Vehicle License Fee Fund provides the amount by transfer to the General Fund to meet the debt service payment.

3 The school districts of the State of California provide funds to pay part of the general obligation bonds annually.

4 Education Code Section 7910.2 authorizes sale of $20,000,000 in bonds for the purpose of repaying the General Fund money previously appropriated from the General Fund at the 1952 Second Extraordinary Session.

5 The operating revenues of the California Water Resource Development Bond Fund, the San Francisco Harbor Improvement Fund, the Small Craft Harbor Improvement Fund, and the Veterans Farm and Home Building Fund of 1943 service the debt service costs that are payable from the General Fund.

6 Callable on and after July 2, 1951 by lot.

7 Callable on and after July 2, 1955 by lot.

8 Callable on and after January 1, 1941 by lot.

9 Chapter 103, Statutes of 1958, First Extraordinary Session, authorized the issuance of $10,000,000 for the development of Small Craft Harbors. These bonds have been sold. The chapter authorizes $50,000,000 for the development of the San Francisco Harbor and $22,500,000 in bonds have been sold.

GENERAL ANALYSIS

Objectives

The Legislative Counsel Bureau provides legal assistance to the Legislature and state officials in drafting legislative measures, and gives legal advice, acts as counsel for committees of the Legislature, and represents the Legislature and legislators in litigation. It maintains indexes, tables and digests of all legislative measures, and edits, compiles and indexes state legal publications for the State Printer.

Program and Performance

The Legislative Counsel acts as the legal adviser to the Legislature. Legal services furnished include opinions, bill drafting, counseling and attendance as counsel at meetings of committees of the Legislature. The attorney-client relationship is maintained, and all work is confidential.

In addition, the office maintains an Indexing Section, which indexes all bills introduced, maintains a statutory record, and acts as editor and compiler of all state-published codes and the official publication of the statutes. The work of this section during the sessions is published as Interim Subject List, Tables of Sections Affected and Final Subject List.

The increase in total expenditures in the budget year reflects the change from the 30-day Budget Session to the 120-day General Session.

GENERAL ANALYSIS

Objectives

This Commission examines the law to discover defects and recommends needed changes, receives proposed changes in the law necessary to modify or eliminate obsolete or unconstitutional provisions and reports proposed studies to the Legislature.

Program and Performance

The commission consists of a Member of the Senate appointed by the Committee on Rules, a Member of the Assembly, appointed by the Speaker, and 7 additional members appointed by the Governor with the advice and consent of the Senate. The Legislative Counsel is an ex officio nonvoting member of the commission.

The workload of this commission is determined primarily by the number of studies assigned to it by the Legislature. Because studies are scheduled for completion just prior to the General Session of the Legislature, workload statistics are presented in terms of fiscal periods of 2 years.

	Actual 1959-61	Actual 1961-63	Estimated 1963-65
Studies	10	3	3

A study on sovereign immunity was one of the studies upon which a substantial number of recommendations were made to the 1963 General Session of the Legislature. A recommendation of the uniform rules of evidence will be the major recommendation to the 1965 General Session of the Legislature.

GENERAL ANALYSIS

Objectives

In conjunction with other states the commission drafts and presents to the Legislature uniform laws deemed desirable and practicable by the National Conference of Commissioners on Uniform State Laws.

Program and Performance

The Commission is composed of four members appointed by the Governor, the Legislative Counsel as a member ex officio, and two legislators. The program is maintained at the same level as previously authorized. Provision is made for the attendance of the commissioners at meetings of the national conference, and for California's contribution to the conference. Contribution to the conference by the states is based on population which accounts for the increase in 1964-65.

COMMISSION ON SENATE APPORTIONMENT

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
SUMMARY			
TOTAL EXPENDITURES			
Senate apportionment study *(General Fund)*	–	–	–

GENERAL ANALYSIS

The Study Commission on Senate Apportionment was established by Chapter 607, Statutes of 1961.

The commission consisted of 2 Members of the Senate, 2 Members of the Assembly and 5 nonlegislative members appointed by the Governor.

The commission could do any and all things necessary or convenient to enable it to exercise the powers and perform the duties in studying and analyzing all facts relating to representation in the State Senate, including proposals designed to modify the present federal plan of apportionment by increasing the representation of extremely heavily populated counties without destroying or rendering ineffective the tested principles of equitable representation for all geographic areas of the State.

The commission completed a report to the Governor and the Legislature during the 1961-62 fiscal year.

The members of the commission served without compensation. Each member was allowed actual travel expenses incurred in the discharge of his duties.

The existence of the commission terminated on July 3, 1962.

CONTRIBUTION TO LEGISLATORS' RETIREMENT FUND

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
	SUMMARY				
	TOTAL EXPENDITURES *(General Fund)*	$160,000	$315,000	$350,000	$35,000 (11.1%)

GENERAL ANALYSIS

The State's contribution to the Legislators' Retirement Fund represents that portion of benefits to be paid from the fund which is not provided by the accumulated contributions of the members receiving such benefits, Chapters 2103 and 2174, Statutes of 1963, provide for increases in benefits payable to retired members by increasing allowances, paid or payable, proportionately to cost of living increases and increasing the allowances for members with more than 15 years of service. The funds provided for the 1963-64 fiscal year have been found to be inadequate by approximately $12,000 because of an estimated increase in new requirements. The appropriation for the budget year is increased over previous levels based on the expected deficit and on revised estimates of the cost of statutory allowances and benefits.

GENERAL ANALYSIS

The Supreme Court reviews cases including appeals in cases of equity, cases at law involving title or possession of real estate, taxation and probate matters, and death penalty cases. It also has jurisdiction to review all cases decided by the several district courts of appeal. In addition, it has original jurisdiction to issue writs of habeas corpus, mandamus, prohibition and certiorari. The court admits to the bar. It must also consider all executive clemency applications submitted to the Governor where the applicant has suffered two or more felony convictions.

An additional $3,500 in 1963-64 and $4,000 in 1964-65 is provided for criminal appeal fees as a result of a U.S. Supreme Court decision requiring appointment of counsel when requested by an indigent appellant. Chapter 873, Statutes of 1963, increased the statutory fees for filings, which accounts for the increase in estimated revenues. A clerical position is proposed new in 1964-65 to operate office equipment and handle other increases in the general clerical workload of the court.

GENERAL ANALYSIS

Objectives

The Judicial Council is a constitutional agency under the chairmanship of the Chief Justice. Its duties include: (1) surveying the business of all courts with a view of simplifying and improving the administration of justice; (2) submitting suggestions to the courts in the interest of the uniform and expeditious conduct of business; (3) submitting recommendations to the Governor and the Legislature; and (4) adopting rules of procedure for the courts.

Program and Performance

The council is composed of 12 judges, 4 lawyers and 2 legislators. The Chairman expedites and equalizes the conduct of judicial business by assigning judges to act where calendars are congested, judges are disqualified or vacancies exist. Judges are required to serve as assigned and to report to the chairman concerning the conduct of business in their courts.

To carry out its administrative functions, the Judicial Council has delegated broad authority to the Administrative Director of the Courts who, under the supervision of the chairman, directs the staff of the Administrative Office of the California Courts. This office performs legal, managerial and clerical staff functions in connection with the work of the council committees and institutes, in the preparation of specialized reports and studies, in the gathering and interpreting of statistical information relating to court business, and in the development of management methods and techniques applicable to court operations.

It is proposed to reclassify the assistant director position to an information officer as an adjustment in the needs of this agency. This change should provide a much needed program of improved informational services within the court system, and a program of public information to improve public understanding of judicial actions.

An increase for extra compensation and expenses of assigned judges is necessary in 1964-65 to meet increased workload. In addition, a large number of judges are expected to retire during 1964 creating a particularly heavy need in 1964-65.

GENERAL ANALYSIS

Objectives

The Commission on Judicial Qualifications was established by constitutional amendment in 1960. The Commission has the authority to investigate and conduct proceedings against any California judge when there may be willful misconduct in office, willful and persistent failure to perform his duties, habitual intemperance, or disability of a permanent character seriously interfering with the performance of his duties.

Program and Performance

The Commission consists of 5 judges appointed by the Supreme Court, 2 lawyers appointed by the State Bar and 2 public members appointed by the Governor.

Information is received and examined, and consideration is given to charges filed to determine if allegations are within the Commission's jurisdiction. After a preliminary investigation the Commission may conclude that formal proceedings should be instituted to inquire into the charges. The Commission may then dismiss the proceeding or make recommendations to the Supreme Court which acts after reviewing the record. The recommendations to the Supreme Court may be for removal or retirement of the judge. The 1964-65 program is budgeted at the existing level.

GENERAL ANALYSIS

The court has appellate jurisdiction in certain cases arising in the superior courts and cases on appeal within the original jurisdiction of the municipal and justice courts, where necessary to secure uniformity of decision or settle important questions of law, in Alameda, Contra Costa, Del Norte, Humboldt, Lake, Marin, Mendocino, Monterey, Napa, San Benito, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano and Sonoma Counties. The court also handles appeals and original proceedings transferred to it by the Supreme Court. In addition, the court has power to issue writs of mandamus, certiorari, prohibition and habeas corpus. The court consists of 3 divisions of 3 justices each.

An additional $2,850 in 1963-64 and $5,350 in 1964-65 is provided for criminal appeal fees as a result of a U.S. Supreme Court decision requiring appointment of counsel in every case where an indigent appellant makes a request.

Chapter 873, Statutes of 1963, increased the statutory fees for filings which accounts for the increase in estimated revenues.

GENERAL ANALYSIS

The court has appellate jurisdiction in certain cases arising in the superior courts and cases on appeal within the original jurisdiction of the municipal and justice courts, where necessary to secure uniformity of decision or settle important questions of law, in Los Angeles, San Luis Obispo, Santa Barbara, and Ventura Counties.

The court also handles appeals and original proceedings transferred to it by the Supreme Court. In addition, the court has power to issue writs of mandamus, certiorari, prohibition and habeas corpus. The court consists of 4 divisions of 3 justices each.

An additional $67,000 in 1963-64 and $48,000 in 1964-65 is provided for criminal appeal fees as a result of a U.S. Supreme Court decision requiring appointment of counsel in every case where an indigent appellant makes a request. Additional revenues are estimated for 1963-64 and 1964-65 as a result of Chapter 873, Statutes of 1963 which increased the statutory fees for filings.

A clerical position was abolished in 1963-64 as being surplus to workload needs.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	

GENERAL ANALYSIS

The court has appellate jurisdiction in certain cases arising in the superior courts and cases on appeal within the original jurisdiction of the municipal and justice courts, where necessary to secure uniformity of decision or settle important questions of law, in Imperial, Inyo, Orange, Riverside, San Bernardino and San Diego Counties.

The court also handles appeals and original proceedings transferred to it by the Supreme Court. In addition, the court has power to issue writs of mandamus, certiorari, prohibition and habeas corpus. The court consists of 1 division of 3 justices and holds regular sessions every other month at San Diego. The intervening months the court holds sessions at San Bernardino for cases originating in or appealed from superior courts in the San Bernardino section.

An additional $7,500 in both 1963-64 and 1964-65 is provided for criminal appeal fees as a result of a U.S. Supreme Court decision requiring appointment of counsel in every case where an indigent appellant makes a request. The increase in estimated revenues is based on increased statutory fees for filings changed by Chapter 873, Statutes of 1963.

GENERAL ANALYSIS

The court has appellate jurisdiction in certain cases arising in the superior courts and cases on appeal within the original jurisdiction of the municipal and justice courts, where necessary to secure uniformity of decision or settle important questions of law, in Fresno, Kern, Kings, Madera, Mariposa, Merced, Stanislaus, Tuolumne, and Tulare Counties. The court also handles appeals and original proceedings transferred to it by the Supreme Court. In addition, the court has power to issue writs of mandamus, certiorari, prohibition and habeas corpus. The court consists of 1 division of 3 justices.

Temporary help in the amount of $404 was provided during 1963-64 to relieve turnover problems in the legal research assistant class, and $768 is proposed to continue this assistance in temporary help during 1964-65.

Estimated revenue increases over past year receipts are based on increases in the statutory filing fees made by Chapter 873, Statutes of 1963.

GENERAL ANALYSIS

Funds were provided by Chapter 8, Statutes of 1963, First Extraordinary Session, for allocation by executive order of the Department of Finance to the Supreme Court and several district courts of appeal for the purpose of increased expenditures for criminal appeals fees. The need for these additional funds resulted from a Supreme Court decision requiring appointment of counsel in every case where an indigent appellant makes a request.

The potential increased cost for this service has been difficult to estimate; therefore, the allocations reflected in the budget based on the first few months experience of the current fiscal year amount to only $81,350 as compared to the appropriation estimate of $115,000. In 1964-65 the increased costs for this service are reflected in the individual budgets of the Supreme Court and several district courts of appeal.

CONTRIBUTIONS TO JUDGES RETIREMENT FUND FOR JUSTICES OF THE SUPREME AND APPELLATE COURTS

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
SUMMARY			
TOTAL EXPENDITURES *(General Fund)*	$37,968	$37,968	$37,968

GENERAL ANALYSIS

Under the provisions of Section 75101 of the Government Code the State contributes an amount equal to 4 percent of the salaries of the Justices of the Supreme and Appellate Courts. The State's contribution for the superior and municipal court judges is included in the Local Assistance Budget.

Legislation will be proposed at the 1964 Session to increase salaries of judges and the retirement contribution rate for both members and the State. The increased cost is included in the Provision for Salary Increases.

GENERAL ANALYSIS

The Constitution of the State of California vests the supreme executive power for State Government in the office of Governor. In order to effectively administer the far-reaching programs and services which government provides the people, the Governor has broad powers to plan, organize, direct, and co-ordinate the activities of state agencies and to appoint various state officers and members of many boards and commissions.

Along with his executive responsibilities, the Governor presents to the Legislature the state budget outlining anticipated programs and the means by which they will be financed. He also reports to the Legislature on the condition of the State and makes various legislative proposals.

This budget provides for continuation of the existing level of service with recognition of the need for an additional 0.7 of a man-year of temporary help related to the 120-day General Session of the Legislature.

GENERAL ANALYSIS

Objectives

This activity of the Governor's office created by Chapter 467, Statutes of 1959, is responsible for advising the Governor on all matters affecting the interests of the people as consumers. The Consumer Counsel recommends to the Governor and to the Legislature the enactment of such legislation as is deemed necessary to protect and promote the interests of the people as consumers.

Program and Performance

The counsel makes such investigations and studies as are necessary to accomplish these functions, and renders reports to the people of the State. The Consumer Counsel appears before governmental commissions, departments, and agencies to represent and be heard on behalf of consumers' interests and does such other acts as may be incidental to the exercise of his powers and functions.

This budget provides one additional professional position for technical assistance to the counsel in the development of consumer legislation and for preparation of studies and presentations to appropriate private and public groups and organizations relative to the representation of the consumer. Experience has established the need for more detailed analyses and evaluations in complex technical matters in order to present a more complete program. This budget also provides an administrative assistant position to assist in the office management and the improvement of the efficiency of this office.

GENERAL ANALYSIS

Objectives

This agency is responsible for planning and co-ordinating a statewide program for emergency relief operations in the event of a natural or war-caused disaster, and for providing leadership and assistance to other state agencies and local governments in developing an effective state of operational readiness. The objectives of this program are:

1. A fully prepared state government with all departments and agencies prepared to carry out their assigned emergency jobs under disaster conditions;
2. Fully prepared county and city governments;
3. A co-ordinated and integrated federal-state-local emergency preparedness program;
4. A well-informed and prepared public.

Program and Performance

The Disaster Office is organized with a central administrative staff and a group of specialists who are responsible for the pre-emergency planning, training and organization for all types of disaster operations. They also provide technical guidance and assistance to other state agencies and local governments in preparing for emergency operations that would be required during an emergency. A field organization has been established which includes 6 regions with staff headed by administrators whose assignments are to implement the disaster program on a comprehensive basis.

Under the provisions of the California Disaster Act, the office is responsible for the following functions:

1. Developing and maintaining the master emergency plans and programs of the State;
2. Recommending to the Governor assignment of appropriate emergency roles to other state agencies and local governments;
3. Assisting state agencies and local governments in planning, programming, organizing, equipping, and training necessary emergency organizations;
4. Co-ordinating emergency plans between federal, state and local agencies;
5. Assisting state agencies and local governments in obtaining federal funds and equipment to implement approved emergency plans and programs;
6. Co-ordinating planning activities pertaining to post-attack management of resources and economic stabilization functions.

In addition to performing the before-mentioned functions on a day-to-day basis, the agency must be in constant readiness to perform its emergency role. During an emergency, it functions as the immediate staff and co-ordinating organization of the chief executive in carrying out the State's responsibilities under the California Disaster Act and applicable federal statutes.

Included in the responsibilities of this agency is the administration of the Public Law 875 program, an act authorizing federal assistance to states and local governments in major disasters. In October 1962 and January 1963 the Governor declared specific areas of the state disaster areas as the result of storm conditions. The President also declared these areas major disaster areas which made the provisions of Public Law 875 available to the State and its local jurisdictions for financial and other types of assistance. The Federal Government has allocated $2,291,080 to 77 local jurisdictions as a result of these disasters. This agency is currently involved in processing the necessary documents to assist these jurisdictions in obtaining their reimbursement.

California's emergency preparedness effort has been closely integrated with and is based on the national program. A plan has been developed to insure the continuity of state government in the event of war. The plan prescribes that all state agencies provide for: (1) protection of personnel, vital public records, and essential equipment against the effects of enemy attack; (2) for carrying on of necessary regular functions of the agency under enemy attack; and (3) for providing training to supervisory and other personnel to prepare them for their emergency responsibilities. In addition to the Disaster Office's overall civil defense co-ordination activity other state agencies have been charged with specific duties.

The Federal Government is continuing its emphasis on community type shelters. A program of surveying and marking suitable shelters has been partially completed and the second phase has been initiated- that of stocking the shelters that have been designated and placed under contract for public use. The State's part in this program is assisting local jurisdictions in contracting for these facilities and acting as intermediary in the stocking program.

The State also is responsible for administering programs for federal assistance to local political jurisdictions for matching funds under Public Law 920 and Public Law 85-606. These programs provide for federal participation in the purchase of supplies and equipment and administrative expense of state and local civil defense organizations. Under the provisions of these laws the State is responsible for processing requests for funds and the actual payment of funds for civil defense purposes.

Medical drugs and blood procurement and donor sets are now 10 years old and are rapidly deteriorating. It is planned to replace these items over a period of 4 years. Provision is made in the 1964-65 budget for the first year.

Significant improvements in communication capability include a local government system which is to provide the basic internal civil defense network tying together state civil defense and disaster headquarters, regional headquarters, and operational areas of the local governments. Other communication equipment requests provide for maintaining various communication systems.

In order to increase fire pumper capability, the program to install pumps to provide for utilization of the large pumpers in combating grassland fires is continued in 1964-65 fiscal year. A 10-year fire truck replacement program, also advocated by the Governor's Fire Services Advisory Committee, is being initiated in the current and budget years. Operating expense has increased because of the advanced age of the existing equipment, and an allowance for that increase is included in this budget.

Funds are included for moving and reinstalling equipment and antennas for control centers and to complete the relocation of the Los Angeles regional office.

GENERAL ANALYSIS

Objectives

The Governor's Advisory Commission on Housing Problems was created by Chapter 1242, Statutes of 1961 and terminated June 30, 1963. The commission had as its purpose the study of housing needs in California, both public and private, to determine how best the State could use its powers to meet those needs.

Program and Performance

The commission consisted of 11 members appointed by, and serving at the pleasure of the Governor. Two members of the Assembly, appointed by the Speaker, and 2 members of th Senate, appointed by the Senate Committee on Rules met wit and participated in the work of the commission.

The commission compiled a study of housing needs as the affect all persons within the State, the home building industry and the various systems of home financing.

A final report of the commission's findings and recommenda tions was submitted to the Governor and the 1963 Genera Session of the Legislature.

Governor's Office

COORDINATING COUNCIL ON URBAN POLICY

Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
SUMMARY			
TOTAL EXPENDITURES			
Support *(General Fund)*	–	$50,000	$50,000

GENERAL ANALYSIS

This activity of the Governor's office provides direction to the many related responsibilities of the State in relation to the problems of urban areas.

The Legislature created the Coordinating Council on Urban Policy, by Chapter 1809, Statutes of 1963, to provide a meeting ground for representatives of urban areas to review, coordinate, plan, and initiate needed policy, and action. The council consists of 18 members proportioned as follows: 3 members represent the cities, 3 members represent the counties, 2 members represent the school districts, 6 members represent the State and 4 members represent the public with an interest in state and regional affairs. All members are appointed by the Governor from lists provided by the represented groups.

The council has responsibility for the following functions:

a. Identifying and analyzing the present and changing trends, conditions, needs, and problems affecting local government in the rapidly growing urban areas of the State and defining the complementary roles of the State, cities, counties and special districts with respect to such growth.

b. Developing long-range policies to assist the state and local agencies in meeting the problems presented by the growth and development of urban areas.

c. Informing and advising the Governor respecting the council's findings and making recommendation concerning policies and programs.

No regulatory powers are vested in the council. The Legislature at the 1965 Session will review the council's work to determine whether to continue its existence. Since the members of the council were not appointed until December 1963 a detailed expenditure program has not been developed. It is anticipated that such information will be available and submitted for consideration during legislative committee hearings.

GENERAL ANALYSIS

The Lieutenant Governor is elected to hold office for the same term as the Governor. In the absence of the Governor from the State, the Lieutenant Governor must assume the duties of the chief executive. He presides over the State Senate during its sessions. He is a Regent of the University of California and member of the Board of Trustees of the State College System. He is chairman of the Commission on Interstate Co-operation, acting chairman of the Coordinating Council on Urban Policy, Member of the Governor's Council, the Governor's Cabinet, the State Toll Bridge Authority, the California Disaster Council, the Re-apportionment Commission, and the California Reciprocity Commission.

Offices are maintained in both Sacramento and Los Angeles for the convenience of the public.

In 1964-65 it is proposed to convert 0.6 temporary help presently authorized into a full man-year of clerical service at a cost of $2,528. It was demonstrated during 1962-63 when it was necessary to expend 1.1 man-years temporary help that workload in this office justifies a full-time employee.

GENERAL ANALYSIS

Objectives

The purpose of the State Employees' Retirement System is to effect economy and efficiency in the public service by providing a means whereby employees who become overaged or incapacitated may be replaced by more capable employees without prejudice or hardship. To this end the system provides retirement compensation and death benefits. The policy-fixing body for the retirement system is its 8-member Board of Administration. One of the board's most important functions is to invest money contributed by participants in the retirement system. The board also administers the Legislators' Retirement System.

Program and Performance

The Board of Administration consists of the Director of Finance, a member of the State Personnel Board, 3 members elected from the members of the system, a life insurance company official, a bank officer, and a representative of the University of California.

Members of the State Employees' Retirement System consist of state employees (including most University of California employees employed prior to October 1, 1961) and employees of more than 380 local governmental jurisdictions participating on a contractual basis. During the 1962-63 fiscal year, 28 additional governmental jurisdictions came under contract with the system for retirement benefits. Coverage of these local governmental jurisdictions extends to employees of cities, counties, schools, and miscellaneous districts. Members of the Legislators' Retirement System consist of Legislators and elective state officials who elect membership.

During the 1962-63 fiscal year the number of members of the State Employees' Retirement System also covered by Social Security benefits grew to 131,000, of which slightly more than 50,000 were State and University employees. The 1959 survivor benefits available within the framework of the State Employees' Retirement System now cover in excess of 51,000 members.

The addition of 20 positions has been provided in the current fiscal year. Ten permanent positions are for the operation of the Mortgage Loan Program initiated by the Board of Administration as the result of several years of study in this area and in conjunction with an independent survey made by a nationally known financial institution. The objective of this program is to strive for an increased return on the system's investments and to provide diversification in the system's holdings. The 10 positions include 8 in the investments unit, one legal counsel and an accounting technician. Three permanent positions are to be utilized in the computation of funds available for member accounts in payment of Social Security taxes for those employers who provide Social Security coverage for their employees on a retroactive basis. These costs are reimbursable in that each employer providing such coverage is billed at a flat rate per member. One position has been provided in the electronic data processing function as a result of the need to extend the machine operations to a second shift. This has been necessary to keep all operations on a current status. Another position has been added as a result of the workload that will result from the inclusion of the employees of the Los Angeles City Schools (on an optional basis) under Social Security coverage as of December 31, 1963. The equivalent of 5 additional positions in temporary help has also been provided in the current year. These funds will provide $10,000 for overtime and extra help in processing the increase in retired allowances enacted at the 1963 Session of the Legislature and other related bills; $8,600 for temporary help in the Accounting Division and making necessary adjustments to the accounting records as a result of those employees of Los Angeles City Schools who select Social Security coverage; $4,000 for the utilization of a consultant in the development of the mortgage program, and finally $900 for use in the Accounting Division for overtime required as the result of 1963 legislation.

The budget year provides for the continuation of the administratively established positions and 7 additional positions plus 1.5 man-year of temporary help. Three of these positions will be utilized in the expanding workload in the mortgage investment program. One position will be utilized in the Accounting Division in the control accounting for the Contingency Reserve Fund and the Legislators' Retirement Fund. Three positions will be added to the electronic data processing function, 2 for key punch workload and the third position will be utilized for efficient flow of documentation between the key punch control audit and operations units in the space allocated in the new quarters which the system is scheduled to occupy in the 1964-65 year.

[a] Trust funds, revenues and expenditures are excluded from overall budget totals.

HEALTH BENEFITS

Objectives

The purpose of the health benefits program is to promote increased economy and efficiency in state service by enabling the State to attract and retain qualified employees, by providing health benefit plans similar to those commonly provided in private industry, and to recognize and protect the State's investment in each permanent employee by promoting and preserving good health among state employees.

Program and Performance

This program is conducted under the provisions of the Meyers-Geddes State Employees' Medical and Hospital Care Act. The program is administered by the Board of Administration of the State Employees' Retirement System whose composition, when acting in the administration of this act, is augmented by 3 members appointed by the Governor to represent the public.

The act provides that the board may contract with carriers for basic health benefit plans or approve basic health benefit plans offered by employee organizations under certain circumstances. The board is empowered to prescribe eligibilty for participation in the plans and establish standards. The State will contribute up to a maximum of $6 per month for each employee toward the amount necessary to pay the cost of a basic health benefits plan approved under the act.

The State's contribution toward the cost of a basic health benefits plan is charged to the fund from which the employee's salary is derived.

The cost of administration of the program is also derived from the various state funds out of which the employees are paid. The amount assessed against the funds for such administrative expenses for each fiscal year is not to exceed 2 percent of the total of the contributions made by the employee or annuitant and the State. An additional 3 percent of the same base is currently being assessed to establish the State Employees' Contingency Reserve Fund. The number of employees and annuitants participating in the program at the present time exceeds 90,000.

The position provided in the current year and shown as proposed new in the budget year will be applied to the expanding workload in processing claims; discussing problems with the various carriers and in working with the health benefits officers in the various state agencies and departments throughout the State. The temporary help funds provided in the current year are for the purposes of establishing a basic control file on employees enrolled in the Meyers-Geddes medical and hospital care program.

Two new positions are proposed in the budget year. One of these positions is for the purpose of establishing a statewide health benefits training program, so that the personnel officers of employers providing health benefits coverage are in a position to give all employees sufficient information about the health benefits program so they may make the decision as to enroll or not, and also to meet the administrative workload related to this coverage. The other position will be required to maintain the control file of the movement of people into and out of coverage under the health benefits program. The temporary help funds in the budget year are required for additional help during the open enrollment period that will be conducted in November of 1964.

	OLD AGE, SURVIVORS' AND DISABILITY INSURANCE						

Objectives

The purpose of the Old Age, Survivors' and Disability Insurance program is to administer a program providing federal insurance to employees of the State and public employees under the Social Security Act.

Program and Performance

This program is conducted under the Federal Social Security Act and in accord with provisions of state law and a federal-state agreement. Financing of the program is devised from assessments of all political subdivisions participating in the program. Presently, there are 2,629 political subdivisions providing Social Security coverage for their employees, with approximately 214,000 employees covered. It is anticipated that during the 1964-65 fiscal year the number of participating political subdivisions will be 2,700, covering some 270,000 employees, including 70,000 state and university employees.

The addition of 1 position has been provided for the current fiscal year. This position is the result of the extension of Social Security coverage to the employees of the Los Angeles City School District on December 31, 1963. This position is continued in the budget year.

To provide for the participation of the State of California in funding the cost of the operation of this division with respect to the Social Security coverage of state employees, an appropriation of $20,000 was made available in the current year and is continued in the budget year at the same level.

GENERAL ANALYSIS

The Department of General Services was created by Chapter 1786, Statutes of 1963 to provide centralized services in State Government. Major elements composing this department were transferred on October 1, 1963 from the Department of Finance and the Division of Architecture.

Objectives of this central agency are to: (a) Permit application of uniform standards and policies in administrative matters common to State Government; (b) Promote economy through large-scale buying of materials and supplies; (c) Provide the highly qualified specialists that individual agencies cannot justify on their own staffs; (d) Co-ordinate in providing physical facilities for State use; (e) Improve paperwork management throughout State Government; and (f) Acquire real property for other state agencies and to carry out the acquisition in Sacramento required under the Capitol Master Plan.

The department accomplished these objectives through 17 major offices and internal service units. In addition, the director maintains liaison with other state departments and operating agencies through a General Services Advisory Council composed of ex officio members representing other departments and offices which utilize services of the department. The purpose of the council is to assure that the varied service functions of General Services continue to meet the needs of other state offices.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
EXECUTIVE OFFICE						
Objectives						
This office provides overall administrative direction and control to the department.						
Program and Performance						
The director of general services is a member of the Governor's Council. Additionally, he serves on the following major boards, commissions, and committees: State Communications Advisory Board; Departmental Co-ordinating Committee on Atomic Energy Development and Radiation Protection; Television Advisory Committee; State Building Standards Commission; State Board of Control; California Exposition and Fair Executive Committee; State Allocation Board, and the State Public Works Board.						
Operating expenses of this office are budgeted in Administrative Services Division. One deputy director position and clerical services are largely financed from the State Exposition and Fair Executive Committee.						
PERSONAL SERVICES						
(See page 17, Salary Supplement)						
Authorized positions	–	11	11	–	$106,342	$144,014
Staff benefits	–	–	–	–	10,813	15,071
Totals, Executive Office	–	11	11	–	$117,155	$159,085
ADMINISTRATIVE SERVICES DIVISION						
Objectives						
This function provides centralized administrative services for the department. These include fiscal and personnel administration of the department's support budget, Services Revolving Fund, and Capital Outlay budget, the administration of the State's insurance program, and the employee suggestion program.						
Program and Performance						
In addition to positions transferred from the Department of Finance for fiscal-accounting workload formerly performed by that department, 3 positions have been established during the current year and are proposed for the budget year to perform increased accounting workload which results from the expanded property acquisition program in this department. These positions and 3 additional positions for accounting services to the State Office of Planning, are proposed in 1964-65 on a reimbursable basis.						
The Personnel Section provides personnel services to the department, the Department of Finance, and 24 additional agencies. Two positions are proposed to perform personnel workload for this department, the Department of Finance and additional agencies in the Los Angeles area.						
The Insurance Section procures insurance for state agencies except the University of California. This includes the master bond for employees, automobile, and aircraft liability insurance.						
The staff of the Merit Award Board receives, previews, and transmits to appropriate departments suggestions from employees, and presents accepted suggestions to the Merit Award Board and Board of Control for payment of awards.						

[a] Expenditures from bond funds are not included in budget totals.

FACILITIES PLANNING SERVICES

Objectives

The Facilities Planning Services is responsible for preparation and maintenance of the State Government's present and future needs for land, office buildings, and related facilities. This function provides staff services to the Communications Advisory Board, and Capitol Building and Planning Commission.

Program and Performance

A professional staff in space planning analyzes and determines space requirements, including types, amounts, and special facilities. It studies space requirements for State agencies for long-range building progams and prepares programs for design and construction of state office buildings. It assigns priorities to office building projects; develops and maintains space utilization standards as essential tools in making forecasts, maintains a complete statewide space inventory; reviews agency requests for space; and makes space assignments.

The Leasing Unit prepares lease exhibits, plans, and specifications for construction of new leased facilities, alteration and improvement of existing leased areas; negotiates leases; and reviews for the director leases negotiated by departments, and recommends approval or rejection of a lease by the director.

The Communication Planning unit provides technical assistance in planning a co-ordinated communications system used jointly by public agencies in the State, as well as systems operated by individual state agencies. Long-range forecasts must be made of state needs for new and different systems of communication and expansion of existing systems to meet growing needs.

PROPERTY ACQUISITION SERVICE

Objectives

This division is responsible for real estate procurement, management and disposal activities of the Department of General Services. It also functions as the overall secretariat of the State Public Works Board.

Program and Performance

Properties acquired by the State in anticipation of later building activity are managed by the division. When such property is needed for a construction project, the unit arranges for termination of tenancies and for the sale by bid or auction of improvements on the site.

The office also is responsible for implementing the surplus real property disposal program. State-owned properties no longer needed are reported to the Legislature, and when authority to sell them has been obtained, the division supervises their sale and return to local tax rolls.

The service was faced by a sharp and sudden increase in the scope of its responsibility and in its workload this year. It assumed the major property acquisition functions of the Division of Beaches and Parks of over $22 million, the $13 million Capitol development plan and $18 million for other state agencies. To perform this increased workload a Southern California office was opened, so that the staff would be closer to the workload in Southern California. Twenty nine new positions were established for the Southern California office.

Fifty-three positions were added administratively during the year. Twenty-five positions were transferred from the Division of Beaches and Parks to provide a portion of the staff necessary to accomplish the purchase of land authorized for beaches and park purposes. Twenty-eight positions were added to provide staff necessary for the beaches and parks program, the Capitol land acquisition program, and other authorizations for land acquisition. In addition, the group assumed the responsibility for maintenance of the proprietary land index formerly a responsibility of the State Lands Commission.

All activities of this program are reimbursed from the various land acquisition appropriations so that the cost of these services are included in the value of the land acquired.

STATE BUILDING STANDARDS COMMISSION

Objectives

The State Building Standards Commission consists of the Director of General Services and 10 members appointed by the Governor. It was established by the Legislature to screen building regulations for conflict, duplication, and overlap. The commission is to write a complete code which will supersede all building regulations by other state agencies.

Program and Performance

The Buildings Standards Commission has established Title 24, "Buildings Standards," in the Code of Administrative Procedures consisting of Division of Housing regulations from Title 8, State Fire Marshal regulations from Title 19, structural regulations for school houses by Office of Architecture and Construction from Title 21, and hospital and sanatoria construction regulations by Department of Public Health, Department of Mental Hygiene, from Titles 17 and 9, respectively.

The future program to make Title 24 complete, consists of consolidation of safety orders, electrical regulations, indexing, cross references to enforcement agencies, and a complete review to eliminate any remaining overlap, duplication or conflict, together with a complete updating of all standards applicable to performance type regulations. A minimum of a 3-year program lies ahead for the final issuance of the complete State Building Code. Two engineering positions are proposed to complete the more technical analysis and consolidation necessary to accomplish the completed code.

LEGAL SERVICES

Objectives

The Department of General Services is responsible for approval of a wide variety of contracts, property transactions and other legal documents. The staff for this function reviews these documents to assure compliance with the law and administrative policy. The legal staff consults with agencies and provides services to agencies not having administrative advisors. They analyze proposed legislation, prepare legislation and appear before legislative committees.

Program and Performance

A chief counsel position was created to perform the duties and carry the responsibilities of this office established by Chapter 1786, Statutes of 1963.

Two counsel positions were added in the current year for work on the expanded property acquisition program. The cost of these positions will be reimbursed from the land acquisition appropriations and will reflect in the price of land acquired. These positions are proposed for continuation in the budget year.

MANAGEMENT SERVICES

Objectives

Management Services provides consultation services on management problems, makes studies of organization and procedures for the department and other state agencies, and prescribes accounting systems, and determines the proper data processing installation for state agency accounting, research, and statistical work.

Program and Performance

The systems analysis group prescribes the Uniform Accounting System, designs accounting systems for special purposes and reviews the purchase and rental of all data processing equipment.

The Management Planning Section maintains the State Administrative Manual, studies and designs procedures in a variety of areas ranging from records management to studies of the department's organization and procedures for the director to determine changes which would result in more efficient service to state agencies. This section also provides staff services to the Board of Control.

A training officer position is proposed to develop and coordinate training programs for the various functions of the department.

OFFICE OF ADMINISTRATIVE PROCEDURE

Objectives

This office co-ordinates the quasi-judicial functions of various state agencies. It provides trained hearing officers to any agency conducting disciplinary proceedings, and it compiles and publishes the California Administrative Code consisting of agency rules and regulations.

Program and Performance

Four positions were established administratively to reduce the backlog of cases filed which have accumulated in the Los Angeles area. These positions are proposed to be continued in the budget year in order to perform the increasing workload.

The cost of the service for hearings is reimbursed by the using agency.

The agency workload is indicated by the following figures:

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Cases filed	1,597	3,152	4,173	4,300	4,900

OFFICE OF LOCAL ASSISTANCE

Objectives

This office provides a central point for the administration of several programs of aid to local government agencies.

Program and Performance

Since 1947 the State of California has assisted school districts in the financing of necessary construction of school facilities to provide for increased enrollments.

These facilities include acquisition and development of school sites, the construction of school buildings, and the furnishing of the necessary furniture and equipment so that they may be in readiness for school operation. The districts which have received these funds are those districts who cannot finance their own facilities with their existing legal resources. A school district may issue bonds in the amount of 5 percent of thei assessed valuation for each grade level and the proceeds o these bonds are used for Capital Outlay purposes. Whenever this amount is insufficient to finance the necessary school construction, school districts may request a loan from the State for this purpose. Also, support is provided for the State Allocation Board through administration of minor programs o financial assistance to local agencies for preparation of plan and construction of public works projects, and temporary housing for veterans.

Planning for educational television and administering federa grants for educational television is done with the advice of th Television Advisory Committee.

OFFICE OF PROCUREMENT

Objectives

The Office of Procurement functions as the State's purchasing agent. Through consolidated buying and central control it seeks to obtain the maximum value for goods and services required by state agencies.

Program and Performance

Bids are requested from dealers, jobbers, and manufacturers engaged in a variety of fields, and award is made to the lowest responsible bidder meeting minimum specifications, taking into consideration price, quality, and fitness.

A program of standardization has been developed for materials purchased by the State which has permitted negotiation of contracts for many commodities purchased in quantity.

Specifications are prepared and deliveries are carefully checked to maintain quality control. Items purchased for state agencies under standard specifications are checked at the Testing and Research Laboratory of the Division of Highways, Sacramento.

A traffic management office has been established in this division to develop and conduct a central traffic management program to effect economies and efficiencies in the movement of state freight.

Central store warehouses are maintained in Sacramento, San Francisco, and Los Angeles, from which supplies are shipped to the various agencies of the State. These supplies are purchased in large quantities at advantageous times, thus assuring prompt deliveries of stocks when needed, also giving the agency the benefit of large wholesale purchases. In addition, the sale and distribution of documents is performed by this office through the Sacramento warehouse. This group also handles the reuse of surplus state equipment, as well as assistance to state agencies in use of commodities made available under the Federal Surplus Property Program.

One buyer is proposed for increased workload, particularly in the area of water resources operation programs.

PROPERTY MANAGEMENT AND SERVICES

Objectives

This function provides maintenance, protection and operation of state-owned property including buildings, communications, vehicles, office machines, interagency mail service and duplicating services.

Program and Performance

Buildings and Maintenance is responsible for maintaining and operating all state-owned buildings under jurisdiction of the department and privately owned buildings which the State rents for its agencies. Currently, it is responsible for maintaining and operating 56 buildings with a total floor space of approximately 6,500,000 square feet, and some 60 acres of grounds in Sacramento, Fresno, Oakland, San Francisco, Los Angeles, and San Diego. The division also has responsibility for maintenance of the Governor's Mansion.

Utilities expense increase substantially due to increased power demands in existing buildings and for new service to the Retirement Building in Sacramento and the Stockton State Building.

One janitor foreman and 2 janitor positions have been abolished on the basis of economy.

[a] Bond funds not included in budget totals.

	Program and Performance—Continued						

One clerical position has been established during the current year and is proposed in the budget year to provide services for the Department of Motor Vehicles related to the opening of the new Motor Vehicle Building. Temporary help is proposed to increase 5.5 man-years to provide vacation and sick leave relief for the janitorial and maintenance staff in the new Retirement Building. Temporary help is proposed to increase 7 man-years for the increased janitorial and maintenance required in the Capitol Building during the Legislative General Session. One additional maintenance man is required for increased repairs and maintenance in Los Angeles. A staff of 12.4 positions are proposed to provide maintenance and protection service in the new State Building at Stockton scheduled to be opened March, 1965.

Through this division the California State Police provides protective service in state-owned and leased space. Additional police service is provided upon request by departments which are provided on a cost basis. This budget provides 1 additional policeman for San Francisco to fill a vacant post assignment.

This function operates telephone exchanges in state buildings in Sacramento, San Francisco, Oakland, Los Angeles, Fresno, and San Diego. This budget provides for expansion of the leased line network to serve additional cities and to carry an increased volume of traffic between cities under the existing network. Telephone toll costs in the current year provide for Sacramento area expense only and toll expenses in other cities were billed as exchange charges. These will be separately identified in the budget year for clarity. Telephone exchange charges anticipate increases based upon anticipated demands by using state agencies. Communications analysts from this department have worked with telephone company engineers to determine the most economical system to meet the State's need. The budget for 1964-65 reflects the conversion of the San Francisco dial switchboard to a centrex system. This system permits parties calling from off-premises telephones to dial directly the extension desired without the services of an operator. This will result i abolishment of a total of 12 operator positions in San Fra cisco; 6 from the state switchboard, 3 in Division of Highway and 3 at the Port Authority. Two operator positions will b discontinued in Los Angeles while temporary help is increase 1.5 operator man-years for additional workload during the legi lative session. One operator position is proposed for the openin of the new state building at Stockton. Telephone services hav been consolidated in this budget from the various building loca tions. Telephone services is fully reimbursed from agenc charges for services received. It is planned to transfer this fun tion to the Service Revolving Fund in the 1965-66 fiscal yea This type of service lends itself to the operation of the Servic Revolving Fund.

Transportation Services manages a pool of state-owned aut mobiles. Cars are available for official state use in San Fra cisco, Sacramento, Los Angeles, San Diego, Fresno, and Eu reka. Control is exercised over type and number of automobile purchased, and the use of state garage and parking facilitie Reports are required to assure that state automobiles are use for official business only. The budget for the pool car operation is shown in the Service Revolving Fund.

Communication Services is responsible for engineering insta lation and maintenance of state radio and microwave equipmen The budget for Radio Maintenance is shown in the Servic Revolving Fund. This budget proposes to transfer 7 positions t the Service Revolving Fund on July 1, 1964, where services a provided on a completely reimbursed basis.

The Central Services section maintains central duplicatin and office machine repair facilities in Sacramento, San Fra cisco, and Los Angeles. The budgets for these activities appe in the Service Revolving Fund. This unit also operates th interagency mail service in Sacramento and 1 additional pos tion is proposed for this service due to the increase in volun of traffic and the number of agencies served.

COMMISSION ON CALIFORNIA STATE GOVERNMENT ORGANIZATION AND ECONOMY

Objectives

The Commission on California State Government Organization and Economy, established by the 1961 Legislature, is composed of 4 legislative and 7 citizen members. Its purpose is to provide continuing assistance to the Governor and the Legislature in promoting economy, efficiency, and improved service in the transaction of public business by the executive branch of the State Government, and in making the conduct of such activities more directly responsible to the will of the people as expressed by their elected representatives.

Program and Performance

Since its inception, the commission has studied the "Agency Plan" of executive organization, including the formation of a Department of General Services, and has studied and recommended changes to the State's automobile replacement policies. The commission is continuing to study various aspects of State Government. The commission is in the Department of General Services for administrative services only.

	DATA PROCESSING							

Objectives

This function provides data processing services for the Department of General Services and the Service Revolving Fund activities of the department.

Program and Performance

This unit performs services where the vast number of data and transactions justifies and requires use of mechanical means for the efficient conduct of administrative business. The consolidation of these services into this unit accumulates a sufficient volume of workload to support faster and more efficient machinery. Some of the services performed are: accounting, departmental billing for stores, automobile mileage, telephone services and printing; inventory of equipment, stores, space and lease records; cost accounting for printing plant activities; purchase estimate analysis and departmental budget reports.

This function was transferred from the Department of Finance to the Service Revolving Fund effective July 1, 1963. Six of 8 positions deleted by the 1963 Legislature were administratively established to perform workload assigned to this function. These positions are proposed for continuation in the budget year. This operation is shown as a reimbursed support activity in 1964-65 for legislative review. This activity is fully reimbursed and will be transferred to the Service Revolving Fund during 1964-65.

GENERAL ANALYSIS

Objectives

This unit is principally responsible for the supervision of design and construction of public school buildings as required by the Field Act (Sections 15451 through 15465, Education Code). It reviews the design, plans and specifications and supervises the construction of all new public school buildings and all alterations and additions which exceed $10,000 in cost. The purpose of this program is the protection of life and property from normal hazards and the hazards of earthquake, fire, panic and storm. The unit is supported from the Division of Architecture Public Building Fund which derives its income entirely from fees charged to school districts for services rendered in this connection. Fee schedules are based on a percentage of project cost within the limits established by Section 15457, Education Code, and are published in Title 21, California Administrative Code.

Program and Performance

The workload depends entirely upon the volume of school building construction which has varied from $83.2 million during a war year to $331.8 million during the 1957-58 fiscal year. The volume for 1962-63 fiscal year was $288.3 million, and the volume for both the current year and the budget year is estimated at $300 million. For this estimated workload, the anticipated revenue from fees will approximate $1,304,000 in both the current and budget year.

This unit has been running a deficit over the past three years. Chapter 1767, Statutes of 1961 revised the fee program to provide for increased revenue. It was anticipated that this would increase revenue by an amount sufficient to cover expenditures. Due to an unforeseen drop in classroom starts this deficit has increased slightly.

Two factors should contribute to a reversal of this trend in the future. The first and most significant is a sharp increase in classroom starts from 2,817 in 1962 to approximately 4,400 in 1963. Secondly, three structural engineering associate positions and four temporary help positions were abolished during the current year. One senior structural engineer was added during the current year to provide more experience in working directly with architects and structural engineers in private practice.

Local school districts, upon application, and approval by the State Allocation Board, receive loans with provisions for repayment of the principal according to an equalization formula which usually allows 30 years and up to 40 years if deferment provisions are used.

Authorized bonds have been sold to the extent of $1,135,000,000 as of November 30, 1963. A total of 44,094 classrooms had been financed through October 31, 1963, providing seating for 1,476,500 children.

The costs of administering these programs are incurred in the Office of Architecture and Construction, Office of Local Assistance, Department of Education, and the State Controller. They are summarized here for informational purposes:

GENERAL ANALYSIS

Objectives

The objectives of this committee is to implement the legislation authorizing the development of a new State Exposition and Fair on the presently available 1,000 acre tract situated in the City of Sacramento and bordered by the American River on the south, Arden Way on the north, the Elvas Freeway on the west. The 1963 Legislature authorized this committee composed of 6 ex officio members, namely, President of the State Fair Board, State Controller, Director of Finance, Director of Public Works, Director of General Services and Director of Agriculture, plus 3 members from the State Fair Board as designated by the Governor; in addition 2 members of the Senate and 2 members of the Assembly will be members of the committee.

Program and Performance

The concept of a new State Exposition and Fair has been found to be feasible as the result of a concentrated and exhaustive study by Economics Research Associates. The feasibility was determined to be both economically and financially sound and analysis in depth has been fully reported in a 2-volume document titled "An Implementation Program for the New California State Fair and Exposition."

The construction of the facilities and the fair operation will be carried out through contractual arrangements with a nonprofit corporation to be financed by grants of funds by the committee. The estimated contractual amount with the corporation for the period through June 30, 1965, is $708,702. After construction and when in operation, the exposition revenue is estimated as sufficient to make the facility completely self-supporting.

The budget presented herein is designed to provide the committee with a minimum staff to supervise the carrying out o its 3 main objectives as follows:

1. The planning and development of the basic exhibit pro gram, the main theme of the exposition, and the maste plan for the entire exposition and fair complex.
2. The actual designing and construction of exhibits, build ings, and facilities.
3. The organizing and training of operational staff togethe with the actual operation of the completed exposition.

In accordance with the above objectives, it is contemplate that the budget contained herein will provide a small but effec tive staff under the direction of executive supervision; to im plement the various phases of the new legislation whereby satisfactory nonprofit corporation is available; its organizatio and functioning to be satisfactory to the committee; to develo a sense of urgency to meet the 1966 opening target date; t observe and influence the corporation's selection of adequat and effective talent for the development of each of the abov phases; to constantly analyze and appraise the effectiveness o the actions and operations of the corporation; to inform an enlighten the committee at all times regarding these matters It is contemplated that the staff will be small as shown belov but effective in its supervision and observation and analysis o the activities.

This activity will be funded under the provisions of Sectio 10.1, Budget Act of 1963, which appropriated $898,000 for th support of this committee for the 2-year period through Jun 30, 1965.

GENERAL ANALYSIS

Objectives

The Capitol Building and Planning Commission was created by Chapter 1952, Statutes of 1959. The duties of the commission are to establish a master plan for the orderly development of future state buildings and other facilities in the capitol area of the City of Sacramento.

The commission is required to submit at each general session a report on projects completed or initiated and may recommend revision of the master plan adopted by the Legislature.

Program and Performance

The commission consists of 13 members appointed by and serving at the pleasure of the Governor. Three members are nominated by the City of Sacramento and 3 members by the County of Sacramento.

The Facilities Planning Services, Department of General Services, is providing necessary staff assistance to the commission.

The 1964-65 Budget provides for preparation of the commission's report to the Legislature and consulting services.

SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$51,898	$65,905	$68,535	$2,630 (4%)

GENERAL ANALYSIS

Objectives

The commission formulates proposals for co-operation with other states and the Federal Government and participates in the support of the Council of State Governments.

The council is a research and service agency which assists the various interstate associations of state officials consisting of representatives from the various states.

Program and Performance

The commission consisting of 7 senators, 7 assemblymen, and 5 officers of the State appointed by the Governor, formulates proposals for co-operation with other states and the Federal Government and participates in the regional and national councils of state governments.

The principal item of expenditure by the commission is California's proportionate share of the cost of operation of the Council of State Governments.

This budget represents the continuation of the program approved in the 1963-64 Budget.

GENERAL ANALYSIS

Objectives

Under the State Civil Service Act, the Personnel Board is responsible for serving the personnel needs of state agencies as well as providing leadership in improvement of personnel practices and procedures and in personnel management. The board which consists of 5 members appointed by the Governor for 10-year terms, sets the general policies for the Personnel Board and prescribes, amends, and repeals rules as necessary to administer the State Civil Service Act. Technical personnel services are provided for political subdivisions on request.

Program and Performance

Under the general policies of the Personnel Board, the executive officer directs the various divisions in recruiting, examining, certifying, adopting suitable pay rates, co-operating in training, and establishing standards of health and safety. The functions of the operations have become more complex during the past few years due in part to the continued growth in number of state employees and the condition of the labor market.

Continuing emphasis is being put on research to develop methods to improve and save on time and staff. As a result, new procedures have been and are being introduced. Training courses are being conducted for various state departments to develop personnel efficiency and promote better departmental training programs.

During 1963-64 authorization was given for $37,524 from the Emergency Fund to develop a central record of vacation credits of all state employees. A graduated vacation schedule effective January 1, 1964, adopted by the 1963 Legislature, created the need for this work. After this one-time cost, annual maintenance of this program will be approximately $4,500.

In 1964-65 it is proposed to provide for consultant assistance to review state employment and personnel practices as they relate to minority groups. Through this assistance more effort can be expended towards the development of recruitment, selection, and training programs designed to further the objective of providing equal employment opportunities to all. A re-evaluation of salary savings has been made for the department and adjusted to reflect realistic recruitment conditions and workload needs.

The 1964-65 Budget provides for the following increases in personnel:

Organization	Positions	Salary and related expenses
Administration	0.5	$7,132
Personnel Services Division	3.3	33,468
Recruitment and Field Services Division	4.5	30,267
Standards and Surveys Division	1.7	9,674
Office Services Division	10.5	60,941
Co-operative Personnel Services	2	12,732
Total	22.5	$154,214

Each position and its purpose is described in the program and performance statements in the appropriate division.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

BOARD

Objectives

The board adopts general policies and rules, establishes job classes, and pay ranges, and hears and decides appeals from disciplinary and other actions.

The board consists of 5 members appointed by the Governor to carry out the administration's policy and provide effective, economical administration of laws affecting this department.

Program and Performance

The board meets once every 2 weeks for 2 days. The meetings are scheduled at Sacramento, San Francisco, or Los Angeles.

The hearing officer presides at hearings on appeals concerning civil service status. The number of these hearings has become too numerous for the Personnel Board and its hearing officer, and assistance is required from the Office of Administrative Procedure at a cost of $12,129 during 1964-65.

In 1964-65 it is proposed to convert an authorized hearing reporter position into 0.5 man-years temporary help for part-time hearing reporter services at a savings of $3,343. This adjustment more accurately reflects workload needs and gives flexibility to meet peak loads.

ADMINISTRATION

Program and Performance

Within the policies set by the Board, this division plans, directs, co-ordinates, and controls the work of the agency.

The executive officer directs the line functions of the board through the assistant executive officer who directly supervises the chiefs of the Personnel Services Division, Recruitment and Field Services Division, Examining Standards Division, and Office Services Division. The chiefs of the staff divisions, Co-operative Personnel Services, the Administrative Service Officer, and Personal Management Consultant report directly to the executive officer.

Proposed in 1964-65 is the addition of 0.5 man-years of temporary help at a cost of $7,132 to provide consultative assistance to the executive officer on state employment and personnel practices as they relate to minority groups. Special consultative evaluation of present state personnel practices is considered necessary to design new programs furthering state objectives toward equal employment opportunities.

PERSONNEL SERVICES DIVISION

Objectives

This division maintains and revises the classification and pay plans for civil service employees. The division is charged with the responsibility for the preparation of examinations utilized in the state selection program for civil service employees. Upon specific request, the division also conducts classification and pay studies for certain exempt employees.

PERSONNEL BOARD—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	PERSONNEL SERVICES DIVISION—Continued						
	Program and Performance						
	The Operations Section, consisting of 4 units, performs the classification and examining work of the Personnel Board. These units also analyze and prepare recommendations concerning salary ranges for civil service classes and establish new or revised civil service classes.						
	The Examining Services Section is responsible for scheduling activities such as the written examinations, oral interviews, and the conducting of investigations of applicants for state employment. A reimbursed contract with the California Disaster Office for merit system services requires 1 man-year of temporary help in 1963-64.						
	The activities of this division are influenced by such factors as growth in the number of state employees, changes in the scope and variety of state programs and functions, labor market conditions, the activity of employee and other organized groups, and changes or additions to laws and rules affecting the State Civil Service System.						
	To handle estimated workload in the areas of written examination preparation, oral appraisals, and classification and pay during 1964-65, an additional 3 analysts are proposed. Also an additional $2,829 is required in temporary help to pay expenses of outside members serving on qualification appraisal panels.

	RECRUITMENT AND FIELD SERVICES DIVISION						
	Objectives						
	The primary functions of the division are to attract qualified applicants to compete for positions in the state service, to provide information concerning state employment, to administer continuous testing programs, and to provide assistance in personnel matters to state agencies. Branch offices are maintained in San Francisco and Los Angeles to provide assistance to state departments and the public.						
	The division has programs designed to provide direct and continuing contact with employment sources such as schools, colleges and other training centers, placement services, and technical and professional associations to create favorable long-term interest in state employment as a career and to advertise and personally recruit at sources of labor supply. The division performs extensive year-round recruitment for such classes as nurses, social workers, engineers, physicians, psychiatrists and auditors and is responsible for the planning and carrying out of both in-state and nationwide recruitment. It is also responsible for school and college recruitment. Workload has increased with the rise in the number of authorized positions in the state departments and with increased shortages of professional workers.						
	Program and Performance						
	The public information counters at Sacramento, Los Angeles, and San Francisco give information concerning the state civil service to state employees and the public. The number of contacts at these information centers is increasing with the population growth and the increased economic activity in the State.						
	The division supervises the proctoring of state examinations in the metropolitan centers and administers continuous clerical testing. It also administers a number of other continuous examining programs which have been decentralized to the field offices for such classes as nurses, social workers, doctors, engineers, auditors and correctional counselors.						
	A reimbursable program with the Department of Water Resources to recruit engineers and technicians for the Feather River and other water plan projects is proposed during 1964-65 and includes an analyst and 1.5 clerks.						
	One clerk each for Los Angeles and San Francisco is included to provide receptionists for qualification appraisal panels and information center assistance.

STANDARDS AND SURVEYS DIVISION

Objectives

This division develops classification and pay policy, standards, and techniques. It conducts general wage, salary, and employee benefits surveys to facilitate keeping state salaries in reasonable relation to those paid in other governmental jurisdictions and private employment. It conducts agency classification and personnel management surveys. It develops physical standards for jobs, directs the program of pre-employment physical examinations and the program to encourage and facilitate the hiring of the handicapped in state service, and advises agencies on medical phases of personnel programs. It reviews procedures of various operating units of the board to eliminate unnecessary activities and develop improved procedures.

Program and Performance

With the increased growth and administrative complexity of state agencies, the classification survey program has become a vehicle for assisting operating departments in implementing the Governor's Policy on Personnel Management and for meeting the needs of line managers consultation in other areas of personnel management. Under this approach, position classification is viewed as the foundation of personnel management and as a single but essential phase of the survey process. The division is engaged in various long-range studies to provide increased flexibility and precision in state personnel management. This includes continued emphasis on the preparation of improved allocation standards under which departments may make accurate classification decisions without preaudit and the development of a career executive program relating to selection for, appointment to and service in high level management positions which are influential in shaping agency policies. Among the division's continuing responsibilities is the collection and analysis of data on salary and employee benefits.

A total of 1.7 positions at a cost of $9,674 is included in 1964-65 to meet clerical workload. One position is requested for the transactions section and 0.2 temporary help for clerical work during peak loads on wage and salary surveys and Governor's Report preparation. The remaining 0.5 clerk is for workload in the Medical Section.

EXAMINING STANDARDS DIVISION

Objectives

The function of this division is to insure the adequacy of the State's personnel selection program. One of its units develops policies and standards and prepares operating manuals for the guidance of the staff, evaluates the effectiveness of the selection program, develops and co-ordinates improved methods of selection such as continuous testing, trains the staff in examining techniques, develops new examining techniques, and produces form or standardized tests for long-term use. Another unit maintains files of test materials and assists the technical staff by preparing both new and old material for use.

Program and Performance

Emphasis has been given to the development of (1) methods that attract better employees to state service, that result in filling vacancies more quickly, or effect economies in operating procedures and (2) techniques that increase the effectiveness of the selection process. Particular emphasis has been given to the development of more effective means of evaluating management potential and skill. Co-operative relations have been established with several research and academic groups for this purpose. Faculty members of the University of California and the State Colleges have served as consultants to the staff and have undertaken research projects for the division. The University of Southern California co-operated in one project which resulted in an improvement in the identification of management potential. Educational Testing Service of Princeton, N.J., is currently co-operating in another project which is partially supported by the Office of Naval Research.

A major function is the construction of standardized written tests. High quality tests of known difficulty are a necessity in continuous testing programs.

OFFICES SERVICES DIVISION

Program and Performance

This division processes applications, arranges, administers, scores, and processes examinations and establishes and maintains employment lists; maintains statistical data, and the state employee roster; prepares reports; conducts certification activities; and performs related office services and clerical operations.

Processing and operating procedures in this central service division are constantly being reviewed for simplification and improvement. Increased use of electronic and mechanical aids such as EDP equipment, punched cards, mechanized files, photographic reproduction, offset duplication, and microfilming has speeded production and increased capacity.

During 1963-64 reimbursable services are being provided the California Disaster Office for that merit system. This amounts to 0.7 temporary help. Also 7.7 man-years temporary help is provided to develop a central record of vacation credits of all state employees. This need resulted from 1963 legislation adopting a graduated vacation schedule. One clerk is established during 1963-64 and proposed on a permanent basis in 1964-65 to service this program after it is developed.

In 1964-65 two positions are proposed for the Data Processing Section to program and prepare the system for much needed expansion as the present disk file is nearing capacity. An increase of approximately $17,000 in operating expense for tabulating operations is also related to this needed expansion in data processing capacity. Also 1.6 man-years of temporary help are proposed for this unit to develop a reference system geared to social security numbers. This will make the Personnel Board system compatible in the future with the systems of the State Controller and Employees' Retirement System for necessary co-ordinated work. In the Clerical Services Section 1 additional clerk and 0.5 temporary help are proposed for workload increases. Three additional clerks are requested in the certification unit to meet an increased volume of work that has created serious backlogs causing delays in the certification process. An additional 0.5 temporary help in General Files and 0.9 temporary help in the Roster Unit are requested for purging and general file maintenance that has backlogged.

TRAINING DIVISION

Objectives

Employee training in California State Government is conducted so that the "quality of service rendered by persons in the state civil service may be continuously improved." The division provides leadership to state agencies and departments for personnel and organization development and co-operates with them in planning, conducting, and evaluating training and developing injury prevention programs.

Program and Performance

The division activities are conducted essentially through the process of consultation, demonstration and pilot programs, preparation of standards and guides, assistance to departmental training efforts, and conduct of direct training sessions. The operations are generally separated into 2 main parts: the first represents program objectives for the next 5 years; the second represents supportive and maintenance-type activities which are continuous in nature.

The supportive and maintenance activities of the division include: training research and development on new methods, concepts, materials and approaches; support of interdepartmental management and staff groups; co-operative association with educational institutions and public and private training organizations; co-ordination of the state "out-service" training assignment program; and maintenance of a personnel management library, reference and bibliography resources, and audio-visual aids and devices.

The performance of the division is measured regularly against annual work plans. Man-days of staff time are allocated for the accomplishment of each phase of the plans and review is made monthly and quarterly to measure and control degree of achievement.

CO-OPERATIVE PERSONNEL SERVICES

Objectives

This division provides personnel services to local agencies on a contract basis by which all costs are reimbursed.

Program and Performance

An increasing trend in local government to employ staff through merit selection methods has led to this program serving more than 195 agencies and giving almost 1,359 examinations for such agencies during 1962-63. These agencies find this service more effective and economical than providing their own testing service. Methods are being reviewed constantly to lower these costs without sacrifice of quality.

An increasing number of local agencies have turned to the State for experienced help in installing and maintaining modern job classification and standardization plans. During 1962-63, 63 agencies including over 5,020 jobs were studied by this division.

One professional position and 1 clerical position are included for 1964-65 at a cost of $12,732 to meet increased workload out of the Los Angeles office. This increase will be financed through reimbursements from the local agencies being serviced as are all costs of this division.

GENERAL ANALYSIS

Objectives

The office of the Secretary of State examines and files articles of incorporation, amendments thereto, elections to dissolve and final dissolutions; statements of trust receipt financing; certificates relating to mortgaged personal property; registers trademarks; exercises general supervision of elections; maintains the Archives of the State and the Central Record Depository; and attests the official acts of the Governor and Legislature.

Program and Performance

Before a corporation can operate in California, its articles must be reviewed, approved and filed with the Secretary of State. Likewise, all amendments to corporate articles, as well as dissolutions, agreements of merger and consolidations must be filed with this office. In the 1962-63 fiscal year there were 35,436

SECRETARY OF STATE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Program and Performance—Continued

corporate documents reviewed as compared to the 35,409 reviewed in the 1961-62 fiscal year. Of this total, 29,884 were filed of which 18,135 represented articles of new corporations in California. This reflects a decrease of 629 in the number of new corporations. The filing of corporate documents is expected to increase slightly in the current and budget years.

In the budget year the Secretary of State will collect cash receipts of approximately $3,173,800. This includes franchise tax prepayments of about $1,588,900.

The publishing and distribution of an election pamphlet normally occurs in alternating fiscal years. In the past year there were 25 measures which appeared on the November 1962 general election ballot. The cost of printing the election pamphlet was $246,024. This budget includes $60,000 in the 1963-64 fiscal year for election pamphlet costs for the proposed State School Building Aid Bond issue, and $190,000 for the November 1964 general election pamphlets.

The Secretary of State's Office, commencing on January 1 1965 will file financing statements pursuant to the Uniform Commercial Code, which was enacted at the 1963 Legislative Session. Program costs will be included in a special report to the Legislature. The program will be self-supporting.

One assistant counsel is proposed for 1964-65 to review and approve for filing articles of incorporation and related documents. Increased complexity in corporate structures, particularly pensions relating to financing, have required longer and more difficult review. An additional clerical position is required for 1964-65 to handle workload including the filing of data on each public agency, compilation of data on water districts, and preparation of reports concerning voter registration as required by statutes enacted by the 1963 Legislature. An increase of $726 in temporary help establishes a level required based on the past three-year average actually expended.

CENTRAL RECORD DEPOSITORY

Objectives

This bureau has receipt and custody of all records required or permitted by law to be deposited in the office of the Secretary of State.

Program and Performance

The Central Record Depository was established in 1947. The use of modern record center systems, procedures, techniques and equipment enables the Central Record Depository to efficiently service records for the depositing agencies and the general public. Through the transfer of inactive material to the record center, depositing agencies are able to effect economies due to reduced purchases of filing equipment and the need for less space for records retention.

As of June 30, 1963, total holdings amounted to 102,579 cubic feet of records. Of this amount 92,352 cubic feet were in the Sacramento Record Center and 10,227 cubic feet in the Los Angeles Record Center Annex. The holdings will continue to increase in line with intensified paperwork management programs.

A San Francisco Record Center Annex will be established during the 1963-64 fiscal year. The cost of operation during the 1963-64 fiscal year is an estimated $26,150.

A preservation program for historically valuable documents is being planned for the budget year. First year cost of the program will be $25,509. Of this amount, $4,344 is for one proposed new position, $6,690 is for space alterations, services and supplies while $14,475 is for the required purchase of lamination laboratory equipment. At the present time, a large number of valuable historical records in the State Archives are in poor condition. Deterioration continues steadily. Preservation treatment is a necessity if these valuable records are to be salvaged.

In 1964-65 a reduction of $643 in temporary help is proposed to reflect a level closer to actual past year expenditures. Also the increased amount budgeted for rent reflects the difference between a partial and full-year operation of the San Francisco Record Center.

GENERAL ANALYSIS

Objectives

The department is responsible for the protection of plants and animals from infectious disease, pest animals, weeds and injurious insects and the prevention of the introduction and spread of crop and livestock pests and diseases. The department is charged with the administration of programs designed to assist in the marketing of agricultural products, and the protection of the public by assuring quality controls and preventing fraud and deception.

Program and Performance

The department functions through 9 divisions maintaining field offices operating throughout the State. The reorganization of the department, begun in 1961-62 and now largely accomplished, is expected to reach completion in 1964-65. A total of 9.5 positions were eliminated in 1962-63 as a result of the reorganization.

The Fairs and Exposition Division transferred to the department effective October 1, 1963, from the Department of Finance pursuant to Chapter 1714, Statutes of 1963, provides general fiscal supervision over 50 district agricultural associations, 24 county fairs, and 2 citrus fruit fairs.

A considerable portion of the departmental responsibility is accomplished in co-operation with the 52 offices of county agricultural commissioners and 56 county sealers of weights and measures. The department gives technical assistance, coordinates various programs and assists in training field personnel.

A summary of the new positions is shown below:

Organization	*Positions*
Division of Administration	4
Division of Agriculture Economics	8.6
Division of Animal Industry	17.4
Division of Compliance	1
Division of Fairs and Expositions	1.3
Division of Plant Industry	7.5
Totals	39.8

Each position and its purpose is described in the program and performance statements in the appropriate division.

In addition to providing for increased workload needs in the various divisions, this budget proposes work in a new area involving hog cholera eradication by providing $15,000 for indemnities to be paid owners of swine slaughtered in effecting control of this disease. The Federal Government is committed to participate in this program to the same extent.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF ADMINISTRATION

Objectives

The director and his assistants are responsible for departmental policy and the direction of the efforts of the operating divisions to insure efficient administration of the agricultural laws.

Program and Performance

The Division of Administration provides agricultural and related economic information for the Governor and the Legislature. In addition, it maintains co-operative relations with federal, state and county agencies.

The fiscal office administers the financial and business affairs of the department. Included are such items as budget preparation and control, automotive management, negotiation of leases and contracts, Capital Outlay projects and related departmental housekeeping activities.

Personnel office activities include: Recruiting, classification, training, pay, and personnel records. In addition, the personnel office is responsible for examining programs in a number of county classifications, including agricultural commissioners, inspectors and weights and measures officials.

The central services section provides central duplicating, stores, mail messenger, filing and data processing services to the operating units of the department.

In 1964-65 a total of 4 new positions are proposed for the following purposes:

One senior administrative analyst temporarily approved in 1963-64 is requested for continuation in 1964-65. This position is to provide an administrative analyst staff necessary for evaluations and recommendations relative to accounting systems, organizational and staffing problems.

One accountant I, temporarily approved for increased accounting workload during 1963-64, is requested for continuation in 1964-65, and is partially funded by the deletion of a junior-intermediate typist. Additionally, 1 accountant I tempo-

[a] Represents partial cost of the Division of Fairs and Expositions which was transferred from Department of Finance effective October 1, 1963, pursuant to the provisions of Chapter 1714, Statutes of 1963.

[b] Provided by Chapter 1391, Statutes of 1961, to pay costs of elections conducted by the Table Grape Commission on a proposed marketing order which was rejected and for which reimbursements are pending.

[c] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

Program and Performance—Continued

rarily approved in 1963-64 for increased workload arising from the transfer of the Division of Fairs and Expositions from the Department of Finance, and the expanded program of the Dairy Council, is requested for continuation in 1964-65 and is funded by additional receipts for these services.

One senior tabulating machine operator is required for workload in 1964-65 as anticipated in the complement of personnel for the data processing unit and recommended by management survey 966 conducted by the Organization and Cost Control Division of the Department of Finance.

In 1963-64 and 1964-65, 1.8 man-years of temporary help have been reduced as a result of past year experience in the data processing unit, and in 1963-64 0.5 man-year of temporary help is reduced in the general and personnel office functions. The position of administrative service officer III is abolished due to a workload adjustment in the executive section since the duties of that position as chief of the division are being performed by the assistant to the director. In 1964-65 deletion of 1 bookkeeping machine operator I is made possible by utilization of a magnetic ledger accounting machine.

DIVISION OF AGRICULTURAL ECONOMICS

Objectives

This division is responsible for the administration of services designed to assist producers and handlers in the marketing of agricultural products.

Program and Performance

The Market News Service reports current price and movement information covering agricultural commodities in intrastate, interstate, and foreign markets. Information gathered in California is assembled and released over leased-wire systems to other states and markets, and similar information gathered in federal offices pertaining to California crops is received on these leased-wires and in turn disseminated to California points.

The Crop Reporting Service develops and releases forecasts of production of our major agricultural commodities and prepares and publishes annual estimates of the acreage, production, and value of most crops in the State. Work is done to devise and test better methods of collection and analysis of data in the estimating of the production of those crops where volume is critical in the marketing process. Much of this developmental work has been financed at least in part by industry groups which have felt the need for more precise estimates in their efforts to accomplish orderly marketing of their commodities and the prevention of extreme fluctuations in consumer prices. Part of the work has been conducted as Matching Fund Projects, with half of the funds coming from either the State of California or industry sources and half coming from the United States Department of Agriculture under the Agricultural Marketing Act matching fund program. Since the basic purpose of this work is that of developing improved procedures and techniques, it is intended that, when such basic purpose has been accomplished, the programs become an integral part of the Crop Reporting Service operations.

The marketing function assists grower and handler groups in formulating marketing orders and programs designed to control surpluses, establish acceptable standards of quality, size, condition, or pack, carry on promotional activities and research, and to control or prevent unfair trade practices in the handling of farm products. This function includes assisting in the preparation of an acceptable form of marketing order, conducting public hearings upon such proposed orders and programs, and supervising the administration of the programs after they become effective. Surveys are also made of marketing and distribution problems for various agricultural groups of the State to develop new and larger markets. Additional duties include the development of economic material for use by the director and the staff of the department as well as by the industry. This includes material in the fields of co-operative bargaining and marketing associations, transportation, land taxation, urban sprawl, import and export of agricultural commodities, tariffs, and agricultural policy.

Particular emphasis is being given to work in the field of foreign trade. A co-ordinated program has been developed which includes industry groups, the University of California, and the Import Advisory Committee and the Export Advisory Committee.

In 1963-64 and 1964-65, 1 field representative position in marketing is reduced due to changing workload requirements that no longer require this position.

In 1964-65 8.6 man-years of temporary help are proposed to make operational a former federal matched funds research project involving fruit and nut surveys. This project will become a regular part of the Crop Reporting Service operation with the Federal Government contributing an amount in non-salary items equal to the state cost for salaries and wages.

DIVISION OF ANIMAL INDUSTRY

Objectives

This division is responsible for the protection of the livestock and poultry resources of the State from diseases. Also an objective of major importance is to enforce laws and regulations designed to assure the consuming public of an abundant supply of wholesome, high-quality, nonadulterated, properly labeled foods of animal origin.

Program and Performance

Included in the discussion of each function is a total of 17.4 new positions required to carry out the responsibilities of the division.

Interstate Quarantine—Prevention of the introduction of diseases of livestock and poultry from other states is accomplished by staff assistance to the chief of the division by the enforcement of laws and regulations relating to quarantines or importation restrictions imposed on other states. Special permits are issued, under certain circumstances, prescribing the conditions under which livestock may enter the State.

Animal Health—The control and eradication of diseases of livestock and poultry are the responsibility of the Bureau of Animal Health. This is accomplished by veterinarians operating out of 10 regional offices. Co-operative programs are conducted with the Federal Government and include the eradication of tuberculosis and brucellosis in cattle and swine, supervision of garbage feeding ranches, and supervision of scabies and scrapie eradication. Veterinarians collect blood samples for laboratory tests and also conduct tests for the diseases referred to, vaccinate calves for brucellosis, and appraise and identify reacting animals. They also diagnose outbreaks of other transmissible diseases and take appropriate measures to suppress them. Provision is made for the continuation of the brucellosis eradication program during the budget year. The first phase of brucellosis eradication was passed when the entire State was declared a Modified Certified Brucellosis Area on August 17, 1962. This meant that the incidence of the disease was reduced in cattle in all of the counties to not over 1 percent and in cattle herds to not over 5 percent. Continued testing is necessary under the second phase of eradication to eliminate the infection in both cattle and swine in each county. When this is accomplished the entire State will be declared a Certified Brucellosis Free Area by the Federal and State Departments of Agriculture. A goal is set for the end of 1965, for this accomplishment. Testing of swine under the brucellosis control area plan, as authorized by Section 215.18 of the Agricultural Code, began in July of 1962.

For several years an effort has been made by the State and Federal Departments of Agriculture to develop a way in which cattle could be tested for brucellosis at the time of slaughter rather than at the ranches. This has developed into the Market Cattle Testing Program (MCT). This program has been gradually developed and expanded and has proven to be a valuable tool in detecting brucellosis infection as well as qualifying herds as free of brucellosis. This MCT program will be continued and used as a control to assure that beef herds which are free of brucellosis remain free.

Beginning in the 1962-63 fiscal year many of the programs of the bureaus were adapted to the data processing method. This is a long-range project shared equally by the United States Department of Agriculture. During the past year the calf vaccination program was converted. At the beginning of 1963-64 the brucellosis ring test and bovine area testing programs were added. About January 1, 1964, the tuberculosis eradication program will be converted. During 1964-65, the brucellosis market cattle testing program and a minor item of private veterinary practitioners blood tests will be added which should complete the conversion. In 1964-65 increased costs to the State of $15,275 for this program are shared equally by the Federal Government and, after a conversion period during 1964-65, reductions in present personnel requirements will be made.

The department is engaged in a co-operative program with the United States Department of Agriculture aimed at the eradication of hog cholera as part of a nationwide program. Some preliminary educational steps were taken during 1962-63 leading to the adoption of regulations effective in 1963-64 that should bring the disease under control. Actual eradication procedures will not be attempted until 1964-65 and an estimated sum of $15,000 is requested during 1964-65 for indemnity funds to match the federal allotment for this purpose.

Bovine tuberculosis indemnities have been reduced to $30,000 for 1964-65 from the previous $100,000 level, in order to reflect improved experience and testing procedures.

One intermediate stenographer was temporarily approved in 1963-64 in the Redding office for increased workload arising primarily from the brucellosis swine testing program. This position is included for continuation in 1964-65 and is offset by reductions in temporary help formerly used for this same purpose. One junior-intermediate typist-clerk temporarily approved during 1963-64 as a workload adjustment in Los Angeles in connection with the brucellosis program is requested for continuation as a permanent basis. This position is offset by a corresponding reduction of temporary help in both 1963-64 and 1964-65.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF ANIMAL INDUSTRY—Continued

Program and Performance—Continued

Dairy Service—A further responsibility is the enforcement of provisions of the Agricultural Code relating to standards of quality and wholesomeness of dairy products and the prevention of fraud and deception in the sale of these items. Sanitary inspection of dairy products plants and dairy farms is conducted. Supervision is maintained over local state-approved inspection agencies, licensed testers, weighers, pasteurizers and quality determination technicians. Inspections and checks are made of milk products, milk products plants, recording thermometers, imitation dairy products, water supplies, pasteurizers and many other places and activities involved in the production and sale of milk and milk products. Prevention of the adulteration of dairy products with pesticides found in the feeds used for dairy animals will continue to be a very important activity of the Dairy Service.

An increase in frozen food manufactured products has increased the number of plants under inspection and 1 additional dairy inspector is included for the Los Angeles area in 1964-65. The costs of this position are financed by industry payments to the department.

The department finds it necessary to plan a bovine mastitis program as a public health measure. The problem has been under study by a statewide industry committee, and included as a proposed new position is 1 additional dairy inspector position, headquartered at Sacramento, to provide the co-ordination necessary to insure uniform statewide application of technical tests and record keeping in the mastitis program.

Meat Inspection—This unit enforces the provisions of the Agricultural Code providing for federal, state, or state-approved municipal inspection of all meats from animals slaughtered and meat products produced or sold in counties of over 28,000 population. A program of slaughterhouse sanitation is conducted. Supervision is extended over the preparation and composition of meat products to insure wholesomeness, to prevent deception and fraud in labeling, and to prevent adulteration with pesticides and other harmful chemicals. The division licenses importers and handlers of foreign cold storage meats and inspects such products. The volume of such importations is expected to continue at a high level. The number of establishments under inspection remains about the same, but there is considerable increase in animals slaughtered and pounds of meat food products processed requiring some additional inspection. One additional veterinarian IV is included in 1964-65 to be assigned to Sacramento headquarters in a staff capacity. He will carry on staff functions in connection with program planning; all matters pertaining to commercial buildings, equipment, and approval of plans for same; inspection procedures and training, publications and program evaluation.

Three additional meat inspectors are included in 1964-65, 1 in San Francisco and 2 in Los Angeles, to inspect increased importations of foreign cold storage meat. Costs for the inspections are defrayed by fees assessed to the importers pursuant to Section 324 of the Agricultural Code. Importations of foreign cold storage meat continue to increase. One additional meat inspector is included for the San Mateo-San Jose area due to increased workload there resulting from 2 new plants and expansion of operations in existing plants. One veterinarian I temporarily approved in 1962-63 and 1963-64 for increased slaughterhouse inspection workload is proposed for continuance in 1964-65 on a permanent basis.

One junior-intermediate stenographer is included in 1964-65 for the newly established office of the district veterinarian, Bureau of Meat Inspection, and area supervisor of the Bureau of Dairy Service in Fresno.

An increase of 4.2 man-years of temporary help is temporarily approved in 1963-64 and is included for continuation at 4.4 man-years in 1964-65. The 1963-64 increase is primarily due to additional workload in relisting of herds for bovine brucellosis. Continuance in 1964-65 is necessary to cover overtime inspection requirements in new meat packing establishments and the brucellosis retesting program. The meat inspection overtime is offset by reimbursements from the plant operators.

Poultry Inspection—This unit enforces provisions of the Agricultural Code requiring sanitary handling and inspection for wholesomeness of all poultry and rabbit meat sold in the State. Poultry processing plants are licensed and required to meet uniform standards for building construction, equipment and sanitation. Poultry meat inspectors are trained and licensed. Inspections are made for sanitation and to assure that diseased or otherwise unwholesome poultry or rabbit meat is not passed for human consumption. Appropriate approval and supervision of labeling is effected to prevent fraud and deception. This bureau continues to find some difficulty in enforcement problems, and they have resorted to several administrative hearings and court actions for the purpose of suspending or revoking plant licenses and inspector's licenses. These are expected to continue.

Agricultural Veterinary Laboratory Services—There are 6 laboratories in this staff agency located throughout the State that furnish diagnostic services for the Bureau of Animal Health, certain poultry disease projects, and render general biological services to other bureaus in the division as indicated. Advances in recent years in the fields of virology and tissue culture methods have necessitated the improvement of the division's laboratories to enable adequate diagnosis of virus diseases. The workload of the laboratories continues to increase. One additional laboratory technician I is requested for the Fresno laboratory to assist in handling the expanding workload in the bacteriology, serology and clinical pathology sections. One additional laboratory assistant II was temporarily approved during 1963-64 for workload and is included for continuation on a permanent basis in 1964-65. A corresponding reduction in temporary help formerly used for this purpose occurs in both 1963-64 and 1964-65.

DIVISION OF CHEMISTRY

Objectives

This division provides analytical and other technical services to various other agencies in the department which administer laws relating to the quality or composition of agricultural products and of the chemicals used in agriculture.

Program and Performance

Pesticides, fertilizing materials, commercial feedingstuffs, and livestock remedies are examined and analyzed for field crops and agricultural chemicals in the Division of Standardization and Inspection to compare the composition of these materials with that guaranteed.

Milk and other dairy products are examined bacteriologically and chemically analyzed for dairy service; and meat, meat products and materials used in procesisng these commodities are analyzed for meat inspection and poultry inspection in the Division of Animal Industry to see if these foods comply with legal requirements.

Fruits, vegetables, hay, and other produce are analyzed for field crops and agricultural chemicals to see if these foods and feeds contain deleterious residues of pesticide chemicals. To expedite prompt handling of these samples, laboratories are maintained in Fresno, Los Angeles, and San Francisco, as well as in Sacramento.

Samples of miscellaneous materials are analyzed for entomology, animal health, and plant pathology, and other offices of the Department of Agriculture; for the Department of General Services, Purchasing Division; Department of Public Health; Department of Fish and Game; University of California; the county agricultural commissioners; police; and other co-operating agencies.

Technical data on toxicity and pharmacology of agricultural chemicals, and similar information on other agricultural matters, are collected and compiled for the guidance of the Department of Agriculture and collaborating officials. No program changes or increases are anticipated in this budget.

DIVISION OF COMPLIANCE

Objectives

This division has the responsibility for the protection of California cattle owners from loss by theft or straying or unintentional movement of livestock; the adjudication of complaints from producers of most farm products against dealers and processors, and the protection of consumers against short weight or measure on all items purchased by weight, measure, or count. Protection is also afforded consumers by the regulation, inspection, and control of automotive fuels, including antifreeze, brake fluids, and automatic transmission fluids.

Program and Performance

The protection afforded cattle owners is accomplished through the livestock identification function by registration of cattle brands, inspection of cattle for ownership where cattle are transported for sale or slaughter, and licensing and bonding of salesyards and slaughterhouses. In co-operation with local law enforcement agencies, cattle thefts are investigated and prosecution instituted where warranted. Stray cattle are returned to their owners, if known. If not, they are advertised and sold, with proceeds held in trust for 1 year, if the owners are not found. Assistance is also given by this division to the program for the promotion of beef by collection of assessments for the California Beef Council.

Commission merchants, dealers, and processors handling farm products from producers are licensed and bonded to assure proper accounting and return to said producers. Market enforcement, as provided by the Produce Dealers Act and Processors Law, handles the licensing and bonding of these firms and receives complaints from producers regarding failure to pay for farm products purchased or to comply with purchase or consignment contracts. Where necessary, the division files legal action for collection of unpaid accounts from bonding companies and prosecutes for violation of the law. Forty-two self-help industry programs are enforced by the division, by audits of industry records for these programs as well as for produce dealers and processors laws, and conformance to fertilizer, agricultural mineral, and field crops tonnage tax laws.

Weights and Measures enforces those provisions of the Business and Professions Code pertaining to weighing and measuring devices, weighmasters, prepackaged commodities, gasoline, motor oil, antifreeze, brake and automatic transmission fluids, bread loaf standards, and special provisions relating to farm products. This activity serves a broader section of the general public than any other division within the Department, since it protects consumers who purchase any item which is measured, weighed, or counted.

In Market Enforcement, Weights and Measures, and Livestock Identification a total of 5 positions have been reduced in both 1963-64 and 1964-65 as a result of decreasing workload. A reduction of 0.7 man-year in temporary help in both 1963-64 and 1964-65 reflects a change in policy whereby hearing reporters will be paid from operating expense rather than salaries and wages allotments.

In 1963-64 1 petroleum laboratory specialist is temporarily approved for increased workload in connection with testing of automatic transmission fluids under provisions of Chapter 1847, Statutes of 1961. This position is included on a permanent basis for 1964-65 for continuing workload.

DIVISION OF DAIRY INDUSTRY

Objectives

This division is responsible for the administration of the milk marketing and stabilization program and enforcement of the related laws and regulations. Also, the division is responsible for the administration of research, sales and consumer educational programs designed to expand the markets for fluid milk and dairy products.

Program and Performance

The Division of Dairy Industry presently consists of the Bureau of Milk Stabilization and the Dairy Council of California.

The Bureau of Milk Stabilization fixes minimum prices that are required to be paid to producers of fluid milk by distributors who purchase the fluid milk. These fixed minimum producer prices vary according to the usage of the fluid milk and the marketing area where it is sold or used, and there are 22 marketing areas in the State. The bureau also fixes minimum wholesale and retail prices for fluid milk, fluid cream, fluid low fat milk, and fluid nonfat milk. These minimum resale prices vary by zones, and at the present time there are 37 resale price zones in the State. Approximately 98 percent of the fluid milk produced in California is subject to established minimum producer prices and established minimum resale prices, and the administration of these activities under the provisions of Chapter 17, Division 6, of the Agricultural Code comprise about 85 percent of the work of the bureau. In addition, the bureau enforces unfair trade practice provisions regulating the dairy industry which are contained in Chapter 16, Division 6, of the Agricultural Code.

The Dairy Council of California enables the dairy industry to develop, maintain, and expand its markets through sales stimulation, research, advertising and educational programs. The entire milk industry pays assessments to finance these programs and the council, subject to the approval of the Director of Agriculture, supervises the collection and expenditure of these funds. The 25 members of the council are appointed from nominations made by the industry and the terms of office of one-third of the members expire each year. The Director of Agriculture is authorized to collect and disburse the funds of the Dairy Council; therefore, pursuant to the provisions of Chapter 2053, Statutes of 1963, these funds are no longer included in this budget. A reduction of 1.2 man-years occurs in both 1963-64 and 1964-65 due to payment being made from operating expenses instead of salaries and wages for hearing reporter services.

DIVISION OF FAIRS AND EXPOSITIONS

Objectives

This division provides general fiscal supervision over 50 district agricultural associations, 24 county fairs and 2 citrus fruit fairs.

Program and Performance

The division was transferred effective October 1, 1963, from the Department of Finance to the Department of Agriculture pursuant to the provisions of Chapter 1714, Statutes of 1963.

The division prepares a master premium list; approves premium lists of the individual fairs; determines the need for state assistance for the fairs; reviews operating budgets of the individual fairs; prepares claims for distribution of appropriated funds; and advises the Director of Agriculture and the State Public Works Board as to allocations of money from the Fair and Exposition Fund to fairs for capital outlay purposes. The division also assists local fairs with construction and maintenance problems.

The presently authorized position of electrical inspector expires on June 30, 1964. It is proposed to continue this position permanently to meet the workload of the division. Each of the fairs is experiencing greater demands for electrical energy and this position will continue to be used to plan improvements and changes to economically meet the requirements of the fair and to upgrade systems to meet safety standards. The cost of this position is met from charges to the benefiting fairs. One intermediate typist-clerk authorized until June 30, 1964, is eliminated in 1963-64, and 0.3 man-years of temporary help is included in lieu of this position to handle the same workload arising from 1959 amendments to the Horseracing Law and Agriculture Code relating to the financing of fairs. These amendments have increased the workload of the division in preparing construction plans and specifications, filing claims, receiving contracts and making inspections. In 1964-65 it is proposed to continue the 0.3 man-year of temporary help on a permanent basis.

DIVISION OF PLANT INDUSTRY

Objectives

This division is charged with preventing the introduction and spread of crop pests, and with the protection of the farmer and consumer in respect to plants and related activities.

Program and Performance

The first line of defense against the introduction of plant pests, including harmful insects, plant diseases, nematodes, and noxious weeds, consists of agricultural inspection stations maintained at 18 border locations for the purpose of inspecting vehicular traffic and enforcing plant quarantine regulations. Stations are also maintained in San Francisco, San Pedro, and San Diego to inspect ships and airplanes. Quarantine enforcement at interior points, consisting largely of the inspection of freight, express, and mail shipments, is carried out by county agricultural commissioners under supervision of the department.

Leadership, co-ordination, and technical assistance are supplied to the counties. Field surveys are conducted in co-operation with the counties to detect crop pests present, but not yet widely distributed in the State. When they are discovered, particularly in incipient stages, suppressive and eradicative measures are initiated.

This division provides identification and classification of pests intercepted during surveys or quarantine inspections.

Co-operative programs are developed with local governments and landowners to control noxious weeds and rodents harboring diseases transmissible to humans. A joint program is carried on with the United States Fish and Wildlife Service to control predatory animals to protect livestock, poultry, crops such as melons and grapes, and as an aid in the suppression of rabies.

The co-ordination of nursery inspection to insure uniformit of inspection procedures in all counties is accomplished throug the county agricultural commissioners and county inspector who are trained by the department in the detection and contro of insects, nematodes, plant diseases, and weeds. Nurserie meeting minimum plant pest cleanliness requirements are issue certificates which permit them to ship their stock to 56 of th 58 counties without inspection at destination. During 1962-6 8,034 nurseries were licensed to sell and ship nursery stock.

The discovery of Japanese beetle, *Popillia japonica*, in Sacra mento in June 1961 represented the first and only known estab lished infestation of this serious pest in California. In th eastern United States this beetle causes nearly 10 million dol lars damage annually. An eradication program was organize immediately with foliage and soil treatments and trappin scheduled to be carried on for several years. No live beetle were found during 1963, and treatment is being stopped bu trapping will continue for several years to confirm eliminatio of this pest.

Citrus whitefly was found in the City of Sacramento durin December 1962. Each time this pest has been found in Cali fornia it has been eradicated. An eradication campaign wa immediately organized and approximately 1,200 blocks treated Past experience indicates that it will require repeated treat ments for several years to complete eradication.

In 1964-65 a total of 7.5 positions are proposed as follows

In Entomology, 1 entomolgist I, temporarily approved i 1963-64 for increased workload in connection with the bee

[a] Transferred from Department of Finance effective October 1, 1963 pursuant to provisions of Chapter 1714, Statutes of 1963. Expenditures for the 1962-63 fiscal year and first quarter 1963-64 are shown in the Department of Finance.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF PLANT INDUSTRY—Continued

Program and Performance—Continued

leaf-hopper project, is offset by the reduction of 1 field assistant I position. For the Fresno office, 1 junior-intermediate stenographer is proposed to provide secretarial services to 6 field positions and is partially offset by a reduction of 0.5 man-years temporary help.

In Plant Quarantine, 2 junior plant quarantine inspectors temporarily approved in 1963-64 for increased workload at the Daggett and Meyers inspection stations, are proposed for continuation in 1964-65 on a permanent basis. A reduction of 2 man-years temporary help, formerly used for this purpose, occurs in both 1963-64 and 1964-65. Increased traffic at the Yermo inspection station, coupled with the opening of the new station building necessitated by highway relocation, requires the addition of 1 man-year, during 1964-65, for the assumption of increased janitorial and maintenance workload otherwise distributed among inspection personnel. Therefore, a janitor position is proposed in lieu of an additional inspector position. Traffic increases at Daggett, Meyers, Hornbrook, and Smith River inspection stations require provision of 1.5 man-years additional temporary help in 1964-65. During 1963-64 only, 0.8 man-year of temporary help is temporarily approved for inspection of outbound produce trucks for fruit and vegetable standardization of the Truckee inspection station in order to determine the effectiveness of present methods.

In Plant Pathology, 1 agricultural biological technician temporarily approved for 1963-64 for technical laboratory work from temporary help funds formerly budgeted for this purpose, is proposed for continuation in 1964-65. A corresponding reduction of 1 man-year temporary help is made in 1963-64 and 1964-65.

DIVISION OF STANDARDIZATION AND INSPECTION

Objectives

The Division of Standardization and Inspection is responsible for the enforcement of laws and the administration of self-supporting services for the purpose of assisting agricultural producers in the marketing of their products and to protect consumers of such products. Many products and materials used by producers are regulated for their protection. The division is responsible for regulating seeds, fertilizers, livestock feeds and remedies, agricultural chemicals used by producers, and also controls the activities of pest control operators. The use of pesticides in the production of agricultural crops has become increasingly important in relation to the problem of protecting crops, wildlife, and man from damage by pesticides, including pesticide residues on food and livestock feeds. Most of the activities of this division are supported by the collection of funds from the industry groups served or regulated.

Program and Performance

Activities of this division include enforcement of the minimum standards of the Agricultural Code relating to fruits, nuts, vegetables, honey, eggs, and poultry meat designed to maintain and improve their quality and to protect consumers from fraud, mislabeling, and deception. These laws are enforced by the county agricultural commissioners in each county of the State under the supervision of this division. In 1962 the equivalent of 393,925 carloads of fruits, nuts, and vegetables were inspected.

The canning tomato inspection provisions of the Agricultural Code, administered by this division, require that all canning tomatoes delivered by producers to canners be inspected to determine compliance with minimum standards. Fees to cover the cost of this service are collected from the canner, payable one-half by the grower and one-half by the canner. In 1962, a total of 3,302,306 tons were inspected. The acreage of canning tomatoes in 1963 has decreased from the high production in 1962; however, higher production per acre was realized and final reports are expected to show a decline of about 600,000 tons.

Grapes for crushing at wineries are also inspected on an optional basis at the request of certain wineries to determine the presence or absence of rot defects. Certification of the percent of rot defects assists the processor to determine the utilization of the grapes for wine or distilled products. The cost of this service is supported by the collection of fees. In 1962, a total of 10,859 loads were inspected at 17 wineries. The value received by industry members from optional inspection of wine grapes to determine the presence or absence of rot defects indicates that this work will continue and probably increase.

The Federal-State Shipping Point Inspection Service, conducted by this division, is furnished at the request of growers, shippers, or other financially interested parties. Federal or state marketing order groups also use this service to assure compliance with quality, grade, and size regulations. This work consists of inspection and certification of fruits, nuts, and vegetables on the basis of United States Standards or acceptable industry standards. This is a self-supporting service supported by the collection of fees and is operated co-operatively with the United States Department of Agriculture. In 1962 inspections and certifications on the basis of United States Standards totaled 128,092 and included approximately 60 different commodities. In addition 199,102 inspections were made on produ for processing. This included approximately 1,357,000 tons grapes delivered to processing plants for crushing, which w inspected and certified as to sugar content as required by t provisions of a federal marketing order regulating such gra in 9 of the San Joaquin Valley counties. This service was c tinued in the 1963 season for the inspection of early deliver of grapes to wineries; however, shortly after the middle August, 1963, the Bureau of Shipping Point Inspection w notified that the federal marketing order regulations requiri inspection had been terminated. The volume inspected in 19 was very small and the marketing order requiring such insp tion will not be effective in 1964. This is resulting in a sh to fruit and vegetable standardization, wine grape inspecti services. Some of the deciduous fruit crops inspected on t basis of United States Standards produced less volume in 19 and in 1963 to date than in normal years resulting in an e pected greater volume in 1964.

This division samples fruits, vegetables, hay fodder, a certain other commodities to determine whether they conta deleterious spray residues which would be injurious to perso or animals. In co-operation with county agricultural comm sioners, regulations are enforced pertaining to injurious her cides and other injurious materials requiring a permit to u In addition agricultural pest control operators are licensed f the specific types of pest control for which they are qualifi During the 1962 calendar year there were 1,446 licensed oper tors in this state. Aircraft pilots certified for pest control wo totaled 725. The number of pest control operators and pil obtaining certificates of qualification has increased appro mately 40 percent since 1952, and the acreage treated annua by aircraft has shown a comparable increase. It is expected th this activity will need to be expanded because of a continui increase in the use of pesticides. Public interest in the use agricultural chemicals in farming operations and numero complaints that pesticides are harmful to some crops, wildli and man, require that emphasis be placed upon this phase the work to meet the increased demands on this function a to provide a minimum level of regulation.

This division enforces the laws relating to commercial fee and livestock remedies, grain warehouse registration, a bonded agricultural warehouses. All commercial feeds must labeled to show analysis and ingredients. Livestock remedi must be registered before sale in California. Approximat 6,500 to 7,000 regulatory samples of feeds and remedies a taken each year. Commercial feeds manufactured have i creased from 1957-58, when slightly over 1,500,000 tons we manufactured, to 6,930,636 tons in 1962-63. This increase a a substantial change in the handling of commercial feeds fr sacks to bulk containers have increased the enforcement wor load. Livestock remedies registered in 1958, when the work w first assigned to the department, totaled 553; while in t 1962-63 fiscal year, 842 such remedies were registered.

In the inspection and certification of grain and commoditi 57,521 samples were examined and certificates issued in t 1962-63 fiscal year. This is a service function, supported fr inspection fees, by personnel licensed under the Federal Gra Standards Act or through a co-operative agreement with t United States Department of Agriculture.

DIVISION OF STANDARDIZATION AND INSPECTION—Continued

Program and Performance—Continued

The enforcement of the California Seed Law is conducted in co-operation with the county agricultural commissioners in each county of the State. Proper labeling as to purity, germination, and presence of weed seeds, if any, is secured through the inspection of over 3,200 lots of vegetable and agricultural seeds yearly. The enforcement of the One-variety Cotton District Law is also enforced in conjunction with the California Seed Law in co-operation with the county agricultural commissioners.

This division is responsible for the registration of economic poisons, commercial fertilizers, agricultural minerals, and auxiliary plant chemicals in order to prevent the sale of ineffective, unsuitable, or dangerous products. During the 1962-63 fiscal year there were 1,984 firms that secured certificates of registration to sell these materials and 15,934 economic poisons were licensed. Approximately 4,000 samples are drawn each year from materials offered for sale to check conformity of composition with accepted standards of labeling and chemical content. In the 1962-63 fiscal year, 2,542 fertilizer salesmen were licensed.

In Administration, 1 intermediate clerk is reduced as a result of the utilization of a magnetic ledger accounting machine being provided in the departmental budget for 1964-65.

Eleven positions in Shipping Point Inspection are reduced in both 1963-64 and 1964-65 due to reduction in workload primarily in the grape crush marketing order. Seasonal help is reduced 31.8 and 44.2 man-years in 1963-64 and 1964-65, respectively, to adjust seasonal help requirements in our shipping point and canning tomato programs to workload needs based upon most current information available.

FEDERAL-STATE MATCHED FUNDS MARKETING PROJECTS

Objectives

The matched funds marketing service work being carried on by the State Department of Agriculture, under the authority of the Agricultural Marketing Act of 1946, has these aims: To help marketing agencies at each level of distribution to put into use the best known marketing practices as they are brought to light by research under the act and by other agencies, both private and public; to provide more timely and better marketing information; and to increase the consumption of farm products.

Program and Performance

For the operation of marketing service activities on the matched fund basis, allotments are made to states under cooperative agreements between the United States Department of Agriculture and the State Department of Agriculture, Bureaus of Markets, and similar state agencies. The states engaged in the program submit projects each year to the Agricultural Marketing Service for approval.

In California, advantage of the matched fund program is made available by the provisions of Section 1286 of the Agricultural Code and by co-operation with the Federal Government in marketing research under the provisions of Public Law 733.

In 1963-64 there are 4 separate projects effective in California. One project, by Agricultural Statistics, Division of Agricultural Economics, is concerned with checks of bearing and nonbearing acreages of fruits and tree nut crops and surveys of the acreages and production of minor crops. One survey, by Marketing, in the Division of Agricultural Economics, covers improvement of marketing efficiency, overcomin obstacles to distribution and sales, achieving market stability expanding markets and effecting improvements in quality, pacl aging, and methods of sales promotion. Another project b the Division of Fruit and Vegetable Standardization is directe toward the development of maturity standards, studies of co tainers, and packaging methods. Studies concerned with th development of a methodology for certification that fruit an nut tree and vine nursery stocks are free of serious virus di eases are also carried on by Division of Plant Industry, Plar Pathology. With the exception, discussed below, of the fruit an nut crop survey project, these projects are continued in 1964-6

During 1964-65 checks of bearing and nonbearing acreag of fruits and tree nut crops and surveys of acreages and pr duction of minor crops is moving from the research phase to regular operational program in the Division of Agricultur Economics, Agricultural Statistics.

A program started on a pilot basis in 1963-64 concerne with research into the feasibility of using aerial photograph in determining variety, acreage, age and location of fruit an nut tree production is carried in the budget year by Agricu tural Statistics at the level required to test this technique.

Provision is made in the budget year for studies to determin the effects of changing marketing practices upon the Mark News Service in California. The studies will be directed towar the possible utilization of personnel in broader areas of respo sibility in order to avoid overspecialization not consistent wit present day marketing practices. Lower costs of operation coul result for the California Market News Service if the study sul stantiates the use of more generalized personnel.

TOTAL EXPENDITURES				
Apportionment to district agricultural associations for encouragement of agricultural fairs *(Fair and Exposition Fund)*	$2,836,700	$2,848,400	$2,984,000	$135,600 (4.8%)
Support of 1-A District Agricultural Association *(Fair and Exposition Fund)*	250,000	250,000	250,000	–
Support of 48th District Agricultural Association *(Fair and Exposition Fund)*	125,000	125,000	125,000	–
Totals	$3,211,700	$3,223,400	$3,359,000	$135,600 (4.2%)

GENERAL ANALYSIS

Regional agricultural societies first received financial assistance from the State in 1861. After the adoption of the new Constitution of 1879, the regional agricultural societies were succeeded by district agricultural associations authorized by the Legislature of 1880 as state agencies. Section 80 of the Agricultural Code fixes the boundaries of 51 agricultural districts. There are 50 districts organized and holding fairs in addition to the California Museum of Science and Industry which maintains a permanent exhibit in Los Angeles.

Each of the district agricultural associations is a state institution administered by a board of 9 directors appointed by the Governor. The organization and operation of district agricultural associations are governed by Sections 80 to 98.3 of the Agricultural Code. District agricultural associations are subject to the laws and administrative regulations which apply to state agencies generally and to specific rules and regulations which apply only to district agricultural associations or to district and county fairs. District fairs are conducted under budgets approved by the Department of Finance. The Audits Division of the Department of Finance audits the premium awards made at the fairs and makes post-audits as well.

Revenues received by the California Museum of Science an Industry, Los Angeles, are deposited in a special fund in th State Treasury and this agency operates out of this special fun under appropriations by the Legislature. This agency does no receive an allocation under the provisions of Section 19627 o the Business and Professions Code.

The 1-A District Agricultural Association, San Francisco receives an annual appropriation of $250,000 and the 48th Dis trict Agricultural Association, Los Angeles, receives an annua appropriation of $125,000 under the provisions of Section 1962 of the Business and Professions Code. Neither of these assoc ations receives an allocation under the provisions of Sectio 19627 of the Business and Professions Code.

The remaining 48 district agricultural associations receiv annual allocations on the basis of premiums paid at thei respective fairs and upon showing of their need for financia assistance.

Provision is made to transfer savings from the appropriatio made by Business and Professions Code Section 19627 for en couragement of agricultural fairs to augment the appropriatio for Capital Outlay at district, county and citrus fruit fairs

[a] Includes $67,742 interfund interest receipts in accordance with amounts reported by controller. These receipts are shown as reve nue in the current and budget years.

[b] Transferred from Department of Finance effective October 1, 1963, pursuant to provisions of Chapter 1714, Statutes of 1963.

GENERAL ANALYSIS

Objectives

The Museum of Science and Industry is a state educational institution administered by a 9 member board of directors appointed by the Governor. The museum was established under the provisions of Chapter 69, Statutes of 1880. This state institution administers, manages, operates and maintains permanent facilities located in Exposition Park, upon land held in trust by the museum in accordance with the general provisions of Sections 80 to 98.3 of the Agriculture Code, and Section 19622 of the Business and Professions Code.

Program and Performance

The Museum of Science and Industry contains permanent and changing special audio-visual and public-participation educational exhibits dedicated to the purpose of educating, informing, inspiring and enriching youth and adults by demonstrating the industrial and scientific progress of the State of California. Such exhibits, through their distinctive and dynamic "story-telling approach" illustrate, communicate and instill the importance of science, industries, industrial enterprises, resources and products as a vital factor in the economy of the community and the State. Facilities include: the California Museum of Science and Industry, the second largest educational institution of its kind in the United States; the new Space Museum, when completed, will be first of its kind in the nation; the park grounds and roads adjacent thereto; the 5,000 car and 100 bus parking lots for the Los Angeles Memorial Coliseum, Los Angeles Memorial Sports Arena and the City of Los Angeles Olympic Swim Stadium. The museum shares in the management of the Coliseum and Sports Arena through the Los Angeles Memorial Coliseum Commission under a joint exercise of powers agreement.

The phenomenal growth in exhibits and attendance at the museum has made it the second largest institution of its kind in the United States. In excess of 1 million visitors annually come to this unique museum which is nationally known for its "audience-participation" educational and dynamic exhibit program. The museum continues to grow in popularity as demonstrated by the 1,194,498 visitors recorded during 1962-63. Attendance is computed by electronic counters and not the hand counter method used by many museums. Museum attendance will continue to increase in future years. As a result of the dynamic exhibit and educational program, organized guided tours for school classes have increased at a phenomenal rate.

A survey of museum visitors indicates the following ratios: 28.5 percent from the City of Los Angeles and 71.5 percent from outside the city. Of the latter amount, 45 percent are Californians, 36 percent are from other states and 19 percent are foreign visitors. This ratio appears to be changing with the number of out-of-state visitors increasing more and more. During 1962-63 the museum was selected by the Department of State to receive visiting scientists, educators and industrial leaders from many foreign countries.

The cost per visitor of museum is $0.269, which represents the lowest per capita rate of any comparable museum in the United States. Included in this per capita cost for the Museum of Science and Industry are the expenses required for maintenance and operation of the exterior grounds surrounding the museum. Financing this cost per visitor to the museum is provided through two sources: revenue activities of the museum earn $0.212 per visitor and augmentation funds provide the balance of $0.057 per visitor.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Program and Performance—Continued

The museum maintains a schedule of approximately 24 changing special exhibits a year. These exhibits remain from 5 days to 8 weeks and vary from applied arts exhibits to educational contemporary playground equipment. The special exhibit program is sponsored jointly by state and private sources. The purpose of this type of activity is to attract and maintain a diversified audience and industry participation commensurate with the rapidly changing scientific, industrial and nontechnical fields.

Financial support from the aviation industry enabled the museum to complete a major portion of the 3,300-square-foot permanent exhibit on Phase I, "Science of Aviation," in November 1962. Phase II of this exhibit opened to the public in September 1963. This exhibit was financed jointly by the State and private industry on a matching fund basis.

The 5,500-square-foot permanent exhibit on the evolution of the motor car, "The Turning Wheel," totally sponsored by a leading automobile manufacturer, was opened to the public in May 1963. This exhibit, together with the existing mathematics and Federal Aviation Agency exhibit constitute 3 of a total of 6 permanent exhibits scheduled for the science wing area. Of the remaining 3, the electricity exhibit opened in November 1963, and the communications exhibit will open to the public in February 1964. When completed, these will form a "walk-through" encyclopedia of the fundamentals of physical science. Each of these exhibits will be financed by private benefactors, foundation grants and industry.

A sum of $200,000 was authorized during the 1963 Special Session of the Legislature for construction of a Hall of Health building to the east of the Museum's Science wing. The Board of Supervisors of the County of Los Angeles is expected to participate by providing $500,000 to pay for Hall of Health exhibits.

A portion of the state-owned National Guard Armory was remodeled in 1962 in accordance with the museum master plan to facilitate its use as a permanent Space Museum. Money was appropriated by the Legislature in 1963 for a new roof and for improvements in the heating and ventilation systems. The story line and preliminary design for the permanent Space Museum exhibits were approved by the California Museum Foundation in July 1963. Final design, construction and installation of the exhibits are necessary to complete the Space Museum. During the interim, the structure is being utilized as the site of major temporary space exhibits, programs such as the Junior Science Symposium and Summer Science Workshop and a variety of other educational and community purposes.

The museum's educational program, supported through private funds provided by the California Museum Foundation, continues to grow in service to the public. During the year an ambitious lecture series, featuring full evening presentations by 4 distinguished California scientists, was inaugurated. Continuing educational projects include the Third Annual Math Seminar, numerous teacher institutes, a daily film series and Summer Science Workshop.

The museum provides an outstanding resource for the e richment of the local schools programs. Since educating ar stimulating young people to pursue the fields of science ar industry is a primary aim of the museum, a broad science ed cation program is in operation and being further develope During the 1962-63 fiscal year, 75,788 Southern Californ school children toured the museum during released period tin from their regular school classes. Tours were conducted b museum guides.

Exposition Park consists of 104 acres owned by the museun partly under lease to the Coliseum Commission (Los Angele Memorial Coliseum and Los Angeles Memorial Sports Arena the County of Los Angeles (Museum of Art, History an Science), and the City of Los Angeles (Swimming Stadium an rose garden); the remainder being under the immediate contr and jurisdiction of the museum. Each tenant assumes entirel or shares jointly in the cost of maintaining the park grounds

The museum owns approximately 26 acres surrounding th park which are operated as public parking lots for patrons o the coliseum, sports arena, swimming stadium and museums The land was acquired and facilities developed from capita outlay funds advanced by the General Fund. These loans ar being repaid, with interest, from receipts from the use of th parking lots.

The budget for 1964-65 includes the following new positions

	Position.
Administration	4
Museum operations	8.5
Parking lot operations	0.5
Total	13

Administration—2 intermediate typist-clerks and 1 intermediate stenographer are provided for the stenographic pool workload as recommended by management survey 1315. The addition of 1 intermediate typist-clerk as secretary to the museum public information officer is offset by a reduction of a like amount in temporary help formerly used for this purpose.

Museum Operations—A total of 8.5 new positions are included. To provide custodial services required by the additional space now utilized in the new science wing, 4 janitors, and 3 museum guards are included. In order to service the complex systems involved in the newer exhibits, 1 electrician 1 and 0.5 man-year of building maintenance man time are provided. A reduction of 0.5 man-year janitor time occurs to adjust for an error in previously authorized position count.

Parking Lot Operations—To relieve excessive overtime by present personnel, 0.5 man-year of maintenance man time is included to meet increasing workload in maintaining parking lots and surrounding areas.

GENERAL ANALYSIS

Objectives

The Poultry Improvement Commission provides the poultry industry with performance and economic data on various types and strains of chickens and turkeys, and these data stimulate the production of better poultry products for, and at lesser cost to, the California consumer.

Program and Performance

The commission is established and operates under the provisions of Sections 43 through 48 of the Agriculture Code and consists of 10 members. Of these, 3 are ex officio including 2 representing the University of California at Davis, and 1, the Director of the Department of Agriculture. The other 7 are appointed by the Governor for 4-year terms, and are chosen, insofar as possible, to give representation to the major poultry districts of the State.

Continuing advancement in poultry genetics and technology has resulted in consistent modifications of the program of the commission. Gene-environment interaction studies have been initiated to measure performance of egg laying stocks under various ranch and seasonal conditions. By starting tests during different months of the year, paralleling the replacement operations of California poultry farms, and by applying certain environmental variations which appear to have practical implications, an assessment is being made of the effects of these differentials upon the quantitative and qualitative performance of different strains of commercial birds. Moreover, reductions have been made in expenditures, and more may be realized, while accomplishing these objectives.

The work of the commission is carried on at Modesto and Keyes, where facilities are maintained for chickens and turkeys, respectively, and on a number of commercial poultry ranches.

[a] Transfers to the General Fund reported as General Fund revenue.
[b] Consists of $15,000 annual allocation provided by Section 19622 of the Business and Professions Code.
[c] Transfers from the General Fund reported as General Fund expenditures.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	

GENERAL ANALYSIS—Continued

Program and Performance—Continued

At these locations, commercial stocks selected randomly from breeding flocks and hatcheries, are raised and kept, observations made, and data collected. Reports are publicly distributed at regular intervals.

During 1962-63, the Chicken Meat and Junior Turkey Tests were discontinued, the first due primarily to the fact that no real differences could be found any longer among the stocks tested, and the second because the consumer was interested in a small bird no longer. Much of the upgrading in quality of chicken fryers was due to the pressure of random sample testing, and the shift of consumer interest from small turkeys to turkey rolls, while eliminating one test, places an emphasis in the remaining test on the economic production of de-boned meat yield so that the housewife will be able to purchase quality turkey rolls at a lower price. The discontinuance of two tests reflected a savings of approximately $25,000 annually.

Modifications contemplated in the evaluation of layer per formance are in keeping with the changes in and the demand of the poultry industry. The all-in—all-out method of stockin a poultry ranch, a procedure being initiated at the Modest project, will provide data which are of economic benefit to poul trymen but which are not available from any other source Furthermore, while these data are being developed, budge requirements are declining. Administrative adjustments durin the 1963-64 fiscal year, have reduced personnel requirement from the 14.8 man-years authorized to 11.8 man-years. A additional reduction of 1 man-year is anticipated during th 1965-66 fiscal year.

It is anticipated that during the 1966-67 fiscal year, the "on the-farm" testing program will have provided data for an evalu ation of the continuing status of the poultry testing projec at Modesto.

GENERAL ANALYSIS

The Agricultural Labor Commission was established by Chapter 1785, Statutes of 1961, which provided for 5 members appointed by the Governor to act as a fact-finding body to ascertain, study and analyze the problems of labor-management relations in California agriculture. In accordance with this provision, a summary of the findings and recommendation of the commission was submitted to the Governor and to the Legislature early in calendar year 1963. Expenses were primarily for traveling costs of commission members and for the preparation and printing of the report.

GENERAL ANALYSIS

Chapter 2037, Statutes of 1961, established the Youth and Adult Corrections Agency and authorized the appointment of an Administrator. Under this organization the Administrator is responsible for general direction over the Departments of Corrections and Youth Authority, Adult Authority, Youth Authority Board, the Board of Trustees of the California Institution for Women, the Narcotic Addict Evaluation Authority, and is the Chairman of the Board of Corrections. He is the chief adviser to the Governor in these areas and as such participate in the development of administrative policy and insures tha such policies are put into effect.

Workload and administrative adjustments in both the curren and budget years reflect the reduction of an assistant to th administrator position and the establishment of a deputy agenc administrator position to strengthen staff effectiveness.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART I—CONTINUING OPERATIONS

Objectives

The protection of society and the rehabilitation of the person are the primary purposes of the Department of Corrections. Since 98 percent of the prisoners are eventually released, adequate protection includes not only segregation from society by imprisonment, but also preparation for release and adequate supervision while on parole. To be most effective, the correctional process must continue throughout both the institutional and parole periods. The aim is rehabilitation in the shortest period of time and the restoration of the person to a constructive life in the community.

Program and Performance

Organization

The Agency Administrator of the Youth and Adult Corrections Agency, a position created on October 1, 1961, is responsible for the formulation and implementation of policy for the Departments of Corrections and the Youth Authority.

The Department of Corrections, established in 1944, is currently composed of the Director of Corrections, the Adult Authority, the Board of Trustees of the California Institution for Women, the Correctional Industries Commission, a Narcotics Rehabilitation Advisory Council and a Narcotic Addict Evaluation Authority, and the Board of Corrections. The director and members of all of the boards are appointed by the Governor.

The Director of Corrections is the chief administrative officer of the department. He is directly responsible for management of the state prisons and for the custody, care, treatment, training, discipline, and employment of the prisoners. He is likewise responsible for administration of the Parole and Community Services Division, which supervises adult parolees, both male and female.

The Adult Authority is responsible under California's indeterminate sentence law for determining the sentences of male prisoners and granting or revoking parole. Like responsibility for women prisoners is placed in the Board of Trustees, California Institution for Women.

A Narcotic Rehabilitation Advisory Council, composed of 5 members appointed by the Governor and a Narcotic Addict Evaluation Authority composed of 3 members appointed by the Governor were legislatively authorized during the 1963-64 fiscal year. The council will be an advisory group in matters of narcotic rehabilitation. The Evaluation Authority will determine release and return provisions for individual addicts committed to the California Rehabilitation Center program.

The Correctional Industries Commission recommends industrial and agricultural enterprises to eliminate prison idleness by providing work and training. Such enterprises may be started only when authorized by the commission after a public hearing.

The Board of Corrections is composed of the Administrator of the Youth and Adult Corrections Agency, the Director of Corrections, the Director of the Youth Authority, the Chairman of the Adult Authority, the Vice Chairman of the Youth Authority, the Chairman of the Board of Trustees of the California Institution for Women, and 2 qualified persons appointed by the Governor, with the advice and consent of the Senate. It is responsible for the correlation of the State's correctional programs, the study of the entire subject of crime, inspection of jails, and the provision of advisory services to cities and counties regarding jail and detention facilities.

Population

During 1964-65, the department will be faced with caring for an estimated average population of 27,530 inmates, including 1,963 Youth Authority wards over 18, and 1,145 women. This prison population will be confined in 13 institutional facilities for males, 37 highway and forestry conservation camps and 1 institution for women. During 1964-65, an average of 11,688 males and 1,285 females will be under parole supervision.

The increase in the felon prison and parole population is primarily a reflection of the increase in the population of the State rather than an increased rate of crime.

The institutions and camps under the control of the department comprise a diversified correctional system composed of facilities with planned capacities of varying degrees of custodial control of inmates and provisions for special and general programs of training and treatment for different types of prisoner groups.

Maintaining persons under control in prison while treating them until evaluated safe for release is the goal for protection of the public. It is therefore essential to know what the characteristics of these people are, how to control and treat them, and what facilities are required.

The prison population represents the most serious behavior problems among those convicted of felonies in the State, since only 25-30 percent of the persons convicted of felonies are committed to the department. The balance serve county jail terms or are granted probation. The prison felon population may be described in general in terms of the "average" felon inmate: A male about 32 years old with a prior juvenile, jail, or prison record, with about 10 years' residence in California, with only a 7th grade education but normal intelligence, lacking in work skills, and having a serious personality difficulty.

The nonfelon addict population can be characterized as having an average age of 25, educational background of the 8th grade, and with 50 percent having had prior felony convictions.

In addition to the "average" inmate there are groups requiring specialized custody and treatment such as the aged, the psychotic, the sex deviate, the tubercular, the physically defective, the chronic behavior problem and condemned cases.

Treatment Programs

The program for handling 40,503 individuals daily in prison and on parole during 1964-65 will include:

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART I—CONTINUING OPERATIONS—Continued

Treatment Programs—Continued

Diagnosis: This is the study of each prisoner upon receipt to recommend an individualized program for his control and treatment.

Classification: This is the designation, based on diagnosis and experience, of the degree of custodial control, educational assignment, medical care, psychological therapy, religious training, and vocational training for each inmate.

Care: The feeding and clothing of the inmates is based on departmental rations. A basic food ration is maintained in all institutions under the general supervision of the departmental food administrator. Rations are modified to meet age, activity, and health needs of the inmates. The clothing ration is based on recorded usage and actual experience.

Treatment: Staff-conducted programs are utilized to effect the treatment process. Treatment involves the integrated activities of a number of subsections. Together, and in co-operation with effective custodial control, the treatment programs make possible the operation of a productive correctional process during the time the inmate is confined and prepared for release.

The major treatment activities are as follows:

Academic and Vocational Education: About 12,000 inmates are in educational programs during the year. Academic education provides elementary and high school courses, both by contracting with the local school district and by institution staff. Vocational training, conducted by the institution staff, is available in approximately 30 trades. Educational services include library programs used extensively by inmates.

Medical Care: Hospital facilities exist at all institutions and virtually any medical or surgical problem can be handled within the department. Complicated surgical procedures are generally performed at San Quentin due to the availability of specialists.

Psychiatric Treatment: Psychiatric service, although provided principally at the California Medical Facility, is also authorized at the other institutions and the parole outpatient clinic. Psychiatric treatment includes ward management of psychotics and other highly disturbed persons. Programs for individual and group psychotherapy for more than 2,000 inmates are also provided under psychiatric direction.

Counseling Services: A professional staff of correctional counselors at each institution deals with social and personal problems of inmates and families and prepares progress reports for the Adult Authority. Two specialized units of correctional counselors are engaged in pilot programs of intensive counseling with small caseloads. About 12,000 inmates currently participate in weekly group counseling sessions conducted by custodial, educational, and maintenance staff employees who have received in-service training in counseling.

Religion: The religious program includes full-time Catholic and Protestant chaplains at each institution and part-time services for the other faiths. In addition to conventional religious activities, chaplains participate in case counseling and in the total classification and treatment activities of the institution.

Recreation: Programs of physical and interest-type recreational activities are maintained at each facility under the leadership of persons trained in recreation with a balance maintained between spectator and participation programs. Such programs boost morale, encourage constructive use of off-duty time, and teach sportsmanship and teamwork.

Employment: The constructive employment of as many inmates as possible is one of the keys to the total treatment program. Prisoners work in factories, maintenance and culinary sections, offices, farms and camps, obtaining diversified work experience. Constructive use of inmate assignments has economic benefit to the institutions and carryover value for work placement after release. Idleness, on the other hand, results in low morale and mental and physical degeneration. Conservation centers and camps operated by the department provide added opportunity for outdoor projects of a type which are also beneficial to the development of California's natural resources.

Release Procedures: Each of the 10,380 inmates to be released during 1964-65 will participate in preparole instruction classes to prepare for adjustment after prison. In addition, each releasee will be interviewed regarding release plans and a report will be prepared to assist with employment and living placements.

Parole Procedure: Of the total number released from the institutions, the great majority will be released under parole supervision. The basic treatment process, which is directed toward successful adjustment in society, is continued in the parole program under the jurisdiction of the Department of Corrections while the parolee is serving the remainder of his term as a productive member of society.

Departmental Research

A primary objective of the Research Division has been to develop techniques to evaluate departmental programs.

Chief among these is a base expectancy measurement which provides predictive estimates of parolee behavior against which actual adjustment in the community is compared This provides on-going evaluation of departmental programs through estimation of program impact on actual parole outcomes. Group Counseling, variations in parole caseload size, intensive treatment, and use of antinarcotic Nalline testing are examples of program evaluations to date which have relied upon this technique. The Research Division is continuously engaged in expansion and improvement of base expectancy technique.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART I—CONTINUING OPERATIONS—Continued

Departmental Research—Continued

Parallel to base expectancy developments, the Research Division has continued experimental program efforts in institution group counseling and intensive treatment, as well as in parole programming. Efforts are also being made to expand data processing capability through use of inmate workers and computer programming.

A 5-year experimental program on narcotic treatment and control was designed to study the detection, diagnosis, custody, and clinical treatment of addicts and suspected addicts. The program is due to be completed on June 30, 1964. The results are promising enough that a similar program is included as a part of the augmented program for 1964-65. A complete discussion of this program is included under the program augmentation section.

Increased Correctional Effectiveness Program

The Increased Correctional Effectiveness Program, which was started in July 1961, will continue through the 1964-65 fiscal year. It includes 10 small institutional units and 37 small parole caseloads located throughout the State with a total of 1,800 inmates and parolees who are either in or have been processed through the program as of the fall of 1963.

For selected nondangerous inmates this Increased Correctional Effectiveness program replaces a portion of the individual's normal institutional term with intensive treatment and programing.

Additional Facilities

Construction of the Sierra Conservation Center was begun in 1963-64. This 1,200-inmate facility is scheduled to start receiving inmates in May 1965. The center is similar in construction to the Conservation Center near Susanville and will be the third such center to be operated by the Department of Corrections.

New Positions

A total of 436.4 proposed new positions at a salary cost of $1,694,472 is included in this portion of the budget. These positions are proposed generally on the basis of increased population and new facilities in those areas where the application of accepted workload standards and formulas has not been interrupted.

Major increases represented by these positions are: the opening and initial staffing of the Sierra Conservation Center requiring 136.6 positions; the activation of the newly constructed acute psychiatric treatment unit at the Medical Facility involving 66.2 positions; 41 positions representing the addition and reestablishment of previously authorized positions at Rehabilitation Center in light of population increases; and the staffing complement of 5.8 positions for a new psychiatric treatment unit at the Institution for Women. In the area of parole supervision, an addition of 52 positions is also required to accommodate increased parole workload under existing staffing standards.

The proposals outlined above, along with on-going correctional programs and those positions related specifically to authorized workload formulas, are discussed in detail within the individual institutional budgets.

PART II—PROGRAM AUGMENTATIONS

Program augmentations are proposed in the following areas:

I Parole management		$907,810
A. Increased supervision [a]	$879,164	
B. Agent training	28,646	
II Law enforcement liaison		74,782
III Community correctional centers		218,099
IV Correction of staffing deficiencies		163,102
A. Administrative	35,579	
B. Career development	15,432	
C. Treatment	67,573	
D. Custodial	44,518	
V Probation practices study		12,000
Total		$1,375,793

Increased community protection and the parolees' more successful adjustment to the community provide the major emphasis of improved programs for 1964-65. Improved parole management, increased law enforcement liaison and the expansion of the community correctional center concept are the particular areas in which this emphasis is placed. In addition to this major effort, improvements are also proposed in individual areas where deficiencies have developed. It is also proposed to continue for one more year the review of probation practices throughout the State authorized in 1963-64. A detailed discussion and cost summary of each of these areas follows.

[a] Includes the continuation of 37 positions related to narcotic control previously authorized on an experimental basis. See discussion of Parole Management program.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

I. PAROLE MANAGEMENT $907,810

A. *Increased Supervision* $879,164

A fundamental strengthening in parole supervision is proposed, with particular emphasis on the parolee with a history of violence proneness. To provide optimum community protection and parolee assistance, a new work assessment system has been devised which will provide a rational and standardized basis for staffing and work performance based upon differential case requirements. This new system is based on an actual time count of required work performed by parole agents.

Approximately one-half of the adult male felon parolees will be supervised under this work unit system.

Under this system a classification plan will assign parolees to one of three classifications for parole supervision. Parole caseloads will be classified on basis of (a) violence potential, (b) other community hazard, e.g., previous narcotics involvement, large-scale embezzlement, (c) parole success expectancy, (d) time in the community with successful adjustment.

Based on these criteria the entire parole caseload will be divided into three classes—*special, regular,* and *conditional.* At this time the following general definitions have been established.

1. *Special*
 Serious assaultive history profiles
 Narcotic addicts until 1 year addiction free history
 Cases especially responsive to intensive treatment
2. *Regular*
 Large group of parolees normally representing no exceptional hazard but requiring constant and regular attention
3. *Conditional*
 (a) Parolees predicted initially to make adequate adjustment, or (b) those demonstrating good adjustment over a lengthy period

Prior to release each potential parolee will be assigned a category to be supervised accordingly. Based upon parole experience and case factors, changes in categories will be made at specified time intervals.

Under a work unit method, each parole agent will be responsible for 120 units of parole activity. Each "special" parolee will count 4⅘ units; each "regular" parolee 3 units, and each "conditional" parolee 1 unit. Units represent time needed for general services such as travel, office coverage, staff meetings, training—together with direct case activity such as field and office interviews, collateral contacts, dictation, emergency investigations.

The total work unit plan is based on the need to give close attention to the most serious problems and lesser attention to the others. Under this plan the person classified as "special" will be seen 4 times per month and will have a minimum of 5 other points of contact during that same month. The case classified "regular" will have a total of 5 points of contact per month and "conditional" will have 1 point of contact per month.

In other words, if a parole agent carried a caseload of 120 units all of which were classified as "special," he would supervise 25 such persons. If they were all classified as "regular" his caseload would be 40 such men. In case his assignment involved only "conditional" class paroles he would supervise 120 men.

In actual practice it is unlikely that caseloads would be distributed in this way. Rather each parole agent would probably supervise a number of men under each category. In any case his caseload would total 120 work units.

Under present determinations it is estimated that approximately 37 percent of all parolees fall within the special category, 53 percent would be classified as regulars and 10 percent as conditionals.

During 1964-65 it is proposed to apply this new work unit system to approximately two-thirds of the "special" category type cases (2,681 based on 10,725 parolees); to approximately one-fourth of the "regular" category cases (1,609); and all (1,073) of the "conditional" type cases. Application of this plan allows for comparison of parole coverage under the new work unit system as against the current 55 parolees to each parole officer which, when including supervisors, makes for a face-to-face supervision of approximately 75 to 1. This ratio will remain in effect for the balance of the parole cases.

Administrative statistics will provide constant followup to assess outcome. Expectation of this more rational approach to parole budgeting and to work supervision is that there will be (1) more control through parole staff in the community; (2) fewer returns to prison for felony crime; (3) more resources for paroling authorities so relatively greater proportion can be placed on parole, and (4) more public confidence in the parole system.

In some respects this program has been conducted on an experimental basis over the last 5 years. On June 30, 1964, the Narcotics Control—Treatment Project will be terminated as agreed to in 1959-60.

Under this experiment a continuing caseload of approximately 770 felon narcotic addicts were given special treatment and supervision. Agents assigned to this special unit carried a caseload of 30 addicts compared to the normal allowance of 55 parolees. In addition special narcotic use detection tests were given frequently.

This project has demonstrated that close supervision and control of a group of extremely difficult parolees can significantly control re-addiction.

While the project will be terminated on June 30, 1964, it is proposed that the type of parolee supervised under this program will be transferred to the special supervision category of the proposed new parole program. In effect, this will continue a program already proven effective.

The figures below include the transfer of these narcotic cases into the new parole supervision program as *special* classification cases.

To inaugurate this proposed work unit system and to staff in the proportions as are here proposed will

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

I. PAROLE MANAGEMENT—Continued

require 74 parole agents and 24 clerks over the numbers that would have been allowed under presently accepted formulas. In addition, 8 positions representing clinical, research, clerical, and custodial staff all related to the institutional return-unit and evaluation portions of the narcotic treatment control project discussed above, are proposed for continuation. This is shown in the table below.

Personal Services:	
12 Parole agent III (1 effective August 1, 1964; 1 effective September 1, 1964; 1 effective October 1, 1964; 3 effective November 1, 1964)	$99,516
10 Parole agent II (1 effective August 1, 1964; 1 effective September 1, 1964; 1 effective October 1, 1964; 3 effective November 1, 1964)	72,207
52 Parole agent I (6 effective August 1, 1964; 6 effective September 1, 1964; 6 effective October 1, 1964; 15 effective November 1, 1964)	326,381
1 Clinical psychologist II	11,066
2 Associate social research technician	19,708
1 Assistant social research technician	7,874
1 Correctional officer	6,487
1 Woman's Correctional Supervisor I	6,158
2 Senior stenographer	12,364
24 Intermediate stenographers (3 effective August 1, 1964; 2 effective September 1, 1964; 6 effective November 1, 1964)	99,079
– Operating expenses	165,866
– Equipment	52,458
[a] 106 Total Increased Supervision	$879,164

B. *Parole Agent Training* $28,646

A 2-week training program for all new parole agents is proposed as a further aid in increasing the effectiveness of parole supervision. The current procedure calls for parole agent positions to be established as the workload formula justifies. This results in a caseload actually being in existence before a new agent is appointed. A 2-week training period to cover departmental procedures as well as the principles and policies affecting parole supervision appears to be a sound contribution to the program. The increasing complexity of parole supervision substantiates the need for an organized formal training program prior to assigning a new agent to a caseload.

Personal Services:	
3 Temporary help—agent training	$21,446
– Operating expenses	7,200
Total, Agent Training	$28,646
Total Parole Management Program Cost	$907,810

II. LAW ENFORCEMENT LIAISON $74,782

Effective and continuous liaison with law enforcement agencies is a prime requisite to provide maximum public protection in managing parolees within the communities of the State.

The primary objectives of this program will be:

(1) To maintain special liaison with law enforcement so as to provide current information regarding selected parolees' methods of operation, whereabouts, etc., and to assist law enforcement with the solution of current crimes.

(2) To conduct special investigations in selected cases for the location of parolees who are AWOL, especially those who have a history of crimes of violence.

(3) To develop and maintain liaison with law enforcement agencies, train organizational units of the department, and review ongoing programs.

(4) To provide close liaison with law enforcement agencies for surveillance of parolees who have a background of organized crime, violence and or major commercial crimes.

Six parole agents, working under the assistant director, are required to work directly with local, county, state and federal law enforcement personnel to develop close working relationships. Under such conditions, the parole staffs and law enforcement staffs can work on a complementary basis to achieve maximum public protection. The special staff of 6 will be used both as a unit to carry out particular functions and on a regional basis in terms of the parole organization. In all matters the unit will work in close co-ordination with the regional administrator.

In addition, the Director of Corrections will maintain close liaison with an advisory group of law enforcement officials and representatives of the Adult Authority and the Board of Trustees, California Institution for Women, to assure the effectiveness of the department's expanded efforts in this area.

Personal Services:	
6 Parole agent III	$52,122
2 Intermediate stenographer	9,208
– Operating expense	13,452
8 Total Law Enforcement Liaison Program Cost	$74,782

III. COMMUNITY CORRECTIONAL CENTERS $218,099

Three community correctional centers for nonfelon and felon narcotic addicts are proposed for continuation in the 1964-65 fiscal year. Two nonfelon centers have been established from savings in the budget of the Rehabilitation Center in the current year and the

[a] Includes the continuation of 37 positions related to narcotic control previously authorized on an experimental basis. See discussion of parole management program.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

III. COMMUNITY CORRECTIONAL CENTERS—Continued

third, for felon narcotic addicts, is currently financed through a grant from the National Institute of Mental Health to the Institute for Study of Crime and Delinquency. The federal grant for the felon center terminates at the close of the 1963-64 fiscal year.

The latter center, situated in East Los Angeles, consists of a 25-bed resident facility and houses an 8-agent unit supervising 200 felon parolees with narcotic histories; 25 of the 200 parolees reside in the Halfway House. It is proposed that this center be continued from state funds.

The other 2 centers will house 60 males and 30 females, respectively. A program administrator, under general direction of an existing regional parole administrator, will be in charge of both facilities.

These centers will be similar to the one established in East Los Angeles with the exception that these will be for addicts only. They will provide a controlled, structured, and constructive living environment for certain parolees without adequate family and other ties during their initial period in the community. Coming from an institution, the step to outside living is a major and difficult one, especially for the narcotic addict. Bridging the gap between institution and community by using community correctional centers provides better control of the parolees and, therefore, affords more protection to the public during this transition back to the community.

Under the direction of a program administrator, the parolee would be given parole behavior guidance, help in actual job contacts and placement by his parole agent. The internal program will include a continuation of the community living treatment that was begun in the institution and will permit the parolee in group sessions to work through the immediate problems facing him as he re-enters family, job, and community situations.

The community correctional center concept provides needed strength in parole, as it permits more observation, more remedial action when necessary, and consequently more help and control of the parolees. After leaving the house the parolees return weekly and through the group counseling process assist the newly released men who benefit from the support and encouragement of the more successful parolees. The center further provides for placing men back into the controlled situation of the community center when difficulties resulting from loss of job, residence, or marital disruptions, affect adjustment on parole.

As a part of the training for full membership in the community, parolees assigned to the centers are expected to contribute to their upkeep when they have jobs.

Performance standards and a statistical followup system will be maintained to evaluate these new units.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

IV. CORRECTION OF STAFFING DEFICIENCIES $163,102

The following positions are designed to satisfy a particular administrative requirement or correct staffing deficiencies in those areas for which a specific formula or staffing standard does not apply.

A. *Administrative* $35,579

(1) Existing correctional programs have developed a need for closer liaison between the department, local government and community groups. Factors which make this need imperative include expanded efforts in narcotic treatment and control, the initiation of community correctional centers and halfway houses, and general institutional growth. The department proposes to establish an area representative position in Southern California which will represent the director and the entire department to provide this type of liaison.

(2) A position of administrative assistant, with clerical support, is planned in the Central Office to free the director from administrative detail and so allow him to devote greater attention to overall department planning and administration.

(3) The department's continued growth has also generated increased clerical workload and requires an added intermediate typist position to meet current work demands.

Personal Services:

1 Area representative	$13,458
1 Administrative assistant II	9,120
1 Intermediate stenographer	4,605
1 Intermediate typist-clerk	4,388
– Operating expenses	2,800
– Equipment	1,208
4 Total, Administrative	$35,579

B. *Career Development* $15,432

(1) The Medical Facility initiated a psychiatric residency training program in conjunction with the Department of Mental Hygiene in 1961-62. In 1963-64 a third and final physician and surgeon position was authorized to allow Department of Corrections personnel to undergo the necessary resident training to become qualified staff psychiatrists. In an effort to overcome difficulties in recruiting psychiatrists, each candidate is required, upon completion of a 3-year resident period, to serve on the departmental staff for at least an equivalent period of time.

Including Mental Hygiene personnel undergoing similar training, a group of approximately 6 physicians will now be training concurrently at the Medical Facility. A supervising psychiatrist position will be necessary to give adequate and proper supervision, to assure the continued recognition of the program by the American Board of Psychiatry and Neurology, and to organize and conduct training.

Personal Services:

1 Senior psychiatrist (Medical Facility)	$14,832
– Equipment	600
1 Total	$15,432

C. *Treatment* $67,573

(1) The added demands for minor surgery and general medical attention for inmates at the California Institution for Women have generated a need for 1 additional surgical nurse.

(2) Medical requirements at Men's Colony—West Facility, an institution for the aged, infirm and handicapped felons, have necessitated increased numbers of x-rays. Current volume requires the services of 1 full-time x-ray technician.

(3) Similarly, medical programs at San Quentin and Folsom will require the restoration of a previously authorized clinical laboratory technician and pharmacist position, respectively, if proper laboratory testing and medicine control is to be maintained. Both of these positions were abolished by the Legislature in 1963 on the basis of long-term vacancy. A need exists and there is every indication that these positions can be filled now if authorized.

(4) The control and treatment problems of the younger, more hostile and aggressive inmates now concentrated in the 4 close custody wings at the Correctional Training Facility require the addition of 3 correctional counselors. At present, 4 correctional counselors are authorized for the total institution population of over 1,500 inmates. This number is insufficient to adequately perform the needed activities. Additional custodial coverage authorized in 1963-64 has alleviated the control situation but there is still serious difficulty in the handling of the underlying problems and tensions that led to the food strike of July 1963 and the racial disturbance of November 1963. Correctional counselors are trained to work with the inmates to develop a spirit of co-operation and a sense of responsibility.

Three of the 4 close custody wings have 130 inmates each with 2 correctional officers providing control in each wing from 2 p.m. to 10 p.m. The fourth wing has 175 inmates. The requested counselors would serve as program co-ordinators for the 130-inmate units and would be responsible for group and individual casework. The fourth close custody unit will be assigned a correctional counselor from existing staff.

SUMMARY OF THE DEPARTMENT OF CORRECTIONS—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

IV. CORRECTION OF STAFFING DEFICIENCIES—Continued

C. *Treatment*—Continued

(5) During the absence of a vocational instructor at San Quentin, security demands make it necessary to close down the affected shop program with related increases in inmate idleness. A position of instructor in general shop is proposed to provide relief for existing vocational instructors. This would allow programs to continue in cases of the instructor's absence from the immediate shop area, due to vacation, illness, necessary institutional work performed outside of the shop, and conferences with Trade Advisory Committee members. This type of coverage is provided at other institutions having a comparable vocational program.

(6) To supervise the increased production of bread required by the Southern Conservation Center a baker is proposed for the Institution for Men. The Southern Center (645 capacity) is currently purchasing bread locally while the Institution for Men can provide bread for the Southern Center at no additional cost and at the same time expand its vocational baking program.

Personal Services:

1	Surgical nurse (Institution for Women)	$5,597
1	X-ray technician (Men's Colony—West Facility)	5,330
1	Senior clinical laboratory technician (San Quentin)	6,818
1	Pharmacist I (Folsom)	10,057
3	Correctional counselor I (Correctional Training Facility)	21,446
1	Instructor in general shop (San Quentin)	9,853
1	Baker II (Institution for Men)	5,330
–	Operating expenses	500
–	Equipment	2,642
9	Total, Treatment	$67,573

D. *Custodial* $44,518

(1) Repeated problems in inmate supervision have indicated a need for closer custodial coverage in the hospital area at the California Medical Facility. To meet this need, it will be necessary to provide 1 officer on 2 shifts, or the equivalent of 3.2 correctional officer positions.

(2) Continuing custodial difficulties at California Men's Colony—West Facility require the full-time services of 1 correctional officer for truck driving and the supervision of inmate waste removal crews which will service this institution and the neighboring East Facility.

(3) Within the East Facility of the California Men's Colony it is proposed that 1 correctional officer position be added for more adequate control of inmate traffic in the administration building.

(4) Inmate idleness at the North Facility, Correctional Training Facility, requires the addition of 2 correctional officers to serve as work crew supervisors. With this addition, approximately 90 inmates who otherwise would be idle will be employed in various aspects of institutional maintenance.

Personal Services:

3.2	Correctional officer (Medical Facility)	$17,934
1	Correctional officer (Men's Colony—West Facility)	5,330
1.6	Correctional officer (Men's Colony—East Facility)	8,528
2	Correctional officer (Correctional Training Facility)	12,726
7.8	Total, Custodial	$44,518
	Total, Correction of Staffing Deficiencies	$163,102

V. PROBATION PRACTICES $12,000

A special study of probation practices in California is currently being made under legislative authorization and the auspices of the Board of Corrections. As was stated at the time the study was approved it will be completed in 1964-65. However the authorization was for 1 year only so this request is made as a part of the augmentation budget.

The use of probation as an alternative to jail and prison sentences varies widely from county to county. In counties over 50,000 population, probation in lieu of incarceration in a jail or prison varies from 21.6 percent to 56 percent of Superior Court convictions. The variation is even greater in the smaller counties.

From these data it appears that persons convicted of felonies in one county are being sent to prison while the same person may have been placed on probation if convicted for the same crime in another county. This raises the questions of (1) unevenness in the administration of justice and (2) the possibility of an unwarranted burden on the state correctional system which may represent a substantial outlay of state funds.

The study is attempting to identify the differences in probation practices and will recommend action to reconcile differences and help in the administration of justice with the possibility of reducing the burden on correctional institutions.

Expenses reflect the retention of a consultant under contract together with clerical assistance and related office and travel costs.

Operating Expense $12,000

GENERAL ANALYSIS

Objectives

The Department of Corrections is responsible for public protection through the confinement, supervision, and rehabilitation of persons committed to it by the courts both during the term of incarceration and on parole.

Program and Performance

The Director of Corrections is responsible for carrying out policies and programs to achieve the objectives of the department. The Departmental Administration function is designed to provide adequate staff to fulfill these responsibilities. It involves a number of diverse units that are organizationally collected under this title for ease of budgeting and administration.

The administration of the department includes the executive function and 7 program and administrative divisions. One of these, the Parole and Community Services Division, is so large and important that a separate analysis of its activities is included.

In addition to these functions, also included are the Adult Authority and the Board of Trustees, Institution for Women. The budgets for these activities are also set forth and discussed separately.

ADMINISTRATION

The budget for administration of the department includes provision for the executive and 6 of the 7 major divisions. As mentioned above the Parole Division is discussed separately.

The Correctional Program Services Division includes staff responsibility for custodial activities, employee training, education and library services, inmate classification, casework and related professional disciplines, group counseling, records, recreation, and the chaplaincy services. Each of these is an important treatment activity or service at the institution level. Emphasis continues on the special treatment and custody of unusually violent individuals in adjustment centers and in the general population in the institution.

The Management Services Division staff is responsible for general fiscal management including budget preparation and control, management analysis, prison planning, personnel management, procurement services, departmental construction and maintenance supervision, the feeding program and accounting.

The Research Division through its studies of inmate and parole population characteristics and performance provides important data for present and future institution and parole correctional programs by developing and testing specific types of correctional programs for specific types of inmates.

The Correctional Conservation Camp Services Division provides central co-ordination and standardization of the conservation program. This program calls for the expanded utilization of inmates in conservation and further development of California's natural resources, working cooperatively with other governmental agencies.

The Correctional Industries Division, which is supported entirely from the Correctional Industries Revolving Fund, a working revolving fund, provides a balanced and diversified work program enabling inmates to acquire the good work habits and occupational skills necessary for successful adjustment to free society. The Correctional Industries program includes industrial and agricultural enterprises in all correctional institutions excluding the Medical Facility, the conservation centers and the Rehabilitation Center.

The Medical Services Division reviews the medical care and treatment programs of the various correctional institutions and recommends standards of such care and treatment.

Workload and administrative adjustments in 1963-64 reflect the establishment of temporary help funds for increased workload in the central office mail room, a program administrator, fully reimbursed by the Institute for the Study of Crime and Delinquency, who will supervise a project "Institutes for Youth Worker Trainers", 3 records office clerks based on the approved workload formula and one senior stenographer for the study of probation practices which was approved and funded by the 1963 Legislature. One field representative is being transferred during 1963-64 from the California Conservation Center to this function because of a reorganization of the conservation program based on legislation enacted by the 1963 Legislature creating separate conservation facilities. In addition 3 field representatives and a clerical position were transferred from Administration to the Parole and Community Services Division to complete a previously approved reorganization of the division; 1 clerical position was transferred to the Medical Facility research unit to perform Improved Correctional Effectiveness program statistical population accounting; and the position of training consultant, Advanced Correctional Program, was converted to operating expense funds to enable the department to more effectively utilize funds available. Henceforth provision for this service will be funded in this manner. In 1964-65 1 research technician and a clerk are being deleted in the research function. These positions are part of the Narcotic Treatment Control Project complement being reduced due to completion of the project. These positions are proposed for reestablishment in the program augumentation section of this budget to complete the final report.

Proposed New Positions consist of a mail room clerk as mentioned above, 3 records office clerks established administratively in the current year and an additional classification staff representative based on workload formula.

PAROLE AND COMMUNITY SERVICES DIVISION

The Parole and Community Services Division, one of the 7 major administrative divisions of the department, supervises all adult males released from California prisons to parole programs in this State. In addition, it supervises men released from prisons of other states to parole programs in California, just as other states supervise California parolees residing there.

This division has its headquarters in Sacramento and field offices throughout the State. For administrative purposes, the State is divided into regions. The regular felon parolee population is administered in 5 regions of approximately 2,000 cases each; the statewide nonfelon parole program is administered from Los Angeles.

The work of the parole agent consists of investigating proposed programs for parolees; assisting the parolees in vocational guidance, job placement, and counseling on personal problems; appraising the parolee's behavior, attitudes, work record, and associations; maintaining contact with other law enforcement agencies; and protecting the interests of society by taking the parolee into custody if he shows evidence of becoming a threat to the community.

Parole agents are budgeted on the basis of an overall ratio of 55 parolees per 1 professional employee. All professional employees, except the chief, deputy chief, and the interstate unit are included in computing the ratio.

As an aid to supervision, the division operates out-patient psychiatric clinics in Los Angeles and San Francisco providing professional psychotherapy to parolees with emotional problems. The clinic staff also provides emergency psychiatric evaluations of parolees, consults with parole agents, and participates in the orientation of agents.

In addition to the regular supervision of parolees, the division has operated 2 research projects designed to discover more effective methods of parole supervision. The Special Intensive Parole Unit continues to evaluate the results obtained from providing more intensive and specialized parole supervision. In its current phase, the unit is testing the effect of assigning specific groupings of parolees to selected parole agents. The Narcotic Treatment Control Project, a research design for the supervision of former felon narcotics addicts released to the community after serving their prison sentence, is due to end June 30, 1964.

One portion of this project is the intensive supervision of small 30-man caseloads made up exlusively of former addicts by agents specially trained to work with them. Another part of the program is the frequent testing of the parolee by injections of anti-narcotic chemicals which disclose any recent use of addicting narcotics. Parolees may be returned to special detention treatment units at San Quentin, the Institution for Men and the Institution for Women when appropriate.

This latter project was designed as a 5-year study and demonstration. The 5th year of operation will be completed at the end of 1963-64 as noted earlier. On the basis of demonstrated effectiveness, the operation is proposed for continuance in the augmentation section of this budget, as a part of violence control and better parole management.

In 1961-62 the Parole and Commuity Services Division started receiving nonfelon narcotics addicts committed to the Department of Corrections in accordance with Chapter 850, Statutes of 1961, who were confined in and paroled from the Rehabilitation Center and its branches. The treatment and control of such narcotic offenders is on a budgeting ratio of 25 parolees per 1 professional employee. This ratio provides the close supervision and treatment setting necessary for the control and rehabilitation of these nonfelon addicts.

Parolee Ratios and Unit Costs:				
Parolees Supervised, End of Year:				
Male:				
Felons	10,349	10,585	11,010	425 (4%)

Workload and administrative adjustments for 1963-64 include the establishment of an intermediate clerk for workload in the Sacramento personnel office; 2 intermediate clerks for the regional records office; staff for the East Los Angeles Halfway House (4.5 positions), which is reimbursed by the Institute for the Study of Crime and Delinquency; staff for a 60-man nonfelon halfway house (8.5 positions), and a 30-women nonfelon halfway house (6 positions). The number of employees in the parole function authorized by the 1963-64 budget was reduced by 53 officers and 15 clerks to reflect a failure to realize the population previously estimated. Three field representatives and a clerk were transferred to this division from Departmental Administration. In addition, 35 positions in the felon narcotic parole unit are being reduced in 1964-65. These positions are part of the Narcotic Treatment Control Project complement being reduced due to completion of the project. These positions are proposed for reestablishment in the program augmentation section of this budget as a part of increased parole supervision and violence control. Positions remaining in this function will be transferred to nonfelon narcotic parole units or regular field units on the basis of authorized staffing standards for regular parole supervision.

During the 1963-64 fiscal year parole supervision responsibilities of the Board of Trustees will be transferred to the Parole and Community Services Division. This is reflected in the transfer of 39.1 field positions together with related operating expenses and equipment funds from the budget of the Board of Trustees—Institution for Women to the Parole and Community Services Division in 1964-65.

Proposed new positions in 1964-65 consist of the intermediate clerk for the personnel office and 2 regional records office clerks mentioned above. In addition, 2 other regional records office clerks are needed to complete the accepted staffing for each records office. All other proposed new positions are directly related to increased parole population of male and female felon and nonfelon addicts. These include: 26 parole agents and 7 clerks for nonfelon narcotic addict supervision; 7 agents and 2 clerks for regular caseload supervision; and 8 agents and 2 clerks for women parolees. These positions will be established at various times during the year as caseload growth demands.

ADULT AUTHORITY

The Adult Authority, composed of 7 members appointed by the Governor for a term of 4 years, is the term fixing and parole-granting agency in California for the adult male felons. The authority is fundamentally concerned with rehabilitation of adult male felons and with the release of these individuals at a time which is compatible with the interests of both the inmate and society.

The Adult Authority acts as the Advisory Pardon Board to the Governor on matters of executive clemency as well as assuming responsibility for investigating and reporting to him on condemned cases. The chairman of the Adult Authority serves on the State Board of Corrections.

The Adult Authority meets at each of the state correctional institutions regularly and conducts hearings by organizing into panels for the purposes of fixing terms, granting paroles, determining and forfeiting of credits, and restoring certain civil rights requested by inmates.

The authority meets weekly to consider reports and recommendations submitted by the Parole and Community Services Division concerning revocation of parole, restoration of certain civil rights requested by parolees, reinstatements, and refixing of terms of parolees.

During the 1962-63 fiscal year the Adult Authority heard a total of 29,177 cases. It is estimated that a total of 31,102 cases will be reviewed by the board during the 1963-64 fiscal year and 32,186 in 1964-65.

Workload and administrative adjustments reflect the removal of an adult authority representative and 1 intermediate stenographer in both 1963-64 and 1964-65 previously justified on the basis of nonfelon addict workload. This workload is now being handled by the Narcotic Addict Evaluation Authority, included as a part of the Rehabilitation Center. In addition, one Adult Authority representative was established in 1963-64 to replace the Adult Authority chairman in the approved workload formula due to the press of his other administrative responsibilities. Temporary help funds were also provided to cover increased clerical workload.

Proposed new positions include 1 adult authority representative to replace the chairman in workload formula computation, as discussed above, and 1 representative based upon approved workload formula computation. One intermediate stenographer is also proposed to handle the increased workload in the Sacramento office.

BOARD OF TRUSTEES—CALIFORNIA INSTITUTION FOR WOMEN

The Board of Trustees—California Institution for Women, composed of 5 members, 3 of whom must be women, is responsible for fixing the terms of adult female felons and granting or revoking paroles. The board also advises the Director of Corrections on general policies affecting the California Institution for Women. It meets regularly reviewing the individual cases and studying the history of women prisoners.

During the 1963-64 fiscal year, parole supervision responsibilities of the Board of Trustees will be transferred to the Parole and Community Services Division. While the board will still be responsible for term-setting and granting or revoking parole, parolee supervision will be conducted through the Parole and Community Services Division under broad terms established by the board.

	Parolee Ratios and Unit Costs:						
	Parolees Supervised, End of Year:						
	Felon parolees			1,091	1,060	1,030	—3
	Nonfelon addict parolees			84	150	325	17
	Total Parolees, End of Year			1,175	1,210	1,355	14 (12%
	Average number of felon parolees			1,045	1,082	1,050	—3
	Average number of nonfelon parolees			46	123	235	11
	Totals, Average Parole Population			1,091	1,205	1,285	8 (6.6%
	Average Cost Per Parolee: [b]						
	Felon			$314	$334	($332)	
	Nonfelon addict			$706	$695	($712)	
	Parole Agents, End of Year: [b]						
	Regular parole supervision			20	19	(19)	
	Increased correctional effectiveness			2	2	(2)	
	Nonfelon narcotics addicts			4	7	(15)	
	Totals, Parole Agents			26	28	(36)	

Workload and administrative adjustments reflect a decrease of 4 parole agents and 1 clerical position in both years based upon a reduction in the average number of parolees to be supervised. In 1964-65, 39.1 positions will be transferred to the Parole and Community Services Division along with related operating expenses. The transfer positions and related expen will allow the Parole and Community Services Division to pervise women parolees, making better use of available m power.

COMMISSION ON PROBLEMS OF INSANITY IN CRIMINAL CASES

The main objective of this commission, created by Executive Order of the Governor on May 4, 1960, was to study the problems of insanity relating to criminal offenders. A distinction was made between the procedural and substantive aspects of the problems. The commission was divided into 2 special commissions of 5 members each.

The commission terminated on June 30, 1963, and its final report recommended legislation aimed at improving the laws relating to procedures and the criminal responsibility of persons afflicted with mental diseases or disabilities.

GENERAL ANALYSIS

Objectives

The California Conservation Center has as its objective the protection of the public by confining male offenders for meaningful training and treatment, with emphasis being placed on forestry training and eventual placement of trained individuals in conservation camps.

Program and Performance

The California Conservation Center is located on 1,120 acres in Lassen County, approximately 8 miles southeast of Susanville. The center will house approximately 1,200 inmates in 1964-65. Its program is to receive inmates from the guidance centers and more secure prisons and train them in the skills necessary for their assignment to conservation camps (Inyo-Mono, Iron Mine, Magalia, Vallecito, Folsom Lake, Beaver Creek, Plum Creek, Intermountain, Crystal Creek, Deadwood, a mobile camp, and 3 federal camps) operated by the center in co-operation with the Division of Forestry, Division of Highways, and the United States Forestry Service.

The staffing of the center and 2 of its camps utilizes the new class of correctional program supervisor to provide better custodial control and treatment in a minimum custody setting through closer inmate-staff relationships. The correctional program supervisor class combines in one person the duties and functions of a correctional officer and a number of the duties of a correctional counselor.

Workload and administrative adjustments during 1963-64 reflect an increase in in-service training funds as the training of new employees was done in 1963-64 rather than 1962-63 where originally budgeted because of the delayed opening of the center, a high school teacher established in lieu of a contractual teacher, the transfer of a field representative from administration, executive, to departmental headquarters, and 1 associate superintendent being reduced in both years due to the reorganization of the conservation program. Temporary help for in-service training is also being reduced in 1964-65 based upon formula computation. Five and three-tenths positions were established in camp operations to supervise a newly created federal conservation camp, Sugar Pine.

Proposed new positions include 2 clerical and 1 professional based upon classification and parole computation, a high school teacher converted from a contractual position, a custodial position based upon a deficiency in the relief requirements of the approved post assignments, and temporary help for in-service training of cooks based upon an approved training formula.

The 5.3 camp positions established administratively during 1963-64 are proposed in 1964-65 for staffing a new federal camp and 1 position of overtime is proposed to cover overtime counseling needs at 2 camps utilizing the correctional program supervisor series. Thirteen and two-tenths positions are being transferred from San Quentin to staff Crystal Creek and Deadwood camps which are being transferred to the center's jurisdiction.

GENERAL ANALYSIS

Objectives

The Sierra Conservation Center has as its objective the protection of the public by confining male offenders for meaningful training and treatment, with emphasis being placed on forestry training and eventual placement of trained individuals in conservation camps.

Program and Performance

The Sierra Conservation Center is under construction on a 240-acre site in Tuolumne County, approximately 8 miles southwest of Jamestown. Completion is scheduled for April 1965 with the first receipt of inmates in May 1965. The center is being constructed as a permanent medium-minimum security facility for 1,200 inmates, divided into two 600-inmate units. One unit will house medium security inmates and the other will house minimum custody inmates.

The program for the Sierra Conservation Center will be to receive inmates from the guidance centers and more secure prisons and train them in a physical fitness program and skills necessary for their assignments to conservation camps. Beginning May 1, 1965, inmates will be received at the rate of 125 per month with a population of 250 on June 30, 1965. The institution will continue to receive inmates in the 1965-66 fiscal year, reaching capacity of 1,200 by January 1966.

During the 1965-66 fiscal year the conservation camps operated from California Training Facility, and Iron Mine Vallecito, Folsom Lake, Beaver Creek, and two seasonal camps currently operated from the California Conservation Center will be transferred to the jurisdiction of the Sierra Conservation Center.

Workload and administrative adjustments for 1963-64 consist of the reclassification of the deputy superintendent to superintendent in line with legislation passed during the 1963 Legislative Session, which make this facility a center rather than a branch of the Conservation Center.

A total of 136.6 new positions is proposed for 1964-65 to provide for preliminary staffing of the new institution. The balance of staff will be requested in 1965-66 based on generally accepted standards of staffing at comparable institutions.

The new positions proposed are classified by function as follows:

Executive	1
Business services	15
Custody and treatment	85.7
Medical	10
Feeding and clothing	11.1
Plant operation	13.8
Total	136.6

GENERAL ANALYSIS

Objectives

The Southern Conservation Center has as its objectives, the protection of the public by confining male offenders for meaningful training and treatment, with emphasis being placed on forestry training and eventual placement of trained individuals in the conservation camps.

Program and Performance

The Southern Conservation Center is located at Chino. It will house approximately 640 inmates in 1964-65. Its program is to receive inmates from guidance centers and more secure prisons and train them in skills necessary for their assignment to the 7 conservation camps (Minnewawa, Rainbow, Morena, Puerta La Cruz, Pilot Rock, Don Lugo, and Cuyamaca) operated by the center in co-operation with the Division of Forestry, Division of Highways and the United States Forestry Service.

The staffing of the Southern Center and two of its camps utilizes the new class of correctional program supervisor to provide better custodial control and treatment in a minimum custody setting through closer inmate-staff relationships. The correctional program supervisor combines in one person the duties of a correctional officer and a number of the duties of a correctional counselor.

Workload and administrative adjustments reflect an increase in custodial in-service training funds because of delayed activation of the center, therefore delaying the in-service training into the budget year, the transfer of 2 business office positions from the Institute for Men and 4 professional and 2 clerical positions also transferred from the Institution for Men for the increased correctional effectiveness program. Adjustments also include the reduction of training funds needed once the program is underway, and a reduction of 1 professional position and 1 clerical position, based upon approved classification and parole formula. The clerical position is requested to be established again in 1964-65 based on approved formula.

Proposed new positions include 3 custodial positions based upon a deficiency in the relief requirements shown on the approved post assignment and 3 clerical positions based upon classification and parole formula. One of the 3 clerical positions was administratively deleted in 1963-64 as discussed above.

In camp operations, overtime funds are being transferred from the Institution for Men due to camps previously transferred and 6.3 positions are reduced due to the closing of Oak Glen camp in the current year. In the budget year, 6.3 positions are proposed for the staffing of a new camp, Cuyamaca, to be activated October 1, 1964, in addition to overtime funds for group counseling needed at 2 camps utilizing the correctional program supervisor series.

Contractual services with the Division of Forestry for the training of inmates in the use of equipment and in fire fighting techniques are budgeted at the same level as the California Conservation Center at Susanville.

[a] Funds originally appropriated to the Conservation Center when this institution was operated as a branch of that facility.
[b] Operated in 1962-63 and 1963-64 fiscal years as a branch of the California Conservation Center.

GENERAL ANALYSIS

Objectives

The California Correctional Institution at Tehachapi has as its objective the protection of the public by confining male offenders for training and treatment.

Program and Performance

This institution operated as a branch of the Institution for Men through June 30, 1963. On July 1, 1963 it became a separate institution, remaining administratively responsible to the Institution for Men until the appointment of the Superintendent. The institution will house an average of 650 inmates in 1963-64 and 655 during 1964-65.

Correctional treatment is designed primarily for carefully screened male offenders capable of profiting by the program and willing to accept its responsibilities. The program includes vocational and academic instruction, industrial activities, and group counseling.

Institution population may be described in general by the following characteristics: median age 30.4 years; 44 percent prior prison commitments; 15 percent prior escape records. Offense groupings include 2.8 percent sex crimes; 14.2 percent forgery and illegal checks; 20 percent burglary; and 20 percent robbery.

Release of inmates from this institution is as follows:

	1962-63	1963-64	1964-65
Paroles and Discharges	272	325	325

Workload and administrative adjustments in 1963-64 reflect an increase of 2 custodial positions because of institution overcrowding, and a high school teacher. The teaching position formerly was provided through contractual academic services with the local school district and is now being converted to a civil service position. The position is financed by a reduction in contractual academic services. All three positions are included as proposed new positions for 1964-65.

GENERAL ANALYSIS

Objectives

The Correctional Training Facility protects the public by confining male prisoners under medium custody and treating them to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

This institution is planned to operate with an average population of 3,405 during the 1964-65 fiscal year. It encompasses 3 distinct prison facilities plus conservation camps: (1) Central Facility with an average population of 1,605 supplies various centralized services such as hospital and laundry for all facilities; (2) South Facility which has 600 inmates; and (3) North Facility which has 1,200 younger adult inmates and Youth Authority wards. Because of its size and organization the North Facility budget is displayed separately from the combined central and south budget. Correctional treatment planned for inmate rehabilitation includes vocational and academic programs, industrial work, plant maintenance training and one of the largest agricultural enterprises in the department. Group counseling, religious programs and recreational activities also have an important rehabilitative role for these inmates.

One cell wing of Central Facility is used as an adjustment center, housing up to 144 inmates with severe behavior problems. This unit also houses inmates in isolation (for punishment or pending prosecution for crimes committed in prison) and under protective custody (for inmates who must be protected from other inmates).

Institution population in 1964-65 may be described in general by the following characteristics:

Median age 26 years; 28 percent prior prison commitments; 22 percent prior escape records; offense groupings will include about 22 percent narcotics; 20 percent burglary; 24 percent robbery, and 9 percent forgery and illegal checks.

The institution is also responsible for the administration of a conservation camp program. During the 1964-65 fiscal year this will consist of the 4 previously established permanent state conservation camps (Miramonte, Slack Canyon, Murietta and Mountain Home) with inmate population totaling 300 men, and one new camp, Piney Creek, to be activated on a permanent basis on March 1, 1965, with an inmate complement of 80 men. In addition to the permanent camps, a mobile camp with 40 inmates is operated for general conservation work.

Release of inmates from this institution is projected as follows:

Paroles and Discharges:

	1962-63	1963-64	1964-65
Adult felons	1,272	1,410	1,350
Youth Authority	589	570	685
Totals	1,861	1,980	2,035

The 1963-64 workload adjustments for the central and south facilities reflect an increase of 1 correctional counselor I and 1 intermediate typist-clerk in accordance with the approved staffing formula in classification and parole; 4 temporary help positions in plant operations financed from repair and maintenance project funds to perform the necessary maintenance and construction projects, and a decrease of 1 psychiatric position which was converted to a contractual position due to recruiting difficulties. Other administrative adjustments consist of the redeployment of 5 correctional officer positions to create a security squad under supervision of a newly reclassified correctional lieutenant. The purpose of this squad is to reduce the inmates' possession of weapons and other contraband by a system of vigorous, surprise searches. A group living and inmate workers' wing for 128 inmates was organized and is supervised by a reclassified correctional sergeant.

Proposed new positions in 1964-65 include 1 intermediate typist-clerk provided under the normal staffing formula for the increased workload in the personnel office and one professional and two clerical positions based on the approved classification and parole staffing formula.

In 1963-64 workload adjustments for the North Facility reduce the staffing requirement by 1 correctional counselor and 3 clerical positions in the classification and parole section. One of these clerical positions is requested to be restored in 1964-65 based on projected workload staffing standards.

Workload and administrative adjustments related to camp operations reflect an increase in overtime funds for transportation of inmates and supplies in accordance with approved standards for the camp supervision function.

Provision is also made for standard staffing, equipment and operating expenses for an additional conservation camp to be established in the 1964-65 fiscal year by the Division of Forestry at Piney Creek.

GENERAL ANALYSIS

Objectives

The Deuel Vocational Institution provides custody, care, industrial, vocational and other training and guidance for young men too mature to be benefited by the programs of correctional schools for juveniles and too immature for confinement in prisons.

Program and Performance

This institution was created in 1945 as the California Vocational Institution and originally operated in temporary military quarters at Lancaster. In 1951 the Legislature changed the name to Deuel Vocational Institution. In 1953, the institution moved to the present permanent 780-acre location near Tracy.

Treatment is designed to rehabilitate young offenders committed either to the Youth Authority or the Department of Corrections. Academic and vocational instruction along with industrial work and training are emphasized. A research study is being conducted by the Pilot Intensive Counseling Organization (PICO) to determine scientifically the results of intensive counseling. A special program for inmates with severe behavior problems is operated in the adjustment center. A group counseling program, staffed generally by volunteer leaders under trained management, provides a medium wherein the majority of the inmate population have an opportunity to review with other inmates the causes of delinquency. A reception-guidance center for Youth Authority wards is operated within the institution.

Institution population in 1964-65 may be described in general by the following characteristics:

Adult Felons:

Nineteen and six tenths percent under 21 years of age, median age 23.4 years; 4.8 percent serving life sentences; 18.4 percent prior prison commitments; offense groupings include 26.8 percent robbery, 10.1 percent forgery and checks, 19.1 percent burglary, and 17.1 percent narcotics.

Youth Authority:

Median age approximately 19.7 years; 53.7 percent prior commitments; offense groupings include 25.7 burglary, approximately 17.8 percent robbery, 13.9 percent auto theft and about 9 percent narcotics.

[a] Excludes cost of operating the reception-guidance center, but does include cost of feeding, housing, and other expenses of inmates being processed therein.

DEUEL VOCATIONAL INSTITUTION—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	GENERAL ANALYSIS—Continued			
	Program and Performance—Continued			
	Release of inmates from Deuel Vocational Institution is as follows:			
	Paroles and Discharges:	1962-63	1963-64	1964-65
	Adult felons	296	285	265
	Youth Authority	584	590	700
	Total	880	875	965
	Reception-Guidance Center:			
	Intake for processing	2,348	1,780	1,958

Workload and administrative adjustments for 1963-64 include 1 clerical position for the personnel office based upon formula computation, 1 custodial position because of institution overcrowding, and 1 clerical and 1 professional position in the Reception-Guidance Center to meet specific workload requirements. Three professional and 2 clerical positions are being eliminated in the Reception-Guidance Center based upon proved formula computation. Four of these positions, 1 clini psychologist II, 1 correctional counselor and 2 typists are quested to be reestablished in 1964-65 based on increased mission computation.

Proposed new positions include a clerk for the personnel fice; the custodial overcrowding position; and the clerk for Reception-Guidance Center record office discussed above un workload and administrative adjustments. In addition, 1 d tist, and 1 psychologist, 1 correctional counselor, plus 1 cleri position that were administratively deleted in 1963-64 as c cussed above are proposed for the Reception-Guidance Cen based upon intake formula. One clerical position for the clas fication and parole function based upon formula computation also proposed. One correctional counselor position is also p posed for group counseling based upon the number of couns ing groups in existence.

GENERAL ANALYSIS

Objectives

The State Prison at Folsom protects the public by confining chronic male adult offenders, 12 percent of whom require maximum or close custody supervision. The program is designed to protect the public through a treatment process to bring about an adjustment which will permit their safe release to the community.

Program and Performance

This institution was established in 1880 and now occupies a 1,700 acre site in Sacramento County. The institution is expected to confine an average of 2,460 inmates in 1963-64 and 2,670 inmates during 1964-65.

Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, plant maintenance work and training, group counseling, medical and dental care, religious, library and recreational activities. A special unit, the 138-inmate capacity adjustment center, provides control and treatment of many of the department's most severe behavior problem cases.

The institutional population may be described in general by the following characteristics: Median age 38.5; 86.3 percent prior commitments; 33.5 percent prior escape records; 7.4 percent serving life sentences. Offense groupings include 24.6 percent robbery; 6.8 percent homicide; 17.1 percent burglary; 18.2 percent narcotics; 10 percent forgery and checks; 3.2 percent assault; 2 percent rape; 3.4 percent thefts except auto; 1.9 percent auto thefts; 3.6 percent escapes; 2 percent habitual criminals; 3.3 percent other sex offenders; and 3.6 percent other crimes.

Release of men from this institution is as follows:

	1962-63	1963-64	1964-65
Paroles and discharges	966	740	800

Workload and administrative adjustments in 1963-64 reflect a decrease of 1 clerical position in both years in classification and parole based upon accepted formula computation, and an increase of 1 custody position because of overcrowding.

Five custody positions are proposed in 1964-65 because of overcrowding. One professional and 2 clerical positions are proposed in 1964-65 based upon accepted classification and parole formula computation.

GENERAL ANALYSIS

Objectives

The Institution for Men has as its objective the protection of the public by confining for training and treatment the more tractable young male offenders with the majority under minimum custody.

Program and Performance

This institution was established in 1941 on a 2,500-acre tract south of Chino in San Bernardino County. Both temporary and permanent facilities of the main institution will house an average of 1,420 inmates during the 1964-65 fiscal year.

The Reception-Guidance Center receives all new male felon commitments from the southern counties. It will operate at an average population of 580 during the 1964-65 fiscal year, and will process approximately 3,530 cases.

Correctional treatment at this institution is designed primarily for carefully screened young male offenders capable of profiting by the program and accepting its responsibilities. It covers a broad field of vocational and academic instruction, plus a correctional industries program which includes an extensive agricultural program.

The institution population may be described in general by the following characteristics: Median age is 30 years; 33 percent have prior commitment records; offense groupings will include about 23 percent forgery and illegal checks, 24 percent burglary, 22 percent robbery, and 8 percent narcotics.

The institution administered 7 conservation camps in co-operation with the state conservation program and the State Division of Forestry at a total average population of 529 until July 1, 1963 when the camps were transferred to the jurisdiction of the Southern Conservation Center.

The population changes at this institution are as follows:

	1962-63	1963-64	1964-65
Paroles and Discharges:			
Institution	1,219	1,010	1,025
Reception-Guidance Center:			
Intake for Processing:			
Adult felons	3,259	3,400	3,530
Nonfelon addicts	973	–	–
Totals	4,232	3,400	3,530

Workload and administrative adjustments in 1963-64 reflect an increase of 1 storekeeper due to delayed construction of a camp warehouse and 2 short-term correctional officer positions because of temporary overcrowding. One professional and 3 clerical classification and parole positions and 1 professional and 1 clerical Reception-Guidance Center position are being reduced in both years in accordance with approved formula computation. Six intensive treatment positions are being reduced in 1964-65 with discontinuance of the program. Two intensive treatment positions are being continued within the ongoing increased correctional effectiveness program as a part of that program. These two positions were used as an integral part of the ICE program although accounted in the intensive treatment program. Eight and two-tenths positions are being transferred to the Southern Conservation Center to accompany related camp functions previously transferred.

Proposed new positions include 1 professional and 1 clerical position for the Reception-Guidance Center based upon approved formula computation.

GENERAL ANALYSIS

Objectives

The Medical Facility is the psychiatric, diagnostic, and treatment center of the Department of Corrections. It confines and treats adult male felons who are mentally ill or who have severe mental or emotional disorders. These include psychotic, severe neurotic, and antisocial character disorders. A small number of recalcitrant tuberculars are also housed.

A reception-guidance center is located in facilities adjoining the main institution and receives adult male felons from the 47 northern counties for diagnosis, classification, and recommended institutional placement.

Program and Performance

Group psychotherapy is employed as a major treatment method along with programs of academic and vocational education, plant maintenance work and training, medical and dental care, occupational therapy, library, recreation, and religion which are also offered to all inmates to the degree to which they can participate. These programs are designed to provide intensive treatment for felons afflicted with major mental illnesses (psychoses) and severe emotional and personality disorders. A sizeable number of problem cases are also admitted expressly for psychiatric evaluation and recommended disposition. Although the overwhelming majority are adult male felons, there is a small number of wards from the Youth Authority and recalcitrant tuberculosis misdemeanants from the Department of Public Health.

An additional wing, with a capacity of 129 and which will house the acute psychiatric treatment unit, is scheduled for completion on January 1, 1965.

It is anticipated that the Game Farm at Yountville will be relocated on the institution grounds during the 1963-64 fiscal year. This is similar to the installation at the Institution for Men at Chino and will be operated by the Department of Fish and Game. This will provide work for 10 inmates.

The institution population may be described as follows: Median age, 32 years; 46.8 percent prior prison commitments; 4.6 percent prior escape record; offense groupings include 12.1 percent sex offenders; 13.2 percent burglary; 18 percent robbery; 9.7 percent forgery and checks; 6.4 percent narcotics; and 10.3 percent homicide.

The population may be described generally in terms of medical classifications as follows:

Psychiatric observation cases for diagnosis and evaluation for the Adult Authority, courts, or other institutions, 60.

Active treatment cases (consists of patients with treatable mental and emotional disorders), under intensive group psychotherapy, 585.

Care cases for continuous treatment, 300. These include sexual deviates (including homsexuals, voyeurs, pedophilics, transvestites, etc.), 80; psychotics, 160; mental defectives, 20; severe neurological, 40.

Administrative cases, 105. These include those awaiting transfer, parole, etc., 55; departmental policy cases, 20; tuberculosis, 30.

Workers (skilled craftsmen, cooks, clerks, nurses, technicians, etc.) assigned primarily for maintenance of the institution, 300. All of these men receive group counseling.

Release of inmates from this institution is as follows:

	1962-63	1963-64	1964
Paroles and discharges	395	410	4
Reception-Guidance Center:			
Intake for processing	3,294	3,670	3,9

Workload and administrative adjustments in the 1963-64 cal year include an increase in funds for special consultants the amount of $10,000 due to an increase in county diagnos cases. The provision that counties reimburse the State for the services has been suspended from October 1, 1963, through Se tember 15, 1965, by Chapter 1787, Statutes of 1963.

Also included is the establishment of 3 correctional officers be used for a research project of the National Aeronaut Space Agency and one correctional officer and 0.8 tempora help for the relocation of the Yountville Game Farm at t institution. These increases are fully reimbursed.

One clerical position is transferred from Departmental A ministration Research to this institution in the 1963-64 fisc year as a part of the increased correctional effectiveness p gram research and reporting unit which was previously tra ferred to this institution.

Reduction in authorized positions in 1964-65 include 1 c rectional lieutenant in charge, first watch, reception-guidan center, due to a reorganization of custodial staff into progra units, and 1 correctional officer position, a portion of which w for relief of maintenance foremen positions. The portion of t correctional officer position for maintenance relief will no long be required with the addition of a new maintenance position f the newly completed psychiatric treatment unit. The remaind of the correctional officer position is deleted based upon po assignment computation. One professional and 1 clerical positi in the reception-guidance center are deleted based on worklo formula for cases processed in both 1963-64 and 1964-65.

Proposed new positions include 1 correctional lieutenant part of the reorganization plan developed to accommoda major changes in the custodial, psychiatric, and medical div sions during the 1962-63 fiscal year; 1 correctional officer f overcrowding in the reception-guidance center based on est mated population; and special consultant funds discussed abo in workload and administrative adjustments and 3 profession and 1 clerical position in the reception-guidance center for pr cessing based on workload formula.

In addition, 64.6 new positions are proposed for the ne acute psychiatric treatment center to be activated January 1965.

The design and staffing of this unit represents a fundament change in the control and treatment of some of the department most disturbed psychotic inmates. Clinician staffing, under th direction of a program administrator, is basically unchange Custodial staffing, however, represents control requirements f inmates in a ward situation who would otherwise be maintaine under isolation conditions.

Psychiatric nursing staff will provide 1 position 16 hours p day and in addition 1 medical technical assistant will be o duty in the clinic area 24 hours a day. The balance of th positions proposed for the unit consist of a building maint nance position to maintain the new facility, clerical support f the professional positions and in-service training funds to pr vide the standard training program for psychiatric unit pos tions based upon approved formula computation.

[a] Excludes cost of operating reception-guidance center, but includes cost of feeding, housing, and other expenses of inmates being pr cessed therein.

GENERAL ANALYSIS

Objectives

This facility protects and serves the public by confining male prisoners under medium custody and treating them to permit their safe release to the community.

Program and Performance

The East Facility of the California Men's Colony is a permanent medium security institution for 2,400 inmates located adjacent to the minimum security West Facility.

The institution is designed to make possible a more personal relationship between the inmate and the treatment staff, and, at the same time, effect economies by using central facilities for service and supply. It contains 4 segregated units of 600 men each. Housing, feeding, recreation, education and group counseling facilities are provided for each unit.

Correctional treatment planned for inmate rehabilitation includes vocational and academic programs, industrial work, and plant maintenance training.

The staffing of the institution has utilized the treatment team concept. A program administrator is in charge of each of the four 600-man units and supervises both treatment and custodial personnel assigned to the unit.

The institution population may be described in general by the following characteristics: Median age about 30.6 years, 39.4 percent with prior prison commitments; 2.7 percent serving life sentences; offense groupings include about 11 percent sex offenses, 8.9 percent forgery, 5.5 percent homicides, 16.4 percent burglary, 21 percent robbery and 22.4 percent narcotics.

Release of inmates from this institution is as follows:

Paroles and Discharges:	1962-63	1963-64	1964-65
Adult felons	737	798	800

Workload and administrative adjustments in 1963-64 reflect an increase of 1 professional position in care and treatment related to workload of nonfelon addicts and based upon approved formula, three-tenths of a professional position in conjunction with a fully-reimbursed research project on group counseling and community living sponsored by the University of California at Los Angeles, 8 positions required to operate a second shift in the laundry for service to Camarillo State Hospital also on a reimbursement basis, and 2 positions required to operate the water and sewage treatment plants acquired from the United States Army on July 1, 1963. The workload and adjustments for the care and treatment, laundry and water and sewage treatment plant functions recognize a continuing need and are included as proposed new positions for 1964-65. In addition, a clerical position is reduced in the classification and parole function based upon formula computation and a student professional assistant deleted because of continued vacancy. Three-tenths of a chaplain position is being deleted and funds transferred to operating expenses so services may be obtained by contract.

GENERAL ANALYSIS

Objectives

The California Men's Colony—West Facility protects the public by confining aged, infirm and other handicapped male felons and treating them so as to permit their safe return to the community.

Program and Performance

The Men's Colony—West Facility was established in 1954 on a 220-acre site in the hospital area of Camp San Luis Obispo. The institution will house an average of 1,425 men in 1963-64 and 1,450 in 1964-65. These totals include 80 who are assigned to the permanent state conservation camp, Cuesta, located on the grounds and who are specially selected and trained to serve the public in the conservation of the State's natural resources through fire fighting and reforestation work.

The correctional program of the facility is designed primarily for the retraining, rehabilitation and return to free society of the elderly and infirm offender. The program includes a small vocational program, an academic program in conjunction with the San Luis Obispo High School District, group counseling, organized recreation, Alcoholics Anonymous assistance, arts and crafts training, and religious guidance.

The institution's population may be described in general by the following characteristics: median age about 53 years, 58 percent with prior prison commitments, 6 percent serving life sentences; offense groupings will include about 23 percent sex

offenses, 19 percent forgery, homicide 13 percent, burglary 11 percent, robbery 6 percent and 11 percent narcotics. Some are blind, paralyzed, senile or amputees.

Release of inmates from the Men's Colony—West Facility is as follows:

	1962-63	1963-64	1964-65
Parole and discharge	457	485	510

In the 1963-64 fiscal year 0.6 temporary help is provided, funded from special repair and maintenance project funds, for maintenance and construction projects and 0.5 overtime is p vided for emergency forest fire suppression, fully reimbur from the Division of Forestry. In 1963-64 and 1964-65 a c rectional counselor I and an intermediate typist-clerk positi are abolished as a result of decreased workload in the classifi tion and parole function. In 1964-65, 0.4 temporary help is quested to handle increased workload in the inmate tr accounts.

GENERAL ANALYSIS

Objectives

The Rehabilitation Center serves to protect society and control addiction through the removal of drug addicts from the community and placement in facilities where they receive intensive rehabilitative treatment. An extensive research program will be conducted to inquire into the causes, effects and possible cures of drug addiction.

Program and Performance

The narcotics rehabilitative program is authorized under Section 6550 of Chapter 12 of the Penal Code. Persons convicted of any crime in a municipal or justice court where the judge finds that the defendant may be addicted, or in danger of becoming addicted, to narcotics are ordered to the superior court for hearing to determine if such is in fact true; and men and women convicted of certain felonies but not sentenced may be ordered into the program, if the judge feels they are fit subjects for the program.

A Narcotic Rehabilitation Advisory Council, composed of 5 members appointed by the Governor and a Narcotic Addict Evaluation Authority composed of 3 members appointed by the Governor were authorized by Sections 6403 and 6515 of the Penal Code, effective in September, 1963. The council will advise and study narcotic rehabilitation program and procedure. The authority will determine release to outpatient status, return to inpatient status and recommend release from the program.

All addicts handled under the California rehabilitation program are classified as nonfelon addicts to differentiate them from the regular Department of Corrections inmate population. This applies to volunteers, misdemeanants, and nonsentenced felons

Correctional programs designed to alleviate the inmates' drug addiction problem include specific programs of group and individual treatment; community living group treatment for the majority of the addict inmates; academic and vocational education; medical and dental care; a physical fitness and recreational program; industrial work and training; plant maintenance; and religious and library activities.

The addict inmate is assigned to work-training or school for half the day; is involved in group treatment for a quarter of the day; and the remaining quarter-day is utilized to meet the physical fitness, individual counseling, and other requirements of the inmate. The treatment program is directed at relief of the psychological and social problems of the individual which may well be a part of the cause of drug addiction. The rehabilitative program must be continuous and provision is made for intensive supervision and continued treatment following release to community parole with provision for quick return to the Rehabilitation Center for further treatment whenever a relapse into addiction is imminent. The Rehabilitation Center treatment program is accompanied by an extensive research program into the causes of, and more positive treatment for, drug addiction.

This 2,300-bed institution was activated in January, 1963 and is composed of a 1,900-bed men's and a 400-bed women's unit with central administrative and business services provided for both units. The women nonfelon addicts were moved from temporary housing at the Institution for Women to the Rehabilitation Center late in September, 1963.

Release of inmates from this institution is as follows:

Paroles and Discharges:	1962-63	1963-64	1964
Men	63	1,447	1,5
Women	–	125	3
Totals	63	1,572	1,8

Workload and administrative adjustments reflect a decrea of 74 positions in both 1963-64 and 1964-65 based upon a r duction in the estimated inmate population. Other worklo and administrative adjustments in 1963-64 include the establis ment of 3 board member positions and 1 clerical position for t Narcotic Addict Evaluation Authority, established by the 19 Legislature.

Also administratively established are overtime funds for t business office to provide for workload requirements, and f in-service training of new employees based upon approv formula computation. One supervisor and 7 academic teach positions were established in lieu of contracting with the loc school district.

A total of 59.2 new positions are proposed for 1964-65. Th includes 39 positions which were approved by the Legislatu for the 1963-64 fiscal year but will not be required until t 1964-65 fiscal year because of population adjustments. All 7 positions are based on necessary post assignments and accepte staffing standards. The positions are broken down between t men and women's unit and are further classified by functio as follows:

Men's Unit:	
Business services	1
Custody	17
Medical	5
Care and treatment	6
Classification and parole	3
Total, Men's Unit	32
Women's Unit:	
Custody	5
Care and treatment	2
Totals, Women's Unit	7
GRAND TOTAL	39

Other proposed new positions include those required for th Narcotic Addict Evaluation Authority as mentioned previously overtime funds for the business office; 2 positions for in-servic training overtime based upon approved formula computation, supervisor and 12 academic teacher positions converted fron academic contractual funds and 4 maintenance positions pre viously financed from Capital Outlay funds during the perio of renovation of the institution.

[a] Chino branch operations were terminated on July 1, 1963, and the facilities converted to the Southern Conservation Center.

GENERAL ANALYSIS

Objectives

The State Prison at San Quentin protects the public by confining adult male felons and some Youth Authority wards under close custodian security and treating them so as to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

The institution is expected to confine an average of 4,315 inmates in 1964-65. Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, group counseling, medical and dental care, and religious, library, and recreational activities.

A special unit at San Quentin provides custody of inmates sentenced to death and provides for their execution under the death penalty. Another special unit, the 101-capacity adjustment center provides control and treatment for inmates with severe behavior problems.

The Narcotics Treatment Control Project provides a half-day treatment and a half-day work program for an average population of 20 inmates. This program is scheduled for termination on June 30, 1964, but it is proposed for re-establishment in the augmentation portion of the budget.

A reception-guidance center is operated to process parole violators. Estimated cases to be processed at this center are 1,600 in both the 1963-64 and 1964-65 fiscal years.

The adult felon institution population may be described in general by the following characteristics: Median age 30.8; 43.1 percent prior prison commitments; 22.9 percent prior escape records; 5.9 percent serving life sentences; offense groupings will include 11.7 percent homicide; 22.3 percent robbery; 14 percent burglary; and 21.9 percent narcotic.

San Quentin will be responsible for the administration of 8 year-round road and conservation camps (High Rock, Parlin Fork, Chamberlain Creek, Alder, Konocti, Clear Creek, Preston Ranch and Black Mountain), 1 mobile camp and 1 seasonal United States Forest Service camp during the 1964-65 fiscal year. Black Mountain camp was approved for activation during 1963-64 but has been delayed until July 1, 1964. Crystal Creek and Deadwood camps are being transferred to the California Conservation Center on July 1, 1964. These camps, manned by specially selected minimum custody inmates, serve the public by aiding in conservation of the State's natural resources through fire fighting and restoration work. The highway and road camp inmates perform highway maintenance and construction work in remote areas of northern California.

Release of men from this institution and its camps is as follows:

	1962-63	1963-64	1964-65
Paroles and discharges	1,362	1,681	1,670

Workload and administrative adjustments in 1963-64 reflect an increase of 9 custodial positions (8 because of overcrowding and 1 to provide temporary help for guarding prisoners on trial in Marin County courts) and 1 clerical position in business services for inmate trust accounting based upon accepted formula computations. In addition, in 1963-64 and 1964-65 2 professional and 2 clerical positions in the reception-guidance center are deleted based on formula computation because of a decrease in the number of cases processed. One correctional counselor in camp operations is deleted in both years due to a reduction in workload.

Workload and administrative adjustments in 1964-65 reflect an additional decrease of 1 professional and 2 clerical positions in the classification and parole function and 13.2 positions in camps due to the transfer of Crystal Creek and Deadwood camps

[a] Excludes cost of operating Reception-Guidance Center, but includes cost of feeding, housing, medical, and other expenses of the inmates being processed therein.

to the California Conservation Center. A custodial position is reclassified for purposes of heading a newly established institution security squad.

Proposed new positions include 1 clerical position for inmate trust accounting, 6 custodial positions due to overcrowding, 1 position of temporary help to provide escort service for Adult Authority hearings. In addition 0.6 camp positions are proposed to complete the staffing complement of Black Mountain Conservation Camp approved in 1963-64.

GENERAL ANALYSIS

Objectives

The Institution for Women receives and confines all types of female prisoners committed to the Department of Corrections, including general felony cases, youth authority wards, narcotic commitments, mentally and emotionally disturbed under felony commitment, and recalcitrant tuberculosis cases, treating them to permit their safe release to the community.

Program and Performance

The correctional treatment program is designed for the rehabilitation of women inmates. It includes courses of academic and vocational instruction, group psychotherapy and counseling, medical and dental care, library, and recreational activities.

A study is made of all women entering the institution and a classification committee works with the inmate to develop an individual treatment program based on her physical and mental condition, aptitudes and skills, educational background, and social history. There is an active program of work, education, and recreation in which every woman is required to participate daily. Individual and group therapy for the more seriously disturbed inmates is conducted by a staff of a psychiatrist and psychologists. The majority of inmates receive individual and group counseling which is conducted by other staff members. There is also an active industrial project consisting of the manufacture of garments as well as sewing projects such as designing, dressmaking, alterations and tailoring. Laundry training, food service training, nurse's aide and medical technician training, and landscape and nursery training are also available for the inmates.

A reception-guidance center will be activated during the current year. Each inmate will be received, processed and classified and an individual program will be worked out with her, taking into consideration her physical and mental condition, educational background and social history.

An adjustment center will be ready for occupancy July 1, 1964, and will enable the institution to separate those persons who need to be temporarily kept apart from the main institution for the good of the general population and for their own protection.

The present population of the institution may be described in general as having the following characteristics: median age, 33.2 years; 30.3 percent prior prison commitments; 3.2 percent life sentences; offense grouping includes 32.4 percent forgery and illegal checks; 21.7 percent narcotics; 15 percent homicide, and 8.9 percent thefts other than auto thefts.

Release of women from this institution is as follows:

Paroles and Discharges:

	1962-63	1963-64	1964-65
Female felons	619	568	565
Nonfelon addicts	–	127	–

Workload and administrative adjustments in 1963-64 reflect an increase of 1.6 custodial position for the custody of a condemned prisoner and one clerical position in classification and parole based on approved formula computation. Eight custodial positions will be reduced due to the closing of one cottage, 2 laundry positions are deleted because of the reduction in workload due to the transfer of the Youth Authority contract laundry to the Institution for Men, and 1 clerical position is deleted due to workload reduction in the reception-guidance center in both years.

Proposed new positions include 4 supervising custodial positions. Three positions are for the new adjustment center and 1 relief position for the reception-guidance center staff. Also, 13.6 custodial positions are provided, 8 for the adjustment center, 4 to cover relief not provided in the 1963-64 fiscal year for the reception-guidance center, and 1.6 positions for coverage for a death penalty inmate as mentioned above in workload and administrative adjustments.

In service training funds are provided for the above new positions based upon approved formula computation.

One clerical position is proposed for classification and parole based upon approved formula computation, and an additional stationary engineer and electrician are requested for maintenance of new structures. Staffing for the adjustment center consists of a correctional counselor III to head the unit; a staff psychiatrist; a clinical psychologist II; and 1 clerk. All of these positions are based on necessary post assignments and accepted staffing standards.

PART I—CONTINUING OPERATIONS

Objectives

The protection of society by substituting for retributive punishment, training, and treatment directed toward the correction and rehabilitation of young persons declared wards for delinquent causes or found guilty of public offenses is the prime objective of the Youth Authority. The prevention of the occurrence of delinquency is its second main objective. In addition, the department encourages improvements in juvenile law enforcement and probation and increased use of county juvenile homes and camps.

Program and Performance

The Department of the Youth Authority was originally conceived as the Youth Correction Authority by the Legislature in 1941. Amendments to the original law in 1943 created the present Department of the Youth Authority and gave it responsibility for the administration of the State's correctional schools and parole program for youths. The law provides that commitments can be made to the Youth Authority by judges of the superior court sitting in juvenile or criminal court and judges of the municipal court after they have determined that the youth is under 21 years of age at the time of apprehension and that there is no program at the county level to meet the special needs of the individual.

The director of the Youth Authority is the chief administrative officer of the department and chairman of the Youth Authority Board. He is directly

[a] Population changes due to admission increases and per capita costs reflect information available for the first half of 1963-64 only. Population increases in facilities and parole for the last half of 1963-64 and all of 1964-65 are not reflected in this budget.

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART I—CONTINUING OPERATIONS—Continued

Program and Performance—Continued

responsible for the management of the State's correction schools, reception-center clinics, youth conservation camps, and for the operation of field services and branch offices. He is responsible for the custody, care, treatment, training, discipline, welfare, and supervision of wards committed to the Youth Authority, whether in the institutions or on parole in the community.

The Youth Authority Board is concerned with the acceptance or rejection of wards committed to the Youth Authority and with the parole and discharge of wards. It also works with the director in the formulation of policies concerning classification, transfer, training and treatment of wards.

The research division was authorized by the 1957 Legislature to provide the department with the means to conduct research into the fields of human behavior as related to its wards and in the specific field of delinquency, its causative factors, treatment, and prevention.

Research programs are now under way to test the effectiveness of psychiatric treatment in institutions, optimum parole caseloads, base expectancy predictions, and other programs to aid in better measurements of existing programs and evaluation of proposed plans for improving the treatment of delinquent youth.

The research division also includes the records and statistics section which is responsible for population accounting for wards in institutions and on parole. This section also provides population forecasts used in planning for Capital Outlay and current operations.

The Division of Probation and Delinquency Prevention Services conducts a program to develop an awareness of the value of local delinquency prevention programs and the need for adequate community services and assists in improving them. Training programs are provided for probation officers; counties are assisted in developing plans for new homes, camps and juvenile halls; and publications are developed that are directed toward improving the quality of local services. The Delinquency Prevention Commission established in 1961 advises the director in the field of delinquency prevention.

The 3 institutions transferred to the Youth Authority in 1943—Preston School of Industry, Fred C. Nelles School for Boys, and Ventura School for Girls—have increased to 7 institutions (5 for boys, 2 for girls), 2 reception center-clinics, and 4 Youth Authority conservation camps for boys.

During 1964-65, the institutions of the Department of the Youth Authority will have an estimated average daily population of 4,964. In addition, an average of 1,963 wards will be in Department of Corrections institutions. Also, during 1964-65 the Youth Authority will supervise an estimated average parole caseload of 13,289, as compared with 12,173 during 1963-64.

The Department of the Youth Authority's institutional program for handling the wards committed to it by the various counties includes:

DIAGNOSIS: A diagnostic study and evaluation is made of each ward committed to the Youth Authority. This study and evaluation, made during the ward's stay in a reception center and clinic is for the purpose of diagnosing the cause of the ward's delinquency and making recommendations for a program of individualized treatment to correct the ward's behavior pattern. This study and evaluation results in a recommendation of the degree of custodial supervision required, educational needs, medical and dental care, psychological or psychiatric therapy needed to treat the ward's mental and emotional needs, religious training, and other programs that will aid in the ward's return to society as a useful citizen.

TREATMENT: The correctional programs carried out in the institutions are designed to enable the Youth Authority to achieve a high degree of training and treatment in the institutional setting and to guide the ward in the development of good moral standards.

SPECIAL TREATMENT PROGRAMS: The 1957 Legislature gave the Youth Authority the responsibility for the custody and treatment of a group of wards who have severe emotional and behavioral problems and who are in need of professional, psychiatric-type treatment. The department was not previously equipped to provide both a custodial training program and psychological and psychiatric therapy services. Staff was authorized for the diagnosis and treatment division for the planning, control, and supervision of this program. Preston School of Industry, Fred C. Nelles School for Boys, Paso Robles School for Boys, Ventura School for Girls, and Los Guilucos School for Girls have been authorized staff for treatment units. A modified program is in operation at the Fricot Ranch School for Boys.

INCREASED CAPACITY AND POPULATION:

Capacity to be completed during the 1964-65 fiscal year will include four 100-bed living units at the Fred C. Nelles School for Boys. Two older unsafe living units at the Fred C. Nelles School are to be demolished to make way for 2 of the new units. One 50-bed living unit will be added to the Ventura School for Girls.

The department also administers programs to give financial assistance to counties in the construction and maintenance of juvenile homes and camps caring for wards who could otherwise be committed to the Youth Authority. During the fiscal year, it is expected that there will be 45 county operated homes and camps. It is estimated that an average of 2,798 boys and girls will be housed in county operated facilities.

The Youth Authority is charged with responsibility for establishing standards for and the administration of this state aid. The construction subsidy program was established by the Legislature in 1957. A total capacity of 2,059 county camp beds have been constructed, authorized, or proposed under this program since its inception.

A total of 121.5 new positions, at a cost of $566,666 are proposed to continue the current level of service, recognizing increased population and facilities and

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART I—CONTINUING OPERATIONS—Continued

Program and Performance—Continued

areas where previously accepted workload standards have not been interrupted or discontinued. Thirty-five and one-half of the proposed new positions are requested for the Division of Parole, recognizing increased workload in that activity, while 62.4 are required to staff new facilities at Fred C. Nelles School for Boys, Ventura School for Girls and the Northern California Youth Center. An additional 17.7 are directly connected with increased admissions and population. A total of 5.9 other workload positions are included throughout the various budgets. Such positions are shown in individual institutional or organizational budgets.

INCREASED ADMISSIONS: A trend of increased admissions which began in the summer of 1963 now appears to be of a permanent nature. This increase in admission of approximately 10 percent over the original estimates is not included in the population estimates shown in the summary tables nor distributed by facility and parole. The latest cost estimate based on this population trend approximates $500,000 for the last half of 1963-64 and $1,000,000 for all of 1964-65. A complete proposal including population estimates together with a program description for handling the increased population will be available when the Legislature considers the budget.

The proposals outlined above, along with on-going programs and those positions related specifically to authorized workload formulas, are discussed in detail within the individual institutional budgets.

PART II—PROGRAM AUGMENTATIONS

The major focus of the supplemental program of the Department of the Youth Authority is on a greater public protection through control of violence prone parolees, and increased parole success by providing more intensive parole supervision, individual treatment and parole services. To further strengthen the parole function a parole agent training program is also proposed.

The program also includes a request to increase allowances for parolees placed in foster homes by recognizing requirements for incidental expenses and clothing over and above present allowances.

Other proposals include the correction of staffing deficiencies in the basic ongoing programs of classification, custody, rehabilitation and administrative services.

These proposals are discussed in greater detail in the schedules and analyses which follow the recapitulation shown below:

A. Parole management	$431,452
B. Parole agent training	28,085
C. Foster home program	116,754
D. Correction of staffing deficiencies	211,832
Total	$788,123

DISTRIBUTION BY PROGRAM

A. PAROLE MANAGEMENT $431,452

The increase in the number of violent acts against person and property requires increased surveillance, supervision and treatment of the growing parole caseload. The Department of the Youth Authority proposes a 2-part program to assist in the control of violent-prone male youth authority parolees.

The first segment of the program consists of an increased parole supervision for 15 percent of the male youth authority parolees 16 years and older. The 15 percent, or 1,527 cases, has been identified as the most severely violence-prone, and as such, will receive a greater degree of parole supervision. The increase in parole supervision will better enable the Division of Parole to supervise, control, treat, and when necessary remove from society parolees exhibiting tendencies toward violent acts. To implement this phase of the proposal will require 38 additional positions.

The addition of these positions will permit the individual parole agent to spend an average 1½ hours of personal contact with each ward each month and an additional ½ hour in collateral services for each ward each month. At present it is possible to spend approximately ½ hour each month in personal contact with each parolee.

The second phase consists of 2 demonstration units of 200 parolees each. This phase is directed at a long range program of increased surveillance, supervision, and individual treatment. The individual treatment program will include individual counseling, group counseling, increased out-of-home placement, psychiatric assistance, and individual case planning. This will enable the Division of Parole to provide an intensified, highly organized surveillance and control program. The proposal provides for:

(1) Better placement of wards upon their release from institutions.
(2) Time for parole staff to have an increased knowledge about assigned parolees and their activities.
(3) More apropriate types of supervision and service to wards.
(4) Time and knowledge to detect the kinds of behavioral patterns which often precede aggressive action by parolees.
(5) Time and facilities to take current action to prevent acts of violence.
(6) The necessary supervisory staff to provide:
 a. Better supervision of parole agents.
 b. Proper planning for cases.
 c. Control of service and supervision of cases.
(7) Better treatment and training programs for wards released from institutions enabling them to live in open society.

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

A. PAROLE MANAGEMENT—Continued

The addition of 10.5 positions is required to put the second phase of the program into effect.

A training program is included in this proposal to allow new or replacement parole agents I a two-week training period prior to the time they become responsible for a caseload. This is the same program as is proposed for new parole agent I positions resulting from increased caseload or turnover in the regular parole program supervision which is shown as Item B of this section of the budget.

The addition of this increased parole program together with normal increases in caseload growth requires the reorganization and strengthening of the Division of Parole administrative structure to provide the administrative and casework direction, supervision and control for proper parole management. The following positions are proposed to establish, administer and operate the Division of Parole:

A deputy chief, Division of Parole and Community Services, who will be responsible for the parole operations in the northern half of the State; a parole agent IV to supervise a fifth parole region; 2 parole agents III to act as administrative assistants in casework and management for the two deputy chiefs. The assistance of 2 clerical positions will be required for the above positions.

The Division of Administrative Services will require the addition of 1 clerical position because of the increased workload in personnel management, 1 clerical position and a business service officer I will be required because of the increased workload.

It is proposed that one professional position and a clerical position be added to the Division of Research to develop evaluative techniques and interpretive materials to gauge the effectiveness of this intensified program.

Personal Services		$301,410
1 Deputy chief	11,390	
1 Parole agent IV	10,364	
7 Parole agent III	43,706	
5 Parole agent II	18,282	
34 Parole agent I	152,955	
1 Associate social research technician	8,889	
1 Business service officer I	7,262	
5.5 Intermediate stenographer	20,691	
3 Intermediate typist-clerk	12,145	
1 Intermediate account clerk	4,747	
1.3 Parole agent training	10,979	
– Operating expenses		95,371
– Equipment		24,969
– Special items of expense (foster home placements)		9,702
60.8 Total		$431,452

B. PAROLE AGENT TRAINING $28,085

It is proposed to provide a 2-week training course in the policies and procedures of the department to all new parole agent I positions.

At the present time the new agent is immediately assigned the responsibility for a regular caseload and he must learn departmental policy and procedures while managing a full caseload.

In addition the training he receives is on an informal intermittent basis conducted by the supervising parole agent to which he is assigned.

The proposed program would provide for a 2-week in-service training program prior to new agents assuming caseload responsibility. The new program would provide for continuity in the training of all new parole agent I positions, a more rapid development of efficiency, and will provide for a higher standard of training and treatment of those parolees assigned to a new agent.

The number of positions proposed are based on a 2-week lead time for 34 parole agent I positions employed during the year as a result of turnover and 18 proposed new for increased caseload. Operating expenses are necessary for travel and per diem during the training period.

Personal services	
2.1 Temporary help	$14,371
– Operating expenses	13,714
2.1 Total	$28,085

C. FOSTER HOME PROGRAM $116,754

The department's present program provides $80 per month for each ward placed in a foster home plus an average of $3 per month from the ward's trust account. This amount is paid to the foster home parent and is adequate only for board, room and supervision at current price levels. It is proposed that the allowances be increased $7 per month to provide clothing and $7 per month for incidental expenses such as carfare, school supplies, etc. The $3 per month taken from the ward's trust funds will be used as a reimbursement to offset this increased allowance.

In addition, a special allowance is requested for those wards requiring special attention. Of the continuing load of 514 cases estimated for 1964-65 it is assumed that an average of 14 of these will require special placement in institutional or group foster homes due to pregnancy, mental disturbance or other circumstances. It is estimated that the cost of these cases will average $125 per month which is $45 per month more than is now provided.

A ward placed in a foster home generally requires an initial clothing allowance over that of the ward who returns to his own home on parole. Projections indicate that there will be 1,028 initial foster home placements in 1964-65. An initial clothing allowance of $50 each is proposed for wards placed in foster homes.

SUMMARY OF THE DEPARTMENT OF THE YOUTH AUTHORITY—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION BY PROGRAM—Continued

C. FOSTER HOME PROGRAM—Continued

These proposals are comparable to allowances already in effect in most of the larger counties which place juveniles in foster homes when they have a history of behavior problems or who are on probation from municipal or superior courts.

A summary of the cost elements is as follows:

1. Clothing and incidental expenses at $14 per ward per month	$57,794
2. Placement of 14 wards in institutional or group foster homes	7,560
3. Initial home clothing allowance for 1,028 wards	51,400
Total	$116,754

D. CORRECTION OF STAFFING DEFICIENCIES — $211,832

The following positions are proposed to correct staffing deficiencies in those areas for which a specific formula or staffing standard does not apply or to satisfy a particular program need or administrative requirement.

Board and Classification Procedures

The 1963 Legislature redefined the duties and functions of the Youth Authority Board. The added responsibilities placed on the Youth Authority Board and the Director of the Youth Authority, coupled with substantial increases in ward admissions and classification workload, requires the addition of 2 board representatives, 2 assistant classification program supervisors and 1 clerk.

Diagnosis and Classification

A half-time parole agent and related clerical help is proposed to provide necessary casework supervision and preparole services for wards at the Mt. Bullion Conservation Camp. These positions will result in better parole programs, and staff training in basic casework methods and provide the Mt. Bullion Camp with a classification staff-ward ratio comparable to the institutions.

Funds are proposed to provide overtime pay for group supervisors who participate in case conferences on the conduct and progress of wards in the camp program. Currently, group supervisors attend the case conferences on a voluntary non-pay basis during off-duty hours. The overtime funds will correct this inequity by compensating group supervisors for the time spent in attending these case conferences. The case conference procedure is an integral and important part of the wards' program.

Community Treatment

The community treatment program project substitutes intensive treatment and control in the community for institutionalization of selected wards. Services within this program include intensive case analysis and treatment planning plus school tutoring. These services have been provided in the past through a grant by the National Institute of Mental Health which is no longer available. The continued success of this program warrants state financing this program. A treatment supervisor, a school tutor and consultant services are proposed to continue these services in 1964-65.

Custodial Control

Inadequate supervision and the lack of search and escort services have caused numerous problems in ward movements and escapes at the Paso Robles School for Boys. To meet this deficiency, 2 posts or the equivalent of 3.2 positions, are proposed.

The Assistant Head Group Supervisors at the Los Guilucos School for Girls have not been able to provide the custodial staff with the necessary supervision guidance, and support that they require. It is proposed to relieve those positions by establishing a control center which will require 3.2 group supervisors to man. In this way the assistant head group supervisors will be able to spend their time more effectively.

Feeding

Lack of adequate supervision of wards working in the kitchen of the Paso Robles School for Boys has resulted in repeated disciplinary problems, improper sanitation and poor food service. Two posts, or 3.2 positions, are proposed to provide closer supervision of wards and to maintain a satisfactory level of sanitation and food management.

Education

Three teachers are requested for the Preston School of Industry to provide a formalized orientation, indoctrination and education program for the 60 wards housed in the receiving unit. Through such a program, wards could be assigned to an activity or educational program and eliminate what is now 2 weeks of idle time.

At the present, relief is provided to cover vacation and educational leave for teachers. However, no provision is made to cover teacher positions when a teacher is on sick leave. To correct this deficiency, funds are requested to hire substitute teachers in order to maintain the education program on a continuing basis with a minimum reduction in the education and treatment process.

Clerical

Increases in workload over the years in the accounting office of the Preston School of Industry has resulted in serious staff deficiencies. An account clerk is proposed to handle the increased workload.

One additional clerk is proposed in the records and statistics unit of the central office to handle the substantial increases in workload in the collection, coding, and accounting of information on characteristics and movement of Youth Authority wards.

YOUTH AUTHORITY BOARD AND ADMINISTRATION

GENERAL ANALYSIS

This division includes the Youth Authority Board, director, administrative services, and supervision of the diagnosis and treatment, special treatment, and departmental research programs.

The Youth Authority Board consists of 6 members, each of whom is appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years. It is concerned with accepting or rejecting wards committed to the Youth Authority and with classification, length of institutional training and parole periods, and formulation of policies concerning wards. Four youth authority board representatives assist the board in meeting part of its workload.

The executive group is composed of the director, who is chairman of the Youth Authority Board, and his staff. The director is the administrative head of the department and is charged with those duties and responsibilities of the department in carrying out its objectives not specifically assigned to the Youth Authority Board.

The youth authority clerk and records office maintains the master files on all wards committed to the Youth Authority. This office is also responsible for recording actions taken and for orders issued by the Youth Authority Board.

Administrative services are furnished in the fields of accounting, budgeting, personnel management, food administration, maintenance and construction, and general administration. The administrative services division also operates as the link between the department and the other agencies concerned with the financial and managerial services of State Government.

The diagnosis and treatment division is responsible for supervision and operation of the department's reception centers, institutions, and conservation camps. This responsibility includes the training and treatment program in the institutions, as well as reception, diagnostic evaluation, and transportation of wards between institutions. It also includes supervision and operation of the department's special treatment program which was started during the 1957-58 fiscal year. This program is designed to meet the needs of special problem delinquents who, because of emotional disturbances or other severe personality problems, do not fit into nor benefit materially from the regular treatment program.

The research division is responsible for research programs being developed and undertaken by the department as well as accounting for the ward population in institutions and on parole. Basic research is planned and being conducted in the fields of human behavior and in the specific fields of delinquency, its causative factors, treatment, and prevention.

Workload and administrative adjustments for the 1963-64 fiscal year reflect an increase of 0.1 temporary help to provide for peak workload periods.

Increases in parole caseload and addition of new programs such as the narcotics control project, post-institutional narcotic treatment program, partway home program and private agency treatment program have increased the workload of the administrative services division's accounting office. In order to cope with this workload increase 1 accounting officer and 2 account clerks will be needed. These positions are proposed for 1964-65.

The department provides tabulating machine services for itself and for the Department of Corrections. The continuance of presently authorized research projects now receiving tabulating services plus the application of such services to ongoing projects which to date have not been provided tabulating services requires the expansion of the present operation.

Some of the Department of Corrections' programs which are scheduled to receive tabulating services in 1964-65 are: parole followup for parolees and persons discharged, inmate manpower control, adult authority hearing schedule, employment experience of parolees, special intensive parole unit studies and increased correctional effectiveness.

The Department of the Youth Authority also proposes to process foster home payments, population movement statistics, allotment accounting, clinic diagnostic summaries and parole followup studies on tabulating machines in 1964-65.

In order to process this increase in workload, an accounting tabulating machine supervisor and a tabulating machine operator together with additional tabulating machine costs of $13,709, are proposed for 1964-65. Temporary help of 0.1 position is proposed due to changes in workload in 1964-65.

DIVISION OF PROBATION AND DELINQUENCY PREVENTION SERVICES

GENERAL ANALYSIS

The Division of Probation and Delinquency Prevention Services provides assistance, leadership, and guidance to the counties and cities of the State in studying youth problems, and encourages them to provide more effective programs to meet their needs. It is concerned with the encouragement of improved juvenile law enforcement and probation. The division administers the program for maintenance of juvenile homes and camps partially subsidized by the State as well as inspection and consultative services to county and city operated juvenile halls.

Organizational changes which recognize this division's greater emphasis on co-operation with local agencies in the area of delinquency prevention are proposed. The new program which was initiated in September of 1963 will provide a deputy division chief position by reclassification of a field representative. The new position will be located in Los Angeles and will be responsible for operations in Southern California. In addition 12 field representatives and specialty consultants are proposed to be reclassified to classes with broader duty requirements which will allow individual consultants to cover jail inspection, law enforcement liaison and development of delinquency prevention programs instead of using specialists in each of these areas. This means that more geographic areas of the State can be covered by traveling consultants without the addition of personnel.

Workload and administrative adjustments reflect an addition of 0.1 temporary help position in 1963-64 due to changes in workload. This fractional position is proposed for continuance in 1964-65.

DIVISION OF PAROLE AND COMMUNITY SERVICES

GENERAL ANALYSIS

The Division of Parole and Community Services provides direct supervision and casework counseling for wards of the Youth Authority who are on parole. Parole agents make use of all available local services in directing wards toward a normal life in the community.

The division is currently engaged in a program to determine the feasibility of substituting treatment within the community for institution training for wards who are amenable to this type of program. The research aspects of this program are being funded by the National Institute of Mental Health.

An increase in caseload in the 1963-64 fiscal year over that originally anticipated requires that 3 parole agent positions be established administratively. The parole caseload projected for 1964-65 indicates the need for 28 new parole agents, including the 3 positions established administratively in 1963-64, and 7.5 clerical positions. These increases are in accordance with the regular parole supervision ratio of 55 parolees per parole agent.

	1962-63	1963-64	1964-65
Average parole population	11,339	12,345	13,515
Parole population end of year	11,659	12,624	13,940

In addition to these regular parole programs the "part way home" project and the provision of supervision under contract with private institutions, both of which were authorized for one-half year in 1963-64, are continued for a full year in this budget.

[a] Specialized training funds shown in departmental administration budget for 1963-64 and 1964-65.

SPECIAL PROJECT ACTIVITIES

Objectives

Research, investigation, and demonstration of methods and techniques that can be of value to the Department of the Youth Authority in the rehabilitation of certain types of youthful offenders are the goals of these projects.

Program

Public and private organizations interested in the prevention of delinquency and the treatment of youthful delinquents make funds available to the department for research activities not financed by the State. The activities must be concerned with the treatment of youthful offenders in California. Projects financed by nonstate funds generally include overhead charges to reimburse the State for additional costs incurred. Expenditures are not included in budget totals.

Activities are listed indicating the type of activity and source of funding. Project fiscal years do not necessarily correspond to the State fiscal year, and as a result expenditures are assigned to the fiscal year which most nearly coincides with the State fiscal year.

COMMUNITY TREATMENT PROGRAM
(National Institute of Mental Health)

The community treatment project substitutes a program of intensive treatment and control within the community for institutionalization of selected juvenile court cases.

A highly skilled staff works closely with approximately 90 wards paroled directly from the Northern California Reception Center and Clinic each year, their families, and appropriate private agencies. Wards are given intensive treatment during the period of time comparable to their regular institutional stay. Each ward is treated according to a plan which will insure maximum control and treatment possibilities in each individual case. Wards who represent a serious menace to persons or property in the community are excluded from the program.

The community treatment project has been made up of a research staff financed by the National Institute of Mental Health and a parole operation staff provided by the Department of the Youth Authority. The research study financed by the National Institute of Mental Health is scheduled to terminate on August 31, 1964. The Department of the Youth Authority plans to continue the parole operation stage of the community treatment program in the Sacramento and Stockton metropolitan area in the 1964-65 fiscal year.

OAKLAND INTERAGENCY COMMUNITY PROJECT
(Ford Foundation)

The Oakland Interagency Community Project is a 3-year community development program with a special focus on the assimilation of the newcomer population living in the Castlemont area in Oakland, California. This grant was made in response to a joint proposal by several agencies of the City of Oakland, the County of Alameda, and the Department of the Youth Authority. The program involves a series of 8 action projects carried out through designated agencies, all relating to the assimilation of newcomers in the Oakland area. Related research and evaluation are carried out through a research director and staff, and a confirming program development seminar.

The Youth Authority's share of the grant provides for the salary of 1 parole agent who acts as the department's liaison to the project.

This project is scheduled for termination March 31, 1965.

SMALL LIVING UNIT PROJECT
(Rosenburg Foundation)

The small living unit project, conducted at Fricot Ranch School for Boys, is scheduled to terminate on October 31, 1964. This project was designed to compare the performance of wards housed in large and small living units. The purpose of this program has been to determine whether the smaller living units and the resultant increased staff-ward ratios produces desirable attitude changes in wards; whether the treatment program conducted results in better ward adjustment and improved behavior pattern upon return to the community; and the kind of wards that are helped most by the smaller living unit.

GENERAL ANALYSIS

Objectives

The Northern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth Authority from Northern California. The purpose of the reception center is to receive, examine, and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

Program and Performance

This institution's program is centered in the reception and diagnostic evaluation of boys and girls committed to the Youth Authority. A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude, and abilities. Recommendations based on such study are made to the Youth Authority Board regarding type of training, treatment, and custodial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen. Remedial medical, dental, and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institutions are transferred to this facility for major surgical and limited psychiatric treatment. Limited use is made of ward help in the reception center because of the short length of stay and the intensive diagnostic evaluation program.

Ward movement and average population at this institution are as follows:

Average Daily Population:

	1962-63	1963-64	1964-65
Boys	213	251	253
Girls	51	58	58
Totals	264	309	311
Admissions: [b]			
Boys	2,131	2,499	2,625
Girls	506	547	587
Totals	2,637	3,046	3,212

Parole Releases and Processed Cases Transferred:

	1962-63	1963-64	1964-6
Boys	2,073	2,344	2,48
Girls	505	524	55
Totals	2,578	2,868	3,04

Latest diagnostic techniques indicate that a greater percentage of youths can be released on parole under special supervision after diagnosis in a reception center. In order to prepare parole plans for a higher number of parole releases, occasioned by the adoption of such a premise, a parole agent and 0.5 related clerical position are proposed for 1964-65. Since this program of controlled early releases was started in August 1963, these positions were authorized on a temporary basis during 1963-64.

In order to determine the causes of failure on parole and improve the treatment program for the individual parole violator, the Youth Authority Board has adopted a policy of returning a larger percentage of parole violators to reception centers rather than directly to institutions. This change in operation which was instituted in August, 1963, has resulted in a greater number of admissions than originally planned. To cope with the higher number of admissions occasioned by this change plus normal growth in referrals by the courts to the department, 1 supervising social worker, 1 social worker and 1 related clerical position are proposed for 1964-65. A senior social worker, a teacher and 0.5 related clerical position were authorized on a temporary basis during 1963-64 to handle the increased admissions and clear up temporary backlogs. An increase of 0.1 temporary help position is proposed for 1964-65 to add barber help for the increased admissions.

Dental work for girls is being shifted from the reception centers to the girls' institutions. This will allow the abolishment of 0.5 dentist position at this center in 1963-64. Other workload adjustments result in a reduction of 0.2 temporary help.

[a] Section 912 of the Welfare and Institutions Code provides that each county shall pay the State $25.00 per month for each ward while under the supervision of the Youth Authority in institution or foster homes. These funds are collected by and included in the budget for the State Controller and shown here for information only.

[b] Does not include anticipated admission increases discussed on page 152 for the last half of 1963-64 and all of 1964-65.

GENERAL ANALYSIS

Objectives

The Southern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth Authority from Southern California. The purpose of the reception center is to receive, examine, and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

Program and Performance

This institution's program is centered on the reception and diagnostic evaluation of boys and girls committed to the Youth Authority. A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude, and abilities. Recommendations based upon such study are made to the Youth Authority Board regarding type of training, treatment and custodial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen. Remedial, medical, dental, and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institutions are transferred to this facility for major surgical and limited psychiatric treatment. Limited use is made of ward help in the reception center because of the short length of stay and intensive diagnostic evaluation program.

Ward movement and average daily population at this institution are as follows:

	1962-63	1963-64	1964-65
Average Daily Population:			
Boys	276	300	300
Girls	48	50	50
Totals	324	350	350
Admissions: [a]			
Boys	3,035	3,247	3,405
Girls	631	700	746
Totals	3,666	3,947	4,151

Parole Releases and Processed Cases Transferred:	1962-63	1963-64	1964-6
Boys	2,899	3,138	3,29
Girls	590	653	69
Totals	3,489	3,791	3,996

Latest diagnostic techniques indicate that a greater percen age of youths can be released on parole under special supe vision after diagnosis in a reception center. In order to prepa parole plans for the higher number of parole releases 1 paro agent and 0.5 related clerical position are proposed for 1964-6 Since this program was initiated in August, 1963, 1 paro agent and 0.5 related clerical position were authorized on temporary basis during 1963-64.

In order to determine the causes of failure on parole an improve the treatment program for the individual parole viol tor, the Youth Authority Board is returning a larger percentag of parole violators to reception centers rather than directly t institutions. This change in operation which was instituted i August, 1963, has resulted in a greater number of admission than originally planned. To cope with the higher number c admissions occasioned by this change 1 social worker and 0. related clerical position are proposed. Handling the increase admissions since the inception of the program required the au thorization of 1 social worker and 0.5 related clerical positio on a temporary basis during 1963-64. These positions are pro posed for 1964-65 because of the continuing workload.

Increases in the juvenile court referral rate have had th effect of producing a large number of admissions to this recep tion center. In order to handle the increase in admissions 0. psychiatrist, 1 clinical psychologist, 2 social workers, 1 teacher 1 related clerical position and 0.1 temporary help position ar proposed for 1964-65.

Workload and administrative adjustments include a reductio of 0.5 temporary help position due to changes in workload dur ing 1963-64.

[a] Does not include anticipated admission increases discussed on page 152 for the last half of 1963-64 and all of 1964-65.

GENERAL ANALYSIS

Objectives

The Youth Authority conservation camps for boys are operated jointly by the Youth Authority and the Division of Forestry. Their primary purpose is the rehabilitation of older delinquent boys through useful work including suppression of forest fires, reforestation, road construction, and general maintenance of the State's forests.

Program and Performance

The 4 conservation camps emphasize work programs both in the forest and in the camp. A few boys are assigned in each camp to operate the kitchen, dining room, laundry, and perform general housekeeping, and building maintenance. A recreation program is conducted after working hours including activities ranging from sports to arts and crafts. A counseling program to aid in removing the causes of delinquent behavior is conducted concurrently with the work and recreational program.

The main camps are Pine Grove, located east of Jackson; Ben Lomond, in the mountains near Santa Cruz; Mount Bullion, near Mariposa; and Washington Ridge Camp located near Nevada City. Three 20-boy spike camps are operated as branches of the main camps, 2 from Mount Bullion and 1 from Washington Ridge.

Selected boys, primarily in the 17 to 21 age group, are sent to these camps as an intermediate stage between training in an institution and return to society. These wards include both criminal court commitments transferred from Deuel Vocational Institution and the Correctional Training Facility at Soledad and juvenile court commitments from the Youth Authority institutions.

Camp population during 1963-64 is expected to rise from t originally budgeted level of 338 to 358 as a result of a sha increase in admissions. Higher populations will be maintain by increasing the populations of Mount Bullion and Washin ton Ridge Camps.

	1962-63	1963-64	1964-
Average daily population	345	358	360
Parole releases	679	729	695

The increased population during 1963-64 necessitates adjustment of 2.2 temporary help positions for the first months of the 1963-64 fiscal year.

The increase in admissions during 1963-64 which has r sulted in a high number of assignments of wards to conserv tion camps is expected to continue during the 1964-65 fisc year. This new population level results in the need for an add tional work crew at both the Mt. Bullion Camp and the Was ington Ridge Camp. Staffing these work crews will require total of 4 proposed new positions.

Escape coverage at Mt. Bullion and Pine Grove, in-servi training at Washington Ridge and feeding coverage at Be Lomond will require a total of 0.5 temporary help proposed f 1964-65 to provide uniform standards at each camp.

GENERAL ANALYSIS

Objectives

The Fricot Ranch School for Boys is a correctional school for training, education, and rehabilitation, of delinquent boys primarily between 8 and 13 years of age. The purpose of the school is to provide a residential treatment center for the youngest and most immature boys committed to the Youth Authority and to return them to society as useful citizens.

Program and Performance

This institution places major emphasis upon a program of academic education and counseling. Minimum custodial standards are maintained as part of the treatment program. Because of its location in the mountainous Mother Lode Country the school is able to carry on a program of scouting, hiking, and outdoor living as part of its total rehabilitation program.

Ward movement and average population at this institution are as follows:

	1962-63	1963-64	1964-65
Average daily population	200	215	215
Parole releases	192	212	216

Workload adjustments consist of reductions of 0.1 temporary help position in 1963-64 and 0.2 temporary help positions in 1964-65.

GENERAL ANALYSIS

Objectives

The Fred C. Nelles School for Boys is a correctional school for the rehabilitation of delinquent boys, primarily between the ages of 13 and 15. The purpose of the school is to return the youths to society as useful citizens.

Program and Performance

The school conducts a program of education, training, and treatment, designed to guide the delinquent youth into accepted behavior patterns. The educational program covers the elementary and junior high school grades and is remedial in nature. The academic and industrial arts shop programs are similar to public school programs, and conducted to enable wards to return to the public schools system at the grade level commensurate with their age. Average age of wards at this institution is approximately 14 years. In addition to the regular academic arts and crafts, and physical education program provided by the education section, there is being developed a small garden and landscaping program, which will be operated in conjunction with the academic school, and which will help train wards who would benefit from work experience.

Ward movement and average population at this institution are as follows:

	1962-63	1963-64	1964-65
Average daily population	452	482	543
Parole releases	599	738	694

Four new 50-bed living units will be opened in 1964-65. Of these a total of 100 beds will be available in September 1964 and 100 will be available in January 1965. The 100 beds available in September will provide 38 new capacity and 62 replacement beds. The 2 living units opening in January will provide 100 new capacity beds. With the new capacity, average daily population will increase 81 over that originally planned for 1963-64. Population is planned at 610 on June 30, 1965.

Staffing for the new capacity will require a personnel clerk in administration, 3 senior group supervisors and 15 group supervisors for custodial supervision; 9 instructors, a supervisor of academic instruction and a related clerical position will be needed for the education program. The instructor positions are based on a ratio of 1 teacher, plus relief, for each 15 students in average daily attendance. An instructor in recreation and physical education is proposed based on a ratio of 1 physical education instructor for each 150 wards in the institution.

Two parole agent positions plus 1 related clerical position are proposed based on the classification and counseling ratio of 1 parole agent per 100 wards. A supervising parole agent plus 0.5 related clerical position are proposed based on a supervisory ratio of 1 agent for 5 or more positions in the classification unit.

A graduate nurse, a barber, a laundryman and 0.2 temporary help are proposed in their respective functions to handle the increase in population.

The increase in capacity of 138 beds will require initial complements of inventory and supplies totaling $17,270 in operating expenses.

Increases in equipment include replacement of a bus, $11,000; equipment for a portion of the proposed new positions, $4,090; and replacement of other large pieces of equipment.

A sharp increase in admissions has resulted in a larger population than originally planned for this institution in 1963-64. In order to care for the increased number of wards, 5 group supervisors for custodial coverage, 0.5 parole agent, 0.5 clerical position for classification purposes, and 1 instructor position for the educational program have been authorized on a temporary basis for the first 5 months of 1963-64.

Other workload adjustments in staff training allow a reduction of 0.5 position in temporary help in 1963-64 and 0.2 position in 1964-65.

GENERAL ANALYSIS

Objectives

The Northern California Youth Center is planned as a group of institutions (eventually 12) clustered around a central core of administrative and housekeeping services, i.e., plant and equipment maintenance, hospital, and business services. Eventually the total program will serve Youth Authority wards from 8 to 25 years of age and of both sexes. It will provide academic and vocational training as well as psychological counseling and treatment for youths committed from the juvenile and criminal courts to the Department of the Youth Authority.

Program and Performance

This constellation of institutions will be located on ground acquired by the State a short distance south and east of Stockton, and is planned for an ultimate capacity of 4,800 Youth Authority wards. The initial phase of the projected program includes a 400-bed institution for the younger adolescent-aged boy together with limited facilities for the central administrative core (i.e., hospital, warehouse, plant maintenance), and is planned for completion January 1, 1966. Funds have been appropriated for the first phase, and working drawings were included in the 1963-64 Budget for the second 400-bed unit. Requests for construction of other components are included in the 1964-65 capital outlay budget.

A minimum staff in central services for accounting, equipment, and maintenance is scheduled to become operative during the construction period and prior to opening the facility. Proposed new positions related to central services include an accounting officer, a procurement and services officer, and a chief of plant operations. A total of 2 stenographer positions are proposed for related clerical assistance.

In addition to the present superintendent (administrator) position for the youth center complex, a superintendent, an assistant superintendent, and a stenographer are proposed for institution No. 1. These positions are to be established during construction of the institution to transact business and follow up on many of the planning details during this period.

The 8 proposed new positions for this facility in addition to the 4 positions presently authorized are scheduled to be quartered in the Stockton area in order to be close to the construction site and transact business concerning the facility. Office space for this purpose is proposed beginning July 1, 1964.

GENERAL ANALYSIS

Objectives

The Paso Robles School for Boys is a correctional school for the rehabilitation of delinquent boys primarily between 15 and 17 years of age. The purpose of the school is to rehabilitate these boys and return them to society as useful citizens.

Program and Performance

The rehabilitation process is carried out through a program of education, training, counseling, and treatment designed to resolve basic emotional conflicts and to guide boys into acceptable behavior patterns. The education program is both academic and prevocational. It is remedial in nature and covers junior and senior high school subjects with provision for graduation from high school for those who successfully complete the required courses.

Major emphasis is placed on individual and group counseling of wards, and the use of every available professional service to provide for the special treatment needs of wards. This includes psychological and psychiatric therapy.

Wards are used to help in the operation of the kitchen, dining room, laundry, shoe repair shop and maintenance functions. Training and supervision are given in these areas as part of the total rehabilitation program. A farm and garden operation is also conducted as part of the education program, t train wards interested in this field. The farm furnishes eggs poultry, ham and pork products and a limited amount of fresl vegetables to the school feeding program.

Ward movement and average daily population at this institution are as follows:

	1962-63	1963-64	1964-6
Average daily population	455	476	454
Paroles	767	816	806

A sharp increase in admissions has resulted in a larger population than originally planned for this institution in 1963-64. In order to care for the increased number of wards, 8 group supervisors for custodial coverage and 3 instructors for the educational program have been authorized on a temporary basis for the first 6 months of the 1963-64 fiscal year. Adjustments in escape coverage, teacher training, classification and in-service training will require an increase of 1.2 temporary help position during 1963-64.

Various workload adjustments will require 0.1 proposed new position in temporary help for 1964-65.

GENERAL ANALYSIS

Objectives

The Preston School of Industry is a correctional school for the custody, training, and treatment of delinquent boys, primarily between the ages of 17 and 21 years. The purpose of the school is to rehabilitate these youths and return them to society as useful citizens.

Program and Performance

The Preston School of Industry conducts an educational program in 3 general areas. These are:

1. Academic instruction for wards who are from 3 to 5 years behind the educational level commensurate with their chronological age. The program is of elementary and high school level, including graduation from high school for those successfully completing the necessary courses.
2. Vocational training in various trades such as printing, auto mechanics, cabinet work, electrical work, sheet metal, and others.
3. Farm program with basic education in the operation of dairy, hog ranch, vegetable garden, and field crops.

Wards are used to help in the operation of the kitchen, dining room, laundry and maintenance program. Training and supervision are given in these areas as a part of the total program.

A program of counseling to understand and remove the causes of delinquent behavior is conducted concurrently with the educational and custodial program. A program of special treatment is available for wards with serious personality problems or in need of psychiatric therapy.

Average ward population and paroles at this institution are as follows:

	1961-62	1962-63	1963-64
Average daily population	841	869	846
Paroles	1,350	1,439	1,428

An increase in admissions has resulted in a larger population than originally planned for this institution in 1963-64. In order to care for the increased number of wards 6 group supervisors for custodial coverage, 0.5 temporary help and 0.5 related clerical position for classification, and 3 instructors for the education program have been authorized on a temporary basis for the first 6 months of the 1963-64 fiscal year. An additional 0.1 temporary help position is needed in administration in 1963-64 due to increases in accounting office workload.

Five-tenths position of instructor in recreation and physical education which has been used for refereeing services is proposed for abolishment in 1963-64 and 1964-65. These services will be budgeted under recreation and religion in operating expenses.

An additional 0.4 temporary help position is proposed for 1964-65 to cover increases in teacher training and accounting office workload.

GENERAL ANALYSIS

Objectives

The Youth Training School is a correctional facility for the rehabilitation of delinquent boys between 17 and 21 years of age. The purpose of the school is to rehabilitate these wards through an emphasis on vocational training with meaningful work experience and to return them to society as useful citizens.

Program and Performance

The rehabilitation process is carried out through an intensive program of education, training, counseling, and treatment designed to guide young adults into acceptable behavior patterns. The program is designed to give wards pre-employment training in the various vocational fields and to provide an opportunity for completion of the requirements for high school graduation. The vocational training program consists of 3 major divisions: (1) formal vocational instructions, (2) related work experience in maintenance and operation of the institution, and (3) work experience-education in areas not related to the maintenance and operation of the institution, i.e., offset printing, business machine repair, electronics, etc. The work experience program is conducted in 2 major areas: (1) plant maintenance and operation, and (2) food service. The auxiliary functions vital to institutional administration is performed by wards under close supervision of journeyman instructors in a program generally consisting of one-half day vocational training in the shop and one-half related work experience.

Average ward population and releases in this institution are as follows:

	1962-63	1963-64	1964-65
Average daily population	1,165	1,195	1,180
Parole releases	1,317	1,384	1,398

A sharp increase in admissions has resulted in a larger population than originally planned in 1963-64 for this institution. In order to care for the increased number of wards, 5 group supervisors for custodial coverage and 3 instructors for the education program have been authorized on a temporary basis for the first 5 months of the 1963-64 fiscal year.

Workload adjustments in temporary help positions result in reduction of 0.5 position in 1963-64 and 0.1 in 1964-65.

GENERAL ANALYSIS

Objectives

The Los Guilucos School for Girls is a correctional school with a resident population of girls between the ages of 10 and 18. The purpose of the school is to rehabilitate these girls and to return them to society as useful citizens.

Program and Performance

The institution is treatment oriented with a co-ordinated program of teaching, therapy, and cottage living. Educational emphasis is on schooling with some pre-vocational classes and work experience opportunities. Girls are instructed and supervised in their duties in the kitchen, dining rooms, hospital, dental unit and clothing room. They are responsible for housekeeping in their dormitories and under close supervision of housekeepers may perform instructional housekeeping.

Average ward population and releases at this institution are as follows:

	1962-63	1963-64	1964-65
Average daily population	244	260	260
Parole releases	306	333	349

Workload and administrative adjustments for 1963-64 are comprised of various temporary help adjustments which result in the reduction of funds equivalent to 0.1 position.

An increase of 0.2 temporary help position is proposed in 1964-65 to meet the requirements for substitute teachers while regular instructors are on educational leave.

GENERAL ANALYSIS

Objectives

The Ventura School for Girls is a correctional school for rehabilitation of the older delinquent girls, primarily in the 16 to 21 age group. The purpose of the school is to rehabilitate girls and return them to society as useful citizens.

Program and Performance

The Ventura School for Girls conducts a program of educational training and counseling to treat the causes of delinquent behavior. The education department offers a remedial program at the junior and senior high school level, with graduation from high school for those who successfully complete the required courses.

A vocational training program is emphasized to prepare girls for employment when paroled. Training is given in practical nursing, laundry operation, production sewing, cosmetology, food preparation and serving, stenography, bookkeeping and related clerical work. A co-operative effort with the State Department of Employment seeks to make the educational program fit these girls for work when paroled.

Paroles and average ward population at this institution are as follows:

	1962-63	1963-64	1964-65
Average daily population	298	398	445
Paroles	445	563	625

A 50-girl living unit is planned to open in July 1964. The opening of this dormitory will bring average daily population for the school to 445 for 1964-65. Staffing of the new living unit for custodial and treatment purposes will require 1 senior group supervisor and 7 group supervisor positions plus 0.4 temporary help for group counseling. Educational programming for the increase in population results in the need for 3.3 instructor positions plus 0.3 temporary help. These positions are based on a ratio of 1 teacher, plus relief, for each 15 students in average daily attendance. The addition of these teaching positions will require a supervisor of vocational education and 0.5 related clerical position to complete the pattern of supervisory staffing in the education program at this school. The choir program for religious services will require the addition of 0.2 pianist position. An instructor in physical education is added to meet the accepted ratio of 150 wards per physical education instructor.

The maintenance and preservation of buildings at this institution require an added painter position since the institution will be over two years old at the beginning of the 1964-65 fiscal year. The addition of this position is based on the formula of 135,000 square feet per year for each painter plus glazing maintenance of the more than 20,000 window panes at this institution.

Workload and administrative adjustments reflect a reduction of 0.2 temporary help position in 1963-64 due to adjustments in teacher training.

GENERAL ANALYSIS

Objectives

The Department of Education seeks to insure that all children of the State have an opportunity to attend the public school system and that once enrolled, they received adequate instruction by qualified teachers. The Superintendent of Public Instruction, an elected official, is ex-officio Director of Education and secretary and executive officer of the State Board of Education, which is the policy determining body of the department. The board consists of 10 members appointed by the Governor for 4-year terms.

During 1963-64, pursuant to Chapter 1747, Statutes of 1963, those functions of the General Activities budget concerned with services for the blind and vocational rehabilitation were transferred to the new Department of Rehabilitation. The net reduction in expenditures for the Department of Education for 1964-65 will be $383,512.

In the event that federal grants become available, there will be established, in 1964-65, a means of administering the Foreign Language Teachers Exchange and Recruitment Law of 1963 (Chapter 2041, Statutes of 1963).

Various other new legislation was enacted at the 1963 General Session. This budget includes these new or expanded items at an increased cost of some $115,000. The items are detailed in the program discussion of the respective divisions.

Program and Performance

The department is divided into 6 divisions to handle specific areas of responsibility: Departmental Administration; Higher Education Instruction; Public School Administration; Special Schools and Services; and the Division of Libraries, which for budgetary purposes is a separate unit. The program of each division is discussed with its detailed budget presentation.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

DIVISION OF DEPARTMENTAL ADMINISTRATION

GENERAL ANALYSIS

The Division of Departmental Administration, headed by a deputy superintendent of public instruction, furnishes executive, accounting, personnel, research, and legal services to the Department of Education. The expenditures of the State Board of Education are included and administered through the departmental budget. $50,000 was provided to the state board in the 1963-64 fiscal year for management analysis by a consulting firm of the department's role in public education. That part of the Division of Administration concerned with investigation of credentialed personnel has a continuing volume of cases that cannot be disposed of with the number of investigators now authorized. To meet this increased workload, there is provision for 1 additional investigator and a half-time clerk position. One intermediate typist-clerk is proposed in the Los Angeles office of the superintendent for increased workload.

The Fiscal Office is responsible for recording of financial transactions, budgeting, preparation of statements, purchasing, claim auditing, shipping and duplicating, and management services generally. The ever-increasing workload involved in financing arrangements, reporting, and recording for federal programs and a continuing demand by federally-supported programs for more readily available technical assistance requires an additional accountant position for the budget year with all costs offset by reimbursements.

The Personnel Office exercises general direction over the personnel program of the department.

The Administrative Adviser's Office acts as legal adviser to the Superintendent of Public Instruction and his staff, the State Board of Education, and to the staffs of the special schools and special service agencies in the department. It represents these agencies and officers in disciplinary actions, both contested and uncontested, involving disciplinary action against public school teachers and employees of the department.

During general sessions of the Legislature, the office prepares department-sponsored legislative bills, and prepares recommendations to the Governor on those bills of concern to the department. It drafts and passes on the legal adequacy of contracts including those for the purchase of state-adopted textbooks, leases, deeds, easements, and probate documents affecting the department and the agencies under its jurisdiction.

The Bureau of Education Research is responsible for studies in the evaluation of public school curriculum, educational measurements, and in the area of school administration, such as finance, teacher preparation, class size, and enrollment data. It also furnishes consultant services to school districts in advising and planning test programs. It assists in the administration of Title 10, National Defense Education Act. The tabulating machine section renders services to the various bureaus and divisions of the department. In the apportionments to the public schools, the bureau assumes the responsibility for mechanical computations of the school apportionment.

A total of 10.5 positions have been transferred from this division to the Department of Rehabilitation pursuant to Chapter 1747, Statutes of 1963. These positions are reflected in the Salary Supplement.

[a] Neither receipts nor expenditures of bond funds are included in the overall budget totals.
[b] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

70	**DIVISION OF HIGHER EDUCATION**						
71	**GENERAL ANALYSIS**						
72							
73	The division was established in 1961 for the purpose of consolidating and co-ordinating the several functions of the department relating to educating beyond high school. It includes the Bureaus of Adult Education, Junior College Education, Readjustment Education, Teacher Education and Certification, and the Commission on Inter-group Relations.						
79	The Bureau of Adult Education has the responsibility for co-ordinating and improving programs of adult education. In addition, this unit is required to approve more than 21,000 adult classes annually, as well as forum and lecture series, and also adult education summer sessions. Approval of the separate adult schools and adult education divisions of high school and junior college districts must also be given by this bureau.						
	The Bureau of Junior College Education is responsible for co-ordinating within the State Department of Education all matters relating to public junior college instruction and administration, including the organization, development, and promotion of new institutions; serves as the approval agency for new courses of study as prepared and submitted in applications by local districts maintaining junior colleges; processes appli-

	GENERAL ANALYSIS—Continued						

cations for approval for conducting "out-of-district" junior college classes; participates in surveys for new junior college districts and reviews existing junior college standards for the purpose of recommending their upgrading by the State Department of Education where necessary.

The Kellogg Foundation Nursing Project conducted by the Bureau of Junior College Education is expected to terminate at the end of the 1963-64 fiscal year. This project has led to the introduction of a registered nurse training program in 29 junior colleges and has made a significant contribution to correcting the shortage of registered nurses in the State.

Two consultants in junior college education and a supporting clerk are proposed new in the 1964-65 fiscal year. The need is becoming more apparent for improved direction and co-ordination of the junior college program of the State. Insufficient staff has been available in the bureau to properly advise the State Board of Education in its policy-making responsibilities of the junior college program.

The Bureau of Readjustment Education has the complete responsibility for the approval and supervision of courses offered by institutions for veterans' training. California has more than 10 percent of all veterans' training in the United States, with also the largest number of approved schools for veterans' training in any state. It is estimated there are approximately 13,000 individuals who are eligible for the benefits under the Veterans Readjustment Assistance Act of 1952 and the War Orphans Assistance Act of 1956. The bureau is also responsible for the administration of the provisions of the Education Code relative to private institutions covered by the "diploma-mill" legislation. This area of responsibility for authorizing the issuance of diplomas is gradually increasing and more private schools are being established in California for residence and correspondence training. Legislation passed in 1961 requiring all correspondence school salesmen to secure a permit to sell correspondence courses is also being administered by this bureau.

The Bureau of Teacher Education and Certification has the responsibility for the general functions of accreditation, teacher education, teacher recruitment, and certification. To assist the bureau in these areas, 3 advisory and 1 administration committees have been authorized. They are the Commission on Credentials, the California Council of Teacher Education, the State Committee on Accreditation, and the Teachers Professional Standards Commission established by Chapter 1748, Statutes of 1963. This budget provides for the travel of the latter commission.

Increased staff is proposed in the Certifications Office to place the credential process on a current basis. Unreasonable delays have been evident in serving credential applicants and a management study has been made to streamline operation and establish a more flexible organization which can adapt more readily to current workload problems and future increases or decreases. Staff changes as a result of this study would add 1 senior credential technician, 1 senior clerk and 4.7 intermediate clerks. These additions are partially offset by the abolishment of 2 man-years temporary help. Authorization by Chapter 1691, Statutes of 1961, has placed the credential processing function on a self-supporting basis from credential fees charged to applicants.

The Commission on Inter-group Relations, first created by the 1959 Legislature and redesignated by Chapter 1799, Statutes of 1963, assists and advises local school districts in problems relating to racial, religious or other discrimination in connection with certificated employment. It also advises and assists districts in problems involving the ethnic distribution of pupils and school attendance areas.

DIVISION OF INSTRUCTION

GENERAL ANALYSIS

The Division of Instruction is the operating division through which the Department of Education co-ordinates the instructional program in the State's public school system. In addition, the department's services for upgrading and improving the statewide instructional program are provided through this division. Although the 2 major functions of this unit are the co-ordination and improvement of instruction, its functions in specific fields vary widely. In certain vocational fields the division provides classroom supervision services, and in 2 programs, police officer training and fire training, division staff members regularly organize and conduct classes.

Three thousand dollars is proposed for use by the Curriculum Commission to secure subject-matter specialists, as necessary in the textbook adoption process. The Department of Education will continue to serve as staff to the commission, and the commission will continue to utilize as much voluntary help as possible, but the need exists for occasional employment of specialists for specific assignments.

The Bureau of Audio-Visual Education is responsible for the co-ordination and improvement of programs of audio-visual education in counties and school districts. The bureau is also a service unit for the department and for other state agencies and maintains materials and equipment to be used on a loan basis by departmental staff members and other state agencies where necessary. Library consultant assistance is also provided to public school libraries as authorized by Chapter 2052, Statutes of 1959. A 2-year study of school library services has been authorized by Chapter 1650, Statutes of 1963.

The Bureau of Elementary Education is responsible for the co-ordination and improvement in instruction in the elementary grades of the elementary and unified districts in the State. The efforts of the bureau staff are concentrated on working with key personnel in state and regional meetings and on the preparation of instruction materials such as teachers' guides and similar publications. No staff time is used for programs of inspection and approvals, for accreditations or for direct instructional services. A research grant from the United States Office of Education has been obtained to conduct a demonstration project in the specialized area of talent development. The project will carry into 1967. Staff has been provided by administrative adjustment during 1963-64; it is proposed to continue these positions through to the project ending. This project will provide needed information to improve the identification and education of gifted students. Chapter 2060, Statutes of 1963, established a 2-year pilot program to determine the effectiveness of providing intensive instruction in English to non-English speaking children. Two pilot programs are being conducted in San Diego and Imperial Counties, and a report will be provided to the Legislature at the 1965 General Session.

The Bureau of Secondary Education is responsible for the co-ordination and improvement of instruction in high schools and in this capacity works with the county superintendents and the high school and unified school districts maintaining junior, senior, and 4-year high schools. In addition, the bureau is required by law to approve the courses of study of all secondary schools. It collects and analyzes the annual reports from high schools and represents the department in the accreditation of high schools.

The Bureau of Physical Education, Health Education and Recreation is assigned the responsibility for the co-ordination of physical and health education and recreation programs in counties and districts. This includes responsibility for athletic services, medical and nursing services, and school district co-operation in community recreation programs of various types. An intermediate stenographer position is proposed to provide proper clerical support to the consultants. 1 man-year temporary help is proposed for reduction to partially offset the cost of the position. $10,000 is included in 1964-65 to print the bulletin "Narcotics and Dangerous Drugs."

The Bureau of Pupil Personnel Services, formerly known as the Bureau of Guidance, is responsible for the co-ordination and improvement of guidance programs in counties and in school districts and represents the department in working with other state agencies that provide services related to the guidance and placement of school pupils. This bureau also co-operates in the administration of Title 5 of the National Defense Education Act.

	DIVISION OF PUBLIC SCHOOL ADMINISTRATION						
	GENERAL ANALYSIS						

The Division of Public School Administration assists school districts by rendering assistance in noninstructional areas. The services furnished include school planning, school district organization, school lunch, free textbooks, surplus federal property, the child care program, advisory service in school finance and attendance and federal financial assistance under Public Laws 874 and 815.

The Administrative Services Bureau advises school districts on financial and administrative matters, including child care centers. The bureau also reviews the audit reports of all school districts and takes appropriate action as indicated by the review.

The Bureau of School Apportionments and Reports verifies reports of school districts and compiles data for use by the public schools. The apportionments are made in 5 major stages to local jurisdictions by this unit. The bureau prepares for publication such materials as are necessary to establish and maintain uniformity of practices and procedures throughout the State in public school financial accounting. County School Service Fund budgets are reviewed and control procedures maintained by this bureau.

The Bureau of School Planning assists and advises school districts in regard to acquisition of sites and construction of school buildings.

The Bureau of Textbooks and Publications is responsible for the editorial policy of all department bulletins and for administration of the free textbook program. A consultant in textbooks and an accountant are proposed in the budget year to meet the increased workload in the textbook program. Two clerks are proposed and the costs are offset by an equivalent reduction of 2 man-years of temporary help.

The Bureau of School District Organization assists county committees with district reorganizations, taking into account population, transportation, economics and school building facilities. A measure of the success of this program is the steady decline in the number of elementary and high school districts and the increase in the number of unified and junior college districts as shown by the following tabulation:

	1958-59	1959-60	1960-61	1961-62	1962-63	Change from 1961-62
Elementary	1,402	1,361	1,316	1,266	1,179	—87
High School	229	225	221	212	201	—11
Junior College	27	28	30	39	51	12
Unified	103	107	119	133	155	22

The Bureau of School Lunch administers the school lunch and the special milk programs which are federal grant-in-aid programs in which cash reimbursement and commodities are allocated to participating schools. The expenditures for these subventions are shown in the Subventions for Education portion of the budget.

DIVISION OF SPECIAL SCHOOLS AND SERVICES

GENERAL ANALYSIS

The Division of Special Schools and Services provides administrative and educational supervision to the state residential schools for the deaf, blind, and cerebral palsied children, and it provides co-ordination of programs of special education in the public schools through the Bureau of Special Education.

The Bureau of Special Education is the unit through which the department co-ordinates, improves, and supervises the various programs for pupils with special needs. These include programs on speech difficulties, hearing losses, sight limitations, and crippling conditions. Because these programs which are carried on by counties and school districts must meet specific requirements in order to qualify for special state reimbursements, this bureau has certain responsibilities for program approval. Many of the districts are unable to provide qualified supervisors for such specialized programs and, in these cases, members of the bureau engage in classroom supervision. Instructional materials available to blind pupils through the American Printing House for the Blind are requisitioned and made available to school districts by this unit. One-half clerk position is proposed in the budget to provide necessary clerical support to the existing professional positions in the bureau. Chapter 2165, Statutes of 1963, provides for the special instructional problems of the educationally handicapped. School districts and counties will need continuing assistance with these problems. One and one-tenth man-year was added in the current year on a federal research project to validate the testing instruments to be used in the identification of educationally handicapped children. This project will be completed in the current year and is not proposed for continuance. Chapter 11, Statutes of 1963, First Extraordinary Session, allowed the use of apportionment funds for the administration of a depository and clearinghouse for books and materials for the blind in the public schools.

The division's expenditure program has been proportionately reduced with the transfer of the functions of Field Services for the Blind, the Opportunity Work Centers, and the Industries for the Blind to the new Department of Rehabilitation pursuant to Chapter 1799, Statutes of 1963.

ADULT EDUCATION FOR CIVIL DEFENSE

Objectives

The program of Adult Education for Civil Defense in California was established to develop adult programs in civil defense using existing state and local adult education resources as well as the resources of business and industry and organizations to teach the principles of individual, family, and community protection to the citizens of the State. The costs of this program are financed entirely by the Federal Government.

Program and Performance

There are 2 phases to the operation of this program: the training of teachers by the State Department of Education, and the conducting of classes for adults.

At the completion of the 1962-63 school year, 1,160 classes and a total of 31,940 citizens were trained under the Civil Defense Adult Education Program.

During the 1962-63 fiscal year, the films "Keys to Survival," published by the Bureau of Adult Education, was used extensively with classes, committees representing governmental agencies, organizations, lay groups, and for co-operative programs over television stations. Plans for current and future operations include the production of a 30-minute informational film for use on television stations and the use of informational film and slides before service clubs, Parent Teacher Associations and lay groups; production of a synchronized slide and script series and construction of a movable exhibit. The continuation and expansion of the circulation of Civil Defense Adult Education materials in connection with adult classes, junior college classes and classes for younger pupils are projected for future months.

A reorganization during the current year for more efficient operation included the addition of 1 consultant to provide a staff of 3 professional positions in the South State area and 3 in the North State area. One consultant, 1 clerk and 0.1 man-year temporary help are proposed new in the budget year to continue this reorganization.

GENERAL ANALYSIS

The National Defense Education Act of 1958 was enacted by Congress (Public Law 85-864) to provide assistance to states and their subdivisions in order to ensure trained manpower of sufficient quality and quantity to meet the national defense needs of the country. The portions of the act of concern to the Department of Education are as follows:

Title 3—Improvement of Instruction. This title is composed of 2 programs: Title 3a provides federal funds to the Department of Education for reimbursement to local public school districts for the purchase of equipment and materials and for minor remodeling to improve instruction in science, mathematics, and modern foreign languages. These federal funds are matched by expenditures of the local school districts and are shown in the Local Assistance Section of the budget, Subventions for Education. Title 3b provides federal funds to the Department of Education for the costs of administering Title 3a and for expansion and improvement of supervisory and related services in the public schools in the field of science, mathematics, and foreign languages. These funds are matched by the State.

Title 5—Improvement of Guidance. This program provides federal funds to be used to establish and improve programs of testing and guidance for the identification and encouragement of able students. Existing state and local expenditures in guidance programs meet the matching requirements of this title and no General Fund appropriation is required. The Title 5 funds reimbursed to school districts are shown in the Local Assistance Section of the budget under Subventions for Education.

Title 8—Improvement of Technical Education. This program provides federal funds to improve technical vocational education and has been amended into the Vocational Education Act of 1946. Existing state and local expenditures in vocational education meet the matching requirements of this title and no General Fund appropriation is required. The budget and program for the title are shown in the Vocational Education Section of the budget, and in the Local Assistance Section under Subventions for Education.

Title 10—Improvement of Statistical Services. These federal funds are provided to improve educational statistics so that more valid information is available about the condition and progress of education in the State. State matching funds are included for this program.

[a] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

TITLE 3b—IMPROVEMENT OF INSTRUCTION

Objectives

Title 3 of the National Defense Education Act is concerned with the improvement of instruction in the fields of science, mathematics, and modern foreign language.

Program and Performance

Before a state can participate in the provisions of Title 3, it must prepare and have approved by the United States Commissioner of Education a state plan which becomes the state's contract with the Federal Government for participation in the program. Federal funds are then released to the state in accordance with the approved state plan and on the basis of the state allocations determined by the United States Commissioner of Education.

Federal funds are provided in this program to be matched dollar for dollar by local public school agencies for the purchase of equipment, materials, and minor remodeling for instruction in science, mathematics, and modern foreign language, and additional federal funds are provided to be matched by the State for the administration and supervision of the program.

Under Title 3a of the act, school districts and offices of the county superintendents of schools may file applications for funds for the purchase of equipment, materials, and minor remodeling with the State Department of Education. The State Department of Education reviews the applications in terms of the act and the state plan, and approves or disapproves. If approved by the State Department of Education the local agency is authorized to proceed as outlined in their project proposal. Up to half of the expenditure is reimbursed to the district from the available federal funds.

Under Title 3b of the act, local agencies may file for funds to provide special services to supplement local resources for plans to strengthen and extend activities for improvement of instruction in science, mathematics, and modern foreign language. These special services consist of providing consultant services to local districts and/or funds for the production of materials developed at the local level for statewide distribution by the State Department of Education.

The workload has steadily increased with the participation of more schools in these activities. To relieve the workload pressure on the clerical staff, a new typist position is proposed. Costs of this proposed position are offset by an equivalent reduction in temporary help.

A position of consultant in foreign language is proposed in 1964-65 to provide more leadership and assistance to school districts in implementing the mandatory instruction of foreign languages in the elementary schools.

	TITLE 5—IMPROVEMENT OF GUIDANCE						
	Objectives						
	This program provides federal funds to be matched by local funds or by existing state program expenditures to establish, maintain and improve programs of guidance, counseling and testing in the public secondary schools.						
	Program and Performance						
	The program for this title consists of approving and supervising local school district programs in guidance, counseling and testing. The program also includes developing minimum and recommended program standards, principles and procedures; conducting group and individual conferences to inform local school personnel of opportunities and requirements; initiating and co-ordinating research projects designed to strengthen guidance services; and conducting surveys and preparing reports on the program in California for the United States Office of Education.						
	Certain major trends in guidance programs have recently occurred which can be attributed in part to the Title 5 prog						
	1. Higher standards of training are being required for g ance personnel, and more efficient use is being mad trained personnel by assigning larger blocks of couns time in the school day to such personnel. Clerical he increasingly being provided to guidance personnel, freeing them from routine tasks and providing more for counseling.						
	2. The parents of secondary school students are being inc ingly involved in the educational and career plannin their children by means of counselor-student-parent ferences.						
	3. Testing programs for the identification of talent are b improved, and more effective use is being made of scores and other data about individual students.						
	4. Local educational agencies are providing additional f funds for the support of improved guidance services.

TITLE 10—IMPROVEMENT OF STATISTICAL SERVICES							
Objectives							
Title 10 provides for the improvement of statistical services of both state and local educational agencies to obtain more valid information about the condition and progress of education in the State.							
Program and Performance							
This title provides funds for the purpose of carrying on research to improve and strengthen the adequacy and reliability of educational statistics provided by state and local reports and records, and to improve the methods and techniques for collecting and processing educational data and information about the condition and progress of education in the State. The programs being conducted in California are as follows: 1. State Testing Program. Considerable resources have been devoted to develop the state testing program. Further work will be performed in 1964-65 to evaluate the testing materials now in use in order to evaluate and seek improvement in the new state testing program. 2. Development of accounting and reporting manuals. 3. Inventory of educational facilities.

GENERAL ANALYSIS

Objectives

The State Library in addition to maintaining a collection of books and other library materials has several service responsibilities. These include providing basic reference service to the State Legislature and to the executive branch of State Government; providing supplementary library service through local libraries in the State; assisting and stimulating the development of public library facilities in the State.

Program and Performance

The state librarian, who is appointed by the Governor, directs the activities of the State Library which is organized into 4 operating bureaus and 1 staff bureau for administration. The 4 operating bureaus are the Law Library, Library Consultant Services, Reader Services, and Technical Services.

The state librarian also administers the new program granting state financial assistance to local public libraries as authorized by Chapter 1802, Statutes of 1963. The budget for this library assistance program is in the Local Assistance section of the Budget under Subventions for Education.

The Law Library serves as a legal research and legal reference center for the Legislature, state agencies, the legal profession, and the citizenry of the State. The law librarian also provides consultant services to local law libraries in the State on request.

[a] Neither receipts nor expenditures of federal funds are included in the overall budget totals.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Program and Performance—Continued

An increase of $8,678 is proposed in the book budget of the law library to correct deficiencies in the library's collection. One clerk is proposed new in the 1964-65 fiscal year for workload increases.

The Reader Services Bureau has the responsibility of coordinating the activities of the various public service functions of the library. One clerical position is proposed in Readers for the Blind to keep pace with the increased number of blind borrowers. One man-year of temporary help is proposed in the bureau to provide staffing for peak periods.

The Technical Services Bureau includes such functions as book repair, cataloging, ordering, maintenance of periodicals, photoservices and shipping. A senior typist-clerk is proposed for the Catalog Section to relieve workload pressure and provide subprofessional assistance to the catalogers. An additional clerk is proposed for increased workload in maintaining the Union Catalog. This catalog is used to locate books requested in the inter-library loan program and not available from the State Library.

A price increase of $16,854 (11%) has been included for book purchases to maintain the existing level of book acquisitions. An increase of $3,500 is included in binding because amounts previously allowed have not been sufficient to keep materials in proper condition.

ASSISTANCE TO LOCAL LIBRARIES

Objectives

The Public Library Services Act, added by Chapter 1802, Statutes of 1963, has as its objective the improvement of locally-financed free public libraries throughout the State by means of incentive grants to public library systems.

Program and Performance

This program is administered by the state librarian with the advice of the Public Library Development Board created by the act. The board has 9 members appointed by the Governor to 4-year terms.

The program provides 3 types of grants to qualifying libraries: planning grants to develop an acceptable plan for improved library services, establishment grants to assist in the financing of the formation costs of library systems, and per capita grants based on average population per square mile served by the system. The first 2 types of grants are one-time in nature while the per capita grants will be on an annual basis.

State financial support is limited to not more than 2 percent of the total operating expenditures of all the public libraries of the State from funds received from public sources for the last completed fiscal year.

A progress report will be available at the 1964 Budget Session of the Legislature.

RURAL LIBRARY SERVICES

Objectives

The Rural Library Services Act (Public Law 597, Eighty-fourth Congress) has as its objective the extension of public library services to rural areas now lacking in such services. Federal funds are provided for this purpose.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64

RURAL LIBRARY SERVICES—Continued

Program and Performance

The Processing Center which is operating under this act has now become self-supporting through reimbursement by the member libraries. These libraries have their books purchased, cataloged, classified and processed by the center. Twenty-two libraries are now members of the Processing Center. The Library Consultant Services programs continue to be accelerated by Federal Library Services Act.

The North Bay Co-operative Library System is a demonstration of co-operative library service in parts of 6 counties in the Northern San Francisco Bay area.

The San Joaquin Valley Information Service demonstration which provided complete and rapid information and reference services to 6 county and 4 city libraries has been completed and is now supported by the local libraries. The headquarters of the service are in the Fresno County Library.

County library services are being demonstrated in Mendocino County on a 2-year basis. During 1964 the county will decide on the continuance of the county library.

The Calaveras County Library Demonstration will be initiated in 1963-64 to extend and develop library services for Calaveras County through a co-operative agreement between Calaveras County Library and the City of Stockton under the Library Services Act. This is a 2-year demonstration.

The Nevada County Library Demonstration is proposed for 1963-64 to extend and develop library service in Nevada County through the organization of countywide library program. The project is scheduled for 2 years of service following its establishment.

Additional federal apportionments were made to California in the 1963-64 fiscal year. It is anticipated that the federal apportionment will be at a reduced amount in the budget year, and the program is budgeted accordingly.

GENERAL ANALYSIS

Objectives

This school provides for the education of blind children who come from school districts without adequate educational programs for the blind.

Program and Performance

This residential school offers general education to blind, partially blind, and deaf-blind children through the elementary grades and the high school levels. Besides special teaching methods and techniques, special equipment, such as Braille writers, Braille books, embossed maps and globes, geometric models, nature study models, audio equipment, and various types of other special equipment are used. The Helen Keller deaf-blind unit provides a full education program for doubly handicapped children.

In addition to the residential school programs, field services are available for preschool blind children, for graduates and for ex-pupils. The school also administers reader services for blind college students who cannot be served by the Department of Vocational Rehabilitation.

During the 1964-65 fiscal year the school will provide general education for 170 resident children, guidance services for approximately 55 former students, field services for an estimated 85 preschool children, and reader service for approximately 70 blind college students.

The 1964-65 budget proposes 4 counselor positions to correct staffing inequities at the school during night hours. Counselor coverage for this purpose has been provided in the past by requiring all counselors to stay on the campus every other night in addition to their regular work day.

One-half stenographer position is proposed in the Los Angeles Office of the Pre-school Program to correct workload deficiencies. An increase of $6,000 is proposed in Readers for the Blind to maintain the same level of services in 1964-65 at the higher hourly rate of $1.25 to be paid at that time.

One hospital aid position was abolished effective July 1, 1963 as a result of reduced workload needs in the school's infirmary.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis and the determination of a treatment and educational program for children from Northern California affected with cerebral palsy and other similar handicaps. It also serves as a demonstration school for the education department of San Francisco State College.

In addition, the school functions as a medical-educational di nostic center for neurologically handicapped children in operation with the Bureau of Crippled Children Servic Department of Public Health.

SCHOOL FOR CEREBRAL PALSIED CHILDREN, NORTHERN CALIFORNIA—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	

GENERAL ANALYSIS—Continued

Program and Performance

The children enrolled in the school are referred by their local school districts or by physicians in the northern counties served by the school. The length of enrollment is dependent upon the severity of handicaps and the degrees of difficulty in establishing an individual educational, medical and therapy program. Upon completion of the residential program the child is returned to his local school district with a suggested educational and therapy program.

A total of 161 children were served at this school during the 1962-63 fiscal year. Of this number, 56 were evaluated in the diagnostic center only, and 105 were enrolled at the school for intensive educational training and therapy. The following table shows the number of students served and the average cost for the past several years:

	1959-60	1960-61	1961-62	1962-63
Number of children served	181	133	183	161
Average cost of students served	$2,431	$3,560	$2,600	$3,105

Thirty-one students and graduate teachers from the Special Education Department of San Francisco State College enrolled in the 1962-63 summer session of the school where they received instruction with first-hand observation on the education of cerebral palsied children.

The school also co-operates with the Department of Vocational Rehabilitation in providing a limited amount of pre-vocational training of students in order to develop sufficient skills that they may become good candidates for further counseling and work experience provided by the department.

An increase of $5,000 is proposed for 1964-65 to begin a 3-year painting program. In addition, a $4,000 increase in medical care is proposed to more properly perform the medical aspects of the program.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis and the determination of an educational-medical program for children from Southern California who are afflicted with cerebral palsy and the similar handicaps. It also serves as a demonstration laboratory school for the training of professional personnel concerned with the education and care of such minors. Various departments of the Los Angeles State College as well as other colleges and universities utilize the school's program and facilities in their training program of professional personnel. It is anticipated that the new facility adjacent to the Los Angeles State College will be completed in January 1964. Upon completion the school will function as a medical-educational diagnostic center for neurologically handicapped children in co-operation with the Bureau of Crippled Children's Services, Department of Public Health.

Program and Performance

The children enrolled in the school are referred by their local school districts or by physicians in the Southern California counties served by the school. The length of a child's enrollment, usually less than one year, is dependent upon the severity of the handicaps, the degree of difficulty in establishing an individual educational, medical and therapy program, and the response by the parents to counseling and guidance provided by the staff. Upon completion of the residential program the child is either returned to the local community for continued special education or he is cared for by other public or private facilities.

A total of 74 children were served during the 1962-63 fiscal year. The following table shows the number of children served and the average student cost for the past several years.

	1959-60	1960-61	1961-62	1962-63
Number of children served	65	90	62	74
Average cost of student served	$5,524	$4,244	$6,122	$5,576

In the 1963 summer session Los Angeles State College taught 6 courses with a total enrollment of 79 college students in the education of physically handicapped children at the school.

With the completion of the new facility in January 1964, the extension of the program will bring the services offered at the school up to a comparable level with the Northern California School.

One teaching position is proposed new in the 1964-65 fiscal year for work with the children enrolled in the diagnostic center. One janitor position has been added administratively in the current year and is proposed in 1964-65. This additional position is required to properly staff the custodial function for the maintenance of the new building.

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children who come from school districts without adequate educational programs for the deaf.

Program and Performance

The curriculum of this school is similar to that found in the public day schools but with special instruction for all students using oral techniques, speech and lip reading, as well as finger spelling. The vocational education program is an important part of the curriculum. In addition, a student may receive vocational instruction in any one of the following fields: home economics, commercial art, business education, printing and linotyping, cabinet making, upholstery, metal shop, auto repair, bakery, and shoe repair. Beginning with 1963-64, this school also offers a preschool parent institute as authorized by Chapter 1745, Statutes of 1963.

The school offers students an opportunity to qualify for admission to Gallaudet College in Washington, D.C. Seventeen graduates from this school will attend Gallaudet College during 1963-64. Other graduates from this school are placed regularly in printing, construction, bakery, shoe repair, business and self-employed enterprises.

The 1964-65 budget for this school proposes the establishment of 1.5 teacher positions and one 1 clerical position. One teacher position established during the 1963-64 fiscal year, is warranted under the approved teacher-pupil staffing ratio. The half-time adjustment teacher is requested to provide intensive instruction to multiple handicapped deaf students who otherwise could not be admitted to the school. This will serve as a pilot program to develop teaching techniques for the multiple handicapped in order that they eventually may be included in regular programs for the deaf as full-time students. The clerk is proposed to provide clerical assistance to the dean of students and for work with the increased personnel workload.

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children who come from school districts without adequate educational programs for the deaf.

Program and Performance

The curriculum of this school is similar to that found in public day schools but with special instruction for all students using oral techniques, speech and lip reading, as well as finger spelling. Chapter 1745, Statutes of 1963, authorized the establishment of a preschool parent institute at the school.

A college preparatory course is offered for students competing for entrance to Gallaudet College in Washington, D.C. Twenty-two graduates from this school entered Gallaudet College in September 1963.

A vocationally oriented junior college course is offered at the Riverside Junior College for students unable to qualify for Gallaudet College. Twenty-three graduates of this school enrolled at Riverside Junior College in September 1963.

The vocational education program is an important part of the curriculum. A student may receive instruction in any one of the following fields: home economics, commercial art, printing, cabinet making, body and fender repair, spotting and pressing, business education, baking, electric motor rewinding, appliance repair, electronic assembly and horticulture.

One-half intermediate typist-clerk position is proposed in order to meet the increased workload in the personnel section.

GENERAL ANALYSIS

Objectives

The purpose of vocational education is to prepare persons for useful employment. Vocational education provides training to develop skills, attitudes, and working habits; it imparts knowledge and information needed by workers to enter, to hold, and to progress in employment on a productive basis.

Program and Performance

The program of vocational education in California is designed to serve the needs of three distinct groups of people—those who are preparing for initial employment, those who are already employed but who have need of higher skill levels, and those who are unemployed.

The Vocational Education Act of 1963 (Part A of PL 88-210) was signed by the President in December, 1963. This new federal act is aimed at improving existing programs and at developing new programs to meet the needs of modern vocational training.

A considerable part of the vocational education program in California is based upon co-operative working relationships between local school districts, the State Department of Education, and the United States Office of Education. Involved in this co-operative plan are federal funds made available for support of approved instructional, supervision, and teacher training costs.

Federal funds available under the Smith-Hughes and George-Barden Acts must be matched on an equal basis by local or state funds. Federal funds available under the Manpower Development and Training Act of 1962 require no matching.

Administrative, supervisory, and consultative services for the vocational education program have been organized as the Vocational Education Section of the State Department of Education. These services are provided through the following categories:

1. Agricultural education, which served 45,385 persons in 1962-63 in classes for adults, in junior colleges and in high schools. These enrollments were the highest achieved in the history of the program.
2. Industrial education, which served more than 756,000 persons in 1962-63 through adult education classes, junior and senior high school programs, and junior college courses.
3. Homemaking education, which enrolled 256,965 in classes dealing with preparation for and improvement of homemaking skills and understandings.
4. Business education, which served some 440,000 youth and adults in courses varying from beginning typing to advanced electronic data processing.

In addition to the basic vocational education program, there are 5 programs which augment the joint federal-state-local program. These are the Instructional Materials Apprentices Program, the Fire Training Program, the Area Vocational Education Program, the Manpower Development and Training Program and the Practical Nurse Training Program. These programs are discussed below.

Instructional Materials for Apprentices. This program prepares instructional materials for use by apprentices in trades in which there are a minimum of 100 apprentices. There are currently 30 such trades. The materials prepared include workbooks and testbooks and such instructional aids as examinations progress charts, and teacher manuals. These publications are sold to the apprentice at a price sufficient to recover the direct costs of such publications. Exceptions to this pricing policy are made for certain nonapprenticeable trades with less than 100 apprentices. Federal funds are used to finance the excess costs when these exceptions are made.

Fire Training. This program provides service to local fire departments (almost exclusively volunteer fire departments) by conducting in-service training throughout the State, teaching the latest methods and techniques of fire fighting, fire prevention, and fire investigation. During 1962-63, 215 schools were held and 5,805 men were instructed in classes taught by the 8 itinerant instructors on the staff. A total of 4,213 class hours of instruction were given. In addition, the annual arson seminar was conducted in Los Angeles with an attendance of 193, and the annual workshop was conducted in Fresno with an attend-

Program and Performance—Continued

ance of 232, also a fire prevention seminar was conducted at the University of California at Berkeley with an attendance of 120 persons.

The Area Vocational Education Program seeks to stimulate the technical education and training of technicians needed by industry. This program is responsible for the reviewing, approving, and processing of local school district applications for federal funds allotted to California for the purpose of technical education. Financing is entirely from federal funds under Title 8 of the National Defense Education Act.

The Manpower, Development and Training Act Program is also administered by this section. This program is designed to provide unemployed persons with the work skills that will make them employable and is jointly conducted with the State Department of Employment. In 1962-63, some 117 training projects were organized for more than 5,500 trainees. Public and private schools were allocated more than $2,700,000, all from federal sources, for the conduct of this training.

During the first year of this program most of the workload was absorbed by existing section staff. In 1963-64, a doubling of the projects and workload has required an administrative adjustment of 9 positions which have been partially offset by a reduction of 3 man-years of temporary help. These positions are proposed in the 1964-65 fiscal year along with 4 additional positions for the anticipated program growth in 1964-65. All costs, whether at the state level for supervision and administration or at the local level for equipment and instruction, are paid from federal funds specifically appropriated and allocated for these purposes.

The Practical Nurse Training Program was instituted in 1956-57 by the Federal Government for the purpose of developing curricula and programs in this field. The program is being developed through contractual arrangements with the University of California.

GENERAL ANALYSIS

Objectives

The function of this system is to provide monthly allowances to public educational personnel who are qualified to retire for services or disability in accordance with the provisions of the Teachers' Retirement Act and policies established by the State Teachers' Retirement Board.

Program and Performance

The Retirement Board consists of the Director of Finance, the Superintendent of Public Instruction, 3 members of the System, a member of a local board of education, a bank officer and an insurance officer.

The present Teachers' Retirement System was established by Chapter 13, Statutes of 1944, 4th Extra Session, and is provided for in Section 13801 through Section 14415 of the Education Code. It is intended to provide retirement allowances for service or disability, and other related benefits for the California public school teachers.

The law provides for the collection of contributions from members by payroll deduction, from the counties, school districts, and other employing agencies. These funds consist of members' contributions which are based on an individual rate applied to the earned salary, and also employer contributions of $12 per year for each member employed, and an amount equal to 3 percent of the certificated payroll of each district or a lesser amount determined by applying an appropriate rate to the assessed valuation of the district's property. Additional members' contributions are received directly by the system for payments of redeposits and arrears, and for the purchase of additional annuities above those provided by the application of the normal retirement benefit formula to the individual case. The member's contributions are credited to his account to be used to provide a retirement allowance or to be refunded upon withdrawal from membership or death; they are invested in qualified securities in accordance with the system's investment program. The employer contributions, plus the appropriation from the General Fund, are used to pay current benefits to eligible persons.

This budget provides 1 administrative analyst position to assist in policy and procedural review. One clerical position is provided to maintain general files of active members. This increasing activity in the General Files Section is a result o increased membership as well as a greater awareness on th part of members of the significance of retirement benefits. On clerical position is provided in the Actuarial Section becaus of increasing workload in maintaining the verification of out-of state service for retiring members. Two clerical positions ar proposed in the Report Section to verify and correct discrep ancies in retirement rates for active members. A study con ducted in 1959-60 indicated 30,000 teachers were contributin an amount to the system at a rate other than that establishe by the system. It is anticipated that this workload can be com pleted during 1964-65 and 1 position can maintain the accuracy in retirement rates thereafter. One clerical position is provide in the Membership Division Correspondence Section to per form increasing workload involved in establishing and servicing new member accounts, rate requests and name and rate changes. Two clerical positions are provided in the Actuarial Section in order to perform the increased workload arising from the establishment of the estimated retirement roll. This permits prompt payment to annuitants following retirement without undue delays arising from formal verification of accounts for retirement purposes. Temporary help is increased $10,000 in order to provide 2.5 man-year equivalent file clerks for the one time conversion of active member files to open shelving. The tenure and expanding nature of these files require this less expensive filing method to maintain economy in this operation.

One general accountant is proposed in Accounting Operations to audit the annual and advanced reports on member contributions and service. This position will assist in the prompt reconciliation of county reports in order to improve the reporting and verification of members' accounts. One general accountant is proposed for internal accounting for increased investment workload. The expanding investment portfolio as well as smaller average purchases in recent years have increased the volume of accounting transactions to maintain control. One senior tabulating machine operator and 1 key punch operator are proposed for overall workload of the system. One accounting technician is provided in the internal accounting unit for increasing workload arising from redeposits and receipts. This involves the

GENERAL ANALYSIS—Continued

Program and Performance—Continued

accountability for withdrawal of member contributions upon separation from service where authorized and redeposit of withdrawn contributions where re-entry is made in teaching service. One man-year of temporary help is provided for tabulating machine operations. Another man-year is for the verification of affidavits of retired members to insure continued eligibility and to perform increasing accounting workload in the retirement payment section of making adjustments to the retirement roll. Finally, 1 clerical position is provided in office services for increased mail handling.

This budget anticipates the postponement of the relocation of this office from May until October 1964 due to construction delays in the new Retirement Building.

During the current year $15,000 will be added administratively to provide temporary help to administer the retirement benefits authorized by Chapter 2171, Statutes of 1963. This legislation carried an appropriation to finance the benefit cost only.

GENERAL ANALYSIS

Objectives

The Donahoe Higher Education Act of 1960 requires the Co-ordinating Council for Higher Education to perform the following functions advisory to the governing boards of the institutions of higher education in California and to the appropriate state officials:

1. Review the annual support budgets and capital outlay requests of the University of California and the California State Colleges, and present comments on the general level of support sought;
2. Delineate the different functions of public higher education and counsel as to the programs appropriate to each segment;
3. Develop plans for the orderly growth of public higher education and make recommendations on the need for, and location of, new facilities and programs.

Within the scope of the above general requirements of the Donahoe Higher Education Act the council since its organization has conducted many specific projects both in terms of these requirements and in response to legislative directive, requests of the governing boards of higher education, and on its own initiative.

On January 14, 1964, the Co-ordinating Council for Higher Education was designated by the Governor as the agency to represent the State of California under the provisions of the Higher Education Facilities Act of 1963. This act established a 5-year program of federal grants to institutions of higher education for the construction of academic facilities. Under the requirements of the act, the Co-ordinating Council has the responsibility for developing a plan for California's participation in this grant program including recommendation of (1) relative priorities of eligible projects for construction of academic facilities submitted by institutions of higher education in the State and (2) the federal share of the development cost of each such project under basic criteria set forth by the Commissioner of Education. The council has the further responsibility of administering any funds granted to California institutions under the auspices of this act once the state plan has been approved.

Program and Performance

The Co-ordinating Council for Higher Education is a 15 member body composed of representatives from the general public, the private colleges and universities, the public junior colleges, the California State Colleges and the University of California. Created by the Legislature in 1960 on recommendation of the master plan for higher education, the council is an agency designed to assure the voluntary co-ordination of public higher education in California.

The council staff is chiefly concerned with the conduct of studies and research in matters affecting the whole of public

[a] These amounts exclude expenditure funds which are not reviewed by the Department of Finance or the Legislature—see "Expenditures not included in overall budget totals" page 221.

CO-ORDINATING COUNCIL FOR HIGHER EDUCATION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Program and Performance—Continued

higher education. Full staffing within budgetary allotments has been achieved during the current fiscal year for the first time since the council's beginning.

Among the subjects considered and reported upon to the governing boards, the Legislature and the Governor in the last 2 fiscal years are:

1. A survey of California medical education needs.
2. An examination of the State's public adult education and extension programs.
3. An examination of the need for additional centers of public higher education.
4. The council's 1963 budget report to the Legislature; which included student fees at the University of California and the California State Colleges, nonresident tuition fees in junior colleges, faculty salary requirements, admission standards and level of financial support.
5. An examination of factors affecting faculty recruitment, retention and selection.
6. Faculty research in the California State Colleges.
7. Capital outlay requirements for public higher education.
8. In addition to the above general projects the council has: considered specific questions regarding the establishment of lower division programs at new State College and University campuses; made recommendations upon the establishment of new junior college districts; and developed procedures designed to achieve comparable data reporting by the three segments of public higher education.

At the present time the council and its staff are concerned with the following specific subject areas:

1. The annual review of the level of state support sought for public higher education including specific review of major budgetary items and programs.
2. A study of dental education needs.
3. A complete statewide survey of needs for additional centers of higher education to be reported to the 1965 Legislature.
4. The California public higher education cost and statistical analysis conducted with the co-operation of the educational segments.
5. As portions of the above study, complete surveys of physical facilities utilization and teaching workloads within all institutions of public higher education.
6. A comprehensive study of the junior colleges with particular emphasis on junior college financial needs and support.
7. Continuing examination of the progress made toward achieving admission standards, diversion, and the proportion of university and state college students in upper and lower division as set forth in provisions of the master plan.
8. Continuing examination of the differentiation of function among the segments with particular emphasis upon articulation among the segments.
9. Source and need for faculty. The council has established permanent segmental committee to conduct continuing research in this subject area.
10. Student selection, retention and transfer. A permanent internal committee advises and assists the staff in study within this subject area.
11. Planning for year-round operation on selected campuses of the California State Colleges and the University of California.

The above studies for the most part will be subjects of separate reports to the Legislature. To be reported during the current legislative session will be the council studies concerning the level of state support including capital outlay needs, faculty salaries, student fees and tuition, and progress reports on admission standards. Reports on other major subject areas are designed for completion prior to the beginning of the 1965 session and subsequent reporting on areas of continuing concern.

Of major concern to the council and its staff has been the development of comparable reporting of data for the segments of public higher education. To achieve the objective of developing a body of information of use to all agencies concerned, the council is sponsoring the California public higher education cost and statistical analysis. With the assistance of the segments, the council staff is collecting the information on facilities utilization and unit costs on a scale never before attempted in California. To insure the rapid completion of this study and to widely disseminate its findings, increases over current levels are included in the 1964-65 operating budget for printing and data processing.

While the professional staff of the council is responsible for the on-going research responsibilities of the council, experts are required from time to time to assist in phases of specific projects. Funds provided within the contract service category will enable the council to have benefit of key experts in junior college finance, facilities utilization, para-medical and nursing education, and statewide library needs.

Two additional positions are requested reflecting increased workload in the 1964-65 fiscal year: an executive secretary for the State Committee on Continuing Education and a fiscal analyst. The former position is required to assist on a full-time basis the permanent committee established by the council to coordinate extension and adult education offerings throughout the State. The latter position will be utilized in new studies connected with analysis of the level of support requested by the segments of public higher education: workload formulae and student fees and charges. This position will also provide assistance to the consultant planned for the study of statewide library needs.

No funds are requested for support of the council's responsibility under the Higher Education Facilities Act of 1963. The act stipulates that federal funds shall be available for costs incurred in administration of the grant program by the states.

DEVELOPMENT OF A MEDICAL EDUCATIONAL PLAN

Pursuant to the provisions of Chapter 1402, Statutes of 1961, the council, in co-operation with the State Department of Public Health, the University of California, representatives of private medical centers, and representatives of the public, developed a plan for the expansion of medical education in the State of California during the next 10 years. The printed report of the completed plan was submitted to the Legislature in January 1963.

Development of a Medical Education Plan	$15,954	–	–	

WESTERN REGIONAL HIGHER EDUCATION COMPACT

Objectives

Chapter 1694, Statutes of 1955, provided for California's participation in the compact which now includes 13 western states, including Alaska and Hawaii, to promote better co-operation in higher education in medicine, dentistry, veterinary medicine, and public health.

Program and Performance

Three commissioners are appointed by the Governor for 4-year terms to the Western Interstate Commission for Higher Education. One commissioner must be engaged in the field of higher education in California. A report of activities is submitted by the commission before January 15 each year to the Governor and Legislature. The expenditure amount represents California's share of the expenses of the Western Interstate Commission for Higher Education.

Pro rata share of Western Interstate Commission	$10,000	$15,000	$15,000	
TOTAL EXPENDITURES	$238,326	$289,384	$353,768	$64,384 (22.2%)

2	**GRAND TOTALS—EXPENDITURES FOR SUPPORT**[a]							
3								
4	Expenditures within "Grand Totals—Expenditures For Support" represent all reported funds expended by the University of California. These expenditures are funded from the following sources: State of California, United States of America, University of California funds, and gifts and private grants. The "Special federal research projects" item represents the expenditures made by the University of California for the Atomic Energy Commission and such funds are separately accounted.

Total by Level:					
Lower division	19,342	20,589	23,284	2,695	13.1
Upper division	19,779	21,186	23,026	1,840	8.7
Graduate	18,062	19,502	22,312	2,810	14.4
TOTALS, UNIVERSITY ENROLLMENT	57,183	61,277 [a]	68,622	7,345	12.0

[a] Fall enrollment indicates increase of 1,680 students or revised estimate of 62,957. However, 1963-64 budget provides only for this lower number, so budget requirements must be made for 7,345 new students.

UNIVERSITY OF CALIFORNIA—Continued

GENERAL ANALYSIS

Objectives

The University of California is a statewide institution of higher learning which has 4 major functions.

These are:

1. Instruction of able young people, by transmitting to them established knowledge and skills and by helping them to experience with their teachers the actual processes of developing and testing new hypotheses and fresh interpretations in many fields.
2. Research directed toward advancing the understanding of the natural world and the interpretation of human history and of the great creations of human insight and imagination.
3. Training for professional careers—a training grounded in the understanding of relevant sciences and literature, and enlightened by some experience in the methods by which the boundaries of knowledge are pushed back.
4. Various sorts of expert public service.

Program and Performance

In keeping with these general purposes admission requirements at the University of California are more selective than those of the junior colleges and state colleges, even though the content of introductory courses at the freshman and sophomore levels may be closely comparable for students planning to go on to a bachelor's degree, by transfer or otherwise. The program of the University of California develops greater differences in the upper division, and goes on to levels of professional or general scholarly training not duplicated in other public institutions.

The University currently operates on 7 major campuses and a number of experiment stations. Ma campuses are situated at Berkeley, San Francis and Davis in Northern California and at Los A geles, San Diego, Riverside and Santa Barbara Southern California. New campuses at Irvine a Santa Cruz are scheduled to open in 1965-66. full-time resident enrollment has been the largest the country for a number of years. It reaches t people directly in all parts of the State through agricultural extension service, including 4-H clu and through university extension classes, correspo ence courses and conferences. It maintains off-camp services through which practicing doctors, lawye dentists, engineers, etc., may renew and deepen t value of their services to the public throughout lif a university press for the publishing and distributi of scholarly books; and diagnostic and treatment c ters to which doctors may refer citizens of the Sta suffering from particularly dangerous or obscure a ments.

In carrying out these programs the University h attained a ranking that places it among the greate institutions of learning in the world. As a natur part of this development the University has tend to devote its energies to advanced studies and lar amounts of fundamental research. As a consequen the student body is heavily weighted in the upp division and graduate schools.

AVERAGE ANNUAL ENROLLMENT

UNIVERSITY OF CALIFORNIA

1951-62 THROUGH 1964-65

YEAR	LOWER DIVISION		UPPER DIVISION		GRADUATE		TOTAL	
	NUMBER	PERCENT	NUMBER	PERCENT	NUMBER	PERCENT	NUMBER	PERCE INCREA

1954–55	12,132	35.1	13,647	39.4	8,802	25.5	34,581	6.6
1955–56	13,073	34.9	14,960	39.9	9,385	25.2	37,418	8.2
1956–57	13,130	33.3	16,607	42.2	9,665	24.5	39,402	5.3
1957–58	13,031	31.8	17,770	43.4	10,181	24.8	40,982	4.0
1958–59	13,439	31.8	17,168	41.4	11,319	26.8	42,226	3.0
1959–60	14,202	32.5	17,379	39.7	12,167	27.8	43,748	3.6
1960–61	16,273	33.7	17,389	35.9	14,692	30.4	48,354	10.5
1961–62	18,414	34.8	18,072	34.1	16,475	31.1	52,961	9.5
1962–63	19,342	33.8	19,779	34.6	18,062	31.6	57,183	8.0
1963–64 (Est.)	20,589	33.6	21,186	34.6	19,502	31.8	61,277	7.2
1964–65 (Est.)	23,284	33.9	23,026	33.6	22,312	32.5	68,622	12.0

The average annual enrollments shown above indicate that during 1964-65 the University will experience the greatest percentage increase in total students enrolled during the last 11 years of enrollment growth. The percentage of lower division students to total enrollment continues at about the same level, with the increase in the proportion of graduate students offset by a decline in upper division enrollments.

It is anticipated that diversion of lower division students the Berkeley campus will begin during the 1964-65 school yea However, this diversion will be offset by the increasing numbe of beginning freshmen at the new campus of Irvine and in th expanded liberal arts program at San Diego in 1965-66.

nber of FTE positions as shown on page 215 of the 1963-64 Governor's Budget.
rce of funding: University Funds.
cludes 5.17 positions not listed in Salary Supplement.

UNIVERSITY OF CALIFORNIA—Continued

EXPLANATION OF MAJOR 1963-64 WORKLOAD AND ADMINISTRATION ADJUSTMENTS IN POSITIONS

STATEWIDE ADMINISTRATION

General Administration (1.00 FTE)

A planning analyst IV was transferred from Santa Barbara to the Statewide Office of Architecture-Engineering-Planning.

BERKELEY

Instruction and Research (—15.17 FTE)

3.65 academic FTE's (part-time clinical instructors funded from clinic income) in optometry were transferred to Organized Activities (Optometry Clinic).

32.75 FTE's in the School of Forestry and the College of Agriculture were transferred to Organized Research from Departments of Instruction and Research to reflect a more up-to-date division between teaching and research functions.

18.57 FTE's were added to categories of supporting funds (i.e., nonacademic salaries and general assistance) allocated for new academic FTE in the 1963-64 departmental allocations. The original estimate of FTE to match the budgeted funds proved to be too low.

Organized Activities (3.40 FTE)

3.65 academic FTE's in optometry were transferred to Organized Activities from Instruction and Research.

Organized Research (33.35 FTE)

32.75 FTE positions in the College of Agriculture and School of Forestry transferred from Departments of Instruction and Research to Organized Research. (See Instruction and Research above.)

General Administration (—66.21 FTE)

Nonacademic—27.00 FTE
General assistance—40.75 FTE

This reduction was effected because of a decreased estimate of requirements for supervisory personnel related to the campus building program. Salaries of this group of personnel are recharged to the campus building program.

General Institutional Services and Expense (8.44 FTE)

These additions were in accounts supported by recharges (i.e., storehouse, telephone and telegraph, garage, and central stenographic bureau) and reflect increased volume of activity.

DAVIS

Instruction and Research (—49.93 FTE)
Organized Research (44.77 FTE)

43.93 FTE transferred from Departments of Instruction and Research to Organized Research to reflect a revised classification of teaching and research functions performed by the College of Agricultu and the School of Veterinary Medicine.

Extension and Public Service (10.73 FTE)

7.50 FTE increase reflected principally in incon accounts (Serology Lab); other increases represe transfers from Organized Activities.

General Institutional Services and Expense (13.54 FTE)

13.54 FTE added to reflect increase in accoun supported mainly by recharges (Farm Service Div sion, storehouse, drafting and duplicating servic etc.).

IRVINE

General Administration (21.60 FTE)

Business Services:
Nonacademic—associate planner—1.00 FTE
General assistance—6.50 FTE

Funds were budgeted under supplies and expens FTE was needed for nonacademic salary provisio and general assistance in order to establish these p sitions in the Irvine campus budget to carry o service functions for campus development. Originall it had been planned to locate some of these positio at Riverside which was to have been reimbursed b means of recharges of expense to supplies and e pense funds budgeted at Irvine.

Architects and Engineers:
General assistance—14.00 FTE

Staff in this area was required for supervision an inspection of major construction projects. These sa aries are recharges to the Capital Outlay Program.

LOS ANGELES

Instruction and Research (70.35 FTE)

The Center for the Health Sciences reevaluated th FTE for general assistance resulting in an increas of 59.30 FTE. Other scattered departmental adjus ments were made in the general campus budgets.

Organized Activities (—72.56 FTE)

A transfer of the visual aids unit from Organize Activities to the newly created account for audi visual services (General Institutional Services an Expense) decreased this function by 16.50 FTE.

A re-estimate of hospital income, together with re-evaluation of general assistance FTE resulted in decrease of 57.11 FTE.

Maintenance and Operation of Plant (—23.71 FTE)

General assistance FTE in janitorial and plant se vices was reevaluated and reduced by 62.00 FTE.

An increase of 33.25 FTE resulted from expansio of service activities supported by recharges.

UNIVERSITY OF CALIFORNIA—Continued

EXPLANATION OF MAJOR 1963-64 WORKLOAD AND ADMINISTRATIVE ADJUSTMENTS IN POSITIONS—Continued

LOS ANGELES—Continued

General Institutional Services and Expense (62.53 FTE)

29.00 FTE were transferred from the statewide mimeograph program to establish a printing and production office.

Transfer of the visual aids unit to general institutional service activity resulted in an increase of 16.50 FTE. Funds and FTE were transferred from Organized Activities.

15.35 FTE were added to reflect increased level in accounts supported mainly by recharges (receiving, storehouse, public information office, printing and production office, etc.).

Auxiliary Enterprises (194.80 FTE)

A re-estimate of income in student housing and feeding and parking facilities required the addition of 194.80 FTE to the adjusted budget in order to bring both estimates of income and numbers of positions to a more realistic basis.

RIVERSIDE

Organized Research (—6.80 FTE)

FTE for nonacademic position erroneously associated with Hatch Act Funds in biological control research was deleted.

Instructional programs initiated in the citrus research program have resulted in reclassifications of approximately six positions from Organized Research to Instruction and Research.

Auxiliary Enterprises (—20.00 FTE)

A downward revision of general assistance positions was made to reflect a decreased volume of activity in residence halls.

SAN DIEGO

Instruction and Research (—13.62 FTE)

15 FTE tentatively assigned to the unallocated provision ($191,050) for the San Diego Medical School were dropped pending specific allocation of these funds.

General Institutional Services and Expense (15.07 FTE)

Funds for these additional positions in business service areas (except for 2 FTE in receiving and 0.25 FTE public information office) were provided through recharges, largely to activities funded by federal grants and contracts.

SAN FRANCISCO

Organized Activities (212.31 FTE)

Maintenance and Operation of Plant (—187.00 FTE)

179.00 FTE janitorial personnel and 8.00 FTE elevator operators were transferred from Housekeeping Service (Maintenance and Operation of Plant) to Hospital Administration (Organized Activities).

SANTA BARBARA

Instruction and Research (—15.77 FTE)

FTE was adjusted downward to correspond to actual personnel count and to 1963-64 budget augmentation.

AGRICULTURAL SCIENCES

Extension and Public Service (16.95 FTE)

$110,638 of Smith-Lever funds (United States Government) augmented the Agriculture Extension Program with an attendant increase of 16.95 FTE.

UNIVERSITY EXTENSION

Extension and Public Service (—13.90 FTE)

FTE count for general assistance employees (teachers) was re-estimated in light of more recent experience.

BUDGET INCREASES—EXPENDITURES FOR SUPPORT

(1964-65 Increase—All Funds)

SUMMARY	*Total*	*State funds*	*University funds*
General administration	$627,565	$626,565	$1,000

UNIVERSITY OF CALIFORNIA—Continued

PART I—CONTINUING OPERATIONS

SUMMARY

General administration	$461,013
Instruction and research	5,455,538
Organized research	—4,781
Libraries	625,108
Extension and public service	—5,756
Maintenance and operation of plant	1,184,100
Student services	288,723
Staff benefits	635,053
General institutional services and expense	280,426
Provision for allocation	2,043,387
Reduction in prior year overhead	1,946,609
Reduction in prior year balances	506,681
Total, General Fund	$13,416,101

GENERAL ADMINISTRATION

Existing campuses	$427,066
Statewide	33,947
Total	$461,013

The proposed increases for existing campuses allow the same increase for administration in relation to enrollment as was provided in 1963-64. This increase will continue to offset the increase in workload resulting from federal contracts and grants, principally for organized research (see breakdown of federal funds on page 221 above). One-half of the overhead funds received from federal contracts and grants is applied against the University's support appropriation. The remainder is allocated by the University for Capital Outlay, especially for income-producing projects, and for operating purposes such as Regents' scholarships, inter-campus exchange, student loans, faculty fellowships, education abroad, centennial observance and cultural programs. These latter allocations for operating purposes are outside the University's budget request to the State, but are reported by function on page 221.

The principal increase in the budget for statewide administration provides for 2 additional internal auditors plus travel and support, 1 additional accountant in the Chief Accountant's office to specialize in contract and grant overhead rate problems, and 1 secretary-stenographer in the Office of Governmental Relations and Projects to review and process grant and contract forms and to maintain records.

DEPARTMENTS OF INSTRUCTION AND RESEARCH

Enrollment Related Increases	$5,455,538

Enrollment Related Increases:

The workload increases related to maintenance of existing level of program for an estimated increase of 7,345 students during the budget year 1964-65 provide for 437 additional faculty members and 109 teaching assistants in Departments of Instruction and Research.

At the Berkeley campus, one supervisor of teacher education is provided for the training of teacher credential candidates.

An increase of $51,057 for the Graduate Division on the existing campuses is related to the 14.4 percent growth in graduate students.

ORGANIZED RESEARCH	—4,781
Enrollment Related Increases	170,219
Program termination	—175,000

Funds for research grants and research travel for 471 additional faculty members total $170,219 to continue the same level budgeted for this purpose in 1963-64.

Agricultural research funds of Davis will decrease by $350,000, reflecting the termination of a special 1-year appropriation of $175,000 to match a private gift.

LIBRARIES

Existing campuses	$625,108

The budget increase for the existing campuses provides for workload increases related to a 12 percent enrollment increase and for an increment towards the goals outlined in the University's library plan; it will also alleviate some of the current staffing deficiencies resulting from cataloging arrearages and expansion of facilities.

EXTENSION AND PUBLIC SERVICE

Regular state support	$21,744
Agricultural publications	7,500
Special medical curriculum study	—25,000
Governor's Conference on "Man in California in 1980"	—10,000
Total	—$5,756

University Extension enrollment is estimated to increase 5.5 percent from 208,957 in 1963-64 to 220,450 in 1964-65. This rate of increase is slightly lower than the 7 percent gain estimated in 1962-63 and 6 percent in 1963-64, and is predicated upon the restrictive effect of the Coordinating Council's recommendations with respect to University Extension's curtailed role in the offering of off-campus lower division and graduate teacher education courses. This budget continues the existing level of state support at approximately the 9 percent level.

The budget for the Agricultural Extension Service is not proposed for increase in 1964-65. The addition of $7,500 is included to cover a 5 percent increase in printing costs. There has been an increasing volume of publications due to the current focusing of attention on the use of chemicals in the production of agricultural food and fiber, particularly with reference to the residue of pesticides on food.

Two special programs budgeted in 1963-64 will not continue in 1964-65: $25,000 for curriculum studies in the area of Post-Graduate Medical Extension, and $10,000 for the Governor's Conference on "Man in California in 1980."

UNIVERSITY OF CALIFORNIA—Continued

PART I—CONTINUING OPERATIONS—Continued

MAINTENANCE AND OPERATION OF PLANT $1,184,100

Physical plant area to be maintained and operated will increase by 1,255,212 square feet to a total of 17,027,389 square feet. This represents a 7.4 percent growth in maintained area as compared with 8.8 percent increase in expenditures. The average unit cost of maintenance and operation will increase from the 1963-64 level of 84.2 cents per square foot to 84.5 cents in 1964-65. Unit costs budgeted for superintendence and police and for the general maintenance of buildings and grounds will continue to decline. However, due to the rapid expansion of air conditioning facilities, and to the added power requirements for scientific equipment related to accelerated research programs, the rising cost of utilities will more than offset reductions in other budgets for plant maintenance.

STUDENT SERVICES

Enrollment Related	$288,723

Student services at existing campuses are requested in relation to enrollment increases. The general fund increase of $288,723 will assist the Admissions, Registrars, and Deans of Students Offices to service the added numbers of students. Unit costs per student for activities financed from general funds will decline from $54.79 in 1963-64 to $53.52 in 1964-65.

The student incidental fee of $180 per term will provide an additional $515,512 restricted income to cover student health service, housing supervisor, student and alumni placement, recreational expense, and other student activities.

STAFF BENEFITS

Regents' Contributions to pre'54 Emeriti	—$25,890
Regents' Contributions to Emeriti Widows	—3,110
State Compensation Insurance	25,000
State Teachers' Retirement System	1,000
State Employees' Retirement System	1,000,269
University of California Retirement System	—547,316
Health and Welfare Benefits	185,100
Total	$635,053

The increase for State Compensation Insurance reflects the rate adjustments effective July 1963. The amount shown for SERS contributions reflects 1962-63 and 1963-64 experience and represents a compensating adjustment between SERS and the University Retirement System. The University retirement system contributions will decrease by $547,316 based on: (1) 1962-63 actual experience, (2) staff needs in 1964-65, (3) exclusion of staff supported by auxiliary enterprises and student incidental fee income, and (4) a decline in relative SERS participation from 37 percent in 1963-64 to 28 percent in 1964-65. Group health and life insurance contributions will increase $185,100, allowing for an increase in the University's contribution from $5 to $6 per employee participating in the program.

GENERAL INSTITUTIONAL SERVICES AND EXPENSE

Furniture Pool	$117,618
Publications	53,823
Health and Safety	18,977
Microscope Pool and Moving—Davis	14,500
Consulting Actuary	—2,500
University Press Subsidy	27,000
State funds to offset net decrease in University of California income	51,008
Total	$280,426

The proposed increases will generally allow the same level of service to be provided in 1964-65 as is being provided during the current budget year, in the light of the estimated enrollment increase and the increasing volume of contract and grant research. Office furniture requirements will be budgeted for new faculty and staff positions which are not provided for out of Capital Outlay funds. The increase in the cost of publications is related to increased enrollments and increased printing expenses. Additional funds are requested to afford protection against the increased usage of radioactive substances. The University Press subsidy will meet essential administrative expense and increased printing costs of scholarly publications. Fifty-one thousand dollars in state funds is requested to replace a decrease in University funds no longer available from interest earnings.

PROVISION FOR ALLOCATION

Merit Increases and Promotions	$3,067,209
Provision for Price Increases	300,000
Administration of NDEA Loans	50,000
Provision for Machine Services	—7,980
Budgetary Savings—1964-65	—695,000
Budgetary Savings Realized—1963-64	—48,507
Range Adjustment—1962-63 Continuation	—232,605
Merits and Promotions—1962-63 Continuation	—389,730
Total	$2,043,387

Provisions for academic and nonacademic merit increases and promotions are provided to continue current salary policies for presently budgeted personnel.

The provision for price increase is based on the Department of Finance letter on price and cost standards and does not duplicate increases requested elsewhere in the budget. Funds are requested in the amount of $50,000 to defray a portion of the costs attendant to the administration and operation of the

UNIVERSITY OF CALIFORNIA—Continued

PART I—CONTINUING OPERATIONS—Continued

MISCELLANEOUS PROVISIONS—Continued

NDEA Student Loan Programs. An unallocated provision for data processing machine services has been deleted from the 1964-65 Budget.

The provision for budgetary savings will increase by $695,000 representing approximately 3 percent of the increase in state general funds consistent with the prior year level. The figure for budgetary savings realized represents salary savings achieved by the University from the turnover during the current year. A total of $622,335 in 1962-63 continuation funds for range adjustments and merits and promotions budgeted in 1963-64, is to be discontinued in 1964-65.

PART II—PROGRAM AUGMENTATIONS

SUMMARY

General administration	$165,552
Instruction and research	1,425,847
Organized research	582,639
Libraries	607,533
Maintenance and operation of plant	251,232
Student services	44,075
General institutional services and expense	48,476
Total	$3,125,354

GENERAL ADMINISTRATION	$165,552
Irvine	87,262
Santa Cruz	28,432
Statewide:	
Vice-President—Finance	32,158
Vice-President—University Relations	17,700

At the Irvine campus, 14.5 positions are provided in business services to complete the initial staffing of the Accounting Office, Personnel Office, and Purchasing Office. Operating supplies and some equipment items are also included.

At the Santa Cruz campus, the Business Office will increase its staff by 7.5 positions by adding a vice-chancellor—business and finance, an accountant, and 4 clerical personnel and creating full-year status for the business manager, personnel manager, and purchasing agent. Other supporting expense and unallocated provisions will be reduced. The staff engaged in physical planning and development will increase by 10 positions to include architects, engineers, construction inspectors, and clerical help; all of these will be recharged to the Capital Outlay budget. Budgetary provision is also made for a residence halls manager and a food service manager to start their respective operations on April 1, 1965.

The principal increase in the budget for statewide administration is the addition of $32,158 to the budget for the vice-president—finance to provide a systems and procedures supervisor at $18,000, 2 systems analysts at $12,832, and expense, to strengthen the systems and procedures program. Included in the Architects and Engineers Office is an additional senior architect for more intensive review of preliminary building plans and specifications, an associate engineer to concentrate on utility master plans, and a community planner for the identification and study of community problems related to new campus planning and development. These latter positions will be recharged to the Capital Outlay program.

An assistant to the Vice-President—University Relations is proposed at $15,000 plus supplies and supporting expense.

INSTRUCTION AND RESEARCH	$1,425,847
Improved level—Riverside and Santa Barbara	157,445
School of Dentistry—Los Angeles	284,100
School of Medicine—San Francisco	64,714
School of Veterinary Medicine—Davis	37,800
Academic Planning Increases:	
Irvine	360,000
San Diego	324,200
Santa Cruz	168,300
School of Law—Davis	29,288

In addition to supporting funds at current levels for the additional faculty members, $157,445 is included to allow for some increase in the level of support for faculty at the Riverside and Los Angeles campuses.

Fourteen faculty members are proposed for the new School of Dentistry at Los Angeles which will open with a first-year class of 48 students in the Fall of 1964.

At the San Francisco Medical Center one faculty position is to be added in the School of Dentistry and two in the School of Medicine to strengthen departments which are understaffed in relation to new developments and specialties.

The School of Veterinary Medicine would receive five animal technician positions needed to maintain new animal quarters which are now under construction.

Academic Planning Increases:

1. Irvine Campus

The 1963-64 budget provides for a vice chancellor—academic affairs, 7 divisional chairmen, and nine supporting positions. The funds requested for 1964-65 will add 20 faculty members and 10 supporting positions. This staff will comprise the academic planning group for the new campus and will recruit the teaching staff required for the opening of the campus for an estimated 1,000 students in September 1965.

2. San Diego Campus

Ten faculty members are proposed to continue the academic planning in humanities and social sciences and 7 in engineering. They will assist in the first-year instruction of 140 undergraduate students in 1964-65.

3. Santa Cruz Campus

The 1963-64 Budget provides 4.5 academic deans and secretarial support. For 1964-65, it is proposed to budget 9 faculty positions to continue faculty re-

UNIVERSITY OF CALIFORNIA—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

INSTRUCTION AND RESEARCH—Continued

cruitment and academic and administrative planning in their specialized fields, preparatory to the campus' opening in the Fall of 1965 with an enrollment of 250 junior-level students.

Davis—School of Law $29,288

A new University of California Law School at Davis was authorized by The Regents in July 1963. The new Law School building is now being planned and the faculty is to be recruited for a first class in 1966. The proposed budget includes provision for a Dean, a secretary, office supplies, etc. for the initial year.

ORGANIZED RESEARCH	$582,639
Research grants and travel	31,869
Irvine	8,500
Santa Cruz	7,837
Agriculture sciences	125,000
Institutes and bureaus	409,433

Funds in the amount of $31,869 are proposed to permit some improvement in the level of research grants and travel at the Riverside and Santa Barbara campuses, and $16,337 to provide support for new faculty members at the new Irvine and Santa Cruz campuses.

Agricultural Sciences	$125,000
Riverside:	
Moreno Ranch	25,000
Agricultural field stations	100,000

At the Riverside campus, $25,000 is requested to develop research activities at the Moreno Ranch facility.

The request for $100,000 for the agricultural field stations will provide for the initial development of the Sierra foothills range station and the continued development of the new Kearney horticultural and Lindcove field stations. Additional support will be assigned to the West Side and South Coast Stations and to a lesser extent to the older establishment stations. The development of the new experiment stations requires core supporting assistance in terms of superintendents, supervisors, cultivationists, and maintenance personnel.

Institutes and Bureaus	$409,433
Berkeley:	
Industrial relations	20,000
Center for higher education	8,240
Urban and regional development	15,000
Davis:	
Computer center	15,000
Governmental affairs	20,000
Museology laboratory	10,000
Los Angeles:	
Industrial relations	35,000
Molecular biology	12,700
Languages and linguistics	3,200
African studies	9,359
Near eastern studies	10,560
Riverside:	
Desert research center	15,000
San Diego:	
Geophysics and planetary physics	10,000
Marine resources	5,950
Oceanography	40,000
Santa Barbara:	
Educational research	15,000
Environmental stress	10,000
University-wide Programs:	
Scientific publicatons	84,195
Water resources	50,000
Lick observatory	20,229

Institute of Industrial Relations	
Berkeley	$20,000
Los Angeles	35,000

Funds are requested to reorganize and expand the labor programs of these institutes as part of the effort of the University to serve the people of the State through direct service agencies. The labor programs, under the direction of an Associate Director will provide research on problems of particular interest to working people and will develop means for disseminating research results to those who have direct concern with such problems.

Center for Higher Education—Berkeley $8,240

The Center for Higher Education presently has 3 full-time staff members. It was initiated in 1962-63 to ensure continuance of important research in the major problems of Higher Education through assumption by the University of the administrative support of the center. This support had been previously provided by the Carnegie Foundation since 1956. This increase will add 1 staff member to augment the administrative support of research programs being planned.

Institute of Urban and Regional Development—Berkeley $15,000

Additional support for this new institute established in the current year is requested for permanent staff positions which cannot be obtained from extramural sources. This institute will co-ordinate existing departmental research in seeking solutions to urgent problems arising from population concentration and urbanization.

UNIVERSITY OF CALIFORNIA—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

ORGANIZED RESEARCH—Continued

Computer Center—Davis $15,000

The present budget of the Computer Center totals $63,100, of which $47,000 is supported from recharges for services. The proposed increase of $15,000 will increase the General Fund subsidy to $31,100 and allow the addition of 2 Programmers.

Institute of Governmental Affairs—Davis $20,000

The proposed increase of $20,000 to the existing budget of $35,105 will allow 1 Assistant Research Political Scientist provision to provide part-time appointments of 1 faculty member and 1 Research Assistant. This institute is now in its second year of operation and provides a link with the state governmental agencies in Sacramento and spearheads the campus effort to establish Davis as a significant research center in the social sciences.

Museology Laboratory—Davis $10,000

This program, conducted in co-operation with the State of California Division of Beaches and Parks, will be concerned with research in the conservation and restoration of precious art objects. The laboratory will be an important agency for the conduct of research and graduate training in art.

Molecular Biology—Los Angeles..... $12,700

The proposed augmentation of $12,700 will supplement the existing provision of $10,000 and allow the appointment of 2 staff personnel to provide administrative support to research in this area.

Language and Linguistics—Los Angeles $3,200

The existing staff (3.78 positions: 1.83 academic, 1.95 nonacademic and general assistance) of the Center for Research—Language and Linguistics is supported by a budget of $25,537. The addition of $3,200 will allow the appointment of 0.5 position nonacademic staff to supplement administrative support for research in this area.

African Studies Center—Los Angeles... $9,359

The proposed increase of $9,359 will provide for the addition of 0.66 nonacademic staff position to supplement an existing staff of 4.03 (0.33 academic and 3.70 nonacademic and general assistance) and a budget of $29,182.

Near Eastern Studies Center—Los Angeles $10,560

The existing budget of $35,580 for this center supports 2.38 academic and 2.65 nonacademic and general assistance staff. This increase will allow the addition of 2 nonacademic positions for administrative support for research in this field.

Desert Research Center—Riverside..... $15,00

This provision will add the initial increment of Gen eral Fund support to the Philip L. Boyd Desert R search Center. This center is located on 640 acres pu chased from the Department of the Interior, Burea of Land Management, using a gift from Regent Boy The $15,000 will provide for 1 specialist position an support to supervise the utilization of this researc facility.

Institute of Geophysics and Planetary Physics—San Diego $10,00

One-half Research Physicist I ($6,200) plus sup port is being added to improve the breadth of researc capability of this institute. The 0.5 position will b used to fund half the salary of a skilled experimente in Geophysics. The other half of his salary will b derived from one of the basic science departments o the School of Science and Engineering.

Institute of Marine Resources—San Diego $5,95

To help support expanded contract and grant re search, an additional nonacademic position is pro posed for general administrative support for researc in this Institute.

Institution of Oceanography—San Diego.. $40,00

This increase will provide 4 positions including a associate specialist I ($9,036) to establish an Emissio Spectroscopy Laboratory for analysis of rocks an minerals recovered from oceans, a scientific illustrato ($5,556) to provide drafting services to the Division of Marine Biology and Earth Sciences, a laborator technician IV ($7,434) to ensure proper maintenanc of the complex hydraulic laboratory to be complete in 1964-65, and an assistant to the curator of verte brates in sorting, labeling, and cataloging.

Institute of Educational Research—Santa Barbara $15,00

This new institute is proposed to undertake basi research in areas such as school administrative be havior and leadership, the influence of technologica and cultural change on curriculum, psychology o learning, testing, and teacher effectiveness. Reflectin the current trends in education to subject matter em phasis, as opposed to method courses, research in thi institute will be interdisciplinary in character. Fund are requested for a part-time director, clerical assist ance and supplies.

Institute of Environmental Stress—Santa Barbara $10,00

This new institute is conceived as an interdisciplin ary approach to an understanding of the relationshi of environmental stress to human capacity and per formance. This joint venture of biological and be

ORGANIZED RESEARCH—Continued

havioral scientists will contribute to a better conception of the environments with which man can cope, and in the future may facilitate the design of environments that will maximize the utilization of human resources.

Areas of proposed investigation include reaction to work stress, reaction to environmental thermal stresses, reaction to aging, involving factors of recuperation, nutrition, fatigue, distraction, tolerance, acclimation, and many others. To supplement existing grants and to attract major extramural support, an initial budget is requested for core support. The initial staff will consist of a part-time director, a part-time medical advisor, and general support.

Scientific Publications—University-wide $84,195

This increase is proposed to meet the publishing needs of the 500 additional faculty added in this budget. An amount of $2,000 is included to provide travel funds for additional faculty representation at meetings of the Scientific Publications Editorial Committee.

Water Resources—University-wide $50,000

A $50,000 increase for water resources research would permit accelerated research on the effective use of groundwater recharge and storage, and on the economic benefits of rational allocation of state water resources.

Lick Observatory—University-wide $20,229

This proposed increase will provide for a half-time programmer ($3,060) to set up procedures in association with the Berkeley Computer Center and add $2,500 for Berkeley computer time. Repairs to residence halls heating equipment and campus incinerator facilities and an increase in equipment funds to purchase a prime focus scanner for the 120-inch telescope make up the balance of the increase.

LIBRARIES $607,533

Increase in book budget	476,182
Law library—Davis	61,623
Irvine	42,983
Santa Cruz	26,745

In addition to increases in staffing and supplies and expense discussed under the workload increases, $476,182 is being provided to increase the total University budget for book purchases and binding by 20 percent. This substantial increase will allow the University to attain the goals set forth in their Library Development Plan by 1970-71.

Law Library—Davis $61,623

A 2-year lead period for building of the law school library of 20,000 volumes is needed in order to qualify for accreditation by 1966. In 1964-65 it is proposed to budget funds for a librarian II, and other support items and to provide $45,000 for books and binding. This would permit purchase of approximately 4,000 volumes, to which would be added 1,000 volumes received as gifts.

Irvine	$42,983
Santa Cruz	26,745

At the Irvine campus, the 1963-64 budget provided a University librarian, a librarian I and a secretary. The 1964-65 budget request would add 1.5 professional librarian positions and secretarial and other support. At the Santa Cruz campus, a half-time assistant librarian position will be extended to full time, and 1 department head will be added plus staff support.

The 1964-65 Capital Outlay budget for the University proposes $759,400 to continue to acquire an initial library collection of 75,000 volumes for each of the 3 new general campuses: San Diego, Irvine and Santa Cruz, and a second increment of acquisitions for the San Diego Medical Library.

MAINTENANCE AND OPERATION OF PLANT $251,232

Irvine will be adding 13.50 positions for the first complement of buildings which are scheduled for completion in the spring of 1965. At Santa Cruz, 5.5 positions are being added to care for the Central Services Building to be finished late in 1964, and the older buildings of the Cowell Ranch, some of which are being reconditioned during 1963-64.

STUDENT SERVICES $44,075

Irvine will add a Dean of Students and an administrative assistant during 1964-65 to prepare for the beginning class of 1,000 in fall of 1965. A Registrar-Admissions Officer and support will be added at Santa Cruz for a first class of 250 upper division students in the fall of 1965.

GENERAL INSTITUTIONAL SERVICES AND EXPENSE $48,476

Irvine	24,924
Dean of Educational Relations	23,552

Irvine will staff their central duplicating services and storehouse operations. The increase for the Dean of Educational Relations will allow the establishment of operating procedures for diversion of students as contemplated by the Master Plan.

UNIVERSITY OF CALIFORNIA—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

SPECIAL ITEMS

Provision for curriculum revision $125,000

This item does not appear as a program augmentation because it was initiated as an administrative adjustment during the current year. By reallocating funds in the existing level of support for 2 years, it is planned to finance a $250,000 study of the problems involved in the change-over from a semester to a quarter system as recommended by the Coordinating Council in preparation for the beginning of year-round operation at 1 or more campuses during 1966-67.

Expansion of medical education opportunities

Although the details have not been included in t budget, a request for augmentation will be made a later date for funds to begin a new 10-year p for expansion of medical education opportuni within the University of California.

As a first step, it is planned to reestablish a ba science medical school at Berkeley which will incre first year places by 32 in the fall of 1964. Second it is planned to conclude an arrangement with S Diego County to increase substantially the pres County Hospital graduate physicians training p gram by 1966. A supplemental budget request now under preparation and will be presented duri the coming session.

DETAIL BY CAMPUS

STATEWIDE ADMINISTRATION

This function is concerned with the co-ordination of separate campus activities into a University program, for management of endowments and University funds, and for co-ordination with nonuniversity groups. The Regents set the policies for operation of the University, the president and statewide staff officers carry out these policies on a statewide basis, with each local campus being administratively self-sufficient in carrying out the policies on their campus. Statewide administration includes the pr dent, who is the administrative head of the University, the v president of the University, who is the chief academic offi Other vice presidents are provided for legal advice, for busin operations and construction, for fiscal and accounting c trol, for governmental relations and projects, and for Univers relations.

ANALYSIS BY FUNCTION

Educational and General:							
General administration	240.87	252.37	262.84	$2,488,117	$2,848,629	$2,932,434	$83,80
Totals, Statewide Administration	240.87	252.37	262.84	$2,488,117	$2,848,629	$2,932,434	$83,80

BERKELEY

The Berkeley campus, the oldest and the largest campus of the University, has major responsibilities in instruction, research, and public service over a wide range of academic disciplines. In 1964-65 its enrollment is expected to approach its ceiling of 27,500 students as prescribed in the University's Academic Plan and in the Master Plan for Higher Education in California. 1964-65 will be a year of transition as the campus approaches its maximum enrollment growth and begins a new phase of maturation within a stable total enrollment. The campus, however, anticipates a continued increase in graduate enrollment and in graduate instruction and research. The principles governing its development continue to be those set forth in its academic plan, namely (1) the maintenance and augmentation of competence in all basic fields of human knowledge; (2) the establishment of leadership in new major areas of instruction and research; and (3) the fostering of interdisciplinary research and service.

Campus year-average enrollment for 1964-65 is estimated 26,596 students. This figure is 5.3 percent higher than t 1963-64 budget estimate of 25,256 students, and represents growth of 9.0 percent above the actual 1962-63 enrollment 24,394 students.

Of the total, enrollments in the Graduate Division are pected to attain 9,534. This is 10.3 percent higher than t 1963-64 budget estimate of 8,647 graduate students which, turn, exceeds by 5.5 percent the actual graduate enrollment 8,197 in 1962-63. In 1964-65 the Graduate Division will c stitute 35.9 percent of the student body. The Upper Divisi with 9,631 students, will constitute 36.2 percent. Enrollment the Lower Division will be 7,431 students, or 27.9 percent the campus total. (These percentages compare with 33:34: in 1961-62, 34:35:31 in 1962-63, and 44:35:22 projected 1969-70.)

DETAIL BY CAMPUS—Continued

DAVIS

The Davis campus, west of the City of Sacramento, continues its development into a general campus of the University, expanding its programs in letters and science, engineering, and veterinary medicine, maintaining its high quality agricultural teaching and research programs, and taking the first steps in establishing a new Law School. In carrying out its mission as a general campus, Davis avails itself of the opportunities for diversity offered by its agricultural interests, great strength in the biological sciences, proximity to state government, and cultural leadership in the Sacramento Valley.

Davis is the University's principal center of agricultural teaching and research, and agriculture is a major emphasis of the campus. A strong College of Letters and Science is being developed, with instruction at the graduate level expanding rapidly. Significant programs have been developed in the School of Veterinary Medicine and in engineering which was given full college status by The Regents in June 1962.

By 1970, the present enrollment of approximately 4,800 is anticipated to reach 10,500 and by 1975 to reach 15,000. In 1964-65, an enrollment of 5,659 is estimated, an increase of 17.9 percent over 1963-64.

IRVINE

Construction is now underway on the first buildings of the Irvine campus to begin preparation for initial instruction in 1965-66 and projected enrollments of 7,500 students by 1975 and 27,500 by 1990.

Located in Orange County, the campus will occupy a site of approximately 1,000 acres. The Irvine campus is responding to a unique opportunity to combine business, science, resources, education, and public administration in making a major contribution to the development of the urban area in which it is located. Orange County is already well known for its modern science and technology-focused industry but the quality of the scientific and technological components of a university can profoundly affect the character of further industrial growth.

Plans for UCI include a School of Engineering, a School of Administration, and a College of Arts, Letters and Science.

The 1964-65 budget request has been based on the following premises:

(1) That the campus will open to 1,000 students in September 1965 in permanent buildings to be constructed for a 2,000-student capacity.
(2) That the campus will be staffed with 110 teaching personnel and have its own operating capability prior to the opening of school.
(3) That the library will have over 75,000 volumes when instruction begins in the fall of 1965 and will have 250,000 volumes by 1971.

DETAIL BY CAMPUS—Continued

LOS ANGELES

The Los Angeles campus, located in the foothills of the Santa Monica Mountains, includes the University's second largest general campus and a major center for the health sciences.

The demands of the future on UCLA will be met by (a) selection and retention of faculty of the highest quality in a period of rapid growth, (b) adequate and proper expansion of research and graduate studies, (c) maintenance and improvement of quality in undergraduate studies.

In the current year, enrollment on the general campus is estimated to pass 20,000 students. By 1970, it is projected to reach 25,405, consisting of 15,075 undergraduates and 10,330 graduate students.

For 1964-65, an increase of 2,050 students (10.2 percent) is estimated, with somewhat greater increases at the upper division (11.8 percent) and at the graduate level (14.1 percent).

The center for the health sciences consists of the Schools Dentistry, Medicine, Nursing and Public Health. Major suppo for the teaching and research program is provided by the ge eral Teaching Hospital, the Neuropsychiatric Institute, Bi medical Library, Brain Research Institute, Rehabilitation Ce ter and the Laboratory of Nuclear Medicine and Radiati Biology.

The major development at the center for the health scienc for 1964-65 is the opening of the new School of Dentistry the fall of 1964, 1 year earlier than previously announce Initially, 48 dental students will be taken in the first ye class; this will be raised to 96 students per class in 1966-6 when the expansion of facilities for basic sciences and clini areas is completed.

ANALYSIS BY FUNCTION

RIVERSIDE

The Riverside campus, near the City of Riverside, is a general campus of the University and also the site of the Citrus Research Center and Agricultural Experiment Station in Southern California. The College of Letters and Science was established 10 years ago. In April 1959 Riverside was designated a general campus; and the transition was started from a small liberal arts college to a full-scale university. Undergraduate instruction is now provided in agriculture also, and graduat enrollment has increased rapidly in Letters and Science and i Agriculture.

Total enrollment is estimated to increase by 42.5 percent t 3,200 students in 1964-65. Of this enrollment, 22.1 percent i expected to be at the graduate level, representing a graduat enrollment increase of 68.9 percent.

SAN DIEGO

The San Diego campus, now being developed north of the city of San Diego, will eventually accommodate 27,500 students and will provide a very broad spectrum of courses and of research opportunities and facilities. The campus is also the site of the Scripps Institution of Oceanography, the Institute of Geophysics, the Institute of Marine Resources. A medical school has been authorized and plans for its early development are going forward.

The first increment of 140 undergraduate students is scheduled for 1964-65, and, in accordance with the campus Academic Plan, annual undergraduate enrollment will increase quite rapidly with 2,350 undergraduate students enrolled by fall 1969. Graduate enrollments are expected to increase from 270 in 1963-64 to 346 in 1964-65; nearly all of these will be candidates for the Ph.D. degree. Approximately 40 percent will represent second stage doctoral candidates (who will have completed 24 or more units while in graduate status, or who have a Master's degree). Total enrollment of 270 students in 1963-64 is expected to grow to 486 in 1964-65 and to increase at an accelerated pace until reaching the ultimate capacity of 27,500 students.

SAN FRANCISCO MEDICAL CENTER

The San Francisco campus includes professional schools of Dentistry, Medicine, Nursing, and Pharmacy, a Teaching Hospital, and ancillary services. Specialized institutes for medical research, partially supported from State funds, include the Institute for Cardiovascular Research, Hooper Foundation, Hormone Research Laboratory, Cancer Research Institute, the Metabolic Unit for Research in Arthritis and Allied Diseases, the Unit for Research in Multiple Sclerosis, and the Radiological Laboratory and Radioactivity Research Center for research in the application of radiation to health problems. In addition, it is the seat of the Langley Porter Neuropsychiatric Institute. These and allied research activities attract extramural funds for research and training of approximately $8 million per year.

The estimated enrollment for 1964-65 is 2,049 students, compared with 2,009 in 1963-64 and 1,954 in 1962-63. Limitations of instructional space are largely responsible for the small increase anticipated, but the completion of Health Sciences Instruction and Research Unit I, scheduled for 1965-66 and the Clinics Expansion Building in the following year, will permit increasing the size of the Medical School class from 100 to 128 students in 1965-66, and an expanded enrollment of graduate students.

SANTA BARBARA

The Santa Barbara campus is located on the seashore northwest of the City of Santa Barbara. It has been designated as a general campus of the University. In addition to a central College of Letters and Science, the campus has a School of Education and a School of Engineering, each with participation in the Graduate Division. Twenty masters level programs and 8 doctoral programs are offered. The campus Academic Plan calls for accomplishment of the following by 1970:

(1) Building a faculty for instruction of an estimated 12,600 students per year, of which 15.2 percent will be graduates in 52 graduate programs;
(2) Providing research units and facilities to attract and retain faculty and to serve graduate students;
(3) A 3-fold increase in the library collection;
(4) Establishment of new professional schools in Fine Arts and Business Administration.

Enrollment for the current year, 1963-64, is estimated to increase 15.4 percent over 1962-63. An additional gain of 32 percent is anticipated for 1964-65. Total campus enrollment for 1964-65 is estimated at 7,162, of which 525 will be graduate students. Graduate enrollment will increase by 42.3 percent over 1963-64.

SANTA CRUZ

The Santa Cruz campus, located adjacent to the City of Santa Cruz on a site of approximately 2,000 acres, is the University's new enterprise in Northern California to receive the great increase in students that cannot be accommodated by existing campuses during the next 25 years. The Santa Cruz campus proposes to combine learning and living, to encourage close teacher-student relationships, and to provide a mode of future growth that will retain a small campus atmosphere. The plan calls for a number of colleges, similar in size and quality to the best of the private liberal arts colleges, yet strengthened by their access to the resources of one another and to the central facilities of the University. Campuswide services would include the University library, science laboratories, cultural center, and other facilities that can more economically be provided in the core than in the colleges.

It is planned to open this new campus in the fall of 1965 with an initial enrollment of 250 students at the junior level.

AGRICULTURAL SCIENCES							
This section includes the University Dean of Agriculture, the Director of the Agricultural Experiment Station, the Agricultural Extension Service, the Agricultural Field Stations, and the production of publications reporting on the progress of the University-wide agricultural research programs. It also includes special programs for control of starlings and pear decline research. The Agricultural Extension Service operates under a cooperative agreement among the University, County Boards of Supervisors, and the United States Department of Agriculture. Extension offices are located in 53 counties, and service 56 of California's 58 counties.

UNIVERSITY EXTENSION							
Since its beginning in 1891, University Extension has become a major service activity of the University. It extends the resources of the University to the adult population of the State by providing evening classes, short courses, conferences, correspondence courses, and special programs. State support is continued at 9 percent of the program, with fees covering the balance of costs.

GENERAL ANALYSIS

Objectives

The California College of Medicine under the direction of a medical and scientific faculty offers its students the opportunity to develop essential skills in basic sciences and clinical medicine leading to the conferment by the college of the degree Doctor of Medicine.

Program and Performance

The California College of Medicine is accredited by the Council on Medical Education and Hospitals of the American Medical Association and by the Association of American Medical Colleges.

The forerunners of the California College of Medicine were the Pacific College of Osteopathy, which was founded in Anaheim, California, in 1896 and the Los Angeles College of Osteopathy, established in 1905. These schools were merged and incorporated in 1914, forming the College of Osteopathic Physicians and Surgeons, a non-profit institution. In 1961 the corporate name was changed to California College of Medicine. The college was accredited as a medical school in February 1962. In 1963, the State Legislature designated the college as a medical department of the University of California effective January 1, 1965 by Chapter 1933, Statutes of 1963.

The budget for 1964-65 includes a request for the addition of 3 faculty positions in the capacities of departmental chairmen to alleviate serious workload pressures in the basic sciences. Also included in the request for 1964-65 is a remodeling of the histology laboratory to bring this instructional area up to normal medical school standards. Operating expenses for the library have been increased to provide for needed increases in holdings and improvements in operation.

SALARY ADJUSTMENT PROVISION

This proposed adjustment in compensation would include $21,000 to provide college personnel with the same salary increase effective January 1, 1965 as granted to other state employees for the 1964-65 fiscal year under the provisions of the Budget Act of 1963. Also included in this request is $22,500 for adjustment of individual college salary rates to bring these rates to the same level as salary rates for comparable positions in state service.

GENERAL ANALYSIS

Objectives

Hastings College of the Law is a fully accredited institution of higher learning. It offers systematic and thorough instruction in those branches of the law which will best prepare the student for the practice of the legal profession.

Program and Performance

The college was founded in 1878 by Serranus Clinton Hastings, the first Chief Justice of the Supreme Court of the State of California. On March 26th of that year, the Legislature of the State provided for its affiliation with the University of California. The college has its own board of directors and is designated by statute as the law department of the University. Degrees are issued in the name of the Regents thereof.

Chief Justice Hastings gave a grant of $100,000 through the Regents of the University for the support of the college. By stipulation in the original agreement, the State is required to pay the sum of 7 percent per annum on the grant or forfeit this amount in full to the Hastings heirs.

Among the most noteworthy parts of the program is the now world-famous "Sixty-five Club." The formation of this club was inspired by the late Dean David E. Snodgrass. Largely through his efforts, Hastings secured the services of many faculty members who had been deans of other law schools or who were recognized as famous and renowned teachers. They had been obliged to relinquish their duties upon reaching retirement age. A very distinguished faculty has been assembled at Hastings through the employment of these men.

Added staffing for the functions of administration and instruction were made necessary during the current year due to unexpected increases in enrollment over the level budgeted for in 1963-64, these services are continued during the budget year.

The budget for 1964-65 includes 3.4 additional teachers, most of whom will be required to teach an additional section of the first year class. This section is urgently required due to anticipated increased enrollment (100 qualified applicants were turned away in 1963-64), and to relieve serious overcrowding in the first year classrooms. An additional position, assistant dean, is included. The position of associate dean and registrar has been deleted. The duties of the registrar have been included with those of controller in a nonacademic position, and the other assignments (including teaching) which have been performed by the associate dean are to be allotted to the assistant dean. One reference librarian and 0.3 of a temporary position are also included in the 1964-65 budget request to meet demands upon the library arising from increased enrollment and faculty.

[a] After deduction of expenditures for summer session.
[b] After deduction of reimbursements of student fees and payments from other agencies for services rendered by the college.
[c] Fall enrollments increased this figure from the originally budgeted 825 students, an increase of 23.3%. This will require the addition of another section to the first-year class in 1964-65.

Net Cost Per Student	$1,026	$1,035	$1,070

[a] Fall enrollment increased this figure from the orginally budgeted 94,840 students. Thus the 1964-65 budget must provide funds for 10,008 students more than the current year, an increase of 15.5%. A total of 110 students (FTE) were enrolled in the overseas program in 1963-64 from all the state colleges. This total is included in the system-wide total shown.

[b] 1963-64 and 1964-65 cost per student includes cost of new program augmentations.

[c] After deduction of all reimbursements received by the colleges.

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

GENERAL ANALYSIS

Objectives

As defined in Education Code, Section 22606, the primary function of the state colleges is the provision of instruction for undergraduate students and graduate students, through the master's degree, in the liberal arts and sciences, in applied fields and in professions, including the teaching profession. The doctoral degree may be awarded jointly with the University of California. Faculty research is authorized to the extent that it is consistent with the primary function of the state colleges and the facilities provided for that function.

Program and Performance

The Trustees of the California State Colleges provide the policy determination and central administration of the California State Colleges. The current fiscal year is the third year of operation under the Trustees, who on July 1, 1961, succeeded to the powers, duties, and functions previously vested in the State Board of Education and the Director of Education with respect to the administration of the state colleges.

The California State Colleges consist of 17 colleges. Two of these colleges, San Bernardino State College and Palos Verdes State College, are in the planning phase. One hundred thirty-three thousand one hundred sixty-four individual students, or 96,460 full-time equivalent students, will be enrolled in the state colleges in 1963-64. In 1964-65 an estimated 143,068 individuals, or 104,848 full-time equivalent students, will be enrolled; this represents an increase of 8.7 percent over the 1963-64 enrollment.

Enrollment Trends

The following table reflects the growth in full-time-equivalent (FTE) enrollments in the state colleges during the period 1951-52 through 1964-65. (Full-time-equivalent enrollments are computed on the basis of 15 semester units for each semester of instruction representing 1 unit of full-time-equivalent enrollment).

Annual Full-Time-Equivalent Enrollment of Regular a Limited Students in California State Colleges, Regula Sessions 1951-52 Through 1964-65

(Does Not Include Summer Quarter at State Polytechnic College)

Academic Year	Regular FTE	Limited FTE	To FT
1951-52	22,584	1,666	24,
1952-53	23,638	2,147	25,
1953-54	26,777	2,804	29,
1954-55	31,269	3,236	34,
1955-56	36,326	3,808	40,

1957-58	45,755	6,228	51,
1958-59	49,061	7,284	56,
1959-60	53,162	8,168	61,
1960-61	61,198	7,891	69,
1961-62	68,522	8,560	77,
1962-63	76,766	9,648	86,
1963-64 (Est.)	85,334	10,740	96,
1964-65 (Est.)	93,408	11,040	104,

Degrees Granted and Graduate Programs

There has been an increase in the number of grees granted, roughly corresponding to the incre in enrollments. There has also been a marked grow in number and types of graduate programs in t state colleges since 1951-52.

In 1962-63 the state colleges awarded 17,711 grees, representing an increase of 14% over the p vious year. Approximately 13% of the total degr awarded are graduate degrees.

Summary of Undergraduate and Graduate Degrees Grant by California State Colleges, 1952-53 to 1962-63

Year	Undergraduate Degrees	Graduate Degrees	Total Degrees	Perc Grad
1949-50	4,341	106	4,447	2
1950-51	6,119	322	6,441	5
1951-52	5,691	434	6,125	7
1952-53	5,272	653	5,925	11
1953-54	5,423	752	6,175	12
1954-55	5,840	975	6,815	14
1955-56	6,878	1,270	8,148	15
1956-57	8,709	1,447	10,156	14
1957-58	9,737	1,761	11,498	15
1958-59	10,770	1,668	12,438	13
1959-60	11,045	1,911	12,956	14
1960-61	12,010	2,062	14,072	14
1961-62	13,281	2,283	15,564	14
1962-63	15,370	2,341	17,711	13

Distribution of Annual Full-Time-Equivalent Enrollment by Level of Instruction

Academic Year	Lower Division	Percent of Total FTE	Upper Division	Percent of Total FTE	Graduate Level	Percent of Total FTE	Total
1957-58	22,363	43.0%	27,260	52.4%	2,360	4.5%	51,983
1958-59	23,952	42.5%	29,739	52.8%	2,654	4.7%	56,345
1959-60	27,733	45.2%	30,824	50.3%	2,773	4.5%	61,330
1960-61	32,589	47.2%	33,460	48.4%	3,040	4.4%	69,089
1961-62	37,115	48.2%	36,491	47.3%	3,476	4.5%	77,082
1962-63	40,845	47.1%	41,972	48.4%	3,902	4.5%	86,719
1963-64 (Est.)	44,372	46.0%	47,651	49.4%	4,437	4.6%	96,460
1964-65 (Est.)	48,125	45.9%	51,900	49.5%	4,823	4.6%	104,848

The distribution of enrollment by level of instruction reflects an increasing percentage of upper division students, a decreasing percentage of lower division students and a constant percentage for t graduate level.

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

GENERAL ANALYSIS—Continued

Programs Offered

The following table indicates the scope of the programs offered in the state colleges and shows their relative size expressed in terms of full-time-equivalent enrollments for the spring term, 1962 and 1963:

Full-time Equivalent Enrollment by Subject Field California State Colleges, Spring Term

Subject Field	Spring 1962 FTE	Spring 1962 Percent	Spring 1963 FTE	Spring 1963 Percent
Agriculture	1,305	1.7	1,430	1.7
Business	5,986	8.0	6,867	8.0
Creative Arts:				
Art	2,455	3.3	3,002	3.5

Science:				
General Science	367	0.5	295	0.3
Life Science	3,853	5.1	4,366	5.1
Physical Science	4,705	6.3	5,355	6.3
Social Science	13,313	17.8	15,075	17.7
Other	–	–	37	*
Totals	74,845	100.0	85,342	100.0

* Less than 0.5 percent.

The percentage of students enrolled in the humanities and mathematics is increasing while the percentage of students enrolled in engineering and in education is declining. The enrollment percentages in the other discipline areas remained relatively constant from 1962 to 1963.

State College Faculty

The number of full-time, part-time, and full-time-equivalent faculty members needed to carry on the instructional programs of the state colleges for the years 1951-52 through 1964-65 are shown in the following table:

Faculty in California State Colleges 1951-52 Through 1964-65

Academic Year	Individuals Full-time	Individuals Part-time	Individuals Total	FTE Faculty Total	FTE Faculty Increase prior-year
1951-52	1,306	406	1,712	1,436	43
1952-53	1,343	505	1,848	1,494	58

1964-65 (Est.)	5,870	1,835	7,705	6,497	607

Student-Faculty Ratio

The student-faculty ratio reflects faculty productivity and other factors. The following table reflects the ratio since 1951-52. Although the ratio varies from one year to another it has remained fairly constant throughout this period.

Annual Full-Time Equivalent Enrollment, Full-Time Equivalent Faculty and Student Faculty Ratio, Regular Session, California State Colleges 1951-52 to 1964-65

Year	Annual Student FTE	FTE Faculty	Ratio of Students Per Faculty
1951-52	24,250	1,436	16.89
1952-53	25,785	1,494	17.26
1953-54	29,581	1,674	17.67
1954-55	34,505	1,845	18.70
1955-56	40,134	2,231	17.99

1961-62	77,082	4,891	15.76
1962-63	86,719	5,384	16.11
1963-64 (Est.)	96,460	5,890	16.38
1964-65 (Est.)	104,848	6,497	16.14

PART I—CONTINUING OPERATIONS

The 1963-64 budget for the total State College System has been revised to reflect a substantial increase in student fees in excess of amounts previously reported. This increase is attributed to the fact that the 1963-64 revised FTE count contains an increase from 94,840 to 96,460 or a net of 1,620 additional FTE. A specific expenditure program for this increase is not reflected in this budget, but the funds have been used to adjust budgeted salary savings in the current year. As specific expenditure needs can be supported adjustment will be made through a process of intercampus transfers authorized by action of the State Board of Control. The current year budget also reflects as administrative and workload adjustments to personal services a series of changes to staff program authorized by supplemental budget appropriation in 1963.

The workload increase in 1964-65 over the revised amounts budgeted in 1963-64 for the State College System is $9,848,934 or 9.5 percent. The Trustees of the California State Colleges and the Chancellor's Office support expenditures increased by $393,329. This last increase includes $264,024 for the International program. The major portion of the State College support expenditure increase of $9,455,605 results from increased workload arising from an estimated enrollment growth of 8,388 full-time equivalent students and addition of approximately 1,075,914 square feet of new facilities in 1964-65.

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART I—CONTINUING OPERATIONS—Continued

Each state college, except for the 4 newest schools, charges employees and students a parking fee which has been established by the Trustees of the California State Colleges. Sonoma and Stanislaus are operating on rental property; Palos Verdes and San Bernardino are not yet receiving students. An estimated amount of $1,395,620 will be collected for parking in the 1964-65 fiscal year. Expenditures of $531,654 are budgeted for the complete operation of these facilities and includes security personnel, garage attendants, rental and/or purchase of automatic control devices, maintenance and repair of parking areas, the collection and accounting of fees and other miscellaneous expenditures. The additional reimbursements reduce the General Fund support expenditures for the colleges, however the Capital Outlay budget for the colleges will include a parking program in the approximate amount of the net reimbursement. In the 1964-65 capital outlay budget this amount will exceed the net reimbursements by approximately $800,000 as provision is made for a large multistory parking structure as a part of a classroom building at Los Angeles State College.

The trustees adopted an application fee of $5 and raised the out-of-state tuition from the previous $360 per year level to $500 per year. These actions provide reimbursements of an estimated $2,000,000. The application fee will apply to all new students seeking admission to the California State Colleges. This fee minimizes the practice of "shopping" for admission and possibly reduce the workload in the college student admissions offices. The tuition fee for out-of-state students, exclusive of foreign students, was increased in order to reimburse the State of California for the direct teaching expenses of the state colleges.

Student fees for materials and services provide $9,264,015 in reimbursements in 1964-65. This is computed on the basis of $76 for regular individuals and $39 for limited individuals. These fees are designed to cover student instructional expenses in the instruction function, health services, counseling and testing services, placement services and student activities including administration of the housing program.

Budgeted expenditures for these purposes in 1964-65 are approximately $9,244,000 anticipating the salary adjustment of January 1, 1964. This total is composed of $5,200,000 in personal services, an allowance of $3,349,000 for general expense under the instruction function, $610,000 for general expense under health service and $85,000 for equipment.

The trustees will continue to contract with the Division of Architecture and various private architects for master planning service. This will permit each campus to have an architect continually available for campus planning and development on a long-range basis. The expenses for the initial master plan of the new state colleges is included in the Capital Outlay budgets.

Other increases were budgeted under operating e penses to provide for price increases and to allow f the additional expenses for operation of new facilitie

Positions are budgeted on the basis of staffing fo mulas and standards which have been implemented previous budgets. Workload units are applied to tl formulas and standards and resulting increases a presented as proposed new positions. Approximate 90 percent of the positions in this budget are mea ured by formulas and standards which provide means of measuring and evaluating work perfor ance.

INSTRUCTIONAL FACULTY

The need for instructional faculty is determined b application of a faculty staffing formula which w first adopted as a budgetary tool in 1953-54. In ord to compute the need for teachers, the number of se tions is determied based upon distribution of the tot estimated campus enrollment among the various su ject offerings. This distribution is determined on tl basis of past experience, anticipated shifts in progra emphasis, and expansion of curricular offerings. Tl formula determines the number of full-time teachin positions based upon a 45-hour workweek for instru tors. The 45 hours provides for 12 hours per week actual classroom lecture type instruction; 24 hou per week for class preparation; and 9 hours a wee for nonteaching assignments such as student advisin committee work, administrative duties, etc. If tl classroom instruction is of an activity or laborator type the relationship between the classroom hours ar preparation time is varied but the total time for bo functions never exceeds the 36 hours provided for th basic lecture type courses.

The faculty staffing worksheets were prepared b the colleges and subsequently reviewed by the Ac demic Planning Section in the Chancellor's Office.

Supervision:

Division chairman, curriculum supervisors, eval ators, and coordinators are added in the budget ar have the responsibility of supervising various aspec of the instructional program. The need for each div sion chairman is measured by the number of teachin positions within a homogeneous grouping of curricul One division chairman is allowed by formula for eac 25 teachers. Curriculum evaluators, coordinator ar supervisors are fractional teaching positions release from instructional responsibilities in order to develo a new curricula or supervise the offerings in a larg existing curriculum. They may also supervise studen doing internship work away from the college the m jority of which are practice teachers.

Technical and Clerical:

Technical and clerical positions are budgeted on ratio to teachers and supervisory academic position and they provide the auxiliary support operations fo

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART I—CONTINUING OPERATIONS—Continued

INSTRUCTIONAL FACULTY—Continued

the direct teaching activities and include such activities as:

1. Operation and maintenance of technical equipment.
2. Clerical operations including typing, filing and other office duties.
3. Reproduction of testing and other materials and more direct instructional activities such as limited student reader services.
4. Staffing the stock and issue rooms.

The number of these positions is based on a formula which provides 0.22 positions per individual faculty members.

Library:

The library program proposed in the continuing operations budget provides for the long-standing formula relationship of 4 volumes for the first 1,000 FTE, 2 volumes for an FTE count from 1,000 to 5,000, and 1 volume for the FTE over 5,000. In addition the continuing operations budget extends an additional amount of $832,000 to provide additional book acquisition money for those colleges with a relationship of less than 25 volumes for each unit of FTE. In the program augmentation section of this budget a proposal is made to further improve the college library program toward a goal of 40 volumes for each unit of FTE. This latter figure approximates national norms for comparable institutions.

STUDENT SERVICES

Staffing in this function is closely allied to increases in enrollments. The new positions consist of the following increases by function:

Student Personnel:

This area includes student placement, counseling and testing, supervision of off-campus housing and other student activity functions. Examples of the formulas for these functions are as follows:

Counselor	1 per 1,000 regular individual students over the first 1,000.
Activities adviser	1 per college below 5,000 regular individual students, and 1 additional for 6,000 to 10,000 regular individuals, and 1 additional for 11,000 to 15,000 regular individuals.
Placement interviewer and supervisor	1 per college having 1,000 to 3,000 regular individual students, add 1 for 3,000 to 5,000 regular individual.

Admissions and Records

Associate dean	1 per college
Registrar	1 per college
Admissions officer	1 per college over 5,000 FTE
Evaluation technician	1 per college, others included within technical-clerical allowance
Clerical and technician	2 per 800 total individuals plus 1 per 1,000 limited individuals

Health Services

Medical officer and nurse	1 per 1,500 regular individual students (first two positions on 12-month basis)
Technician	1 per 4,000 regular individual students (first position on 12-month basis)
Clerical	1 for first 1,500 regular individual students, 1 additional for next 1,500 plus 1 for each additional 2,000 regular individuals

PLANT OPERATION

The formulas which account for the majority of these positions are for custodians and groundsmen.

Custodians	1 per 15,000 sqaure feet of building area (outside gross), plus 1 per 60,000 square feet of adjacent area cleaned by custodian, plus day coverage, sick leave and vacation coverage (1 per 12 custodians: and rest room coverage based on need).
Groundsman	1 per 7 acres of campus area improved with sprinklers 1 per 5.5 acres of campus area improved without sprinklers 1 per 55 unimproved acres 1 per 25 acres with ground cover and trees Additional allowance for P. E. facilities and 1 per 12 groundsmen for sick leave and vacation

PART II—PROGRAM AUGMENTATIONS

I. Library program improvement	$1,000,000
II. Sabbatical leaves	200,000
III. Out-of-state travel	30,000
IV. Master of Social Work	235,692
V. Masters degree improvement	90,000
VI. Joint doctoral program	47,000
VII. Management improvement	151,900
VIII. Electronic data processing	50,000
IX. Year-round operation study	255,000
X. Faculty research	500,000
TOTAL	$2,559,592

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

DISTRIBUTION

I. LIBRARY PROGRAM IMPROVEMENT $1,000,000

In December 1962 the Trustees by resolution accepted the "Program for Library Development—California State Colleges" and adopted the recommendations therein as forming the basis for long-range program for library development in the state colleges. The implementation of this new program requires a substantial amount more than would be required by the application of the old library formula. The 1964-65 Budget provides for a major implementation of the program by adopting in principle a new library formula; however this budget modifies the program to the extent that certain schools with extremely low student-book ratios receive a larger share of the funds made available. Briefly, the new library formula contains the following features:

(1) A new annual book acquisition formula which gives recognition to graduate student enrollment and which provides a more adequate book allowance for undergraduate enrollment.

Volumes to be Acquired Based on Units of Annual FTE

	Old Formula	New Formula
Graduate	–	5
Remaining Enrollment:		
1– 999	4	4
1,000–4,999	2	3
over 5,000	1	2

(2) Each new state college is to have a collection of 50,000 volumes by the time the college opens.

(3) The staffing allowance to process new book acquisitions continues at the current ratio—1 position per 1,600 volumes.

(4) The operating expense allowance continues at the current ratio—65 percent of the book amount for that portion of the allowance that would have been acquired under the old formula; however, only 15 percent of the book amount is provided operating expense for those books obtained as a differential under the new formula.

The additional $1 million provided here to implement the new formula includes the costs for book related library expenses, and staffing to process these books. It is proposed to allocate these additional funds on the basis of need. Of this amount approximately $600,000 is for books, $90,000 is for related operating expenses, and $310,000 is the estimated cost of providing the additional 63 staff positions necessary to process these books. The funds so provided supplement the book acquisition program proposed in the continuing operations budget which is outlined on the accompanying schedule. The continuing operations budget was based on the old formula plus approximately $832,000 previously added to the library program for schools with an exceptionally low books per student ratio. In subsequent years the budget anticipates that the new formula will be adopted as a general standard for determining total dollar requirements for the system. The funds will then be distributed on the basis of need in the separate colleges to meet basic growth requirements and inequities which have come about through inadequate funding in the past.

The implementation of the new program will yield approximately 184,000 volumes more than the total volumes that would be provided in 1964-65 under the old formula. It is estimated that this will increase the systemwide ratio from approximately 24.8 volumes per FTE to 26.2 volumes per FTE. Although this ratio is only a modest increase toward the goal of 40 volumes per FTE, it is the required amount needed under the new formula. Under the old formula it was possible for the systemwide average to deteriorate because of the rapid increase in enrollments on some of the campuses.

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

II. SABBATICAL LEAVE $200,000

The granting of sabbatical leaves to faculty members who qualify through years of service is a traditional benefit in most colleges and universities of this country. This type of leave is considered as a regular condition of employment to faculty members and the sabbatical leave program previously in force within the California State Colleges has been detrimental to our efforts to recruit the best possible faculty. Because of this, effective July 1962, the Trustees of the California State Colleges adopted new personnel rules relating to sabbatical leave.

The previous system permitted the granting of sabbatical leaves to 5 percent of those eligible. To be eligible a faculty member must have served 6 years and then be selected from among that number which 5 percent of the eligibles represented, in essence this could mean that some individual faculty members might teach for 25 years before they would have an opportunity for a sabbatical leave.

The new rules essentially provide for two changes; (1) the base upon which the eligible group is determined has been expanded to the *total number of faculty* at any given college and (2) the group eligible for the sabbatical leave program has been expanded to include executive, administrative and librarian classes.

This budget provides for the first of the two changes adopted by the Trustees of the California State Colleges, that of expanding the sabbatical leave program for the faculty. There are now approximately 6,000 faculty members in the college system, 5 percent of this total, or 300 individuals, would be entitled to participate in the new sabbatical leave program next year if they have sufficient tenure.

The funds provided by this budget will allow implementation of approximately 50 percent of the program expansion for the teaching faculty.

III. OUT-OF-STATE TRAVEL $30,000

The 1963-64 Budget, as well as the 1964-65 Budget, provides out-of-state travel funds at the rate of $10 for each administrative employee and $17 for each academic employee. Studies of the problem by the system lead them to believe that there is a need to increase the allowance for administrative employees to $17 and to $24 for each academic employee. Study of the out-of-state travel requirements will continue during the budget year to evaluate the revised amounts. At this time, however, additional funds are being provided for that portion of the program related to travel essential to a nationwide faculty recruitment program.

IV. MASTER OF SOCIAL WORK $235,692

Increasing concern has been expressed nationally, in the State and at the local level over the acute problems raised by the shortage of professionally trained social workers. This situation has come about because of the rapid expansion of population and hence rapid expansion of social problems, the growth in social welfare programs to meet these problems and an increasing nationwide emphasis upon rehabilitation. The emphasis on rehabilitation means that students will have to spend more time learning new techniques than heretofore. The shortage of social workers has become especially acute in California as a result of the sharp increase in population, and particularly because of the large growth in the number of older people at one end of the life cycle and of children at the other. Both groups require more social services than do other age groups.

Demand on a statewide basis for professionally trained social workers is now figured as three thousand (3,000) persons per year for the next 10 years, according to the July 1962 *Third Draft* of the California State Colleges Master Curricular Plan. Existing graduate professional education programs in social work (3 in California) now turn out only about 300 persons per year, according to the same source. In response to the need for more and better prepared social workers, a number of studies have been made in California in an effort to find a solution. The most recent of these is the study undertaken by the Welfare Study Commission, established by the 1961 *California Statutes* Chapter 2045, entitled *Welfare Study Commission Final Report,* dated January 1963.

As a result of the recommendations contained in this report and in response to related developments, the Board of Trustees of the State College System authorized the State Colleges at Fresno, Sacramento, and San Diego to initiate a graduate professional curriculum in social work leading to the degree of Master of Social Work in full recognition that it is a high cost per student program. Actual instruction in this new program is to begin in the fall semester of academic year 1964-65. In order to make it possible to get the program under way by the beginning of the fall semester it was necessary for each college to engage some staff for the academic year 1963-64 so that essential planning and action could begin. Since the college system had insufficient funds to employ the staff needed in 1963-64 it sought outside support. Because it was necessary to start these 3 training programs as soon as possible, the State Department of Social Welfare was authorized to provide the additional funds required to finance the planning activity during 1963-64 at the 3 colleges.

Plans now being implemented call for the admission of approximately 20-25 graduate students to the Mas-

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

IV. MASTER OF SOCIAL WORK—Continued

ter of Social Work program at each of the 3 colleges in the fall of 1964-65. Approximately 20-25 additional students will be admitted in the fall of 1965-66. Since the Master of Social Work program requires 2 years for completion, funds being requested in the 1964-65 budget will permit enrolling this number of students. If additional resources subsequently become available, the number of students admitted will be increased.

The objective of the proposal is to develop a Master of Social Work program of education for social workers of such quality as to insure its accreditation by the Council on Social Work Education within the minimum time required. The ultimate test of the professional education provided will be the performance of its graduates.

In order to meet minimum standards for accreditation each program requires $78,564 of support in addition to that provided by the faculty staffing formula or a total of $235,692 for the 3 programs. Each program will require 1 coordinator and a secretary, 1 administrative assistant, 3 faculty members for classroom instruction, 2 faculty members for supervision of field work, 1 clerical position, plus intermittent student help, provision for part-time lectures, and special funds for travel and professional dues.

V. MASTERS DEGREE IMPROVEMENT $90,000

On the basis of a 2 year study of assignments and responsibilities of teachers of graduate classes, it was ascertained that the time spent in preparing, teaching, and otherwise serving graduate classes was almost double the amount of time expended in relation to undergraduate classes. It is now proposed that such recognition be given by weighing the calculation of the teaching load for instructors of graduate courses, by applying a factor to the staffing considered adequate for undergraduate courses.

The program augmentation proposal here is substantially less than the level that academic planning personnel would consider desirable. The additional factor will provide a modest amount of time to a professor assigned graduate level classes for additional preparation, library and bibliography work, evaluation and follow-up, and advising of graduate students.

VI. JOINT DOCTORATE PROGRAM__ $47,000

The Master Plan for Higher Education in California, 1960-75, and the Donahoe Higher Education Act of 1960, were designed to provide maximum opportunities for residents of California to obtain the best possible higher education in state-supported schools at the least expense to both students and taxpayers through fuller utilization of educational resources available in the State. In defining the educational missions for the University of California, the California State Colleges, and public junior colleges, provision for an important new dimension of co-operation was made in the authorization of joint doctoral degrees to be awarded by the University and the State Colleges.

A long, intensive, co-operative effort by represent tives of the 2 segments of higher education has r sulted in significant progress toward working out de inite agreements and procedural arrangements in t implementation of the joint doctoral program. It hoped that definite working agreements will be for alized with the University shortly.

Before any specific joint doctoral program can implemented, it will be ascertained that the appr priate academic departments at both the Universi and the state college are fully qualified in terms faculty, facilities, and library, and in addition, bo departments must be desirous of co-operating in t offering of a joint doctoral program.

It is anticipated that a joint doctoral program wi be implemented during the 1964-65 fiscal year. Est mated costs for the program are as follows:

4 faculty @ $8,000 each	$32,000
Equipment and miscellaneous expenses	15,000
Estimated cost of each program	$47,000

VII. MANAGEMENT IMPROVEMENT $151,90

Following completion of the basic Master Curric lar Plan, and a survey of all colleges to determin staffing needs, it became apparent that the co leges were inadequately provided with the numbe quality, and level of administrative staff to plan fo guide, and carry out the demands of the instructiona program especially as they exceed 5,000 FTE. Staffin formulas, developed in the 1950's to meet the need of colleges of a maximum size of about 5,000 FT are no longer adequate for the leadership and man agement of institutions which are forced by circum stance to grow to 15,000 and 20,000 FTE, and t undertake a greater variety of much more comple programs. As a result, it is felt that administrativ demands are being met at the expense of the instruc tional program. The budget proposed for 1964-65 i designed to meet the most urgent administratio needs of the colleges as the first phase of a long-rang program.

VIII. ELECTRONIC DATA PROCESSING $50,00

Data processing operations in the California Stat Colleges may be divided into 2 broad categories. The first category is instruction, where students are increasingly required to manipulate large complexes of data in their pursuit of learning within a multitude of disciplines. The second, administrative processing, involves the collection, storage, and subsequent retrieval and use of a variety of data concerning students, faculty and staff, facilities, curriculum, property inventories, expenses and revenues, and so on. These data are essential to the operation of the colleges and, in addition, are required by other agencies having various control responsibilities.

In order to provide for both the instructional and administrative requirements of data processing the Trustees recently adopted a policy statement which sought to define the entire program contemplated for

SUMMARY OF THE CALIFORNIA STATE COLLEGES—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

VIII. ELECTRONIC DATA PROCESSING—Continued

electronic data processing. They stated that in part data processing equipment now installed in the colleges, together with that added in the future, must be adequate to serve the dual needs of the instructional and the administrative programs. To the extent practicable, such equipment shall be used for both purposes.

The budget for 1964-65 not only recognizes the expansion of existing programs which is funded in the budgets for continuing operation of the state colleges, but also makes provision herein for several areas which are desirous of considerable updating of equipment and expansion of capacity. In addition to the extent possible, some schools may be allowed their initial configuration upon completion of feasibility studies.

IX. YEAR-ROUND OPERATION'S STUDY $255,000

To prepare for year-round operation of the California state colleges it will be necessary to undertake a very extensive overhaul of the curriculum of the colleges and to increase the administrative services available for the developing and planning of the revised program. It will also be necessary to obtain the services of some consultants and to defray the costs of printing and other services. Lest proliferation and unworkable programs result, the study and overhauling must be undertaken with extreme care. If the transition from 9 months to year-round operation is not carefully worked out, it is possible that the resulting year-round operation will be more costly and less efficient than the present program. The amount provided will allow 0.5 to 1.5 staff members to be assigned to each of 15 campuses plus a small amount for expenses. In addition, it is hoped that 1 or 2 pilot programs might be undertaken.

X. FACULTY RESEARCH $500,000

This program is designed to support departmental, or faculty research within the provisions of Section 22606 of the Education Code. All such research will be of the kind that supports the approved instructional programs through the discovery of new related information and through its supplementation of regular classroom exercises and projects. It is estimated that one-half the instructional departments in the state colleges, which would include approximately one-half the total number of faculty members in the system, will be prepared to engage in departmental research programs during 1964-65. The research funds requested for 1964-65 will provide about $200 per full-time faculty member which is estimated to be a minimal support level. The Coordinating Council for Higher Education has reviewed this program and has recommended approval.

Expenditures will be made for the following: technical and clerical assistance needed to sustain high quality research; student assistants to help in the actual carrying out of the research projects; travel funds to enable participants to obtain data and counsel from outside sources; equipment and supplies required in the projects which are not available in the regular support budgets; and other material currently not available for departmental research activities.

The distribution of the funds to the colleges will be based on the relative size of the college's faculty and its ability to carry on research with existing facilities.

CHANCELLOR'S OFFICE

Objectives

The Trustees of the California State Colleges were created by Chapter 49, Statutes of 1960, First Extraordinary Session, and assumed responsibility for administration of the California State Colleges on July 1, 1961. The board, which consists of 16 gubernatorial appointees and four ex-officio members, is responsible for policy determination and co-ordinated planning for the State College System.[b] Within the framework of systemwide policies and programs, each college is responsible for its primary function of undergraduate and graduate instruction in the liberal arts, sciences, applied fields, and certain professions, especially the teaching profession. Doctorate degrees may be awarded jointly with the University of California. Faculty research is authorized to the extent that it is consistent with the primary functions of the State Colleges.

The Chancellor, who is appointed by the Trustees, is the chief executive officer of the Trustees, and is responsible for policy recommendations to the Trustees, and for implementation within the State Colleges of established policies and programs. The Office of the Chancellor comprises the staff necessary for the planning and administration of academic policies and programs, external relations, support budgets, campus master plans and building programs, personnel affairs, college data processing and information systems, auxiliary organization policies, and student affairs.

Program and Performance

Numerous special studies required by the Master Plan for Higher Education, and requested by the Trustees, the Coordinating Council for Higher Education, and the Legislature, are presently being conducted by the staff of the Chancellor's Office. Some of the continuing studies are (1) the Academic Master Curricular Plan, Phase III, (2) Education Cost and Statistical Analysis Study, (3) faculty salaries and benefits, (4) programmed learning, (5) admissions and retentions, (6) student fees, and (7) utilization of physical plant.

During the current year administrative and workload adjustments were made to the program of the colleges in several areas. These changes were primarily financed by reimbursement, and included studies related to the planned Master of Social Work program, the overseas program, the statewide academic senate, and statistical studies in various institutio problems. These additions involved 4.1 man-years of which man-years is extended into the budget year to provide cleri assistance to the academic senate program.

The budget makes provision for 6 man-years of new staff. the academic affairs function two professional positions added. One will provide staff services in the area of library a audio-visual programs. The other is provided as a gene staff assistant to the vice chancellor to free that position fr many operational matters so that the vice chancellor can dev the major portion of his time to the development of a lo range program of educational improvements. In the busin affairs function an administrative assistant is proposed for t facilities planning group to co-ordinate and maintain reco on all projects and handle routine paperwork, prepare m agement reports, administer and control preliminary plan fun process projects to state agencies, and prepare necessary proval letters. A stenographic position is being provided for dition to the clerical pool for workload needs throughout t office. The budget also proposes the reclassification of a p fessional personnel position to the principal personnel anal level. This reclassification will strengthen the level of cont between the Chancellor's office and many campus probl areas. The position will work with top campus administrato local faculty councils, and the statewide academic senate. the institutional research function a senior clerk is added. similar position was established for a limited term during t current year. The clerical position will be utilized to comp summary tables as outlined by the professional and technic staff. The position will also be responsible for the project fili system. In addition to the foregoing, provision is made for creasing the temporary help funds available to cover needs the public information program and additional funds for vario peak workload situations throughout the Chancellor's office. operating expenses provision is made for the first time to p vide a modest community relations allowance for the Chanc lor's use. In addition a small increase is allowed in rent and space alteration amount is provided to permit a rearrangeme of office space presently available. The budget also recogniz the full-year costs of the program for the statewide acade senate.

	INTERNATIONAL PROGRAM						
	Objectives						
	The International Program of the California State Colleges is designed to provide qualified students with an opportunity for a systematic academic year of study abroad in selected institutions of higher learning. It is a bona fide academic undertaking of the California State Colleges with clearly defined educational and professional objectives. Faculty members of the California State Colleges serve as Resident Directors of Programs abroad, acting as academic advisors and counselors to the students, and as liaison between the host universities and the students' home campuses. There is consultation throughout the academic year between the Resident Director and the student's major advisor on his home campus. The Resident Director, under the general supervision of the Office of International Programs, is responsible for arranging with the student's advisor and home campus registrar the granting of academic credit for course work successfully completed at the host university. Students are required to abide by all the regulations of the university they attend; however, the academic regulations of the California State Colleges are also fully in force during the academic year abroad. Since many more students apply than can be accommodated, a selection among the applicants is made on the basis of academic, linguistic and personal qualifications. All students are required to participate in an orientation program which includes a study of the host country and of the academic procedures of the host university, and an examination of the responsibilities of United States citizens abroad. Orientation continues during the intensive language program upon arrival in the host country.						
	Program and Performance						
	This program began in the fall of 1963 with 110 students the Universities of Aix-Marseille, Heidelberg, Madrid, Taiw Free Berlin and Stockholm, and it is reported as a reimbursa program in the Chancellor's Office budget. The costs of administration and instruction of the progr are borne by the State, and are equivalent to the current av age per full-time student support of the regular instructio program by the State. All transportation costs and living penses are borne by the student ($1,470 average per stude and in addition, the student pays the regular material s services fees. For the 1963-64 fiscal year, the state costs of the progr were provided by the regular college appropriations, su these appropriations were based on an enrollment which cluded the participants in the International Program. F 1964-65, however, the estimated number of students has n been included in the college enrollment estimates, and the fore, the colleges have not received funds based on these s dents. The program amount necessary is included as part of Systemwide Programs budget. During the budget year it is estimated that 238 students w be accommodated. To provide for continuation of the progr the staff previously provided by administrative assignment shown as proposed new positions. Operating expenses are pr grammed for both the administrative as well as instruction needs. The latter needs cover the expenses related to the re dent directors and consultants who are faculty members the California State Colleges. The funds provided here are us for contractual payments to be made to the faculty membe home college. In addition funds are provided for payment services to be rendered the various host universities and m also include tutoral service for program participants.

SUPPORT EXPENDITURES DETAIL	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

NATIONAL DEFENSE EDUCATION ACT TITLE II, STUDENT LOAN PROGRAM

Objectives

Title II of the National Defense Education Act makes possible loans to worthy and needy State college students by providing Federal funds to the extent of nine times the State's contribution. By means of forgiveness of a portion of the loans to those who engage in the profession of teaching, there is a special emphasis to encourage students to enter the field of teaching.

Program and Performance

In order to continue the Student Loan Program authorized by Chapter 952 Statutes of 1959 and under authority given in Education Code 24001, $200,000 is required in the 1964-65 Budget. This amount represents approximately one-ninth of the amount of federal funds which it is estimated will be made available to the California State Colleges for student loans in accordance with National Defense Education Act. The State's contribution has been $200,000 for the past four fiscal years. College demand has increased to the point where it may be necessary to increase the amount in subsequent years. It was necessary to augment the amounts budgeted for 1961-62 and 1962-63. The application for allocation of federal funds is made to the Federal Government and is co-ordinated by the Chancellor's office. Federal funds are forwarded to the Chancellor's office of California State Colleges and actual disbursement of both state and federal funds is made by this office. The costs of administering this program are contained within the budgets of the individual colleges with the exception of the co-ordination costs which are borne by the Chancellor's office.

GENERAL ANALYSIS

Objectives

Chico State College is a 5-year fully accredited college with programs in teacher education, liberal arts, sciences, occupational, and pre-professional curricula designed to meet the needs of the State of California and especially of the northeastern region of the State.

Program and Performance

Chico State College was founded as a normal school in 1889, and is the second oldest of California's state colleges. The college offers a broad selection of curricula in the liberal arts and general education, occupational fields such as agriculture, nursing, business, engineering, and social work, and pre-professional training for such fields as medicine, law, and architecture. A strong emphasis is placed on the education of teachers for the public schools of California. Its effectiveness in this respect is demonstrated by the fact that approximately 50 percent of its students are enrolled in courses with teacher education objectives.

The graduate program of the college is expanding to meet demands of its own graduates and the educational needs of region, particularly in the field of professional education. M ters degree programs are offered in the following fields: biol ical science, business education, education, English, industr arts, language arts, music, physical education, physical scier and social science.

The agriculture curriculum is supported from the Gene Fund and has expanded from an original terminal 2-year p gram to a 4-year degree curriculum. This program is mak intensive use of its farm site, the Paul L. Byrne Memor Farm, consisting of 645 acres. The farm is just now be equipped with its permanent educational facilities and it expected that because of the new instructional opportunit thus created, the agriculture enrollment will show a signific increase in the years immediately ahead.

This function includes all expenditures of operating and maintaining the college physical plant (grounds, buildings, heating and cooling systems, utilities, etc.), security activities, motor vehicle operations, and administration of these activities.

The budget makes provision for 1.5 man-years of custodian time and 0.5 man-years of stationary fireman because of new facilities recently phased into operation. A stock clerk is provided to better control issuance and maintenance of tools and hardware. Student assistant time is provided for the security operation on the campus.

This function includes all fully reimbursed activities, such as research projects for governmental agencies and private enterprises, services to auxiliary organizations, summer session, extension, etc.

The Reimbursed Activities amount is completely offset by reimbursements related to these activities.

The additional positions proposed in the various categories will be funded from charges made for services.

GENERAL ANALYSIS

Objectives

Fresno State College, established in 1911, is a 5-year, fully accredited college, with programs in the liberal arts and sciences, in applied fields and in the professions, including the teaching profession, designed to meet the needs of the 5 counties in the Southern San Joaquin Valley.

Program and Performance

Fresno State College has a campus comprising 1,428 acres at the northeast corner of the City of Fresno. In recent years the college has expanded its educational program to include several important new curricula and community services, including a residence center in Bakersfield, off-campus summer sessions in Bakersfield and Visalia, an extension center in Fresno, and a federally-sponsored teacher education project in the Sudan.

The 5 most important programs at Fresno State Colle from the standpoint of number of students, are teacher edu tion, business, social sciences, agriculture, and engineeri Approximately one-third of the total enrollment of the coll can be credited to the various teacher education progra Other programs of significance in the total offerings of the lege include biology, criminology, fine arts, home econom humanities, industrial arts, nursing and physical education. new program for the master degree in social welfare will be in 1964-65.

Since 1961-62 the college has been co-operating with United States Agency for International Development in a s cial project in the Sudan to improve teacher education elementary schools in that new nation. This program is fu reimbursed from federal funds. This project is currently un contract through June 30, 1964.

This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.

During the current year administrative provision was made for an accounting technician in the business management function. This position was previously approved but was omitt from the schedule of authorized positions in error. The adju ment is continued in the budget year. To meet the worklo demands created by increased student population the budg year adds 5 man-years of assistance. This increase will aid the executive office and the business management office.

STUDENT AND GENERAL INSTITUTIONAL SERVICES						

This function includes noninstructional expenditures for services provided to the students, and those operating expenses which apply to the college generally (exclusive of library and plant operation).

During the current year administrative provision was made for a half-time graduate nurse in the health service function as a workload adjustment. This revision has been extended to the budget year. Further provision is made in the budget year for the addition of 2 man-years of staff time in the student personnel program. In admissions and records 0.4 man-year is proposed. In the health services area a further increase in staff of 1.6 man-years is proposed. All of the foregoing increases are related to the increased enrollments which are anticipated in the budget year.

REIMBURSED ACTIVITIES						
This function includes all fully reimbursed activities, such as research projects for governmental agencies and private enterprises, services to auxiliary organizations, summer session, extension, etc. The Reimbursed Activities amount is completely offset by reimbursements related to these activities.						
Provision is made for increasing the level of staffing for the summer session program and the extension program. Recognition is also proposed of a workload need relative to the management of residence halls. A major element of the research project is the Sudan project which under present contract with the Federal Government will terminate June 30, 1964.

GENERAL ANALYSIS

Objectives

The state college at Hayward, established by Chapter 1681, Statutes of 1957, started classes in 1959 on an upper division basis, with majors limited to teacher education. Its primary regional service area is the east shore of the San Francisco Bay, including Alameda County, Contra Costa County and portions of San Mateo County.

Program and Performance

The college started lower division instruction and graduate instruction in September 1963, thus becoming a full-scale liberal arts college with the beginnings of a graduate school. During the summer of 1963, the Trustees changed the name of the college to its present title. Likewise, during the summer of 1963, the college occupied its permanent quarters for the first time—moving into the fine arts building and the science-library building during the latter part of August and the early weeks of September while the buildings were being completed. Planting, irrigation and certain portions of the site development were to be completed during the 1963-64 year, as well as locker facilities and a corporation yard.

Programs in liberal arts, teacher education, occupational and pre-professional curricula are offered through its 6 academic divisions supported by library and audio-visual services. Twenty-one majors are offered at the baccalaureate level in art, biological science, business administration, business education, chemistry, economics, elementary education (phasing out), English, history, language arts, mathematics, music, physical education, physical science, political science, psychology, recreation, social science, Spanish, speech and drama, and special major. The college is authorized to grant the master's degree in mathematics.

This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.

The budget makes provision for 2 half-time positions in the executive area for workload increases related to enrollment growth and also to problems in the reception area of the new physical plant. In addition 2.5 man-years are added in the business management area because of anticipated workload increases.

	INSTRUCTION						
	This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college. The 70.1 man-year increase in the instruction area includes 55 full-time teaching positions. Faculty staffing formula determinations are based on course offerings. It is estimated that the student-faculty ratio will be 15.25 to 1. Provision is made for 0.6 man-years of assistance to provide sabbatical leave privileges according to previously approved standards as well as an amount for substitute teaching assistance. The 12.1 man-years of clerical technical assistance related to the additional full-time teaching positions is provided at the rate of 1 such position for every 4.5 full-time equivalent teachers. For the audio-visual function provision is made for 1 man-year based on workload formula.

LIBRARY

This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings, maintenance of card catalogs, services to individual students and faculty, and supervision of the foregoing activities.

It is proposed to increase staff in this function by 8.5 man-years. Of this additional staff the storekeeper and an intermediate stenographer will be in the central library supervision function. Technical processing will require 3.5 man-years, and the public services area will require 3 man-years. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

GENERAL ANALYSIS

Objectives

Humboldt State College is among the 7 colleges originally established as normal schools. It has progressed through various developmental stages and currently offers a broad program in the liberal arts and several curriculums in other areas. These include teacher education, business, civil engineering, nursing, and several curriculums in natural resources. The last named area has been designated by the Board of Trustees to be given special emphasis. Curriculums leading to the bachelor of science and master of science degrees in fisheries, forest management, and game management enroll almost one-fourth of the students.

Program and Performance

Although the curriculum has been planned primarily to serve the students from the counties of northwestern California, at least one-third of the students come from elsewhere, mostly from Southern California. Contrary to the urban colleges cated near junior colleges, most of the new students at Hu boldt State College are freshmen; however, junior colle transfers showed a marked increase in the fall semester, 19(

Special conditions at Humboldt affect the operation of t campus and are reflected in the budget. These include a cold climate, more rain, a hilly terrain, long distances to urb centers, and limitations in or the absence of public transp tation. The curriculum specialties, particularly the unique pr gram in natural resources, make it necessary for over on fourth of the students to be enrolled in science laborato classes. Many of the "laboratories" for the natural resourc courses include the surrounding forests, streams, sea coast a lakes. The college has a 300-acre experimental forest 6 mil away and is developing a marine fisheries laboratory at Tri dad Bay.

INSTRUCTION

This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college.

A reduction in authorized substitute teacher resource reflects recent experience at the college. In addition in the instructional area 0.4 man-years of supervision time and 8.5 additional full-time teaching positions are allowed together with 3.5 man-years of technical and clerical assistance. These additions are made as a result of the application of formulas to increases in enrollments.

GENERAL ANALYSIS

Objectives

Long Beach State College, established in 1949, has as its primary function the provision of instruction for undergraduate students and graduate students, through the masters degree in the liberal arts and sciences, in applied fields and in the professions, including the teaching profession.

Program and Performance

Since its establishment, Long Beach State College has become one of the largest state colleges and now offers a wide variety of courses. The bachelor of arts degree is offered in the following areas: anthropology, art, biology, botany, business administration, drama, economics, English, French, geography, German, health education, history, home economics, industrial arts, mathematics, music, philosophy, physical education, physical science, political science, psychology, recreation, social sciences, sociology, social welfare, Spanish, and speech.

For the bachelor of science degree, the college offers the following major fields: art, business administration, business education, chemistry, engineering, geology, industrial arts, indu trial technology, mathematics, microbiology, music, nursin physics, police science and administration, and zoology. Al offered is the bachelor of vocational education degree.

In the graduate program opportunities are provided for stud leading to the master of arts degree in the following fields concentration: art, biology, chemistry, drama, education, En lish, history, home economics, industrial arts, mathematic music, physical education, physical sciences, physics, psycholog social sciences, and speech. At the present time the master sciences degree is offered only in business administration.

The college is organized on the semester system with 2 re ular sessions, spring and fall. In addition, the college offers summer sessions each year, 1 of 6 weeks, followed by 1 of weeks. The summer programs are comparable to those of th regular sessions except that many special clinics, conference seminars, and field studies are offered. The enrollment in th summer sessions, like that of the regular sessions is one of th largest in the State College System.

GENERAL ADMINISTRATION

This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.

To meet the workload demands during the budget year created by increased student population provision is made for an add tional 2.8 man-years. The increase includes 0.3 man-year fo year round coverage of the publications management functio Two and one-half clerical positions are added for workload i the accounting office, the duplicating center, and the clerica pool.

STUDENT AND GENERAL INSTITUTIONAL SERVICES

This function includes noninstructional expenditures for services provides to the students, and those operating expenses which apply to the college generally (exclusive of library and plant operation).

During the current year an administrative adjustment was made in the health services area to adjust total staffing pattern to meet new formula authorizations. During the budget year provision is made for the addition of 11.5 man-years of staff time. Of this amount 1.7 man-years of counselor time is in the student personnel area. In admissions and records 6 man-years are proposed. In the health services area 3.8 man-years are added. All of the foregoing increased are related to the increased enrollments which are anticipated in the budget year.

LIBRARY						
This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings, maintenance of card catalogs, services to individual students and faculty, and supervision of the foregoing activities. During the current year additional temporary help was added to process an augmented book allowance provided by supplemental budget action. During the 1964-65 fiscal year 14.5 man-years of added staff are justified on the basis of increased book processing and related supervisorial needs. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

PLANT OPERATION						
This function includes all expenditures of operating and maintaining the college physical plant (grounds, buildings, heating and cooling systems, utilities, etc.), security activities, motor vehicle operations, and administration of these activities. A total of 10.4 new positions are proposed for the budget year. Of the new positions 7.5 are for custodial services, 0.9 of a position for grounds, and 2 for general maintenance. The majority of these positions will be required for operation of the new gymnasium addition which will be completed in the spring of 1965.

GENERAL ANALYSIS

Objectives

Los Angeles State College of Applied Arts and Sciences was established in 1947. It is located at the eastern boundary of the city limits of Los Angeles adjacent to the City of Alhambra and began holding classes at this site in 1956. Prior to this date it shared facilities with Los Angeles City College. It is a 5-year, fully accredited institution offering a wide variety of curricula in liberal arts education, occupational education and teacher education designed to meet the needs of the metropolitan Los Angeles area.

It has one of the largest teacher training programs in the country with specialization in the training of teachers working with mentally retarded, deaf, and emotionally disturbed students. The graduate program at Los Angeles State College is the largest within the State College System involving over one third of its students. Thirty-four fields of concentration are offered at the graduate level; 26 leading to a master of arts degree and 8 leading to the master of science degree.

To satisfy the needs of the more than 19,000 attending classes, the college is in operation from 8 o'clock in the morning through 10 o'clock at night Monday through Friday and from 8 o'clock until noon on Saturday. Many course offerings are alternated each semester between day and evening sessions to accommodate the high percentage of working students enabling them to fulfill degree requirements on a part-time basis.

Totals, General Administration				$418,510	$454,444	$485,513

Three and one-half positions are proposed for general administration. One position will provide administrative assistance to the Dean of the College. The remaining clerical positions will be assigned to the accounting and purchasing offices. These positions are needed to provide for workload created by growth.

STUDENT AND GENERAL INSTITUTIONAL SERVICES

This function includes noninstructional expenditures for services provided to the students, and those operating expenses which apply to the college generally (exclusive of library and plant operation).

During the budget year provision is made for the addition of 1.3 man-years of staff time in the student personnel program. In admissions and records 1.5 man-years are proposed. In the health services area 1.3 man-years are added. All of the foregoing increases are related to the increased enrollments which are anticipated in the budget year.

	INSTRUCTION						

This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college.

Workload and administrative adjustments made during the current year and extended into the budget year reflect the addition of 1 computer programmer by conversion of 1.5 man-years of clerical time. In addition the 26.6 man-year increase in the instructional area includes 2.3 man-years of supervision time and 17 full-time teaching positions. The substitute teacher blanket is increased by 0.5 man-year and 5.1 man-years of technical and clerical assistance is added. In related teaching services 1.7 man-years of additional staff is proposed.

	LIBRARY						

This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings, maintenance of card catalogs, services to individual students and faculty, and supervision of the foregoing activities.

During the current year an adjustment was made in the staffing pattern by authorizing 21 man-years of temporary help to process an augmented book allowance granted by the Legislature. This staff was available for one year only. During the budget year it is proposed to increase staff in this function by 18.3 man-years. All of this staff will be utilized in the technical processing area to process the volumes provided for budget year accessioning. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

GENERAL ANALYSIS

Objectives

Orange State College was established by Chapter 1681 of the Statutes of 1957. The site of the college near the City of Fullerton now consists of 225 acres. In the fall of 1960, the college opened classes on its own campus where it occupied 12 temporary buildings. The first permanent building, the Letters and Science Building, was completed in 1963. The second permanent facility will be the music-speech-drama building which will be completed in 1965.

Program and Performance

Enrollment at the college has grown from 180 full-time equivalent students in 1959-60 to an estimated 2,860 full-time equivalent student body in 1964-65. Baccalaureate programs offered include majors in the humanities, social sciences, business administration, economics, psychology, fine and applied arts, science and mathematics. In 1963 the college began to offer a limited number of master's degree programs which include history, social science, English, and business administration.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
GENERAL ADMINISTRATION						
This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.				A total of 4.5 new positions are proposed for this function based on accepted formulas and increased workload attributable to an expanded building program and rapid increase in enrollment.

LIBRARY

This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings and card catalogs, services to individual students and faculty, and supervision of the foregoing activities.

Eight and two-tenths new positions are being added to this function in 1964-65. The positions are justified on the basis of increased book processing and related supervisorial needs. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

GENERAL ANALYSIS

The State College at Palos Verdes was established as South Bay State College by Chapter 64, Statutes of 1960, First Extraordinary Session. The name was redesignated by the Trustees of the California State Colleges on July 12, 1963. This college is scheduled to open in 1965 with an estimated enrollment of 400 students (FTE). After full implementation it will offer undergraduate and graduate programs designed to meet the educational needs of its service area in southwestern Los Angeles County, as well as the specialized needs within the State College system as a whole. Because of its projected rapid growth in enrollment and since it is a new institution, the college has been asked to initiate a year-round program.

The present budget provides for continuance of the college planning staff during the 1964-65 fiscal year. The staff is engaged in the following activities: (1) resolution of complex site acquisition and development probelms; (2) planning the college's first permanent facilities; (3) academic planning to develop an instructional program within the guidelines of the Master Curricular Plan established by the Board of Trustees; (4) continued development of the college's initial collection of library books; and (5) development of new concepts to foster more economical administration. The new positions in the 1964-65 Budget will enable the college to initiate more detailed academic planning in anticipation of the first students to be accepted in the fall of 1965.

Totals, General Administration				$75,566	$87,201	$110,807

This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.

Principal new allowance in this function is the provision of $7,500 to allow the college to begin to develop its campus master plan. In addition provision is made for essential business management services effective January 1, 1965 to develop fiscal procedures preparatory to accepting students in September 1965.

GENERAL ANALYSIS

Objectives

Sacramento State College was established in June 1947 as a 5-year fully accredited college. The college opened its doors to its first students in September 1947, in rented facilities on the Sacramento Junior College campus. During the years 1947 to 1953, pending the purchase and development of a campus of its own, the college continued to conduct classes at the Sacramento Junior College and in nearby facilities which were leased for instructional purposes.

Program and Performance

At the present time, programs are offered leading to bachelor of arts degree in 24 liberal arts fields. Pre-professional curriculums preparatory to post graduate study in law, medicine, dentistry and the ministry are available. Master of arts degree programs are also offered in a number of the liberal arts fields. Professional programs include business administration, engineering, government services, laboratory technology, nursing, social service, and teacher education.

During the past year, the Trustees of the California State Colleges approved 2-year master's degrees programs for the college which are now being developed. The programs are: Master of business administration and master of social work. Hence, the college is now offering 6-year degree programs in higher education, and is in the process of studying fields in which it may be desirable to offer joint doctoral programs based upon the principles and guidelines recently approved by the trustees, in accordance with the Master Plan for Higher Education.

The programs of the college are designed to meet the need of the 13 counties in the southern Sacramento Valley and central mountain regions of California.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
GENERAL ADMINISTRATION

This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college.

The 66.1 man-year increase in the instruction area includes 49.8 full-time teaching positions. Faculty staffing formula determinations are based on course offerings. It is estimated that the student-faculty ratio will be 16.3 to 1 during the budget year. In support of this increase, provision is made for 1.9 man-years of supervision and 14.4 man-years of technical-clerical assistance.

† Salary range determined by education, experience, and academic rank in accordance with "Salary Schedule for Instructional Positions—State Colleges."

[1] Expenditures for the budget year included as part of staff benefits.

GENERAL ANALYSIS

The State College at San Bernardino was established by Chapter 64, Statutes of 1960, First Extraordinary Session, and is scheduled to become a fully accredited 5-year state college with programs designed to meet the needs of a service area consisting primarily of San Bernardino and Riverside Counties.

It is now planned to open this college in September 1965, in temporary facilities on the college's permanent campus. Present enrollment projections forecast that the college will have an enrollment of between four and five hundred full-time students in its first year. By 1971 the full-time student body will total 4,000. The college is being master planned for an ultimate 20,000 full-time students.

Before the first students enroll in fall 1965, an academic plan for the college must be worked out in great detail. An extensive general education program from fields within the Social Sciences, Natural Sciences, and the Humanities is planned. The calendar and organizational plan of the college call for a program in which students will take 3 courses per term for 3 terms in the academic year. Classes will be proportioned between large lectures and small discussion groups. This "3/3 Plan" differs from the conventional quarter system although the calendar is similar. By reapportionment of classroom sizes it is planned to change the present student to faculty ratio from the present 16 students to 1 faculty member to a ratio of 18 students to 1 faculty member. It is hoped that by this system economies of operation will develop which will be rather substantial in future years. Initially the system is somewhat more costly because the Capital Outlay demands to accommodate the large lecture and small discussion groups are greater than for a conventional classroom situation.

The 1964-65 Budget provides for an acceleration of the planning activity into more specific academic programs. Provision is also made to staff the business management area and the admissions and records area so that more intensive preplanning may be accomplished.

1	**GENERAL ADMINISTRATION**						
2							
3	This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.						
8	Principal new allowance in this function is the provision of $7,500 to allow the college to begin to develop its campus master plan. Provision is also made for the addition of business management staff effective January 1, 1965 to accommodate the accounting workload which will increase rapidly as the opening date approaches.

GENERAL ANALYSIS

Objectives

San Diego State, established in 1897, is a 5-year, fully accredited college with programs in teacher education, occupational and pre-professional curricula designed to meet the needs of the southern counties of the State. The programs at San Diego State College are designed to aid the student to develop his powers of critical, independent thought and to become aware of the main streams of our Nation's cultural, social and scientific traditions; to inform him of the political ideas and ideals that have built our Democracy and to stimulate in him an interest in participation in civic life; and to equip him with the knowledge and skills necessary to meet the needs of California and the Nation for competence and leadership in a number of vocational and professional fields.

The number of degrees conferred and the number of successful teacher training candidates produced in 1962-63 gives a measure of the performance of the College in fulfilling its responsibilities. Of the total 1,720 degrees granted in 1962-63 there were 709 students securing teaching credentials.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	STUDENT AND GENERAL INSTITUTIONAL SERVICES						
	This function includes noninstructional expenditures for services provided to the students, and those operating expenses which apply to the college generally (exclusive of library and plant operation). During the budget year provision is made for the addition of 3 man-years of staff time in the student personnel program. In admissions and records 3.5 man-years are proposed. The foregoing increases are related to the increased enrollments which are anticipated in the budget year. The increase in expenditures for communications reflects costs for additional faculty offices and planning for a new Centrex exchange. The new telephone system should realize measurable savings after the first year.

	INSTRUCTION						
	This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college. The 63.8 man-year increase in the instructional area includes 48.5 full-time teaching positions. Faculty staffing formula determinations are based on course offering. It is estimated that the student-faculty ratio will be 16.4 to 1 during the budget year. Related supervision and technical-clerical staffing is added. For the audio-visual area 2 man-years are added for workload.

LIBRARY

This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings, maintenance of card catalogs, services to individual students and faculty, and supervision of the foregoing activities.

During the current year additional temporary help was added to process an augmened book allowance provided by supplemented budget action. Seven positions are being added to this function in 1964-65. The positions are justified on the basis of increased book processing and related supervisorial needs. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

PLANT OPERATION

This function includes all expenditures of operating and maintaining the college physical plant (grounds, buildings, heating and cooling systems, utilities, etc.), security activities, motor vehicle operations, and administration of these activities.

A total of 13.1 new positions are proposed to meet the custodial and grounds workload related to the college's new business administration-mathematics building. In addition 1 new position of stationary engineer is added for steam plant workload.

[1] Expenditures for the budget year included as part of staff benefits.

GENERAL ANALYSIS

Objectives

San Fernando Valley State College is a 5-year institution serving an area encompassing the San Fernando Valley portion of Los Angeles County and including Ventura County, the southern portions of Santa Barbara and Kern Counties, the Owens Valley region and the cities of Burbank, Glendale, Beverly Hills, and Santa Monica. The college is located in Northridge on a 222 acre campus which is currently being expanded to 284 acres through purchases of private property and the transfer of 27 acres of state-owned land formerly belonging to the 51st Agricultural District. The campus is master-planned to accomodate an enrollment of 20,000 FTE.

The service area of the institution is experiencing an exceedingly rapid population growth on a large prosperous base. College enrollments have increased at an average of 950 FTE a year since establishment of the institution in temporary buildings in the fall of 1956. The enrollment for 1963-64 is approximately 6,710 FTE and the budget for 1964-65 is based upon an estimated enrollment of 7,690 FTE.

The San Fernando Valley State College offers a broad program in the liberal arts, teacher education, science, engineering, and business. Master of science and master of arts degrees are offered in many fields. The largest concentration of master's degrees awarded in 1963 were in education, business, history, and speech.

This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.

This budget makes provision for three positions in the Business Management area for workload increases related to enrollment growth.

STUDENT AND GENERAL INSTITUTIONAL SERVICES

This function includes noninstructional expenditures for services provided to the students, and those operating expenses which apply to the college generally. (Exclusive of library and plant operation.)

During the current year an adjustment was made in staffing of the health service office to adjust ratio of position to the student load according to authorized formula. During the budget year provision is made for the addition of 0.5 man-years of staff time in the student personnel program. In admissions and records 3 man-years are proposed. In the health service area 1 man-year is added. All of the foregoing increases are related to the increased enrollments which are anticipated in the budget year.

54							
55	This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college.						
56	The 76.8 man-year increase in the instruction area includes 1.8 man-years of supervision and 58.5 full time teaching positions. Faculty staffing formula determination are based on course offerings. Supporting technical-clerical services are provided by formula. In the instructional services area 2.5 man-years are provided for audio-visual program.

This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings, maintenance of card catalogs, services to individual students and faculty, and supervision of the foregoing activities.

During the current year temporary help was allowed to process an augmented book allowance provided by legislative action. The budget year makes provision for 3.9 man-years to man public service stations in an expanded library area. In addition 7.5 man-years of temporary help are added by formula to process new book acquisitions and other required work in the technical processing area. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

† Salary range determined by education, experience, and academic rank in accordance with "Salary Schedule for Instructional Positions—State Colleges."

[1] Expenditures for the budget year included as part of staff benefits.

	PLANT OPERATION						
	This function includes all expenditures of operating and maintaining the college physical plant (grounds, buildings, heating and cooling systems, utilities, etc.), security activities, motor vehicle operations, and administration of these activities.				The budget makes provision for 2.5 man-years of trade classes to maintain a satisfactory level of plant operation. In addition 7 man-years of custodial service were added to staff additional space in the administration-classroom building.

GENERAL ANALYSIS

Objectives

San Francisco State College is a 5-year fully accredited college with programs in teacher education of graduate students, in occupational and preprofessional curricula and in many liberal arts fields designed to meet the needs of the counties in the San Francisco Bay and Peninsula areas.

Program and Performance

Started as San Francisco Normal School in 1899, the college was named San Francisco State College in 1935. Operations were conducted at 2 downtown locations prior to a move in 1954 to a new campus near Lake Merced. General education introduction to diversified liberal arts training is stressed as basic to preprofessional and occupational programs for a well grounded educational background. Training of teachers constitutes a major college function for students completing a subject major. Active community contact is achieved through the operation of a Downtown Center extension program and a highly diverse Summer Session which exceeds 10,000 registrations.

A reputation of pre-eminence in several fields of expanded offerings has been realized through programs in business, creative arts, education, nursing, language and literature, general humanities, economics, geography, government, psychology and international relations. These programs and others have made significant advances toward major concentration of college effort on upper division and graduate student training. Courses offered now lead to master's degrees in 28 subject fields and to annual recommendation of more than 1,000 candidates for public school teaching credentials.

The increase in positions in special projects continues to evidence the variety and size of contract program requirements and is totally reimbursed from sponsored funds.

The seeming discrepancy between the fact that enrollments appear to have decreased between the current year and the budget year by 300 FTE while expenditures at the same time have increased by approximately $600,000 is accounted for as follows: The 1963-64 budget estimated the enrollments for fiscal 1963-64 at 10,750 FTE; enrollments actually materialized at 11,550 FTE at the conclusion of the enrollment period. This is 800 FTE more than provision was made for in the budget; administrative adjustments were made during the current year to provide instructional staff for these additional students which has not been reflected in this budget; the apparent decrease of 250 FTE shown is in reality an increase of 500 FTE over the previously budgeted level.

This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.

To meet workload demands in the executive area provision is made to extend the existing publications manager to 12 months class and rank. In this way the president will have available to his office a 12-month administrative officer capable of representing him in many assignments.

† Salary range determined by education, experience, and academic rank in accordance with "Salary Schedule for Instructional Positions—State Colleges."

INSTRUCTION						
This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college. In the instruction function 1.1 man-years of supervision time and 36 full-time faculty positions are proposed together with 1.1 substitute faculty position as well as 9.1 man-years of technical-clerical assistance. Related instructional services are increased 0.8 man-years for audio-visual service.

The function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings, maintenance of card catalogs, services to individual students and faculty, and supervision of the foregoing activities.

During the current year, 0.8 man-year of temporary help was provided as an administrative adjustment to process an augmented book allowance provided by the Legislature in 1963. In the budget year an additional position is proposed for the supervision area based on accepted workload formula. In addition, 2.8 man-years of temporary help are added for processing the book allowance proposed. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

PLANT OPERATION

This function includes all expenditures of operating and maintaining the college physical plant (grounds, buildings, heating and cooling systems, utilities, etc.), security activities, motor vehicle operations, and administration of these activities.

The budget makes provision for 6.4 man-years of custodial time and 1 supervising position for new and expanded facilities to be phased into operation in the budget year.

[1] Expenditures for the budget year included as part of staff benefits.

REIMBURSED ACTIVITIES

This function includes all fully reimbursed activities, such as research projects for governmental agencies and private enterprises, services to auxiliary organizations, summer session, extension, etc.

The Reimbursed Activities amount is completely offset by reimbursements related to these activities. The 65 man-year adjustment in the current year gives evidence to the variety and size of contract program requirements and is totally reimbursed from sponsored funds. The proposed new position in the budget year provides custodial service and stenographic service reimbursement to the college for service rendered the various associated student activities.

GENERAL ANALYSIS

Objectives

San Jose State College, established in 1857, is the oldest public institution of higher education in California. It is the largest of the 18 State Colleges; it is the third largest institution for higher learning in California; and it is the twenty-third largest in the nation. The College is a 5-year fully accredited institution designed to meet the needs of Monterey, San Benito, Santa Cruz, Santa Clara, and San Mateo Counties. Its principal functions are to provide both undergraduate and graduate instruction in the liberal arts and sciences, in applied fields, and in the professions, including the teaching profession. In carrying out these broad functions, the college provides curricular offerings: (a) for general and liberal education and for responsible citizenship; (b) for professional and occupational education in such fields as Business, Police Science, Engineering, Public Services, Homemaking, Journalism, and Social Service; (c) for professional education leading to various teaching and school service credentials at elementary, secondary, and junior college levels; and (d) for preprofessional requirements of those who transfer to other institutions to pursue advanced professional study. Bachelor's and Master's Degrees and credentials are offered in 178 major areas of specialization. While the college is primarily a teaching institution, its responsibility to add to the sum of existing knowledge has been generally recognized. Already the research potential of the College has been recognized by a number of foundations, government agencies and other sponsors.

GENERAL ANALYSIS

Objectives

Sonoma State College, established by Chapter 66, Statutes of 1960, First Extraordinary Session, provides educational programs to serve Marin, Napa, Sonoma, and the southern parts of Lake, Mendocino, and Solano Counties.

Program and Performance

Along with its increase in enrollment and staff since its opening in 1961, Sonoma State College has steadily increased the breadth of its offerings. In 1961 its program was limited to upper-division work in elementary education, building on the base established during the 5 previous years of operation of the Santa Rosa Center of San Francisco State College. In 1962 the first freshman class was admitted, and with the second group of freshmen in 1963, the full 4 years of undergraduate instruction were represented. Also in 1962, liberal arts majors were introduced, and by 1963, 13 major programs were in operation. Graduate students have been served in the elementa credential program and also in a program for the pupil pe sonnel services credential. A secondary credential program w commenced during the 1963-64 academic year. In all of the curricula, a strong emphasis has been placed on the liberal ar core. It is the conviction of the faculty and administration Sonoma State College that specialization must be based on sound program of general education, which in this case is re resented by a required pattern of courses totaling 58 semest units.

In the summer of 1963, site development began on th permanent campus, and in the fall of 1963, the first instru tional building—a physical education facility—will be starte It is scheduled for completion in the summer of 1964. Tw major classroom buildings are to be under construction durin the 1963-64 fiscal year, 1 to be completed by summer of 1965 an the other by the early part of 1966.

	STUDENT AND GENERAL INSTITUTIONAL SERVICES						
	This function includes noninstructional expenditures for services provided to the students, and those operating expenses which apply to the college generally (exclusive of library and plant operation). To meet the workload demands created by increased student population this budget provides formula increases of 2.9 man-years for this function. The increase will add 1.8 man-years in the student personnel office and 1.1 man-years in health services.

	INSTRUCTION						
	This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college. The 26.6 man-year increase in the instruction area includes 22 full-time teaching positions. Faculty staffing formula determinations are based on course offerings. It is estimated that the student faculty ratio will be 13.3 to 1 during the budget year. The related clerical-technical assistance for the instruction area is provided at the rate of 1 such position for every 4.5 full-time equivalent teacher.

34	LIBRARY						
35							
36	This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings, maintenance of card catalogs, services to individual students and faculty, and supervision of the foregoing activities. During the current year the college received a special capital allowance for processing an initial complement of books which is not funded in the budget year. The 1.5 man-years of additional positions in the budget year are based on normal book processing workload requirements. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

GENERAL ANALYSIS

Objectives

Stanislaus State College, established by Chapter 2172, Statutes of 1959, is an accredited college offering upper division programs designed to meet the needs of a primary enrollment area composed of the counties of Calaveras, Mariposa, Merced, San Joaquin, and Tuolumne. Curricula in business administration, creative arts, education, humanities, natural science and social science are based upon a foundation of liberal arts courses.

Program and Performance

The college is located in temporary facilities and will continue in those quarters through most of the 1964-65 academic year. It is anticipated, however, that the first classroom building, library, and boiler plant will be completed by June, 1965, which will enable the college to hold their 1965 Summer Session in the permanent facilities.

The college's growth rate continues at a low level due to the limitations of their temporary facilities. The college expects significant enrollment increases after moving onto their permanent campus.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
GENERAL ADMINISTRATION						
This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.						A half-time clerk typist is being added to meet the increase in workload in the personnel and the accounting offices in view of the increased staff and large volume of new purchases to be made in 1964-65.

STUDENT AND GENERAL INSTITUTIONAL SERVICES						
This function includes noninstructional expenditures for services provided to the students, and those operating expenses which apply to the college generally (exclusive of library and plant operation).						A small increase in the operating expense category has been budgeted to meet the needs created by a small enrollment increase. In addition provision has been made for contract on 1 services of 0.2 medical officer for the student health service.

	EQUIPMENT				$3,745	$4,969	$7,776
	Totals, Instruction				$341,672	$375,541	$403,074
	No new positions are budgeted for this function in view the small enrollment increase and the relative stability of t college's academic program at this time.						
	LIBRARY						
	This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings and card catalogs, services to individual students and faculty, and supervision of the foregoing activities.						
	The 1.5 man-years of temporary help positions shown under workload and administrative adjustments were budgeted to process a special capital outlay book allowance.						
	Four and three-tenths new positions are being added to the li brary in order to meet the public service staffing needs in th college's new library. A more detailed discussion of the librar function will be found in the program augmentation statemen on page 254.

GENERAL ANALYSIS

Objectives

California State Polytechnic College is the only polytechnic college in the State College System. As such and in keeping with the mandate of its Enabling Act, the college emphasizes the applied fields of agriculture, engineering, business and home economics together with the closely related supporting fields of physical sciences, natural sciences and mathematics.

Established in 1901 just outside San Luis Obispo on a campus which has been expanded to 2,850 acres, the college also has its 157-acre Voorhis Campus near San Dimas and its Kellogg Campus of 816 acres near Pomona. Cal Poly was established as a statewide rather than a regional school thus setting a pattern in enrollment which has continued to the present.

The college provides a highly diversified, occupationally centered instructional program. Bachelor of science degree programs prepare students to meet both present and future requirements of specific occupations in production, supervision, management, product design and development, sales, services, teaching and similar areas.

Each student selects his major occupational field as a freshman. Basic technical and exploratory courses in the major field are stressed during the student's first 2 years with the last 2 years providing increasing proportions of general education and supporting courses. Instructional philosophy emphasizes laboratory and field work, with constant interplay between general principles and practical applications. The college seeks to make the arts and sciences an integral part of all curricula to the end that students will be better prepared for an effective and intelligent citizenship.

At the San Luis Obispo Campus, agricultural, engineering, applied arts and applied sciences divisions offer 33 occupationally oriented majors. All of these curricula lead to the bachelor of science degree. The master of arts degree in education also is offered with concentrations in education, agriculture, mathematics, physical education, biological sciences, physical sciences and social sciences. A 2-year technical course in the major fields of agriculture also is available.

Indicative of the college's statewide scope, the San Luis Obispo Campus draws its students from all the counties of California; in an average year less than 10 percent of its enrollment consists of students who are residents of San Luis Obispo County. More than 400 students come annually from other countries, representing in some years as many as 63 nations.

The Kellogg Campus has been the college's southern center of instructional activity since 1956. In that year new college facilities were ready at the Kellogg Campus and the instructional program which the college had begun on its Voorhis Campus in 1938 was transferred to the larger campus. The Kellogg Campus serves students from many counties of California but the majority of its students come from the southern counties of the State. Agricultural, engineering and arts and sciences divisions at the Kellogg Campus offer 22 occupationally oriented majors each of which leads to the bachelor of science degree.

This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.

A total of 1.6 additional positions are provided in the budget year. Of this, 0.3 is within the executive area and will provide for a full-time publications manager. The balance is in business management. These include the 0.5 administrative assistant I in the business manager's office which position will serve as a budget officer and assistant to the business manager. In the personnel office a 0.8 stenographer position is added for the payroll section.

STUDENT AND GENERAL INSTITUTIONAL SERVICES

This function includes noninstructional expenditures for services provided to the students, and those operating expenses which apply to the college generally (exclusive of library and plant operation).

The college operates on a quarter system, also offering a full summer quarter. This means that the registration, grade recording and other peak-load causing operations are repeated 3 times in the regular school year and again in the summer. The budget year provides 2.5 positions. Included is the 0.5 position of administrative assistant I who will assist the dean of students with disciplinary problems, correspondence, th loan fund program, and foreign students of whom this colleg has an unusually high percentage. An intermediate steno rapher is provided in the placement office to assist with bot professional and student placement. A typist-clerk is provide in activities and housing for that office which has a heav load because more students are housed on the San Luis Obisp campus than at any other college in the system. Ninety per cent of its students claim as home a city more than 100 mile distant from the school.

INSTRUCTION						
This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college. Faculty staffing formula determinations are based on course offerings and student loads. In the instructional area 4 man-years of supervision time and 35.5 additional full-time and 0.5 summer faculty positions are proposed in this budget. In support of the foregoing and based on formula 11 man-years of technical and clerical assistance is provided. Additional staff is provided in instructional services including 2 man-years for the audio-visual function based on formula and 1 man-year for workload needs on the college farm.

LIBRARY						
This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings, maintenance of card catalogs, services to individual students and faculty, and supervision of the foregoing activities. During the current year temporary help was allowed to process an augmented book allowance provided by legislative action. The budget year makes provision for 1 man-year for technical processing, 2.7 man-years for public service points in a new library addition, and 1.5 man-years of temporary help by formula to process new book acquisitions and other required work in the technical processing area. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

	PLANT OPERATION						
	This function includes all expenditures of operating and maintaining the college physical plant (grounds, buildings, heating and cooling systems, utilities, etc.), security activities, motor vehicle operations, and administration of these activities. A total of 6.1 positions are provided in the budget year. Of this number 5.1 man-years are added in the custodial area based on workload formula. In addition 1 plumber position i added because of the rapid building growth of the college an particularly because so much of the plumbing is very old bu tied into the new system which has been installed in increment as each new building has been erected.

KELLOGG-VOORHIS CAMPUS

GENERAL ADMINISTRATION

This function includes the executive and administrative offices serving the institution. Responsibilities charged to this function are the college building program, administration of the instructional program, business management, personnel administration, and property management.

The increased staff for this function provided for the budget year relates to workload increases created by additional FTE. A bookkeeping machine operator is provided for the accounting function and an intermediate account clerk is provided for the purchasing function.

This function includes noninstructional expenditures for services provided to the students, and those operating expenses which apply to the college generally (exclusive of library and plant operation).

During the budget year provision is made for the addition of 0.5 counselor in the student personnel section. In addition an intermediate typist-clerk is added for admission and records workload. The increases are related to the increased enrollment in the budget year. The college operates on a quarter system similar to the system at the San Luis Obispo campus.

INSTRUCTION

This function includes all expenditures pertaining to classroom instruction and related supporting services, and is of primary importance because it directly implements the educational objectives of the college.

Faculty staffing formula determinations are based on course offerings and students' loads. In the instructional area 24 additional full-time and 2.4 summer faculty positions are allowed in this budget. In support of the foregoing and based on formula 10 man-years of technical and clerical assistance is provided. An additional 0.5 man-years of clerical time is added for workload in the audio-visual program.

† Salary range determined by education, experience, and academic rank in accordance with "Salary Schedule for Instructional Positions—State Colleges."

LIBRARY

This function includes all expenditures relating to the processing of new book acquisitions, maintenance of current holdings, maintenance of card catalogs, services to individual students and faculty and supervision of the foregoing activities.

During the current year 3.6 man-years of temporary help was allowed to process an augmented book allowance provided by legislative action. The budget year makes provision for 1.6 man-years of additional assistance to process new book allowances and other required works in the technical processing area. A more detailed discussion of the library function will be found in the program augmentation statement on page 254.

GENERAL ANALYSIS

Objectives

The Maritime Academy trains qualified young men to become licensed officers in the Merchant Marine. The course is 3 years in length and leads to the Bachelor of Science degree with a specialization in either the deck or engineering fields.

Program and Performance

The 3-year training program during which the student attends school 11 months of each year, is culminated by the United States Coast Guard examination for a license as either third mate or third assistant engineer. The student must pass the license examination before he can receive a degree.

The program at the academy is supplemented by a yearly sea training period of 3 months' duration aboard the Golden Bear, a merchant type ship loaned to California by the Federal Maritime Administration. These sea training periods provide training in celestial navigation, piloting and midocean ship operation. This training is essential to establish the eligibility of the student to take the United States Coast Guard licens examination.

The Maritime Academy Act of 1958 revised the method b which federal grants and subsidies are made to the variou state-supported maritime academies. The new law permits a outright grant of $25,000 to academies operating in accordanc with prescribed standards and an additional payment of $50,00 for academies that accept out-of-state students. The aid als provides for payments of $600 per student per academic year t assist in defraying the cost of uniforms, books, and subsistenc for each student. Of the total of $600 the state receives $40 and the remaining $200 goes to each midshipman.

In addition to providing the ship for the training cruise, th Federal Government also provides for the annual drydockin overhaul and major repair of the Maritime Academy ship at a estimated cost of $62,500. This amount, however, is not reflecte in the budget.

GENERAL ANALYSIS

Objectives

The State Scholarship Commission, consisting of 9 members appointed by the Governor, administers a statewide program of competitive scholarships enabling a group of academically able students to attend the college of their choice. These students, because of financial considerations, would not have the freedom of college choice without the scholarship program. The program has encouraged independent institutions to expand enrollment facilities and absorb a proportion of the student's educational cost without a burden on the taxpayers for capital investment in instructional facilities and operating costs. The scholarship programs at public universities and colleges of the State have been supplemented and strengthened as a result of the State Scholarship Program.

Program and Performance

Under provisions enacted by the Legislature in 1960, the number of authorized scholarships for the 1964-65 academic year is increased from 4,480 to 5,120, this representing the maximum number of scholarships authorized in the law. Under provisions of Chapter 1878, Statutes of 1963, scholarship grants at independent colleges may vary up to $900 plus 90 percent of tuition and fees above $900 in $100 amounts, with a maximum of $1,500 for one academic year. No grant may be made in excess of tuition and fees for the academic year, excluding summer sessions, of the institution at which the scholarship is used.

Scholarships at the University of California and the state colleges are in the amount of the fees charged the students. Students who win State Scholarships but elect to attend a

	junior college will have their scholarships held in trust for them by the commission as Junior College Reserve Scholarships. The awards are made on the basis of scholastic ability, academic potential, and the need for financial assistance to enable a student to attend the college of his choice. Academic aptitude is measured by means of the Scholastic Aptitude Test of the College Entrance Examination Board. Academic achievement is measured by a minimum performance in high school, and need for financial assistance is determined by a need-evaluation system and the judgment of college admissions and scholarship directors employed by the commission on a temporary basis.				
	Based upon an increase in the total number of units of wor as measured by applications received and award winners, additional clerical position and temporary help for evaluatio of need are necessary. Because of increasing college costs and because of the in crease in the maximum authorized by the Legislature, it i estimated that the average award will approximate $750 fo 1964-65 for a total of $3,840,000. Funds are included for renewal of Agricultural Scholarshi winners who had enrolled in college on the scholarship pro gram prior to its elimination by the Legislature in Chapte 672, Statutes of 1963.

Headquarters Office at Sacramento

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	SUMMARY			
	TOTAL EXPENDITURES			
	Support *(Department of Employment Contingent Fund)*	–	$75,000	$75,000
	Personnel man-years	–	2.2	2.2

GENERAL ANALYSIS

Objectives

To provide continuous reappraisal of the impact of automation and technological developments on the skills required in the California work force and the job opportunities available to them; and to make known the knowledge and information obtained to labor, management and public agencies to be used as a basis for planning programs and actions to develop the skills of California's work force for a changing technology, to deal more effectively with the problems of unemployment, and to further the economic growth and development of the State and the well-being of its people.

Program and Performance

The California Commission on Manpower, Automation and Technology was created by Chapter 998, Statutes of 1963, and consists of a total of 29 members including 4 members of the Senate appointed by the Senate Committee on Rules, 4 Members of the Assembly appointed by the Speaker, 15 members appointed by the Governor, and 6 ex officio members. Of the 15 members appointed by the Governor, 6 represent management, 6 represent labor, and 3 represent the general public. The ex officio members are the Commissioner of the Economic Development Agency, and the directors of the following departments: Agriculture, Education, Employment, Industrial Relations, and Social Welfare. The commission is charged with the following responsibilities:

(1) Study the introduction of modern production and distribution techniques in California to determine the impact of automated processes and other technological advancements on employment opportunities, the skill requirements of industry, business, and government, the displacement of employees, and the obsolescence of skills among members of the labor force.
(2) Study and analyze the processes of adjustment to automation and other technological advancements in the State's economy.
(3) Study and analyze surveys of current public and private programs in the field of job training, retraining, and skill developments generally to evaluate their effectiveness in providing employable skills in reference to both the changing composition of the State's labor force and the changing skill requirements of industry.
(4) Recommend co-ordinated surveys in the various labor markets of the State to project as best possible the basic skill requirements of industry, business, and government sufficiently in advance of need, and in the approximate quantity needed, to the end that such projections shall provide a body of usable information for the development of sound job training, retraining, and skill development programs by labor and management and responsible government agencies.
(5) Encourage labor and management to undertake jointly similar surveys and projections within their respective industries and occupations to maintain a high level of private initiative in meeting the skill development requirements of both employees and employers.

A State Manpower Advisory Committee will be constituted by the Governor with representatives from the designated fields of the public, labor, management, agriculture, education and training. This committee shall co-operate and assist the National Manpower Advisory Committee as established by the United States Manpower Development and Training Act of 1962.

The commission is required to submit annually to the Governor and the Legislature its findings and recommendations not later than December 31 of each calendar year.

The commission is in the organizing phase with the result that the 1963-64 authorized program level of expenditure is presently planned for continuation in 1964-65. Should there be any significant changes in the expenditure requirements as the program is further developed, they will be submitted for legislative consideration during the session.

GENERAL ANALYSIS

Objectives

The board, consisting of the Director of General Services, the State Controller, and 1 other member appointed by the Governor, makes rules and regulations governing the presentation and auditing of claims, allowances for traveling on official business, and the issuance of merit awards. Other functions include considering, auditing, and recommending of claims against the State for which no appropriation has been made, and hearing appeals in accordance with the purchasing procedure under the provisions of Section 13391 of the Government Code.

Program and Performance

Each year the board considers claims arising because no appropriation is available or because the settlement of the claim was not otherwise provided for by law. At current levels this amounts to approximately 1,500 claims annually. Claims approved by the board are, with the sanction of the Governor, referred to the next session of the Legislature with a recommendation that an appropriation be made in payment thereof. The board subsequently pays all claims for which funds have been provided and the Governor has approved. The board meets semimonthly to conduct business, consider appeals, establish rules and regulations concerning state travel and per diem expenses, and hear claims.

This budget provides for the continuation of the existing program.

The board appoints members to the Merit Award Board on a 2-year basis and monthly considers the recommendations for awards of that board.

GENERAL ANALYSIS

Objectives

The State Controller is the elective state fiscal officer. He maintains the control accounts of all funds and appropriations, and audits all claims before issuing warrants on the State Treasury; classifies and funds all receipts and makes various apportionments of state revenues; administers the state payroll system; accounts agency trust moneys in the custody of the Treasurer; supervises the administration of state inheritance and gift taxes; accounts and collects motor vehicle fuel license tax, motor vehicle transportation license tax, petroleum and gas assessments, and insurance premiums tax; administers the tax refunds to nonhighway users of motor vehicle fuel; administers the provisions concerning county budget precedures; reports state, county, city, district, and street and highway financial transactions; prescribes the uniform accounting system for counties and special districts, and the audit standards for special districts; supervises the general procedures concerning delinquent property taxes and administers property tax-deeded to the State; and field audits expenditures by local governments for programs involving state subventions.

The State Controller also serves on a number of boards a commissions including the State Board of Equalization, Fra chise Tax Board, State Lands Commission, Pooled Money I vestment Board, Board of Control, and the various bond finan committees.

Program and Performance

The State Controller administers his office through 8 div sions in offices in Sacramento, Los Angeles, and San Francisc among other cities.

The proposed budget includes 15 proposed new positio which is partially offset by a decrease of 11 positions resultir from economies of machine operations and improved procedure This budget describes the programs and performances and t additional positions in the budgets for the various divisions.

ADMINISTRATION DIVISION

Objectives

This division provides general administration of the State Controller's office and staff assistance to the State Controller pertaining to his responsibilities as a member on boards and commissions. It also performs the auxiliary services for the entire State Controller's office.

Program and Performance

The State Controller's general administrative staff is respo sible for the general administration of 7 divisions; for lega research, personnel, accounting, and miscellaneous auxiliar services. This budget reflects the transfer of 1 clerical positio from Tax Collection and Refund Division in order to provid additional stenographic assistance for the State Controller.

ACCOUNTING DIVISION

Objectives

The principal functions of the Division of Accounting are to maintain the control accounts covering the receipts, disbursements, and balances of all state funds; to audit and designate the fund for all deposits into the State Treasury; to prepare the various financial statements and reports covering the State's financial condition and operations; to administer the Judges' Retirement System; to make various apportionments of revenue to local government; to administer the Uniform Disposition of Unclaimed Property Act and various laws relating to unclaimed money or other property in estates of deceased persons.

Program and Performance

In addition to the administrative staff, the Accounting Division comprises the following organization units: Bureau of Control Accounts, Bureau of Financial Analysis, and Bureau of Unclaimed Property.

The Bureau of Control Accounts maintains the control accounts covering all funds in the State Treasury. In these accounts are recorded all transactions covering approximately 150 funds. It is also the responsibility of this bureau to audit all remittance advices covering deposits into the State Treasury to determine the legality of the receipt of the money and its proper disposition. The bureau maintains accounts for all funds of state agencies, which are deposited in trust with the State Treasurer. It superintends the collection of the state's share of fines and forfeitures levied by judges under various state laws. The bureau maintains both control and detailed subsidiary investment accounts covering the bond investments made from various state funds and from treasury pooled money, as well as accounts covering the various interest-bearing bank deposits.

It is a major responsibility of the Bureau of Financial Analysis to prepare the Annual Report of the State Controller. It also prepares the preliminary annual report, the month-end statement setting forth the revenues derived from all major taxes and the receipts and expenditures of the General Fund and school construction funds, and several periodic reports on special topics. The bureau compiles data and makes computations for the apportionment to local agencies of various revenues, such as highway users taxes, motor vehicle license fees ("in-lieu" tax), and moneys received from the Federal Government. It compiles estimates of future cash receipts and expenditures for use of the Pooled Money Investment Board in determining amounts available for investment under the pooled money investment program. In addition to the foregoing functions, the bureau administers the Judges' Retirement System.

The Bureau of Unclaimed Property administers the Uniform Disposition of Unclaimed Property Act and laws relating to unclaimed estates of deceased persons.

In the 1963-64 budget, 2 positions were authorized to June 30, 1964 to enforce the provisions of the Uniform Disposition of the Unclaimed Property Act. Due to litigation in progress relative to application of the law, this program will be postponed 1 year. In the litigation, the plaintiff has asked that the State Controller be enjoined from attempting to force the bank to pay over to the State various classes of unclaimed property named in the act. Until the case is adjudicated, a compliance program cannot be devised. Therefore these 2 positions were eliminated in 1963-64 but are proposed again for 1964-65.

This budget also includes temporary help funds to provide additional help for the Bureau of Control Accounts and the Bureau of Unclaimed Property. The Bureau of Control Accounts has increased volume of typing, filing, and miscellaneous work required during rush periods, particularly on the State School Building Aid Fund. The additional help is needed by the Bureau of Unclaimed Property to help in picking up a backlog of work resulting from the new programs under the Uniform Disposition of Unclaimed Property Act, and because after July 1, 1963, the regular staff of the bureau must perform all work relating to the screening of unclaimed contents of safe-deposit boxes. During 1962-63, a total of 10.4 man-years of additional temporary help were employed in the screening operations.

AUDITS DIVISION

Objectives

The Audits Division administers the Controller's responsibility of assuring that public money is expended for the purposes for which appropriated. The Constitution and statutes require the Controller to determine the legality and validity of all payments from the State Treasury.

The division passes upon the legality and propriety of state expenditures before disbursement from the treasury. It approves the payment of expenditures found to be correct and valid and refuses to allow any withdrawals which are contrary to law or public purpose. Under various statutes which establish subvention programs for assistance to local jurisdictions by the State and by the Federal Government through the State, funds are advanced to such local agencies by the Controller. Claims presented often contain only information necessary to authorize an advance. The division makes post audits of the accounts of local agencies in order to determine that accountability has been established for the funds advanced and that expenditures were legal and proper.

Program and Performance

During the 1964-65 fiscal year the bureau will audit an estimated 2,321,340 claims, 35,230 contracts and contract changes and will verify 153,000 contract claims. The average number of claims audited annually per audit position will have increased during the 5-year period of 1960-61 through 1964-65 from 128,170 to 136,550, an increase of 8,380 claims per auditor per year, or 6.5 percent.

During the budget year the bureau of field audits will perform an estimated 869 audits of local agency records pertinent to expenditures of state and federal funds under 15 different subvention programs, carry on a program of internal audit within the Controller's Office, and will review fiscal procedures in all justice courts and most municipal courts in 29 counties to determine compliance with the uniform accounting system for courts and the adequacy of internal control in the courts.

It is proposed to keep the staff at the same level in the current and budget years.

DISBURSEMENTS DIVISION

Objectives

This division issues the Controller's warrants drawn on the State Treasury and maintains the records of outstanding warrants; administers the Uniform State Payroll System; provides electronic data processing service for the gas tax refund program, the unclaimed property program, and maintenance of the State's central control accounts and the treasury trust accounts; and performs electronic data processing services for other state agencies under reimbursed programs.

Program and Performance

The total workload of the division for the 1964-65 fiscal year will exceed that of previous years by substantial volumes.

The Division of Disbursements, through field offices located in Sacramento, San Francisco and Los Angeles, performs the Controller's constitutional duty of drawing warrants on the Treasury. In the past 5 years warrant volumes have risen from 3 million to 4 million per year. A substantial part of this increase is due to increases in the state employee population, for whom payroll services are performed by this division. Warrant volume increases have also been experienced in payments to retired employees and from general disbursement claims. Each year under direct mailing procedures over 2 million warrants are processed through the division under these programs.

A modern electronic computer is employed to perform all the accounting and auditing work required in the payroll processes. Savings produced by this operation are anticipated in the reduction of 11 positions during the current year. Gross wages for the 151,000 state employees serviced by this division approximate three-quarters of a billion dollars annually. All other accounting functions, including fund accounting, claims paid reporting and bank reconciliation are performed under integrated computer programs. The division performs "issuing agent" service in the largest United States Saving Bond program on the West Coast, maintaining approximately 24,500 individual accounts and issuing 15,000 bonds per month. By utilizing position roster records maintained by the division, control is exercised over all state agencies to insure that salary expenditures are made only from duly authorized positions.

All workload factors continue to climb steadily with certain areas showing large increases due to legislative action. This is particularly noticeable in payroll deduction transactions, due to newly authorized credit union, parking and OASDI deductions. Persistent and recurring requests for additional withholding tax deductions, as permitted by federal law, have resulted in the introduction of such a program into the Uniform State Payroll System to become operative early in the 1963-64 fiscal year. The computation of the State's share of retirement, OASDI and Health Benefit contributions at the function and appropriation level, as required under revised budgetary procedures, will be performed by this division as a byproduct of normal payroll operations. All programs originally scheduled for computer processing have been converted and are functioning smoothly. These include fund accounting, payroll, general disbursements, bank reconciliation, U.S. Savings Bonds, agency trust accounts, unclaimed property and investment accounting.

Computer modifications providing much greater capacity will be achieved in the 1963-64 fiscal year without additional cost to the State. Savings resulting from staff reductions and improved methods made possible by these modifications will not only pay the $475,000 which the improvements cost, but will also result in an estimated savings of $600,000 over the 6-year period beginning with the 1963-64 fiscal year. The increased capacity which will be available will permit this division to absorb additional legislative assignments with only nominal 1-time costs. Some of the savings attributed to staff reductions result from increased computer speed, permitting a change from a 4-shift to a 2-shift operation. The machine time made available by this action provides a margin to accommodate additional workload at future dates.

In addition to workload increases, the division will continue to provide machine accounting services to other divisions of the Controller's Office for such programs as: the Tax Collection and Refund Division under a plan for automated auditing and refund processes in connection with claims for refunds of motor vehicle fuel tax; the Division of Accounting for the performance of duties related to the administration of the unclaimed property laws; and the Division of Accounting for the investment accounting operations, including the scientific amortization of premium, discount and interest. Under reimbursed programs the division anticipates providing electronic data processing services for the State Employees' Retirement System approximately 4 hours each day and for the Franchise Tax Board a total of approximately 100 hours in the 1963-64 fiscal year. Since both agencies will have their own equipment by July of 1964, reimbursements are not anticipated in the 1964-65 fiscal year.

INHERITANCE AND GIFT TAX DIVISION

Objectives

This division administers the State Inheritance and Gift Tax Laws.

Program and Performance

The Inheritance tax is levied on the succession or transfer of property upon the death of the owner, and is fixed by the superior court of the county in which the estate is being probated. The division represents the State's interests at the local level and through centralized supervision controls the receipt and deposit of inheritance tax moneys into the State Treasury. It also affords the taxpayer an opportunity to have his case heard in the local courts. The division operates out of 3 district offices, in Sacramento, Los Angeles and San Francisco.

The gift tax is imposed on transfers made by gift during the lifetime of the owner and supplements the inheritance tax.

Workload Data

	Actual			Estimated	
	1960-61	1961-62	1962-63	1963-64	1964-65
Gift tax returns	6,474	7,387	7,632	8,319	8,901
Inheritance tax reports	25,764	25,864	24,619	26,342	27,659

There is a continuous increase in the workload of this division. In 1962-63, the inheritance tax revenues for the State were $89,841,821 and gift tax revenues were $5,782,384 with the combined total being $95,624,205, an increase over the prior year of $16,995,485, or 21.6 percent.

Related to the increase in workload and new programs in progress and being proposed, 3.5 intermediate clerks have been established in the current year administratively and are proposed for the budget year.

There has been an 83 percent increase in the Los Angeles audit staff, a 28 percent increase in the legal staff and a 27 percent increase in the clerical staff in the past 10 years with no additional staffing in the stenographic section.

The law services have not been filed for several months due to lack of help in this section. Also, there is a need to reduce the backlog in processing consents to transfer, releases of lien and other normal duties. An intermediate typist-clerk is proposed in Los Angeles to accomplish this workload, and an additional position is proposed in Los Angeles to maintain general files on a current basis. The San Francisco office requires 0.5 clerk for mail and supply deliveries.

During 1961-62 fiscal year a research program was initiated in the headquarters office to provide data needed in the administration of inheritance and gift tax laws and permit accurate assessment of future legislative proposals for modification of the laws. A research technician was provided plus one-half an intermediate account clerk in temporary help. One intermediate account clerk has been continuously required to assist the research technician. This temporary position established during the current year is proposed to be converted to an intermediate account clerk in the budget year.

LOCAL GOVERNMENT FISCAL AFFAIRS

Objectives

This division administers the laws relating to county budgets; the reporting of city, county and district financial transactions; provisions of the Collier-Burns Highway Act requiring local jurisdictions to report city and county street and road financial transactions and prescribes uniform accounting procedures for counties. The division will also administer the fiscal audit provisions of the Collier-Unruh Local Transportation Development Act and prescribe uniform accounting and reporting procedures for special districts.

Program and Performance

The staff of this division collects, reviews, compiles and publishes information concerning financial transactions relating to streets and roads of cities and counties in California.

The division collects, compiles and publishes information concerning the financial transactions of cities and counties of California, the financial transactions of special and irrigation districts, the financial transactions of school districts and assessed valuations of local jurisdictions.

The division certifies irrigation and water district bonds for the State Controller in accordance with statutory requirements, prescribes forms for the use of county auditors in compiling their budgets, and makes semiannual settlement of financial accounts between the State and the counties.

Under the Collier-Burns Highway Act of 1947, the Controller is responsible for reviewing and reporting on the use of state gas tax funds apportioned to local government to insure an adequate accounting from the cities and counties.

Under Section 30200 of the Government Code, the Controller must devise and supervise the installation of uniform accounting procedures for all counties.

Under Chapter 1760, Statutes of 1963, Regular Session, the Controller must prescribe uniform accounting and reporting procedures for all local agencies except cities, counties and school districts. Local agencies which substantially follow a system of accounting prescribed by the Public Utilities Commission of California or the Federal Power Commission are also excluded. In effect this law requires that the Controller must prescribe uniform accounting and reporting procedures for more than 3,300 special districts operating under approximately 170 special authorizations. To perform this work 2 governmental auditors and 1 stenographer are proposed in this budget.

The Collier-Unruh Local Transportation Development Act, Chapter 1852, Statutes of 1963, Regular Session, requires audits of additional gas tax moneys which will be made available to cities and counties. These audits will be the responsibility of the Controller. To perform this work 3 governmental auditor positions have been administratively created during the current year and 4 auditors and 1 clerk are proposed to perform this added workload in the budget year.

To date the division has been able to cope with the increased workload in the city and county financial reporting programs by more efficient operations as a result of a reorganization and general operating improvements. The increase in the number of incorporated cities has averaged 2 percent per annum. This growth has in aggregate increased the workload by nearly 20 percent since the staff has last been augmented. In addition more field work is required in some areas, particularly in that relating to reporting of city financial transactions. One additional governmental auditor II is proposed for these needs.

Assisting the division is a 7-man "Advisory Committee to the State Controller on Financial Reports" and a 10-man "Controller's Committee on County Accounting Procedures." The members of these committees are all representatives of local government and serve without pay.

DIVISION OF TAX COLLECTION AND REFUND

Objectives

This division administers the refund of motor vehicle fuel license taxes (gasoline tax) to non-highway users, collecting, in the process, state and county sales and use taxes on the purchase subject to such taxes; and enforces the collection provisions of the Motor Vehicle Transportation License Tax Act, the Motor Vehicle Fuel License Tax Act, the Insurance Tax Act, the petroleum and gas production assessments and the assessments under the Subsidence Abatement Act.

Program and Performance

The division operates a headquarters including a fuel tax refund section, a tax collection section, and a headquarters group for the field operations. Field offices are located in Sacramento, San Francisco, Fresno, Bakersfield, Los Angeles and San Diego to carry out the field auditing program of selected fuel tax refund claims and field collection of delinquent taxes.

Persons purchasing tax-paid gasoline and using it for certain off-highway use as provided by law may claim a refund of the motor vehicle fuel license tax subject to deduction of the state and local sales taxes. This division office-audits the claims received and carries on a field program of education and compliance through verification of the legality and amount of refund to be paid.

A procedure was developed to check claimants' computation by electronic computer in the Division of Disbursements. The claimant receives with his refund warrant a statement showing the computations made and the gallonage and price upon which they were based.

These operational improvements and some reduction in the number of claims received have reduced costs through elimination from 1959-60 to 1963-64 of 9.8 positions in the fuel tax refund section or 27 percent. During this time the number of claims received declined 16 percent due to legislation affecting eligibility for a fuel tax refund. The utilization of computers in the computation of sales taxes to be deducted from the claims has reduced reimbursement from the Board of Equalization for this purpose.

In 1963 the Legislature increased the gasoline tax from 6 cents to 7 cents per gallon effective October 1, 1963. Any refund claim which includes gasoline purchased before and after this date will require allocation and computation of the refund due under each tax rate. This added workload will be absorbed except for the peak claim load of July-October 1964. For this peak period temporary help funds have been budgeted for 1964-65 to provide 3 intermediate account clerks for 4 months each to be used to insure the necessary prompt processing of claims.

The division accounts for and collects delinquencies for 6 major classes of revenue which are assessed by other agencies—the motor vehicle fuel license tax and the motor vehicle transportation tax assessed by the Board of Equalization; the insurance premium tax including the retaliatory tax assessed by the Board of Equalization based on returns filed with the Insurance Commissioner; and petroleum and gas assessments and the subsidence abatement assessments by the Department of Conservation. Under these tax laws the division keeps an account with each individual taxpayer and does related cashiering and fund accounting and enforces collection of any tax delinquencies for each tax.

The field tax collection workload is almost entirely delinquent transportation tax. While the number of taxpayers has remained relatively constant for several years, the office and field workload arising out of delinquents has decreased because the Board of Equalization, in view of the decrease in the tax rate January 1, 1958, has assessed less delinquent tax through their field audit program. Field-assigned collection cases as of June 30, 1963 are 38 percent fewer than the peak load reached in January 1956. The reduced workload has been reflected in elimination of 3 positions in headquarters tax collection section and shifting of 3 tax collection field positions to the more productive field auditing of fuel tax refund claims and allocation of related clerical support from tax collection to fuel tax refund work.

One intermediate stenographer position is transferred to the Division of Administration during the current year for workload purposes. Improved procedures have made these clerical savings available in this division.

TAX-DEEDED LANDS DIVISION

Objectives

This division is concerned with the restoration of tax-deeded property to local tax rolls as soon as possible. It advises and offers technical assistance to counties in attaining uniform and effective interpretation and application of the laws relating to property taxation and the collection of property taxes. The division also strives to assure sound and marketable tax title through proper application of the law regarding tax sales and tax deeds and, in addition, to obtain income for local taxing agencies in lieu of taxes lost while properties are off the tax rolls. This latter function is accomplished primarily through securing maximum rentals and reasonable proceeds at public auction of tax-deeded property.

Program and Performance

The State Controller has general supervision over the general procedure for tax sales, tax deeds, and redemptions and, to this end, may make any rules and regulations he deems advisable.

The program provides for regular scheduled trips to all 58 counties of the State to advise and technically assist the local officials in the interpretation and application of the property tax laws. It establishes uniform procedures in the district offices for a more effective approach to restoring tax-deeded property to the tax rolls and preventing property being deeded to the State. It provides continued work with the individual counties in installing a control system for tax delinquent property, including compiling abstracts and indexes of tax-sold property. Active supervision and training of the field staff is provided in connection with the outlined program.

GENERAL ANALYSIS

Objectives

The Board of Equalization is responsible for property taxes, business taxes, and in addition, acts as a tax appeals board. Based on constitutional and statutory provisions, the property tax responsibilities include the assessment of utility properties, assistance to the counties in the assessment of all locally taxable properties, and equalization of the average assessment levels between counties.

The board collects over half of the State's revenues in administering various business taxes. The General Fund revenue sources administered are: The Sales and Use Tax, the Cigarette Tax, the Alcoholic Beverage Excise Tax, and the Private Car Tax. The special fund revenue sources administered are: The Motor Vehicle Transportation License Tax, the Motor Vehicle Fuel License Tax, and the Use Fuel Tax. The board participates in the administration of the insurance company taxes and administers, collects, and distributes to local governments one of their major revenue sources—the local Sales and Use Tax.

The board sits as a hearing court to hear appeals from actions of the Franchise Tax Board on personal income and bank and corporation taxes.

Program and Performance

The Board of Equalization is composed of 4 members elected from areas of the State known as equalization districts and a fifth, ex officio member, the State Controller. Board members acting collectively set overall policy. In addition, each board member investigates the administration, enforcement and operation of the tax programs of the board within the equalization district from which he is elected. Board meetings are devoted to hearing appeals from actions of the Franchise Tax Board, consideration of tax deficiencies, matters of general policy, equalization of local property tax assessments, valuation of public utility properties and the assessment of the taxes on insurance companies and privately owned railroad cars.

For purposes of business tax administration, the State is divided into 10 districts, each of which consists of a group of counties within an equalization district. In addition, an out-of-state district with headquarters in Sacramento and offices in New York City and Chicago administers the tax programs with respect to out-of-state persons or businesses doing business in California.

Chapter 1858, Statutes of 1963, extends the coverage of the use tax to certain in-state purchases of automobiles. The additional tax, as well as the use tax on automobiles purchased out-of-state for use in California, will be collected for the board by the Department of Motor Vehicles at the time of registration or transfer of registration of the vehicle. Estimates by the Department of Motor Vehicles for the cost of their services are $429,779 in 1963-64 and $488,518 in 1964-65. The abolishment of 15 positions in the Board of Equalization will partially offset this amount. The difference will be obtained from the emergency fund in 1963-64 and by appropriation in 1964-65.

The following is a summary of the proposed staffing adjustments:

Reduction in Authorized Positions:	
Administration	
Women's restroom attendant	1
Business Taxes	
Junior-intermediate account clerk	1
Clerical positions transferred to the field	5
Reclassification to other positions	5
Auto Use Tax reduction in positions	15
Property Taxes	
Reclassification to other positions	2
County Contract Mapping	
Reduction in positions	14.8
Total, Reduction in Authorized Positions	43.8
Proposed New Positions:	
Administration	
Tax regulations communications officer	1
Key punch operator	1
Junior-intermediate account clerk	1
Overtime	3.5
Intermittent help	0.6
Reclassification from other positions:	
Junior counsel	1
Associate personnel analyst	1
Business Taxes	
Tax representatives	6
Clerical positions transferred from headquarters	5
Property Taxes	
Reclassification from other positions:	
Junior property appraiser	1
Assistant administrative analyst	1
Junior property appraiser	1
Utility valuation analyst	1
Junior real property appraiser	1
Total, Proposed New Positions	25.1

These adjustments are described in the program and performance statements in the appropriate section.

BOARD OF EQUALIZATION—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 62-63 (Filled)	63-64 (Auth.)	64-65 (Auth.)	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65
	ADMINISTRATION						
	Program and Performance						
	Execution of policy established by the board members is the responsibility of the executive secretary. The executive secretary, under board direction, co-ordinates the three line departments of Property Taxes, Business Taxes, Administrative Services and the central staff services consisting of Legal, Internal Audit, Personnel and Training, and Administrative Analysis.						
	The Administrative Service Department provides administrative and supply support to all units. The units of the Administrative Services Department include Fiscal Services, Electronic Data Processing, Research and Statistics, and the General Services functions of cashiering, mail, supply and duplicating and forms management.						
	Electronic data processing services will be enhanced by the installation of a larger system about November 1, 1964. To offset the small increase in rental anticipated by this system, one intermediate clerk position which is directly offset by additional electronic data processing services will be eliminated from the Business Taxes budget.						
	In addition electronic data processing has made possible the release of 5 headquarters positions to the districts and the transfer of 2 positions to Administration and 3 positions to Property Taxes.						
	Reimbursements from the Department of Alcoholic Beverage Control for data processing services will discontinue in 1964-65. It was determined these services should be performed by the Department of Agriculture since both agencies are housed in the same building.						
	The position of ladies restroom attendant is abolished. Cleaning services will be provided by the lessor.						
	In the current year a junior counsel and an associate personnel analyst were added by reclassification of 2 auditor positions transferred from Business Taxes. The junior counsel position will staff for the increased workload as a result of the greate number of appeals from the action of the Franchise Tax Boar The need to travel to the Board of Equalization's 62 offices t implement various personnel and organizational programs whil keeping studies, surveys and documentation current in th headquarters office required the assistance of an associate per sonnel analyst. Overtime and intermittent help for quarterly cashiering and electronic data processing are increased to reflec actual expenditures in past years. The above positions ar shown as new positions in the budget year.						
	The need to provide information concerning changes in ta laws administered by the board and rules and regulations re lating thereto, and to make taxpayers aware of common mis understandings regarding these levies, is met by the inclusion of a proposed new position of tax regulations communication officer. Areas of common misunderstanding regarding the Sales Tax, Transportation Tax, Motor Vehicle Fuel Tax, Alcoholic Beverage Tax, and Cigarette Tax are revealed by audits and taxpayer inquiries. Misunderstandings also exist concerning some aspects of property tax administration including the determination by the board of the Collier factors (the relationship between the counties' assessment level and the assessment level of the State as a whole) and the resulting effect on local property taxes.						
	Two new positions, a key punch operator and an intermediate account clerk, are added in the Tabulating Unit for a workload growth of 3 percent in the number of items processed by the key punch and control units.						
	Operating expenses are budgeted at 1962-63 workload program levels with adjustments for price increases. Provision has been made for building alterations in both headquarters and field offices to provide for maximum utilization of space.

BUSINESS TAXES

Program and Performance

The Department of Business Taxes administers the Sales and Use Tax Law, Bradley-Burns Uniform Local Sales and Use Tax Law, Cigarette Tax Law, Alcoholic Beverage Tax Law, Use Fuel Tax Law, and the licensing and assessment provisions of the Motor Vehicle Transportation License Tax Law and the Motor Vehicle Fuel License Tax Law.

The board's administration of state taxes during the fiscal year 1962-63 involved the licensing of 334,999 sellers of tangible personal property operating at 362,614 outlets, and of 2,732 certificates of registration-use tax as well as the 43,875 highway-users and members of the petroleum products industry and 284 licensed cigarette distributors and 1,779 licensed manufacturers and wholesalers of alcoholic beverages. Tax returns are distributed to, and tax remittances received from, these licensees. A total of 36,986 taxpayers were audited in the 1962-63 year.

The various tax programs are administered within the compliance and audit functions. Compliance activities include the licensing, regulation, and administrative actions requiring taxpayers to comply with the law. Audits are performed both as an enforcement and educational procedure and for the purpose of determining misplaced items of tax.

In order to process the additional 1.8 percent growth increment of sales tax and other accounts which are expected in addition to the continuous workload involved (1964-65 volume estimated at approximately 15,000 accounts more than 1962-63), 15 additional compliance positions are needed. Five positions will be transferred from headquarters to the districts during the 1963-64 year and are shown as proposed new in 1964-65. Six additional positions are also included as proposed new positions in 1964-65. The equivalent of 4 man-years will be obtained through emphasis on recruiting compliance classes. All 15 positions are required on the basis of additional taxpayer accounts during the current and budget years.

As a part of the continuing program of conversion of certain operations to electronic data processing, this budget makes provision for abolishing 1 intermediate account clerk on January 1, 1965. Other data processing procedures have made possible the release of the 5 headquarters compliance personnel to the districts in 1963-64 (as provided above) and the transfer of 2 positions to Administration and 3 positions to Property Taxes (as discussed under the appropriate section).

A total of 15 positions related to the Auto Sales and Use Tax are deleted as a result of the transfer of responsibility for collection of the tax to the Department of Motor Vehicles.

PROPERTY TAXES

Program and Performance

The major property tax programs are administered by 3 operational divisions. The Division of Assessment Standards instructs, advises, and directs county assessors in the development of efficient and acceptable assessment procedures, and promotes uniformity in the ratio of assessed value to market value of all locally assessable properties within a county (intracounty equalization). The Division of Intercounty Equalization, in cooperation with the property tax statistician, makes annual estimates of the ratio of total assessed value to total market value of locally assessable property in each county for application of the board's intercounty equalization responsibilities. The Valuation Division provides the board with the data required for the assessment of state-assessed property and administers the Private (Railroad) Car Tax Law.

The board assesses property that produces property taxes and ad valorem special assignments amounting to approximately $345,000,000 a year; and it assists county assessors who are responsible for the distribution among property owners of an additional $2,543,000,000 of taxes and ad valorem special assessments. It also makes some 6,000 appraisals of secured and unsecured property holdings each year involving over 5,000 parcels of real property and 3,000 personal properties, to test the assessment levels of approximately one-third of the counties, and estimates the assessment levels of the remaining counties by reference to the results of prior year appraisals.

The effect of the Collier factor (the relationship between the counties' assessment level and the assessment of the State as a whole) has been to increase the amount of time spent by intercounty equalization appraisers with the county assessors in reviewing board and county appraisals of properties. In order to meet the requirements of increased board-assessors discussion time and still maintain adequate time for training, an additional appraiser position was reclassified from a clerical position transferred from Business Taxes in the current year and is included as proposed new for the Intercounty Equalization Program in 1964-65.

With the addition of 2 positions by reclassification of clerical positions transferred from Business Taxes in 1963-64, the Assessment Standards Division will be effectively providing assistance to county assessors in the previously deficient areas of office procedures and methods. These positions are proposed new in the budget year.

The need to relieve the valuation chief of some of the technical detail involved in the computation of unit-value indicators —historical cost less depreciation, reproduction cost less depreciation, stock and debt value, and capitalized earnings—and to achieve more frequent updating of reproduction cost and depreciation figures, a valuation analyst and an additional appraiser are required in the analyst section. Both positions are to be reclassified from clerical positions.

Timber appraisal services to counties will be continued at approximately a 1 man-year level.

COUNTY CONTRACT MAPPING

Program and Performance

The County Contract Mapping Program, cost of which is borne by counties through reimbursements, is expected to be terminated by June 30, 1964. The Lassen County contract, which is in current process, is expected to be completed at that time. No provision is made for this program in 1964-65. However, there will be approximately $10,000 reimbursements received from Lassen County under their contract in 1964-65.

GENERAL ANALYSIS

Objectives

The Department of Finance has general supervision over all matters concerning the financial policies of the State. All matters of business services have been transferred to the Department of General Services as provided by Chapter 1786, Statutes of 1963.

Program and Performance

The responsibilities of the various offices of the Department of Finance, which now includes 268.5 positions, are as follows:

Executive Office:
The Director of Finance is immediately responsible to the Governor. He acts as adviser on fiscal matters, planning, economic development, assists in the formulation of administrative policies, and is charged with the responsibility for the preparation and execution of the state budget.
One deputy director is headquartered in Washington, D.C., and represents the State's interests in matters with the Federal Government.

Audits Division:
Conduct post-audit of all state agencies and district and county fairs. Supervise the examination of records of all school districts, and make special audits and investigations.

Budget Division:
Prepare and administer the Governor's budget. Conduct economic and population research and project data for long-term financial planning. Approval powers relating to classification and salary of exempt positions have been assigned to the Budget Division.

Office of California Development:
The responsibilities of this office will be to stimulate the general economy of California through vigorous domestic and foreign promotion of the State's industrial and agricultural products, tourist attractions, world trade significance, and plant site and labor force potential.
The office will provide a program designed to meet the pressing problems of automation, defense industry cutbacks, and unemployment. This office, through broad statewide and specific local assistance programs, will promote all aspects of the California economy. The administration will request enabling legislation creating the Office of California Development at the 1964 session of the Legislature.
The office will assume the existing programs and powers of the Economic Development Agency and the World Trade Center Authorities. Central administration of existing programs, coupled with a new tourism promotion program, will provide a framework for a co-ordinated effort to expand and increase California's economic growth.

Office of Planning:
Provide and maintain a comprehensive state development plan. Co-ordinate the public works programs undertaken by state, federal, and local agencies. Provide planning assistance to local agencies.

Program and Policy Office:
Evaluate state programs and policies, propose changes, and develop new programs to meet public needs. Serve as a consultant staff to the Governor's office, the director, the cabinet, and agency administrators. Assist the Governor's legislative secretary in the preparation of legislative programs.

Office of Housing:
This budget includes funds for an Office of Housing. It will be the responsibility of this office to bring together and evaluate the many studies concerning California's housing problems. The development of a program designed to meet the needs of the citizens of California utilizing federal, state and local resources will be the initial function of the office.

This budget includes 41 proposed new positions as follows:

Audits Division	6
Budget Division	11
Office of California Development	13
Office of Planning	7
Office of Housing	4
	41

EXECUTIVE OFFICE

Objectives

This office provides overall administrative direction and co-ordination for the department.

Program and Performance

All of the service functions formerly performed by the Department of Finance have been transferred to the Department of General Services. Operating expenses and equipment for 1962-63 and the first quarter of 1963-64 are reported in Administrative Services Unit of the Department of Finance. Operating expenses and equipment for the remainder of 1963-64 and the budget for 1964-65 are reported in this function.

AUDITS DIVISION

Objectives

This division performs the postaudit of the accounts of every state agency, district and county fairs, and supervises the examinations of records of all school districts. The purpose is to discover and report any unauthorized, illegal, or irregular expenditures; any financial practices that are unsound; determine if agencies have faithfully discharged their responsibilities; and suggest improved procedures in accounting practices and procedures.

Program and Performance

Government Code Section 13294 requires an audit of each state account at least once every 2 years. In addition to the biennial audit, this division provides audits and studies of special problem areas at the request of the Director of Finance and other state officials. Six new auditor positions are proposed to provide staff to fulfill these responsibilities. The time required to perform careful, constructive fiscal audits has increased as the size and complexity of State Government has increased.

BUDGET DIVISION

Objectives

This division is responsible for the preparation and administration of the annual budget.

Program and Performance

The service and control functions affecting budgetary activities of all state agencies are performed by this division. Each state agency prepares detailed estimates of proposed expenditures and anticipated revenues for the coming fiscal year which are analyzed by the division staff in terms of policies set by the Governor and the Director of Finance. After legislative action on the budget this division continuously reviews and approves each agency's financial operations. The budgetary process and the operations of the division receive continuing management review from a policy viewpoint by a procedures unit (staff services).

Another unit of the division conducts economic and population research, prepares the budget estimates of revenue from major taxes and licenses, and provides the basic data on population and income essential for long-term financial planning. Under the provisions of Section 194.2 of the Streets and Highways Code, local governments may request the Department of Finance to prepare estimates of population and pay the minor expenses incidental to this work in lieu of conducting special

	Program and Performance—Continued						
	censuses. The resulting population estimates are certified to the State Controller and used as a basis for future distribution of motor vehicle fuel and vehicle license fee revenue.						
	One personnel analyst position was transferred from organization and cost control along with the transfer of responsibility for classification and pay of exempt positions. One clerical position was transferred from the Administrative Service Office to staff the library function for this division which was decentralized due to physical separation of the units using the library. These transfers are reflected in the Salary Supplement.						
	One clerical position was added in the current year and is proposed in the budget year to provide clerical staff for the medical fees adviser. The cost of this position is reimbursed.						
	Four positions are proposed for the budget operations section: 1 professional position to provide staff for analyzing, preparing, and administering the Governor's Budget for public school apportionments which are now approaching $1 billion annually; 2 positions to provide clerical assistance for the rapidly increasing workload of the budget operations section and 1 position to perform comptometer calculations required for budget schedules and revenue estimates.						
	One position is proposed for the staff services section to act as personnel clerk for the State's exempt pay scales, a function recently transferred to this office.						
	Five positions are proposed for the financial and population research section. One professional position is to assist in the projection of enrollments in the public junior colleges. There are 71 junior colleges to be studied, each with different characteristics and service areas. Three professional positions are required to maintain and upgrade the economic growth model proposed for future use in state economic planning. These positions will also provide technical and advisory assistance to the Planning Office in areas involving economic phases of planning and assist in the operation of the population model now being used for various population projections. One additional position is proposed to provide clerical assistance to the proposed professional staff.

OFFICE OF CALIFORNIA DEVELOPMENT

Objectives

To stimulate the general economy of California through vigorous domestic and foreign promotion of the State's industrial and agricultural products, tourist attractions, world trade significance, and plant site and labor force potential.

Program and Performance

It is proposed to establish this office, through legislation at the 1964 session of the Legislature, to assume the existing programs and powers of the Economic Development Agency and the World Trade Center Authorities. This, coupled with a new tourism promotion program, will provide a co-ordinated program designed to meet the pressing problems of automation, defense industry adjustments, and manpower evaluation.

Headquarters staff will be established in Sacramento and regional offices will be established in San Francisco and Los Angeles.

The program proposed for this office encompasses the following objectives:

Provide statewide and specific local assistance program to promote all aspects of the California economy.

Develop a tourism promotion program to inform prospective and visiting tourists of the many tourist attractions in this State. Engage in basic research to gather much needed data for more effective promotion. Approximately $200,000 is devoted to this program.

Serve as an information and research center of the industrial opportunities and possibilities in California.

Provide representation for California in the rapidly expanding foreign trade centers through an attaché program.

It is also proposed that the advisory boards for the Economic Development Agency and the World Trade Authorities be abolished and a single advisory board be established. Per diem expenses are provided in the 1964-65 budget.

Three executive positions, 2 in the Economic Development Agency and 1 in the World Trade Center, are administratively abolished in the budget year. A corresponding number of positions are proposed in this office to provide executive staff. Two additional executive positions are proposed to provide staff for a proposed Los Angeles office and for the proposed tourist program. Five technical and 3 clerical positions are proposed to provide additional staff for the tourism program.

	OFFICE OF PLANNING						
	Objectives						

This office will prepare, maintain and periodically revise a comprehensive state development plan; co-ordinate the public works programs undertaken by the state, federal and local agencies; give planning assistance to local, district, and regional planning agencies and to other public agencies upon request; and undertake such other physical planning and co-ordination studies as will implement the planning program. The State Planning Advisory Committee provides advice and guidance to the planning function. This committee is appointed by and serves at the pleasure of the Governor.

Program and Performance

The state development plan is to be based on studies of physical, social, economic and governmental factors, conditions and trends. The plan is aimed at the co-ordinated physical development of the State. It will embody state policy regarding the State's physical growth and development and will include by discussion and agreement between the agencies involved, the projects and other improvement proposals of the departments and divisions of the State Government, the projects and improvements proposed by the Federal Government, and the major aspects of master or general plans of regional and local agencies of government.

The clerical position was transferred from the Administrative Services Office to staff the library function for this office which was decentralized. This transfer is reflected in the Salary Supplement.

Two assistant planners and 1 junior planner are included for the state development plan program. During the 1963-64 fiscal year the second phase of the development plan program will be initiated with the aid of a federal grant. This second phase of the program will continue during the budget year. Although the bulk of the studies for the development plan will be undertaken by outside consultants, it is important that a staff be established within the State Office of Planning during the second phase of the program. The advantages of increasing the state staff are (1) during the second phase work itself, certain studies can be more readily and economically performed by the state planning office staff than by consultants due to the convenience of interrelationships with other state agencies; (2) personnel who are familiar with the development of the policies to be proposed as the core of the ultimate state plan will be necessary to effectively carry on the permanent planning function of the office beyond the initial preparation phase. An additional assistant planner and 3 clerical positions are included in the administrative section. The assistant planner is required to assist the chief of the section in preparing material and layout of reports, conducting surveys, answering, inquiring, arranging conferences and in supervising the production of reports and display material. During the 1964-65 fiscal year, effective information functions of the office will be of great importance in order to achieve good public understanding of the issues involved in the state development plan. Three clerical positions are required to provide clerical services.

Accounting services are budgeted in the amount of $17,000 which will be provided by the Department of General Services. Certain housekeeping functions will be provided in addition to processing the many applications for federal grants and contracts for consultant services.

	PROGRAM AND POLICY OFFICE						
	Objectives				**Program and Performance**		
	This office evaluates state programs and policies, proposes changes and develops new programs to meet public needs. It serves as a consultant staff to the Governor's office, the director, the cabinet, and agency administrators. It assists the Governor's legislative secretary in the preparation of legislative programs.				This unit will help evaluate existing programs as to need and results and will assist in the preparation of needed new programs with emphasis on objectives and expected results. Ten positions were transferred to this unit from the Organization and Cost Control Division during the 1963 reorganization. No new positions have been established for this purpose.

	OFFICE OF HOUSING						
	Objectives						
	This office is proposed to develop housing programs for California based on the needs of California citizens; to provide information and assistance to local, private and public agencies toward the development and improvement of housing; and, to represent the Director of Finance in co-ordinated housing programs with the Federal Government.				operation between local, state and federal agencies be assured. The needs of California must be made known and reflected in public programs. The vast array of data and studies must be reviewed and summarized in order to carefully and fully document California's needs. Home financing and home building standards will be among the subjects requiring consideration in relation to the needs of low income, elderly and minority groups. This office will co-operate with local agencies in the development and stimulation of local housing programs.		
	Program and Performance						
	One of California's most immediate and pressing problems is low-cost housing. It is mandatory that co-ordination and co-

	ADMINISTRATIVE SERVICES OFFICE							
	Objectives							
	The functions of this division have been transferred to the Department of General Services. The approved 1963-64 Budget included 120 positions. The 1964-65 Budget includes these positions as follows: 89 positions in Administrative Services Division, 27 positions in the Service Revolving Fund (Data Processing Section), 1 position each in local allocations and executive functions and 2 positions to remain with the Department of Finance. One of the 2 positions remaining in this department was transferred to the Budget Division and the other to the Office of Planning. Expenditures for operating expenses, equipment and reimbursements are reported for 1962-63 and the first quarter of 1963-64. The remainder of 1963-64 and the budget for 1964-65 are included in the Department of General Services.

GENERAL ANALYSIS

Objectives

The San Francisco World Trade Center Authority is established under the provisions of Chapter 1508, Statues of 1947, to foster and develop domestic and international trade for the benefit of the entire State.

Program and Performance

The authority is composed of 11 members, including the Director of Public Works, the Director of Finance, and the President of the San Francisco Port Authority, and 8 persons appointed by the Governor for 4-year terms. The chairman is selected by the authority from its membership.

The authority may obtain land, buildings, works, and property and operate and maintain them to foster and develop domestic and international trade for the benefit of the entire State. The authority operates the World Trade Center in the Ferry Building in San Francisco, and carries on various activities designed to foster and develop this State's participatio in world trade.

Rental management of office space, and exhibit and displa space in the World Trade Center is performed by authority pe sonnel. Rentals in the center have been averaging in excess 90 percent capacity, with approximately 110 tenants, includin 4 consulates and 7 chambers of commerce representing foreig countries, several travel agencies, numerous import-export firm a branch office of an international bank, freight forwarders, an customs brokers. In addition, employees of the authority carr out the responsibilities of the basic legislation by promoting d mestic and international commerce. The World Trade Cente Libraries, composed of over 8,000 publications, is operated o the premises by authority personnel.

A legislative program will be proposed to include this activit within the Office of California Development in the Departmen of Finance.

WORLD TRADE DEVELOPMENT PROGRAM

Program and Performance

This program authorizes the authority to engage persons in foreign counties to represent the State's business and agricultural interests in seeking markets and to keep this State's interests informed about current export opportunities in these countries. These representatives will contribute to the development of the total economy of California.

Commercial representatives are to be located in the Europea Common Market, Latin America and the Orient to help brin about a better climate for expansion of the State's exports i international trade.

CALIFORNIA EXHIBIT AT UNITED STATES WORLD TRADE FAIR

Objectives

The San Francisco World Trade Center Authority will prepare a state exhibit in the proposed 1964 United States World Trade Fair to be held in San Francisco.

Program and Performance

The United States World Trade Fair Corporation, a private organization in New York City, proposes to hold its eighth annual fair in San Francisco in the late spring of 1964 because the World's Fair will be held in New York at that time.

Funds were appropriated by the 1963 Legislature to develop and maintain an exhibit at this 10-day fair depicting California's role in world trade and the opportunities available to other countries trading with California.

SAN FRANCISCO WORLD TRADE CENTER PROGRAM						
Program and Performance						
The San Francisco World Trade Center Authority furnishes import-export opportunity information to both local and foreign businessmen and serves as a liaison for the State with foreign government officials who come on trade missions. The San Francisco Port Authority is overall landlord of the Ferry Building wherein the World Trade Center is located. The Port Authority performs physical operation of the plant by providing janitorial service, maintenance and collection of rent. Funds provided from the San Francisco Harbor Improvement Fund were considered as an allocation of a portion of the rent receipts to pay for the costs of the operation of the World Trade Center.

GENERAL ANALYSIS

Objectives

This agency conducts the annual State Fair and Exposition and during interim periods, utilizes the grounds for public service activities.

Program and Performance

The Agricultural Code directs that the State Fair Board, subject to the approval of the Department of Finance, shall "provide for and manage an annual fair or exposition at Sacramento of the industry and industrial products of this State and of the commercial products exported and imported through the ports of this State." The fair program generally has been a 12-day fair held in the latter part of August and the first part of September; however, 1 day was added during the 1963 State Fair on Admission Day to commemorate California becoming the most populous state in the nation. The 1964 State Fair is budgeted for 12 days.

In addition to the fall program, provision is made for a 25-day Spring Fair from March 11 to April 4, which will feature 21 days of quarter horse racing. A Spring Fair staged as a co-operative effort with the 52nd District Agricultural Association in 1961, 1962 and 1963 is discontinued by mutual agreement of the respective boards of directors as the dates available for racing are too early for the District Fair.

Provision is also made for a horse show in June as a separate event which is budgeted as a self-supporting activity.

Since inception of the State Fair in 1854, the program has grown to represent economic interests in livestock, poultry, dairy, and other agricultural products, the arts, home economics, junior division, horse show, rodeo, fashions and fabrics, wines, horseracing, and many others. The fair portrays California as a whole, and shows its economic, governmental, and social and its relationship to the world. In this respect foreign c tries have exhibits at the fair.

The use of the fairgrounds for public service activities s grown to include conventions, dances, roller rink, auto ra cattle sales, winter quartering of racehorses, rental of eq ment, and storage use which provides revenues and helps sup the maintenance and upkeep cost of the fairgrounds.

The Budget Act makes provision for a General Fund tran to the State Fair Fund of $287,510 to provide the additi operational resources required to support the continuing gram of the State Fair. In addition, revenue estimates increased in 1964-65 based on anticipated increased attend at both the Fall and the Spring Fairs.

For the past several years the State Fair accounting syst which was especially designed by the Organization and Control Division, has been on a program cost basis. As a log result of the system this budget is presented and justified o program and performance basis. This format is intended describe briefly the individual programs and associated co and should provide a clearer understanding of the State F activity. It is anticipated that the program budget will be e lutionary, tending toward a simple, meaningful presentat which will provide the reviewing authority at all levels a for policy-making decisions. The new State Exposition and E Executive Commiteee program is on page 45; the Capital O lay section contains funds for architectural and engineer studies.

A summary of proposed new positions for 1964-65 is follows:

Function	*Purpose*	*No. of Positions*
Fall fair	Convert contractual security costs to temporary police help	4.5
Fall fair	Increase temporary help based on 1963 experience	1
Fall fair	Buildings and grounds service for landscaping and general preparation based on 1963 experience	2.3
Spring Fair and Quarter Horse Meet	Net staff increase over prior spring program for this new program	16.1
Horse Show	Initial staffing for this event	1.9
Buildings and Grounds	Conversion of overtime to temporary help	4.3
Buildings and Grounds	Conversion of overtime to permanent positions	4
Totals, Proposed New Positions		34.1

ADMINISTRATION

Administration includes the functions of management and direction of all fair programs, specifically the board of directors, the manager, the assistant manager, the comptroller, and their immediate staffs. Also included are certain expenses which are general in nature and are allocated on a pro rata basis. Examples of these expenses are communications, insurance, a general administration pro rata charges.

There are no significant program level changes anticipat in administration for 1964-65.

FALL FAIR

Program expenses reported under Fall Fair include administrative costs, general ancillary services, and specific exhibit programs.

The following programs with comparative costs with the 1963 Fair are budgeted for the 1964 Fair:

Program	*1963-64*	*1964-65*
Administration	$76,617	$67,477
Ancillary services	427,722	427,220
Promotions	116,504	120,371
Special events	61,554	65,148
Livestock	80,563	84,563
Poultry	10,636	11,636
Junior division	58,095	60,095
Arts and crafts	32,015	31,165
Home economics	10,750	10,100
Education	$3,265	$3,4
Floriculture	72,236	75,2
Counties	84,191	84,6
International	3,434	4,8
Consumers' reaction	8,736	12,3
Fashions and fabrics	4,401	4,8
Rodeo	60,819	51,3
Racing	475,731	472,7
Night show	73,421	49,2
Commercial activity	47,950	50,3
Hobbies, Circa 1890, and Antique Show	6,151	8,7
Dairy products	5,912	
Wine judging show	12,909	
Total	$1,733,612	$1,695,4

STATE FAIR AND EXPOSITION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

FALL FAIR—Continued

The ancillary costs are applicable to the entire production but are accounted in separate programs including fire and police protection, grounds cleaning, lighting, landscaping, decorations, preparation of grounds and facilities, health and sanitation, control of gates and admissions, traffic control, and other miscellaneous costs. This phase of the fair is essentially a fixed cost of doing business in an orderly manner at a safe, sanitary and attractive facility. Administrative costs include personal services expense of the permanent staff and related office expenses.

The promotions program is designed to inform the public about the many fair activities. Primary emphasis is on newspaper and broadcast media with minor expenses for outdoor, transit and miscellaneous advertising. Notable success is achieved with news releases having a local interest such as naming the winners of competitive events. Each of the fair activities is covered by news stories prepared by both experienced personnel and by collegiate journalism students who receive on-the-job training. An additional $5,000 is budgeted in this program to promote an advance ticket sale.

The special events program includes bands, contests and special attractions, and trophies and awards of a general nature. The program is designed to create and sustain a high interest level for fairgoers. The special events program is handled by a limited term employee under the supervision of the assistant manager.

The livestock program includes both beef and dairy cattle, swine, sheep and goats. A total of 177 exhibitors show 2,217 entries in this program, which is divided into about 200 competitive sections. Based on the most recent information 44.5 percent of the fairgoers see at least a part of either this program or the junior division.

The poultry show has recently evolved from an exhibition of caged fowl to a panorama of the industry from eggs to the dining table, including chicks, marketing, preparation, and cooking. This new format appears to have gained public interest and approval.

The junior division program includes both beef and dairy cattle, sheep, swine, 4-H Club clothing entries and booths, and Future Farmers of America horticulture, agriculture, mechanics, farm account books and feature booths. A total of 799 exhibitors show 5,300 entries in this program which is divided into 434 competitive sections.

The arts and crafts program is a statewide competitive art program which has about 2,300 entries of which 25 percent survive the 14-man jury of recognized art experts and are exhibited. The most recent information indicates that 69.5 percent of the fairgoers see the art show indicating a high degree of public interest.

Home economics is a program receiving about 1,800 entries which are all displayed. This program appears to be particularly attractive to the senior citizen exhibitor. The most recent information shows 82.9 percent of the fairgoers see this exhibit which indicates a high interest relative to the budgeted program cost.

The education program provides an opportunity for public exposure to nonprofit organizations such as the Heart Association, Cancer Society, Muscular Dystrophy, and other charity, religious and patriotic organizations. The education program costs are primarily for maintenance of the partially protected outside area.

The floriculture program is designed to further interests in landscaping, beautification and to present worthwhile, interesting "take home ideas" for fair visitors. It presents both old and new materials in educational form and helps to develop the industry through premium offerings. The most recent information shows 87.5 percent of fairgoers see the flower show, second in attendance only to the counties program.

The counties program is the number one attraction at the fair with 93.9 percent of the visitors seeing the exhibit. Forty-nine counties participate by showing the wealth of the State including displays of agriculture, horticulture, livestock and poultry, viticulture, minerals and petroleum, recreation, industry and forestry.

The international program shows the imports through the ports of the State which are prominently displayed in the Women's Building. Exhibits are sponsored by West Germany, the United Kingdom, Japan, Finland, Canada, and others. The costs are primarily for preparation of the facility.

The consumers' reaction program has a marked visitor appeal and is nearly self-supporting through entry fees which afford a market survey to producers interested in marketing new products.

The fashions and fabrics program has two facets. The textile portion is international in scope with more than 200 entries from manufacturers throughout the world who want to acquaint both public and clothing merchants with new products. Judging is in the spring and fabrics are shown at both spring and fall fairs. The fashion portion is based on California manufacturers' entries which are judged in August and are exhibited at a fashion show.

The rodeo is a 12-night program staged in the horse show arena. Revenue from admission to the rodeo when supplemented by a proper apportionment of general admissions and concessions revenue attributable to the rodeo is approximately a self-supporting program.

The racing program is for 10 days and is by far the largest single event staged at the fair. It is a profitable venture to the fair and contributes approximately $345,000 to the State for license fees.

The night show program includes fireworks which are a free nightly attraction. In the past two years major attractions have been scheduled with the anticipation of providing top-flight entertainment on a self-supporting basis. Neither venture was entirely satisfactory on a cost-income basis. In 1964-65 consideration is being given to contracting with a promotional company who would take first money up to an agreed limit sharing any income over this limit with the fair. In this way high quality entertainment can be offered with the expectation of some net income but without the added financial risks of such a venture.

The commercial activity is made up of the concession program and commercial space sales. Each program strives to provide a balanced offering to the fair visitor, while protecting him from over-commercialization, price gouging, inferior products, high pressure sales techniques, and return to the fair an optimum revenue. The larger concessionaires are audited by the Audits Division of the Department of Finance to insure compliance with the terms of contracts.

The hobbies, circa 1890, and antique shows are in the process of growth as a relatively new combination located primarily in the space occupied by the junior division after the 4-day junior show closes. An interesting attraction is needed in this location in order to encourage circulation around the grounds and this program fits both visitor interest and general needs. The antique show is one of the few attractions with an admission charge and is self-supporting.

The dairy products program and wine judging show are being dropped out of the fall fair program in 1964 until such time as they can be presented on a self-supporting basis or redesigned to achieve greater general interest. This is particularly true of the wine judging show which has traditionally been a pre-fair activity not viewed or participated in by the fair-going public, thereby not contributing as an attraction feature to the fair.

In 1964-65 the proposed increase of $24,957 in temporary help is mainly a conversion of the previously authorized security contract of $24,500 into $20,689 of temporary help for State Fair police. This shift in method of security results in an overall savings of about $4,000. The remaining increase of $4,268 in temporary help is a net figure of decreases and increases in the various programs based on actual need experienced at the 1963 Fall Fair.

The increase of $12,230 in services by buildings and grounds for 1964-65 for fall fair program is primarily for general fair and landscaping preparation based on needs experienced at the 1963 Fall Fair.

STATE FAIR AND EXPOSITION—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

SPRING FAIR AND QUARTER HORSE MEET

The Spring Fair and Quarter Horse Meet includes industrial art, which is a statewide high school competition; a showing of the State Fair permanent art collection made up of first award objects from past art shows; a textile show; Angus and horse shows and sales; and is highlighted by a 21-day quarter horse race meet. The State Spring Fair ($34,203) and Sp Quarter Horse Meet ($498,735) with estimated revenues f $514,338. The $18,600 not covered by revenue is primarily s e support of the high school industrial arts program. There e 16.1 proposed new positions for this new program.

HORSE SHOW

The Horse Show is the oldest in the Western United States, having been staged by the State Fair over one hundred years. It was moved from the Fall Fair to the Spring Fair in 1961 because of a conflict in stabling both race horses and show horses in facilities that are barely adequate for only one group, and to take advantage of less competitive horse show dates. However, by moving the Spring Fair dates to March and April, and with the addition of a racing program, the stabling prob again arises and the earlier dates are unsuitable for a h show. It is, therefore, proposed to hold the horse show in r June when stables are available, and at a time weather sh be favorable. The horse show program is budgeted on a s supporting basis at $81,500. There are 1.9 proposed new p tions added for this program.

BUILDINGS AND GROUNDS

The function of buildings and grounds includes the interim maintenance and security for the plant. Special repairs and maintenance not chargeable to the direct fair operations are shown here. Also shown in this function are major equipment expenditures. Work done by this function for direct fair activities is reimbursed by the fair program involved. An increase is proposed in the maintenance expenditures for plumbing and electrical work. These increases are proposed to provide a plant which will meet minimum health and safety levels, and be reasonably presentable to the public. There is no intention to spend money on the old plant that is not justified for the time it will be used for State Fair purposes. The same comments are applicable to the increase in equipment proposed. Each eq ment item has been reviewed and proposed only if it will p vide for minimal level of safe, efficient usage. The buildi and grounds function is budgeted at $412,031.

There are 8.3 proposed new positions in this function wh are entirely funded by reductions in overtime. The 4 foren positions are proposed to be funded from overtime, so that n essary work may be scheduled in an orderly manner through year rather than under emergency conditions preceding and d ing the fair. An increase of 4.3 man-years of temporary hel a shift from 4.3 man-years of overtime which reflects a cha in the method of handling part-time work.

PUBLIC SERVICES ACTIVITY

The public services activity program represents the effort and cost involved in making the fair facilities available for public use during the period not occupied by fair purposes. The plant is used for livestock sales, conventions, dances, roller rink, auto races, winter training of race horses, and storage. The reve realized from this program considerably exceeds the cost bu eted at $43,240.

GENERAL ANALYSIS

Objectives

The Division of State Lands administers policies established by the State Lands Commission in managing the public lands belonging to the State. These consist of school lands, swamp and overflowed lands, salt marsh, tide and submerged lands and other sovereign lands comprising approximately 3,500,000 acres.

The principal revenue-producing function is the leasing of the public lands for the extraction of oil, gas and other minerals.

Program and Performance

The commission is composed of the Director of Finance, the Lieutenant Governor, and the Controller.

Activities in the administration of state lands have increased in scope and value with passing time, ranging from the original activity of selling and leasing proprietary lands to the present duties, which include oil, gas, mineral, grazing, agricultural, commercial and recreational leasing, and leases for use and occupancy of swamp, overflowed, and tide and submerged lands.

The Public Resources Code authorizes the leasing of the State's tide and submerged lands for oil and gas production. Leases may be let on either a cash bonus or a royalty bid basis, whichever is anticipated to return the greater revenue to the State. Total cash bonuses for leases awarded during the past fiscal year amounted to $21,167,654. The Commission has adopted a policy of offering parcels of tide and submerged lands for lease on a continuous sequential basis. As a result, cash bonus royalties may be anticipated during each fiscal year in the future. Active wells on production in Orange, Ventura, and Santa Barbara Counties total 898, an increase of 31 during the past year. Five rigs are presently drilling in the Santa Barbara area.

The commission also accounts for the State's share of oil and gas revenues derived from tide and submerged lands granted to the City of Long Beach. This is a major program involving complex engineering, auditing, and legal problems. Revenues from this source for the past year totaled $11,156,833, an increase of $4,414,867 over the previous year. This increase in the State's share of revenue can be attributed to a decrease in capital expenditures and an increase in production as the result of secondary recovery induced by the water repressurization.

At the present time, there are three major revenue-producing projects in view in the Long Beach Harbor area. The most urgent matter is the issuance of a new contract for the parcel now held by the Long Beach Oil Development Company. In order to insure continuity of an income to the State in excess of $800,000 per month, the successful bidder will have to have an available lead time sufficient to take over field operation by March 21, 1964. The second project is the resolution of the forms of the Unit Agreement, Unit Operating Agreement, and the Contractors' Agreement to be used for developing the Long Beach Unit, East Wilmington Field. When these documents are finally approved, a contract can be awarded for the development of this field. Reserves in this unit are in the order of one and one-half billion barrels of oil having an estimated value of $4,500,000,000. This budget, however, reflects no income from this source. Forty-five hundred acres out of the sixty-seven hundred acres in the unit are tide and submerged lands administered by the City of Long Beach, subject to the review of the State Lands Commission; the net returns from which will be shared by the City and the State. The third matter of concern is the disposition of a 790-acre tract contiguous to the east boundary of the Long Beach Unit, East Wilmington Field. This tract, known as the Alamitos Bay State Park parcel, is wholly owned by the State. When contracts have been let for development of the City's granted tide and submerged lands, plans can be adopted by the State Lands Commission for lease of this parcel.

Chapter 1398, Statutes of 1963 amends the oil revenue d tribution formula of Long Beach oil recovery so that the Stat cost of administering such act is reimbursed from gross roy ties. These funds are anticipated to reduce this appropriat $294,742 in the budget year.

At the September 1963, meeting, the State Lands Commissi adopted comprehensive changes in the policies and procedu for the administration of State School Lands. It also revol the withdrawal order of May 24, 1960, which precluded s of such lands, concurrent with the effective date of revisions the rules and regulations necessary to implement the new la administration program.

With the resumption of sales, a flood of applications is an cipated. Revenues from this source, estimated at $500,000 the budget year, should more than double thereafter.

Ten statutes were passed during the 1963 session of t Legislature providing for grants of tide and submerged lan to political subdivisions of the State. Section 6359, Pub Resources Code, requires that such grants be surveyed, mon mented, and a plat of the granted lands be recorded in t county where the lands are located prior to the grant beco ing effective. These granting statutes also require that su stantial improvements be made of the area by the grant within a 10-year period. The commission has been assigned t responsibility of monitoring such improvements. As a resu a substantial civil engineering workload will have to be unde taken. These legislative grants of tide and submerged lands a count for the establishment of 4 positions in the current year provide the necessary survey work on a reimbursable bas One engineer position is reduced with the reduction of rei bursable Colorado River Boundary workload.

Applications for the leasing of lands for use and occupan continue to grow in volume. Revenues from this source total $300,356 during the past fiscal year, and show a continu increase.

Paramount among litigatory actions the State Lands Cor mission is defending *United States* vs. *State of California No. Original* in the United States Supreme Court. The Solicit General of the United States has petitioned the Supreme Cou to determine the offshore boundary of the State of Californi At issue are submerged lands described as having an oil ar gas potential worth billions of dollars. The present status the case is that the State has filed a reply in opposition to t United States' motion to reopen *U.S.* vs. *California*, and h moved to dismiss the case.

Recently concluded was the case *United States* vs. *Ancho Oil et al.*, in which the United States sued the State, the Cit of Long Beach, and various oil producers for alleged irreparab damage in the amount of $70,000,000 to the Long Beach Nav Shipyard. This action was settled by stipulatory agreement, th State's share of the cost being $1,200,000 which was withhel from oil royalties during 1963-64. Strategy devised and tec nical material developed by the commission's staff are co sidered to have been major factors in concluding this actio

A total of 17.4 positions are included in the budget. An a sistant division chief and a stenographer are included in th executive staff at Sacramento to establish a liaison unit wit other governmental jurisdictions. Because of its proximity t the State's producing oil fields, its relationship with the petro leum industry and Long Beach, the headquarters office of th division is in Los Angeles. State business requires that a executive officer be in Sacramento. This condition results fro legislative demands, business with the commission, and busines with other state agencies. Thus, for continuity and efficiency i

STATE LANDS DIVISION—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

GENERAL ANALYSIS—Continued

Program and Performance—Continued

operations, representatives of the executive staff at Sacramento are necessary.

An assistant counsel is required to provide staff for the increasing and more complex workload in the legal section. A data processing technician position is provided to meet workload requirements. Four positions are included in the audit section to strengthen the audits of existing operations. Three of the 4 positions are for the Long Beach operation, the fourth will be established in Los Angeles. An additional work factor is the review of how tideland grantees are expending revenues, and if these expenditures are in accordance with the terms of trust.

Three engineers, 3 oil gaugers and 1 clerical position are included in the mineral resources section based on workload requirements. The primary justification for these positions is the increase in the number of wells in production. A second factor is the expansion of the geographical extent of the area to be covered. Necessary engineering reviews of Long Beach City's projects are to be increased.

An additional land agent position is required to service the increasing numbers of commercial leases, easements, rights-of-way and recreational permits.

A total of 1.4 positions are required for reimbursed overtime projects.

GENERAL ANALYSIS

Objectives

The Franchise Tax Board administers a revenue producing program. This program is essentially a citizen self-assessed activity. The laws administered are those providing for the personal income tax, the bank and corporation franchise tax, and the corporation income tax. The board audits and assesses additional taxes where deficiencies occur and collects delinquent taxes. The Franchise Tax Board is composed of the State Controller, the Director of Finance and the Chairman of the Board of Equalization.

Program and Performance

This budget provides for the continuing upward trend in the number of returns filed and the over-all workload of the department. The board is presently in the process of converting a major part of its records and many of its procedures and processes to an electronic data processing tape system. Beginning in 1964, this system will allow the board to receive on electronic data processing tape a portion of the "information at source" returns that are filed by employers. This will be the first time since the introduction of the social security tax, that any tax agency in the nation has made a change in reporting requirements that will result in the reduction of the tax compliance burden for those employers who are equipped to furnish electronic data processing tape. The initiation of the pilot project will result in the filing of information return data on an estimated ¾ million employees. The State of California, as an employer, will be one of the first to take advantage of this saving.

Beginning with the 1964 filing period, the board will experience the payment changes that were incorporated into the 2 tax laws by the 1963 legislation. Both personal and general corporate taxpayers will no longer be permitted to pay their taxes in installments. Effective in March 1964, banks and financial corporations will be required to pay one-half of the estimated financial rate which is set in December of each year by the Franchise Tax Board. Beginning in 1965, banks and financial corporations will be required to pay the entire tax, both general and financial, at the time the return is due. General corporations will be required to file a declaration of estimated tax on or before the 15th day of the 6th month of the income year and pay 20 percent of the estimated tax. In 1966, this estimated tax will become 35 percent; and in 1967, it will reach its maximum of 50 percent of the estimated tax.

Commencing with the filing period in 1964, the Franchise Tax Board will carry out an intensive educational campaign to bring these changes to the attention of the individuals and corporations affected.

The current year budget includes an allocation from the Emergency Fund in the amount of $62,446 to finance 14 positions required on a workload basis.

ADMINISTRATION DIVISION

Objectives

This division provides cashiering, accounting, personnel services, management analysis, electronic data processing, statistical analyses, and bank tax rate computation services. The division is also responsible for performing the legal functions, including hearings on appeals by taxpayers from audit findings.

Program and Performance

The Franchise Tax Board, like the Internal Revenue Service, has been faced with the major problem of processing, analyzing, examining, and storing of an ever increasing volume of tax returns and related documents. An indication of the growth pattern is the fact that between 1952 and 1962, the number of returns increased from 2,270,000 to 4,838,000. A projection of this growth rate indicates that by 1972, the board will be receiving more than 7 million returns. This growth potential and the adoption of an electronic data processing tape system by the Internal Revenue Service in 1962, made it desirable that the Franchise Tax Board consider the use of similar equipment and processes in order to maintain compatibility with federal records for purposes of continuing the interchange of information covering compliance with federal and state tax requirements and the use of federal information for mailing state return forms. A system was adopted which will provide for the receipt of information on tape from the Internal Revenue Service, the accounting for personal income tax accounts receivable, the statistical analysis of returns, and the computation of the annual bank and financial corporation tax rate. Data processing activities that were formerly carried on in three separate units within the board have been integrated into one section. The 1963-64 budget provided for the installation of the electronic data processing tape system beginning in September 1963. The final components to be installed and the conversion to tape are scheduled for January 1964. The 1963-64 budget provided for the preliminary programing and the start of actual operations in the latter half of 1963-64. Later analysis and programing has revealed that the original budget request for 1963-64 has not provided sufficient working force to carry on the approved objectives of the electronic data processing system. Five man-years of temporary help were added in the current year to cover this deficiency. The same 5 man-years of temporary help and 12 additional positions requested in the budget year will allow the board to meet its commitments in the area of enforcement, federal-state tax co-operation, processing by tape methods of the personal income tax accounts receivable, statistical analyses, and computation of the annual bank rate. In addition, this system will provide the basic components and the personnel for further studies to allow the board to expand the electronic data processing system in areas where appreciable savings can be realized. Three areas undergoing active planning and programing are: streamlining the collection process; providing for receipt on tape of information at source from employers with compatible equipment; and processing of inquiry letters arising from the enforcement program. A total of $409,163 is required for this budget year for EDP and component rentals.

The Management Analysis Unit prepares and issues general policy directives and is actively involved in interagency cooperation development with the Board of Equalization and the Department of Employment. This unit is currently completing a branch study which defines functions and establishes a work measurement standard and a production reporting system. Other studies encompassing policy and program review, work measurement standards, and organizational analysis are urgently needed by the board. To accomplish these necessary studies one additional administrative analyst is requested in 1964-65.

To effectively utilize the personnel unit, provision was made in the 1963-64 budget for the establishment of a personnel officer. The long-needed personnel management activities and programs now being introduced and provided by the personnel officer require clerical support to handle the sharp increase in workload. One clerical position is being requested to meet this workload increase.

FRANCHISE TAX BOARD—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65

ADMINISTRATION DIVISION—Continued

Program and Performance—Continued

Income tax legislation and requirements are among the most complex in contemporary society. Every citizen is affected. A self-assessed tax program depends upon each taxpayer's understanding and co-operation. With the influx of new citizens and constant changes in the law, the present level of compliance (revenue production) can be maintained or raised by a Tax Service Consultant. This position, working in close association with staff members, will provide profitable assistance in interpreting to the taxpayer the requirements of the state income tax laws in understandable language.

The accounting section keeps the fiscal records for the board, performs the cashiering function, maintains the corporate and individual tax receivable ledgers and performs the service and supply function.

In the current year 9 man-years of temporary help have been administratively established. Three of these positions are for the cashiering section to meet increased workload resulting from more returns than estimated. Under the new record system status requests of account reports must be taken from the EDP tapes. This new procedure requires 3 man-years of effort. Another 3 man-years is needed to reduce the backlog and keep current the identification and processing of payments on fines, penalties, deliquent accounts, assessments, over payments and unidentified receipts.

The above positions are requested as new permanent positions in the budget year. In addition, 2 clerical positions and 1.1 man-years of temporary help are needed by the cashiering section for the continuing increase in workload.

In administering a budget of ten million dollars and an organization of 1,350 employees, the services of 1 full-time budget analyst are imperative. The necessity to more closel relate expenditures to program objectives, to develop a syste to provide the information for management judgment, to d velop a staff level system to analyze internal requests and t provide adequate review of the total fiscal program can only b met with this type of specialist assistance.

The statistical section is responsible for annually computin the rate of tax applicable to bank and financial corporations In addition, the section analyzes statistical data relating to th taxes administered by the board, including proposed legislation To meet workload increases, 1 clerical position is being re quested to assure timely and supportable documentation of th validity of personal property taxes used in the determinatio of the annual bank rate.

The legal section acts as the attorney for the board in the in terpretation of the statutes and provides legal services necessary for the proper drafting of regulations. This section represent the board in actions that are subsequently appealed to th State Board of Equalization, and assists the Attorney Genera in those matters that are carried to the courts.

The appeals and review section acts on formal taxpaye protests against notices of proposed assessments which hav their origin in the audit activities of the board.

The special investigations section investigates criminal viola tions of the income tax laws. The unit also procures evidenc of illegal gambling activities to support the assessment of addi tional taxes under the "Illegal Activities Sections" of the Rev enue and Taxation Code (Sections 17297 and 24436), which provide for a disallowance of all deductions from income re ceived from certain illegal gambling activities.

OPERATIONS DIVISION

Objectives

This division handles the general administration of the Bank and Corporation Tax Law and the Personal Income Tax Law. Responsibilities include various information services for taxpayers, design and distribution of tax forms, clerical processing of tax returns and related reports, desk and field auditing of returns and issuance of additional assessments and refunds where indicated. The division also carries on large-scale compliance programs to insure the filing of returns by those having a liability to do so, and is responsible for the collection of delinquent taxes.

Program and Performance

The headquarters of the division is in Sacramento, and Regional Offices are maintained in Los Angeles and San Francisco. Branch offices, under the direction of the Regional Offices, are maintained in the larger cities throughout the State. Two new branch offices were authorized in the 1963-64 Budget and they have been established in Van Nuys and Santa Ana. The division also maintains offices in Chicago and New York. These out-of-state offices are primarily concerned with the audit of the returns of large corporate taxpayers carrying on multistate operations. Auditors working out of these offices cover the eastern and midwestern portions of the United States where many large corporations have their principal offices.

The division conducts a large-scale program to make tax forms available to those who should file them. In addition to a direct mailing program, forms are provided to banks, chambers of commerce, and other state agencies. Information as to filing requirements and other tax information is made available through press, radio and television on a public service basis.

After the original receipt of returns by the cashier, this division reviews all corporation returns and selected personal income tax returns for errors in computation. Net assessments from this activity totaled $2,245,925 for 1962-63, of which $1,608,392 was personal income tax and $637,533 bank and corporation tax. Recovery per dollar of cost was $4.92 for personal income tax and $9.52 for bank and corporation tax.

Some time after the original review for errors in computation, the returns are subject to inspection and a number are selected for audit either by desk audit methods or by field audit, depending on the particular problem involved. Net assessments from auditing activities for 1962-63 produced a total of $29,142,280, of which $8,913,004 was personal income tax and $20,229,276 bank and corporation tax. The net recovery per dollar of cost was $4.45 for personal income tax and $13.14 for bank and corporation tax.

The personal income tax compliance program involves the comparison of information documents with the files, and a follow-up of "failures to file." This work is carried on jointly by the headquarters and Regional Offices. The 2 main sources of information documents are the United States Internal Revenue Service (abstracts of Federal filings) and various payers of income (Forms 599). The compliance program produced net assessments of $5,680,795 during 1962-63. The net recovery per dollar of cost was $2.91.

The bank and corporation tax compliance program produced $220,390 during 1962-63 for a recovery of $10.59 for each dollar of cost.

The efforts in respect to delinquent accounts were expanded significantly by the addition of personnel during the 1962-63 budgetary period. The expanded staff produced $6,191,810 in cash applied to personal income tax delinquent accounts during the first 10 months of 1963 compared with $4,484,958 during the same period in 1962, This revenue increase of $1,706,852 was achieved at an additional salary cost of $137,000 for the 10-month period.

In audit, compliance, and collection areas, programs of information exchange are conducted with the United States Internal Revenue Service. These programs are valuable to both organizations and also reduce taxpayer inconvenience and irritation which could arise from duplicate audit activities.

Six senior account clerk positions were authorized for the headquarters office on a 1-year basis for 1963-64. Continuance of these positions is requested. These positions are being used in connection with the review of smaller returns and from past experience a high level of revenue production is anticipated. A representative period for review will be available in the near future.

There is an increase of 13.4 man-years of temporary help to provide for handling an expanded volume of filings of returns and information documents. This is offset by a transfer of 2 positions of temporary help to the Administration Division and an anticipated savings of 14.2 man-years in handling certain delinquent collection work for a net decrease of 2.8 man-years. The gross savings of $45,719 arise from the application of electronic data processing to record keeping and file maintenance functions formerly performed manually.

For the Los Angeles Regional Office 2 man-years of temporary help is requested. Expansion of the clerical staff has not kept pace with the increase in collection, enforcement, and audit activity, and the requested increase will help with the reduction of clerical backlogs.

GENERAL ANALYSIS

Objectives

The State Treasurer is charged with the responsibility for the custody of all money and securities belonging to or held in trust by the State; investment of surplus General Fund moneys, and other designated surplus funds together with funds of the state and public agencies deposited in court under condemnation proceedings; administration of the sale of state bonds, their redemption, and interest payments; and pays warrants drawn by the State Controller and state agencies.

Program and Performance

The Pooled Money Investment Program is administered by the State Treasurer under the broad policies set out by the Pooled Money Investment Board. Members of the board are the State Treasurer as chairman, the State Controller, and the Director of Finance.

Earnings on the various investments administered by the Pooled Money Investment Board for the fiscal year 1962-63 were $30,548,000.

Redemption of warrants issued by the State Controller and state agencies is estimated to increase from 4,711,945 in 1962-63 to 5,018,000 in 1963-64, and 5,344,000 in 1964-65.

The treasury vault staff is engaged in the trust activity of safeguarding those securities owned by the State, those deposited by banks to secure bank deposits, and those deposited as other pledges. Approximately $4,467,000,000 in securities were held for safekeeping during 1962-63. This amount will increase to an estimated $4,820,000,000 in 1963-64, and $5,120,000,000 in 1964-65.

The treasury bond and coupon servicing section accounted for the redemption of 5,360,000 bonds and coupons in 1962-63. This volume is expected to increase to 5,829,000 in 1963-64 and 6,723,000 in 1964-65. As a result of this workload increase an additional clerk is requested for 1964-65. The costs of this position will be partially reimbursed from bond funds.

[a] Expenditures from bond funds are not included in overall budget totals.

GENERAL ANALYSIS

The office of Health and Welfare Agency Administrator was established by Chapter 2037, Statutes of 1961. Under its provisions the administrator is responsible for the supervision of the operation of the Departments of Social Welfare, Public Health, and Mental Hygiene.

In 1963, Chapter 1747 established the Department of Rehabilitation within the agency, and assigned to it the functions previously performed by the Division of Vocational Rehabilitation, Department of Education. Chapter 1747 also assigned the Citizens Advisory Committee on Aging and the Office of Atomic Energy Development and Radiation Protection to the agency administrator for supervision. He is the chief adviser to th Governor in these areas and as such participates in the develop ment of administrative policy and insures that such policies ar put into effect.

The administrator's office is operated with one staff assistan and minimum clerical help. Other assistance, as required, i provided on a project basis from the departments concerned Housekeeping activities are performed by the Department o Social Welfare.

The 1964-65 Budget maintains the present level of service

CITIZENS' ADVISORY COMMITTEE ON AGING—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64

GENERAL ANALYSIS

Objectives

The citizens' committee has the responsibility to advise the Governor on action needed to solve the problems of aging; to encourage and provide consultation to the local communities of the State in developing programs to meet the needs of their senior citizens; to work toward a more effective use of the resources of the State in behalf of its senior citizens; and to act as an information center on all aspects of aging.

Program and Performance

The committee of 8 citizens is appointed by the Governor and is augmented by 4 Members of the Legislature, 2 from the Senate and 2 from the Assembly, appointed by their respective houses.

The committee is charged with the responsibility to study the problems of aging in California and to make recommendations to the Governor for needed action. In addition, the committee serves as an advisory group to assist in the evaluation of local proposals and criteria under the provisions of the Community Services for Older Persons Act. Through its staff, it provides technical consultation to the communities in California on the development of programs designed to meet the needs and interests of their older residents. As a result of this continuing activity, the committee receives expressions of community interest regarding the needs and problems of older people in California, which is helpful in the formulation of its recommendations.

The committee and its staff serve as an information center on activities in the field of aging at a state and local level in California. It maintains a library of books, periodicals, pamphlets, and other printed materials which are available to interested groups and organizations. A newsletter is published to summarize developments and programs in the field of aging and to give information regarding current state and local activities.

The committee also maintains extensive relationships with other agencies of local and state and federal governments with respect to more effective and efficient use of existing resources in behalf of older people.

Additional printing funds are requested to publish an updated Directory of Community Services and an Inventory of Specialized Housing for Senior Citizens.

OFFICE OF ATOMIC ENERGY DEVELOPMENT AND RADIATION PROTECTION—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64

GENERAL ANALYSIS

Objectives

This office is charged with broad responsibilities with respect to atomic energy development and radiation protection. In that field the coordinator is required to: advise the Governor and the Legislature; co-ordinate the activities of all state agencies and the cities and counties with each other, with other states, and with the Federal Government; act as liaison to other states and the Federal Government, including the United States Atomic Energy Commission; and disseminate information to the public and to state agencies.

Program and Performance

Two advisory groups are prescribed by statute: an Advisory Council of 11 members, representing 11 areas of public interest in atomic energy matters; and a Departmental Co-ordinating Committee of 18 members, who are the heads of those state agencies principally involved in atomic energy affairs.

The 1962 Legislature ratified an agreement between the Atomic Energy Commission and the State of California which transferred to the State a large portion of the Atomic Energy Commission's radioactive materials licensing and inspection program effective September 1, 1962.

Co-ordination of the activities of the State Department of Public Health, the Division of Industrial Safety, and such local agencies as elect to participate in the program, continues to occupy a major portion of this office's time.

Revisions of the Atomic Energy Commission and state regulations are currently being pursued. These revisions are necessary to clarify the regulations, to further refine and integrate the federal-state program, to incorporate licensing and inspection experience into the basic regulation, and to assure that the regulations reflect the latest scientific data on exposure guides. This is a continuing program.

Additionally, several broad policy questions with regard to federal-state jurisdiction remain unanswered. These are being actively pursued by both parties to the agreement and will continue to demand time and energies until resolved.

Although the licensing of nuclear reactors remains a federal prerogative, the interests of state and local agencies have been represented by this office in several Public Utilities Commission and United States Atomic Energy Commission public hearings. The State has certain requirements for environmental surveillance programs in the areas adjacent to power reactor sites. Several meetings between pertinent state agencies and power reactor operating company representatives and consultants have been held to assure that these requirements are being, or will be, met. This is a continuing program.

A careful review of the evidence indicates that nuclear reactor plants to produce power, and perhaps desalinate sea water, are a necessity for California. Public acceptance of nuclear power plant siting has been favorable. However, in some specific instances energetic opposition to these plants has distorted the role of federal and state agencies in the regulation of these activities and the overall safety picture of such operations. The demands for authoritative factual public information are therefore increasing in number and complexity. This office should possess the resources to adequately supply this type of information in answer to these demands. The increase in general expense funds reflects an initial attempt to sustain a modest public information program.

On October 1, 1963, this office was transferred from the Governor's Office to the Health and Welfare Agency in accordance with the provisions of Chapter 1747, Statutes of 1963.

During 1963-64 terminal pay funds were provided administratively for accumulated vacation resulting from the resignation of the former coordinator and the overlap involved in the hiring of his replacement in order to insure continuity in the program.

PART I—CONTINUING OPERATIONS AND WORKLOAD INCREASES

21 Objectives

22
23 The objectives of the Department of Mental Hy-
24 giene are to care for, treat, and rehabilitate mentally
25 ill, mentally retarded and emotionally maladjusted
26 patients so that they may return to society as produc-
27 tive citizens at their optimum potential; to promote
28 the development of comprehensive mental health serv-
29 ices in the communities of California; and to prevent
30 mental illness and retardation through an active pro-
31 gram to foster mental health and remove the causes
32 of illness and retardation.
33
34 Program and Performance
35
36 Since the present Department of Mental Hygiene
37 was established as a separate entity in 1945 it has de-
38 veloped a diversified program directed toward the
39 effective achievement of the department's objectives.
40 The major elements of this diversified program are
41 institutional diagnosis, treatment, rehabilitation and
42 care of mentally ill or retarded persons requiring
43 this degree of help and for whom no other resource
44 is available or suitable; research into the causes and
45 treatment of mental illness and retardation; training
46 of personnel, both therapeutic and administrative;
47 promotion of community organization and support,
48 assistance and demonstration of necessary community
49 services; and mental health education of the general
50 public. The concept of custodial isolation of patients
51 from the community has been abandoned. In its place,
52 there has been developed an active therapeutic set-
53 ting, designed to serve that phase of a patient's illness
54 which requires a highly protective situation. Even be-
55 yond the plan for intensive treatment hospitals, a
56 goal has now been set which aims toward the maxi-
57 mum possible provision of prevention, of help and of
58 treatment in the patient's home community, so that
59 daily routines and life patterns are interrupted only
60 to the extent and duration essential for his condition.
61 The pursuit of this objective with a gradual in-
62 crease in the amount of intensive treatment given
63 patients and a similar increase in the efforts to de-
64 velop community services and opportunities has re-
65 sulted in a decrease in the resident population of the
66 department's hospitals for the mentally ill. This im-
67 provement has occurred in spite of the fast-growing
68 population of the State and the number of annual ad-
69 missions. This same trend is being sought in the men-
70 tally retarded where the department's resident pop-
71 ulation continues to rise. Both the mentally ill and the
72 mentally retarded are returning to community living
73 in increasing numbers after the benefits of relatively
74 short hospital stays for treatment and training of the
75 most difficult phases of their condition. As mentally ill
76 hospital populations decrease, treatment staff ratios
77 slowly improve which permits the department to de-
78 velop more modern standards of staffing and even
79 better treatment.
80
81 Special programs in institutions are provided for
82 patients with special needs or conditions, including
83 children's units at Camarillo and Napa State Hos-
84 pitals, tuberculosis patient units at Patton and Napa
State Hospitals, alcoholic and narcotic addiction pro-
grams at all hospitals, and a special institution at
Atascadero for the treatment of the criminally insane
and the sexual psychopath.

To provide the resources for its large direct pro-
gram the department supports a variety of activities
in research, training and evaluation of the efficiency
of new methods, drugs or procedures. Since 1956,
there has been state support for research which is
used for a balanced program to which can be added
research supported by funds from other sources. A
major use of these research funds are the evaluation
activities which provide data for the department to
guide its program planning.

Two institutes are operated by the department
in conjunction with the University of California as
teaching and research centers for both the University
and the department and provide care and treatment
for patients with early curable type of mental dis-
orders. To carry out such a program, they care for and
treat a limited number of inpatients and operate a
large outpatient program as part of the teaching and
research programs.

The expansion of community-based resources for
diagnosis, treatment and rehabilitation has been one

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART I—CONTINUING OPERATIONS AND WORKLOAD INCREASES—Continued

Program and Performance—Continued

of the most important recent developments in the State's mental health program. These resources range from extramural services, designed for the early release of patients, as soon as they have received maximum benefit from hospital inpatient services, through day treatment at 3 centers, outpatient services at 8 state mental hygiene outpatient clinics, and 20 community mental health programs, operating under the Short-Doyle Act, which are aimed at providing treatment and precluding the necessity of state hospital commitment. The Short-Doyle program is of special significance in the department's long range plans for mental health services in California. Under the act, cities and counties may set up local programs with practical assistance from the State that includes reimbursement on a matching basis for local money expended. Ultimately, these local mental health services are expected to prevent large numbers of citizens from ever having to leave their home communities because of mental illness or handicap.

The 1962-63 Budget provided for the inauguration of a crises service program at the Chico Clinic. In this program patients are seen immediately and immediate consultation is given by persons dealing with psychiatric emergencies (doctors, welfare workers, probation officers, etc.). In the first year of this new program a 50 percent increase in budgeted professional staff produced an 80 percent increase in the number of patients served directly and a 50 percent increase in indirect services to agencies with psychiatric emergencies. The first four months of 1963-64 showed a further increase in services to patients while indirect services remained essentially at the 1962-63 level.

Amendments to the Short-Doyle Act in the 1963 Legislative Session have resulted in significantly greater attention to the development of local screening and rehabilitation services for the mentally ill and the mentally retarded and to the evaluation and treatment services for children.

A total of $4.75 million was appropriated in 1962-63 for joint state-local participation in construction of local multipurpose centers for the retarded. Two county proposals are under consideration currently and allocations should be made before the end of the 1963-64 fiscal year. The two proposed centers would serve about 750 mentally retarded patients a year.

In 1962-63 the department exceeded its goal of 200 net additional mentally retarded patients in Family Care at year end, and achieved half its goal for the mentally ill, placing a net increase of 100 more patients. For 1963-64 the department is well along toward realizing its goal for 500 additional placements in Family Care by June 30, 1964.

A community geriatric screening unit and a special hospital staffing unit for geriatric inpatients was authorized as a part of the 1963-64 augmentation program. Staffing has been completed for the geriatric screening unit in co-operation with San Francisco's County Hospital and Mental Health Service; community placement resources have been explored; and efforts to divert patients from state hospital care are beginning. The special staff to help reduce the state hospital population of hard-to-place geriatric patients—those over 65 years of age who have been hospitalized more than two years—is being recruited and has begun finding community placements for this group. Base line data on which to judge the net reduction of population are currently being developed.

The 1962 Legislature enacted provisions to pay for the care of a few retarded patients in private institutions licensed by the Department of Mental Hygiene. In the past 12 months the number in such placements has varied from 112 to 117, housed in from 24 to 28 licensed private institutions.

The 1963 Legislature authorized additional personnel to develop and license additional private facilities for all psychiatric patients—including the retarded. On June 30, 1962 there were 434 such licensed facilities, capable of caring for 10,497 patients. One year later there were 442 such facilities, with a total capacity of 10,957 patients.

During 1963-64 significant administrative changes in nonmedical activities within the hospital system included the abandonment of selective farming activities at Agnews, Atascadero, and Napa with a reduction of 27.7 positions. In addition a contractual arrangement was initiated between the Departments of Mental Hygiene and Corrections whereby a portion of the laundry for Camarillo State Hospital is performed at the California Men's Colony at San Luis Obispo. This arrangement will continue into 1964-65 pending the completion of studies as to the feasibility of phasing out the laundry at Camarillo and contracting with Men's Colony to perform the laundry services.

To continue existing operations at the level of admissions and resident population estimated for both the mentally ill and mentally retarded in 1964-65, a total of 237.5 new positions with a salary cost of $1,460,957 are proposed in this section of the budget. The increase in the convalescent leave caseload, staffing for new wards at 1 hospital, and the increased workload requirements in a variety of supportive activities also account for a portion of these positions. The positions are discussed in greater detail in the budgets of the individual facilities but they can be grouped as follows: 65 positions for increased admissions and/or resident population; 70 positions for the increased convalescent leave caseload on the basis of the established workload standards; 33 positions established administratively during 1963-64 and proposed for continuation in 1964-65 for staffing of the new Cottage G at Stockton State Hospital; 27 positions for patients' estates and accounts activity throughout the system; 5 positions for the Comprehensive Program Planning Unit (financed from federal grants); and 1.5 positions for the Community Psychiatric Training Center (financed from federal grants). The remaining 36 positions proposed include continuation of 15 positions established administratively for career research teams (financed by the special research appropriations); 2 positions for staffing

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART I—CONTINUING OPERATIONS AND WORKLOAD INCREASES—Continued

Program and Performance—Continued

the Study Commission on Mental Retardation that was established by the 1963 Legislature; and 19 positions for various community service, hospital and central administration activities to meet new workload requirements or to correct present deficiencies.

In addition to these proposed new positions, transfers of medical and related positions between hospitals in order to equalize professional treatment staffing patterns throughout the system on the basis of patient admissions and resident population are included in this section of the budget.

The recent dramatic change in the population of the hospitals for the mentally ill is predicted to continue through 1964-65. The resident population in these hospitals on June 30, 1959, was 36,771. By June 30, 1964, it is estimated that the resident population will be 32,600 with a further reduction to 31,300 by the end of the 1964-65 fiscal year. This drastic reduction has been made in the face of a rapidly growing state population and a continuing increase in the number of hospital admissions which are estimated to reach 27,700 during 1964-65.

This overall change attests to the soundness of the State's comprehensive approach to the problem of mental illness in recent years by enriching hospital treatment and supportive staff and programs, increasing reliance upon community service programs such as home leave, family care, outpatient and day treatment services, and co-ordinating efforts with state and local agencies in making use of other public and private treatment resources and facilities for the care and treatment of the mentally ill.

In this regard, no reduction in the nursing staffing at these hospitals is proposed to follow the estimated reduction in population during 1964-65. This will permit a further increased level of service, without additional positions, to continue the increasing emphasis on intensive treatment and short-term hospitalization for most of the patients admitted. It is planned that during 1964-65, nursing positions will be administratively transferred between hospitals to provide a more equitable distribution of personnel among the various types of treatment programs conducted throughout the system.

For the hospitals for the mentally retarded a continuing rise in resident population is planned for 1964-65. During 1964-65, it is estimated that 1,620 patients will be admitted and that the resident population will meet the physical, rated-bed capacity of 13,100 at these hospitals by June 30, 1965. The estimate includes the start of a short-term hospitalization program which will admit selected patients for an average length of stay of 2 months. This will admit patients from the pre-admission list for short-term periods of treatment to provide relief to the patients' families and to prepare the patients for further care in the community.

The 1963-64 budgets for the hospitals for the mentally retarded were based upon planned admissions of 2,400 and an average resident population of 13,250. These estimates were based upon the assumptions that the 676 new beds at Fairview would be ready for occupancy by October 1963 and that a total of 13,600 beds would be used throughout the hospitals. However, the completion of the wards at Fairview has been delayed due to a labor dispute. In addition, the Department of Mental Hygiene has instituted a policy to reduce overcrowding. Hospital population in 1963-64 will be limited to the rated capacity of 13,100. Due to these factors it is now estimated that 1,050 patients will be admitted during the current year. This results in an average resident population of 12,500 for 1963-64. In keeping with these re-estimates, comparable reductions in positions and operating expense have been made in the budget of each hospital involved.

All of the increases and reductions in positions, and transfers of positions mentioned above are specifically discussed and shown in the budgets for the individual institutions and other units.

The following table outlines the actual and estimated total movement of population for the hospitals for the mentally ill during the period 1955-56 through 1964-65:

HOSPITALS FOR GENERAL PSYCHIATRY POPULATION MOVEMENTS BY FISCAL YEAR

	Actual								Estimated	
	1955-56	1956-57	1957-58	1958-59	1959-60	1960-61	1961-62	1962-63	1963-64	1964-65

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—PROGRAM AUGMENTATIONS

The supplemental program of the Department of Mental Hygiene for 1964-65 continues the further development of services, including pre- and post-hospital services, offered through existing facilities, both inpatient and outpatient, community as well as state, in an attempt to lower the number of admissions to the state mental hospitals and to lower the rate of returns to state hospitals by previously hospitalized individuals. Significant progress is continuing in counteracting the continued spiral of admissions to state hospitals for the mentally ill. While admissions are increasing, an even greater number of patients are being discharged or released on leave. This is vividly portrayed by the significant reduction in the anticipated year-end resident population.

To continue this trend and to better meet the needs of the mentally retarded, major areas of added emphasis in the 1964-65 Budget occur in hospital services, training, research, community services and administration. To expand hospital services for the mentally ill and mentally retarded a more effective program of maintaining the health of hospital patients and their receptiveness to treatment is provided in a multitude of areas which include additional drugs, medical treatment consultation, rehabilitation and education services, chaplain services, dental services as well as expansion of supportive activities such as clerical, maintenance and safety programs.

Increased emphasis on training is provided through further expansion of student programs which have proved to be effective in the recruitment and training of personnel in the specialized fields of social work, clinical psychology and physical therapy. Expansion of existing training programs is also provided through increases in such items as specialized training, travel training funds and training consultant funds.

Additional funds are provided for state supported research activities so as to maintain the "purchasing power" of appropriations. This will enable the department to carry on the research program at a more constant level.

The family care program has demonstrated its value in reducing the needs for hospital beds as well as providing for the maximum physical and mental development of the patients. An increase in the rate paid for such care is proposed in order to assure the continued effectiveness and further expansion of the program. In addition, greater effectiveness of both new and established community mental health and retarded services is sought through adding greater allowances for program consultants.

In addition to the above, some increases in administration are provided for improving the efficiency of the existing operation as well as the direction of new or expanded programs. These include positions for staff support to the Deputy Director, Medical Services, in the areas of mental retardation, social work consultation and non-medical staff assistance. An additional food administrator and a facilities engineer are requested to assure greater effectiveness departmentwide in their respective fields.

The cost of the Department of Mental Hygiene's supplemental request for 1964-65 totals $1,993,557. It is summarized by program in the table immediately below.

I. Hospital services	$798,00
II. Training	412,20
III. Research	214,00
IV. Community-based services	498,69
V. Administration	70,66
Total	$1,993,557

Each one of the services is discussed separately and in detail in the following presentation.

I. HOSPITAL SERVICES

A. Drug therapy	$188,489
B. Medical treatment consultation	25,000
C. Hospital rehabilitation services	157,175
D. Education services	40,729
E. Medical records—clerical	85,420
F. Safety program	34,266
G. Chaplain services	16,171
H. Dental services	91,180
I. Hospital maintenance services	159,571
Total	$798,001

A. Increase in Special (Tranquilizing) Drugs *$188,489*

At present it is possible to provide treatment to 35 percent of the resident population with special tranquilizing drugs. The proposed increase is to extend this treatment to an additional 10 percent of the mentally ill resident population. New drugs and application are continuing to develop. With these developments drugs are proving more effective and are serving a wider variety of uses than ever before. Types of patients can now be treated with these drugs who would not have been so treated previously.

B. Medical Treatment Consultants *$25,000*

Additional funds are proposed to expand the consultative services in the medical and surgical specialties over and above that provided by full and part-time staff of the hospitals. Such specialties include opthomology, dermatology, urology, gynecology, neuro-surgery, orthopedics, surgery, pathology, pediatrics, oral surgery, anesthesiology, and cancer consultation. In addition to providing services for patients in the hospital, these funds provide for emergency medical care of patients placed in family care homes that are located at such a distance away from the hospital that it is impossible or impracticable for patients to come to the hospitals for such treatment.

C. Rehabilitation Services *$157,175*

An additional 21 rehabilitation therapists and one assistant supervisor of rehabilitation services are requested to provide vocational, physical, social and recreational activities as well as training of a rehabilitative and therapeutic nature. Without this type of activity the mentally ill and mentally retarded pa-

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

I. HOSPITAL SERVICES—Continued

tients find it difficult or impossible to function at a satisfactory level in the community. Staffing is presently at 40 percent of a standard ratio of one therapist to 100 patients. This proposal increases the number of therapists to provide approximately 50 percent of that standard.

The number and distribution of the requested positions is shown in the table below.

	Rehabilitation Therapists	*Assistant Supervisor Rehabilitation Services*
Agnews	4	–
Camarillo	4	–
Mendocino	2	–
Metropolitan	3	–
Napa	3	1
Patton	1	–
Stockton	3	–
Pacific	1	–
	21	1

The distribution of costs by category is shown below.

1 Assistant supervisor rehabilitation services	$6,703
21 Rehabilitation therapists	121,772
Operating expense	21,000
Equipment	7,700
22 Total	$157,175

D. Education Services *$40,729*

Agnews State Hospital houses an average of 30 resident juveniles of school age who receive psychiatric treatment and for whom there is no formal education program. The deprivation of education to such juveniles contributes to their emotional problems, making it essential to provide as near normal activities for them as possible. For these reasons $10,000 is requested to allow Agnews State Hospital either to hire or contract with the local school district for the equivalent of 1.5 elementary and high school teaching positions.

It is also proposed to provide a minimum service of 2 teachers each at Patton and DeWitt State Hospitals, in order to furnish basic education for mentally retarded patients transferred to these 2 institutions in the previous year. At the present time there are 45 patients between the ages of 16 and 20 at DeWitt and 38 patients in this same age group at Patton. Two teachers at each hospital will provide a portion of the needed professional attention and specialized teaching techniques.

5.5 Elementary teachers	$36,879
Operating expense	1,100
Equipment	2,750
5.5 Total	$40,729

E. Clerical Services *$85,420*

Sixteen intermediate typist-clerks are requested to provide medical record clerical assistance on the recognized ratio of 1 clerical position to 3 professional positions. The medical records clerical pool processes the medical records connected with the admission, release and movement of hospital patients and provides the necessary clerical support to hospital professional medical and most ancillary staff. Clerical support over and above that now available will increase the efficiency of hospital procedures which depend heavily on the adequate and prompt processing of patient records and will enable the hospitals to reach a greater degree of their potential in the treatment programs.

Hospitals where clerical assistance is inadequate and for which the new intermediate typist-clerk positions are proposed are:

4 Agnews	$17,754
2 Camarillo	8,877
2 Mendocino	8,877
1 Napa	4,439
5 Patton	22,195
1 Stockton	4,439
1 Sonoma	4,439
Operating Expense	3,200
Equipment	11,200
16 Total	$85,420

F. Safety *$34,266*

Three safety officers and secretarial assistants are proposed to further implement the Department's environmental health and safety program. Significant progress, as measured by the decline of employee disabling injuries, as well as a reduction in workmen's compensation benefits, has been achieved through the development and operation of safety programs at the hospital level. Based on the results achieved through the efforts of the 2 positions now authorized, it is requested that an additional safety officer be provided at each of the following hospitals: Pacific, Sonoma, and Camarillo. It is expected that the additional positions will significantly reduce costs of compensation cases in the Department of Mental Hygiene.

3 Safety Officers	$14,853
3 Intermediate typist-clerks	13,263
Operating expense	3,000
Equipment	3,150
6 Total	$34,266

G. Chaplain Services *$16,171*

Two additional Protestant chaplains are proposed for Camarillo and Napa due to the extremely large patient populations. Addition of these positions will enable the chaplaincy program to provide additional

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

I. HOSPITAL SERVICES—Continued

church services, religious rites, family counseling and consultation on a more continuous basis. All of these activities are effective help in motivating patients in beneficial therapy programs.

2	Protestant chaplains	$15,471
	Operating expense	700
2	Total	$16,171

H. Dental Services *$91,180*

In 1962 the department made a survey of its dental needs. Based on this report 4 additional dentists and 4 dental assistants are proposed in the 1964-65 Budget.

The study was based upon actual experience with a significant sample of patients. It identifies 2 major areas of dental needs: work necessary upon admission of the patient and the yearly maintenance necessary for resident patients.

This request is a first increment towards improving the present dental staffing and recognizes the areas of greatest need, the larger hospitals with the highest number of admissions, i.e., Agnews, Camarillo, Metropolitan and Napa State Hospitals. One dental assistant is requested for each dentist to provide for preparation assistance, cleanup, and other duties which allows dentists to work at maximum efficiency.

I. Hospital Maintenance *$159,571*

Twenty positions, based on a hospital maintenance staffing survey completed in 1961, are requested to provide the first increment of additional staffing needed for the adequate maintenance of hospital plant facilities. These positions fall into the classes of carpenter, electrician, steamfitter, plumber, mason and building maintenance man.

Practical treatment economies can be accomplished with more effective and efficient operations of state facilities through a better program of maintaining plant equipment and physical treatment facilities at a higher level. Another consideration is the tremendous investment which the State has in physical plant at the hospitals. To protect this investment an adequate maintenance program is necessary. In the past few years the maintenance staffs have been unable to keep up with their required tasks.

20	Maintenance positions	$129,571
	Operating expense	30,000
20	Total	$159,571

B. Internships	80,338
C. Student professional assistant program	193,993
D. Training supervisor	18,870
E. Specialized training	10,000
F. Training consultant funds	24,000
G. Travel training funds	4,000
	$412,201

A. Scholarships *$81,000*

The use of scholarships as a recruitment device was started in 1962-63 and was augmented in 1963-64. When a student accepts a scholarship he obligates himself to spend 1 year of service in a nonmetropolitan facility of the department in return for each academic year of education subsidized under the scholarship. Under these arrangements, 8 social workers and 2 therapists will begin work in the department in 1963-64 and an additional 20 students, who will have completed their work by that time, will enter the State service in 1964-65. On the basis of the successful experience of this program to date, additional scholarship funds are proposed to provide for approximately 20 individuals in professional education programs in the field of mental health.

B. Internships *$80,338*

It is also proposed to fund approximately 23 internships in the fields of social work, clinical psychology and rehabilitation therapy as a continuation of internship program initiated in 1963-64. Due to the difficulties of recruiting, high vacancies in these classes have

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

II. TRAINING—Continued

persisted for a number of years which reduces the effectiveness of planned and authorized treatment programs.

Several of the hospitals are approved by the appropriate professional organizations for field placements or internships in social work, clinical psychology, the rehabilitation therapies, and other treatment professions. By adopting the recruitment technique of scholarship and intern programs, it is anticipated that recruitment will be improved, thereby contributing to a more effective treatment program.

C. Student Professional Assistant Program _ *$193,993*

For several years certain vacant professional positions have been converted to short-term training programs which have provided needed assistance and also encouraged students to enter the mental health field. Formal recognition of this effective arrangement is requested by authorizing the equivalent of 47 full-time student professional positions to be used as another recruiting device. The following programs are proposed to provide increased opportunities for paid field experience in hospital facilities and to increase recruitment advantages in the fields of rehabilitation services, psychology, psychiatry, social services and nursing services:

(1) (17 Student professional assistants—$61,500) This program is designed to attract, by means of short-term placements, students connected with universities or professional organizations which conduct some type of summer work-study program. These include the Western Interstate Compact for Higher Education program, the YMCA program at Porterville and the Antioch college program at Atascadero.

(2) (10 Medical student assistants — $43,400) A pool, equivalent to 10 positions, is proposed as a means of attracting physicians to the speciality of psychiatry through the summer employment of medical students. Such a program has proved effective in increasing the medical manpower pool in California under the previous informal arrangements.

(3) (20 Student professional assistants—$72,000) A pool of 20 equivalent positions is requested to provide informal arrangements with universities, colleges, and individual students for short-term or vacation employment of students. In addition to exposing potential mental health professionals to treatment situations, this type of program has resulted in many psychologists, social workers, rehabilitation therapists, teachers, chaplains, nurses and other technical and professional personnel entering state employment.

D. Training Supervisors _____ *$18,870*

To supervise the student programs proposed above, as well as existing professional training programs in social work, clinical psychology and rehabilitation, 3 professional positions are proposed. These positions will provide supervision for students and will act as liaison with affiliating universities in order to obtain maximum benefit from the training funds provided as well as adherence to the training program direction and needs.

E. Specialized Training _____ *$10,000*

No increases have been received by the department for specialized training purposes since 1960-61. Since that time the professional staff of the department has increased substantially; new and more demanding functions have been assigned to existing staff; and new services have been added to the department's program. Additional funds are proposed in order to more adequately provide for the training needs of the staff.

F. Training Consultant Funds _____ *$24,000*

Additional training consultant funds are proposed for those hospitals with approved residency training programs in psychiatry. These funds will provide for visits by training consultants to residents-in-training, thereby enabling the department to provide a more adequate level of consultation in these programs.

G. Travel Training Funds _____ *$4,000*

The sum of $4,000 is proposed to cover travel costs incident to training courses relating to personnel from the state clinics, day treatment centers, Bureau of Social Work and the Community Organization Section. This training program, which is now being conducted for other departmental personnel, is important in disseminating advance techniques, skills, and ideas among the hospitals and community orientated services by means of staff visits, training conferences, and seminars conducted by highly qualified persons within the department. This fund provides traveling expenses for those not now participating in the programs.

III. RESEARCH _____ $214,000

Since 1961-62 yearly allocations of $1,107,000 have been provided for the research program of the Department of Mental Hygiene. The departmental research program is carried on by both career and project research personnel who pursue investigations relating to both basic and applied research. Subsequent to 1961-62 personnel service costs have increased without a corresponding increase in the research allowances. This has made it impossible to maintain the same level of service. $214,000 is requested to fund merit salary adjustments, special salary increases and increased fringe benefits which have been granted to all state employees but for which the research allocation has not been augmented.

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

IV. COMMUNITY BASED SERVICES

A. Increase in family care home rates	$410,610
B. Increase in incidental expense—family care	48,300
C. Drug therapy—day treatment center	2,000
D. Program consultation	37,781
Total	$498,691

A. Increase in Family Care Home Rate $410,610

In order to realize the department's objective to return increasing numbers of mentally ill and mentally retarded patients to the community, rates paid for family care must be competitive. Family care has proven to be one of the department's most effective devices for achieving the release of hospital patients to their communities. To maintain a competitive position it is requested that board rates be increased to the statutory maximum, $130 per month. Present budgetary allowances are $115 per month. In addition to improving the care being given patients today, the higher board rate should extend the family care program into areas where it has been difficult to do so. It will also retain those family care homes of demonstrated value.

B. Increase in Incidental Expense for Family Care Cases $48,300

An estimated 60 percent of the patients placed in family care are indigent to the point that the State must furnish incidental expense money for such items as cosmetics, cigarettes, dry cleaning, shaving supplies, shows, hobby materials, transportation, school supplies, etc. The present allowance for such purposes is $7.50 per month. It is proposed to increase the incidental expense allowance to $10 per month. Through the additional aid in comfort and grooming, adjustment of patients to their family care environment will be improved. It will also encourage them to take a more active and responsible role in community life.

C. Drug Therapy $2,000

Due both to the anticipated increase in the number of patients at the San Diego Day Treatment Center and the greater proportion that require drug therapy, an increase of $2,000 is being requested for this purpose.

D. Program Consultation—Local Services $37,781

Three program consultants, together with clerical assistance, are proposed to assist in the State's administration of the Short-Doyle Act. These positions, working out of regional offices, will consult with local program administrators about mental health programs and services and insure compliance with the program as described in the approved applications. They will also provide information and co-ordination services to the local administration in order to assure greater effectiveness of both new and already established resources.

3	Program consultant	$24,348
1.5	Intermediate typist-clerk	6,683
	Operating expense	3,600
	Equipment	3,150
4.5	Total	$37,781

V. ADMINISTRATION

A. Assistant to deputy director	$20,073
B. Mental retardation and children's services	9,125
C. Food management	13,422
D. Facilities management	12,303
E. Social work consultation	15,741
Total	$70,664

A. Assistant to Deputy Director $20,073

An assistant to the Deputy Director, Medical Services, and clerical assistance are proposed to shift a portion of the workload of necessary nonclinical administrative duties from that person. This will allow the Deputy Director to concentrate on the more professional medical and psychiatric orientated duties that are now suffering because of the present workload pressures. It is anticipated that the effectiveness of the office of Deputy Director, Hospital Medical Services, would be greatly increased by providing full-time staff assistance.

1	Assistant to deputy director	$13,883
1	Senior stenographer	5,090
	Operating expense	1,100
2	Total	$20,073

B. Mental Retardation and Children's Services $9,125

An assistant to the coordinator of Mental Retardation and Children's Services is proposed to meet increasing workload and to provide coordination of programs for mentally retarded and for children and adolescents. These programs are now carried out by community services, hospital services, research, training, planning and development, as well as other public and private agencies. Recent federal emphasis in such areas as public health, welfare, rehabilitation, employment, delinquency and education has demonstrated a greater need for interpretation of programs and program direction as well as professional consultation and assistance. Such assistance will enable the Department to take advantage of developments on a co-ordinated and more effective basis.

1	Senior psychiatric social worker	$7,375
	Operating expense	1,400
	Equipment	350
1	Total	$9,125

SUMMARY OF THE DEPARTMENT OF MENTAL HYGIENE—Continued

PART II—PROGRAM AUGMENTATIONS—Continued

V. ADMINISTRATION—Continued

C. Food Administration *$13,422*

During the current year 2 Assistant Departmental Food Administrators were administratively approved in the department. One was from an existing position while the other was a position established administratively. It is requested that the assistant departmental food administrator temporarily established be approved on a permanent basis. This organization will provide 1 assistant administrator in the North and 1 in the South in an effort to improve the department-wide administration of the food program. In order to assure a greater effectiveness of the food management program, this position is proposed to analyze food management programs at each hospital and to recommend and oversee the implementation of improvements for storage, production, distribution, sanitation, staffing and administrative procedures in a hospital food service area.

1	Assistant departmental food administrator	$8,985
0.5	Intermediate typist-clerk	2,187
	Operating expense	1,200
	Equipment	1,050
1.5	Total	$13,422

D. Facilities Management *$12,303*

Many of the hospital physical plants are becoming old and there is a growing need for evaluating minor construction, special repair, and preventive maintenance needs, and developing programs to meet these needs. An additional facilities engineer is requested to assist the hospitals in maintaining existing hospital plant facilities in an effort to prevent further deterioration.

1	Senior facilities engineer	$10,853
	Operating expense	1,100
	Equipment	350
1	Total	$12,303

E. Social Work Consultation *$15,741*

A hospital social service consultant and related clerical assistance are requested to be attached to the Sacramento office. They will provide staff services to the Deputy Director of Hospital Medical Services and the Chief of Social Services. This position will also offer consultation to individual hospital service programs and will contribute advice as to the hospital treatment, release and maintenance of the increasing numbers of patients in the community.

1	Supervising psychiatric social worker II	$8,985
1	Intermediate typist-clerk	4,406
	Operating expense	1,300
	Equipment	1,050
2	Total	$15,741

DEPARTMENTAL ADMINISTRATION FUNCTIONS

GENERAL ANALYSIS

The Department of Mental Hygiene is organized into 4 primary areas: (1) patient oriented services provided by the State in hospitals, institutes, clinics, and day treatment centers; (2) community-based services to patients and local governments through the Short-Doyle programs, National Mental Health Act funds, community organization specialist program, the mental retardation referral and evaluation units, and inspecting and licensing private institutions; (3) special services consisting of research, training, program review and planning; (4) administrative services consisting of fiscal, general services, guardianship, facilities planning, management analysis, nutrition services, data processing and Bureau of Patients' Accounts

Presented below are significant workload areas which are not reflected in the preceding tables. These relate to the Bureau of Patients' Accounts and Bureau of Social Work:

The Bureau of Patients' Accounts is responsible for planning, organizing, and directing the department program to secure, protect, and preserve patients' benefits and estates; and to establish charges and recover available revenue within the ability of responsible sources to pay for care and treatment costs. The effectiveness of the bureau's program is indicated in the following table of annual collections for patients' care and treatment:

1961-62 Actual	1962-63 Actual	1963-64 Estimate	1964-65 Estimate
$13,845,277	$15,010,136	$15,500,000	$16,200,000

The Bureau of Social Work conducts preleave studies, develops necessary community resources such as family care homes and work placements to enable mentally ill and mentally retarded patients to leave the hospital, arranges and effects placement of hospital patients into the community, and assists in the re-establishment and maintenance of patients as responsible members of the community. Important elements of such service in the overall leave program of the department include assisting patients with living arrangements, employment, social and recreational opportunities, and developing healthy interpersonal and family relationships. Frequent patient and family contacts are made in order to achieve the goal of a firm and satisfactory community adjustment.

SOCIAL WORKER CASELOAD AND UNIT COST

	1962-63	1963-64	1964-65
Year-end number of active assigned leave of absence cases	13,704	15,173	16,453
Total number of social workers	215.4	253	303 [b]
Ratio of active assigned cases to all social workers (including supervisors)	63.62	59.97	54.30
Ratio of active assigned cases to all social workers (excluding supervisors)	78.54	70.90	64
Cost per active case assigned	$202.95	$217.07	$231.

The following administrative adjustments were made in 196 64: A half-time technical position and 1 clerk were temporar established to assist in handling the increased training load the training center in community psychiatry. Both of these po tions are fully reimbursed from federal training funds. Th technical positions (project coordinator, statistical consulta assistant planner), and 2 clerks to provide nucleus staff for f erally financed comprehensive mental health program planni projects were temporarily established; and 4 positions c sisting of a senior and assistant social research analyst and clerks were temporarily established to provide necessary te nical assistance in the administration of the state resear program. These latter positions were funded from the spec research appropriation.

In addition to the above administratively established positio which are requested for further continuance, a total of 89.5 n positions are requested in 1964-65. All are based on worklo standards and include the following: 4 professional positio and 4 related clerks are proposed in the Bureau of Patien Accounts in conjunction with 1963 legislation extending liabili for payment of hospital costs to the trust accounts of the me tally retarded; 2 positions (1 technical and 1 clerical) in t Accounting and Fiscal Section are requested on the basis increased workload; 1 duplicating machine operator is request in Mail and Duplicating to handle the increased activity in th area; 1 clerk in Patient Transfer Section is proposed to pr vide additional assistance in handling the increased workload this section. To process the increased estate and litigation wo 1 additional attorney and clerk are proposed in the Guardia ship Section. New positions proposed for Community Servic include 3 additional clerks in the Mental Retardation Evalu tion and Referral Units to correct a deficiency in secretari assistance, 1 budget analyst to provide technical assistance the fiscal review of Short-Doyle contracts which have increas in complexity due to the 1963 legislative amendments, 1.5 cler to provide full-time rather than half-time clerical assistance the Regional Chiefs in Community Services, and 50 psychiatr social workers and 20 related clerks to handle the increas caseload estimated for 1964-65. These social worker positio are requested on currently authorized ratios and are propos on a staggered basis to correspond to the anticipated increa in indefinite leave cases.

[a] Grants from the Federal Government and expenditures therefrom are not included in budget totals.
[b] Includes 50 proposed new positions in 1964-65.

STUDY COMMISSION ON MENTAL RETARDATION

Objectives

The commission, established by Chapter 935, Statutes of 1963, is charged with studying the entire field of mental retardation in California and making recommendations for improvements in all aspects thereof. The commission will cease to exist upon adjournment of the 1965 General Session of the Legislature.

Program and Performance

The commission is composed of 15 members appointed by the Governor and consists of 2 local mental health directors, 2 county supervisors, directors of the following departments: Education, Mental Hygiene, Employment, Public Health, and Social Welfare, and 6 persons representing the general public. In addition there are 4 members of the Legislature: 2 from the Senate and 2 from the Assembly.

In accordance with the enabling legislation, the commission is to study and make recommendations on the following:

(1) Planning and implementation of policies, procedures, programs, services and activities pertaining to identification, care, treatment, education and general rehabilitation of mentally retarded persons and research in the field of mental retardation.
(2) Full utilization of services and facilities available to the State from the Federal Government for the benefit of mentally retarded persons.
(3) Statutory revisions necessary to carry out the recommendations of the commission.

As authorized by the enabling legislation 2 positions were established in 1963-64 and are proposed to be extended in 1964-65. Chapter 935, Statutes of 1963 provided for $25,000 for the support of the commission. A like amount is requested in 1964-65.

DEPARTMENTAL ADMINISTRATION—Continued

EXPENDITURES	ACTUAL 1962-63	ESTIMATED 1963-64	PROPOSED 1964-65	CHANGE FROM 1963-64
FAMILY CARE				
Provision is made for an average of 1,968 fully state-financed and 244 partially state-financed cases in 1963-64, and an average of 2,096 fully state-financed and 250 partially state-financed cases to be placed on leave of absence to family home care in 1964-65. The program includes provision for payment at the current rate of $115 per month.				
OPERATING EXPENSES				
The caseload totals account for and reflect adjustments occasioned by the anticipated shift in financing by June 30, 1964, of a total of approximately 930 current departmental cases and by June 30, 1965, 1,080 cases from Department of Mental Hygiene support to public assistance programs administered by the Department of Social Welfare.				
Allowances for subsistance and care of patients on leave of absence to family care homes	$3,054,504	$2,917,600	$3,102480	$184,880 (6.3%)
CARE AND TREATMENT OF MENTALLY RETARDED				
This appropriation provides for payment to private medical facilities for the care of mentally retarded persons who are on waiting lists for placement in state hospitals. The legislative authorization for this program is provided by Chapter 1764, Statutes of 1961.				
OPERATING EXPENSES				
Payments to private medical facilities	$242,391	$250,000	$250,000	
RESEARCH PROGRAM				
This appropriation for research is allocated to the central office for administration of the research program and between permanent and project support phases in the hospitals to insure a comprehensive program that includes both applied and basic research. A research unit at each hospital is the ultimate goal with 11 units having been formed thus far. All hospital research units as well as the central office departmental unit carry out their own research projects in the hospital and/or the central office and assist other staff members of the various disciplines with their investigations. The balance of funds are used to support research investigations undertaken by departmental, hospital and clinical staff personnel.				
All funds appropriated for the program are available for expenditure for a 3-year period. This type of appropriation is similar in nature to Capital Outlay appropriations in that research projects authorized in one fiscal year may require 2 or 3 years to complete. This requires that all necessary funds to complete a project be reserved in order to insure the completion of the project with the funds appropriated by the Legislature. All funds are allocated by the Department of Mental Hygiene with the approval of the Department of Finance.

SPECIAL PROJECT ACTIVITIES

Objectives

The Department of Mental Hygiene conducts many special research projects of value to the development of mental health in California for which funds are obtained from the federally supported National Institute of Mental Health. Research grants have also been received from the Office of Naval Research, the National Science Foundation, and other federal agencies interested in mental health research.

Program and Performance

The National Institute of Mental Health, and other federal granting agencies, interested in the furtherance of mental health, make funds available to the department for research projects and activities not financed by the State.

Projects financed by nonstate funds include overhead charges to reimburse the State for additional costs incurred.

Activities are listed indicating the project titles, location and amount of funding. Since project fiscal years may not coincide with the state fiscal year, projects are assigned to the state fiscal year which most nearly coincides with the project fiscal year. Federally supported projects are funded on a yearly basis with additional support recommended for subsequent years.

GENERAL ANALYSIS

Objectives

The day treatment centers provide a program of day psychiatric treatment to patients who return to their homes each night and who otherwise would require 24-hour hospitalization.

Program and Performance

The day treatment program was initiated with the establishment of a center in San Diego in 1960. Two additional centers were established in Los Angeles and San Francisco in 1962. These centers are designed to provide rapid and intensive treatment similar to that given by 24-hour institutions but with the added therapeutic benefit of not removing patients from the community environment.

An administrative adjustment in the 1963-64 fiscal year was the abolishment of 1 janitor position at the San Francisco Day Treatment Center. This position is not required because janitorial services are provided for within the space lease agreement for this center.

For the 1964-65 fiscal year it is proposed to increase the janitorial services at the Los Angeles center from 1 to 1.5 positions on the basis of the amount and type of space requiring service. Also, $5,000 is requested to make necessary minor alterations in the existing space at this center.

GENERAL ANALYSIS

Objectives

The outpatient mental hygiene clinics provide for the prevention, early diagnosis and treatment of mental illness, retardation or disorder, and are established to assist persons not requiring hospitalization.

Program and Performance

The programs provided by the 6 state-supported and the 1 federally supported clinics operate in both metropolitan and rural areas. In addition to the general services offered at each clinic, the East Bay Clinic at Berkeley, supported from federal funds, conducts a training program for social workers, psychologists, and psychiatrists.

The total performance of the clinics is indicated by the following schedule which shows the number of hours spent by professional employees in interviews with patients and in preventive services to communities. Of the professional time allocated to all services 87.7 percent was directed toward treatment of clinic outpatients and 12.3 percent toward preventive work in the community in the 1962-63 fiscal year. It is estimated that the percentages will be 88.7 percent and 11.3 percent respectively for both the 1963-64 and 1964-65 fiscal years.

The chief factors responsible for the variation in cost per service hour from clinic to clinic are: (1) the duration of normally occurring vacancies (e.g., in areas remote from metropolitan centers, recruiting is more difficut); (2) the proportion between children and adults in the caseload of patients (e.g., a child's case takes 2 to 3 times more staff time than does an adult case); (3) the ratio between group psychotherapy and individual psychotherapy offered in a given clinic (e.g., 10 hours of professional staff time may produce 100 patient-hours in group therapy but only 10 patient-hours in individual treatment interviews); and (4) other extraneous factors.

Following is a summary of performance for each clinic in terms of utilization of professional staff, service-hour distribution, and costs per service hour:

[a] Federal grants and expenditures therefrom are not included in the overall budget totals.

During 1963-64, the 0.5 janitor position at the San Diego clinic was abolished as janitorial services are now provided under the space lease agreement for this facility.

For 1964-65, 1 intermediate typist-clerk position is proposed for the Chico clinic on the basis of increased clerical workload related to the increase in direct patient services being provided by the clinic.
